Attachments: Malibu Watershed discharger locations.jpg

I was reading through the TMDL and under the "Permitted Facilities" section (Page 5-1) there's a statement that the only permitted wastewater discharge to the creek or tributaries is Tapia. Maybe the term "wastewater" is throwing me but if it implies "POTW effluent", then it should probably be described that way since there are many other permitted discharges in the watershed (non-POTW). See attached JPEG.
