Subject:	Priority Notification 14-FRE-18: 6 fieldworkers reported symptoms after adjacent aerial application in almond field
Date:	Wednesday, March 14, 2018 5:16:30 PM
Attachments:	14-FRE-18 PENR.pdf

An aerial application of Propicon 3.6 EC and PHT Ad-Max 90 was made to an almond orchard. Sixteen fieldworkers were performing irrigation work in an adjacent almond field while the application was being made. Six fieldworkers reported symptoms. The county is continuing to investigate this case.
