Subject: FW: stream cross section data for Malibu Creek
Date: Friday, March 01, 2013 3:34:50 PM

Hi Cindy,

Following our conversation, we are looking for stream cross section hydrologic data for Malibu Creek and Triunfo Canyon (e.g., elevation, bottom width, slope …) to input in QUAL2K. C.P. was able to get data from the Army Corps of Engineers from the lagoon to the junction with Cold creek, but not above that. I contacted Joe Bellomo from Willdan about it, but I have not heard back from him. Hopefully you will have more luck ☺.

Thanks, have a great week end!

Celine
