HPNS
Hunters Point Naval Shipyard
Department of the Navy
Base Realignment and Closure (BRAC)

Living and Working
at Hunters Point

More than 400 townhomes and condominiums have been built on Parcel A

Thousands of visitors attend HPS Artists Open Studios each spring and fall

It is safe to live at The San Francisco Shipyard

- Parcel A was used by the Navy as offices and housing areas
- No cleanup was required; Parcel A was transferred in 2004
- USEPA recently confirmed the site is safe for residential use *(fact sheet available in Documents section below)*

It is safe to work at HPNS

- Several buildings have been approved as safe workspaces for Navy tenants
- More than 250 artists, 40 San Francisco Police Department employees, and 100 independent food service entrepreneurs work on HPNS

Public safety is the highest priority to the Navy. Investigations show that people who live, work, and visit HPNS and adjacent properties are safe.

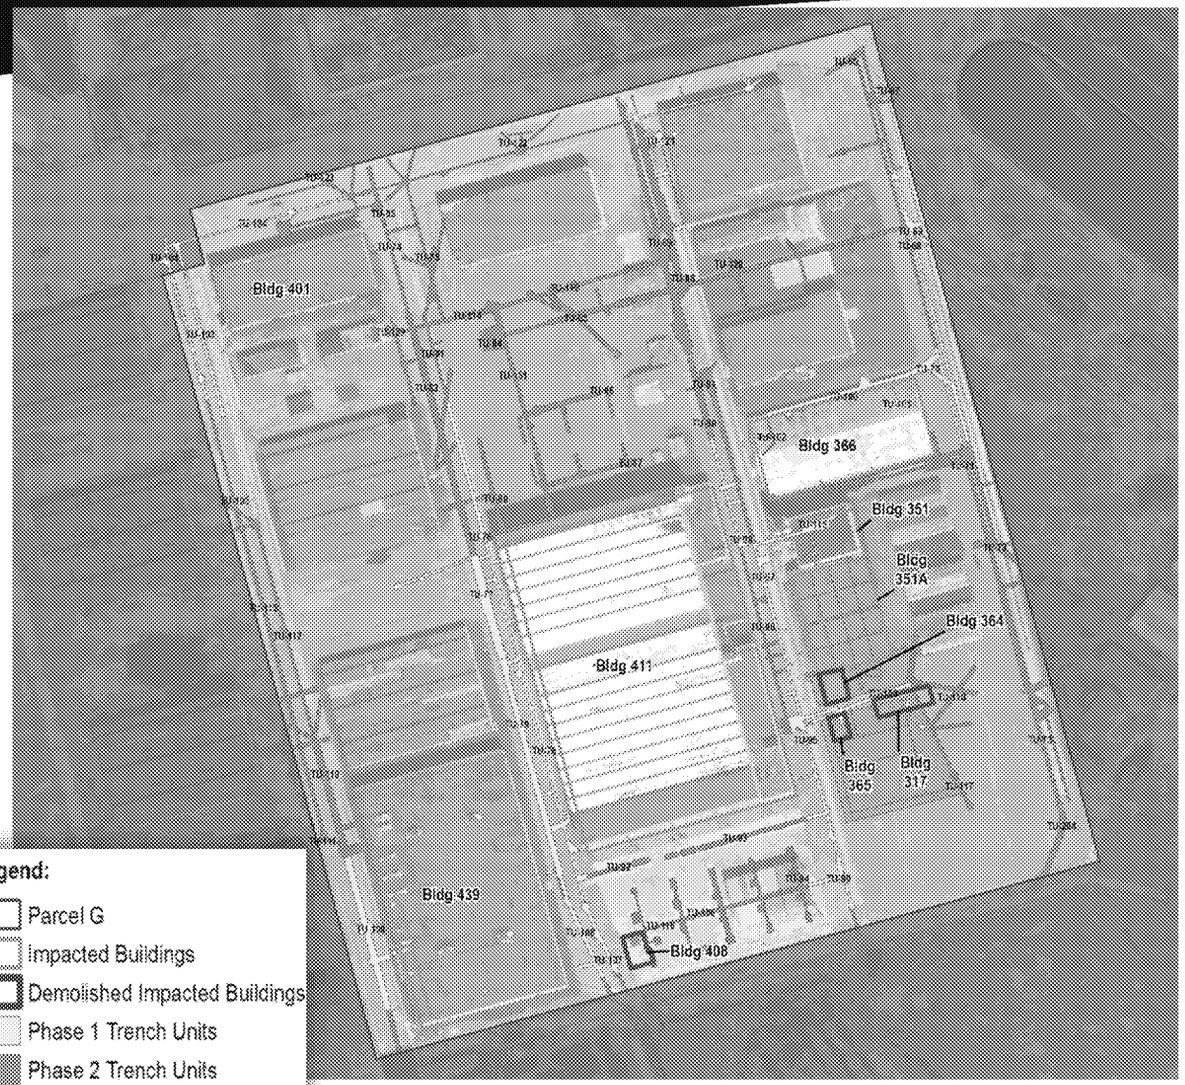
Fieldwork Schedule
Radiological Retesting at Parcel G



Legend:
- Parcel G
- Impacted Buildings
- Demolished Impacted Buildings
- Phase 1 Trench Units
- Phase 2 Trench Units
- Survey Units

Initial trench samples to lab for analysis →

Initial lab results returned to Navy →

Navy evaluation of initial lab results →

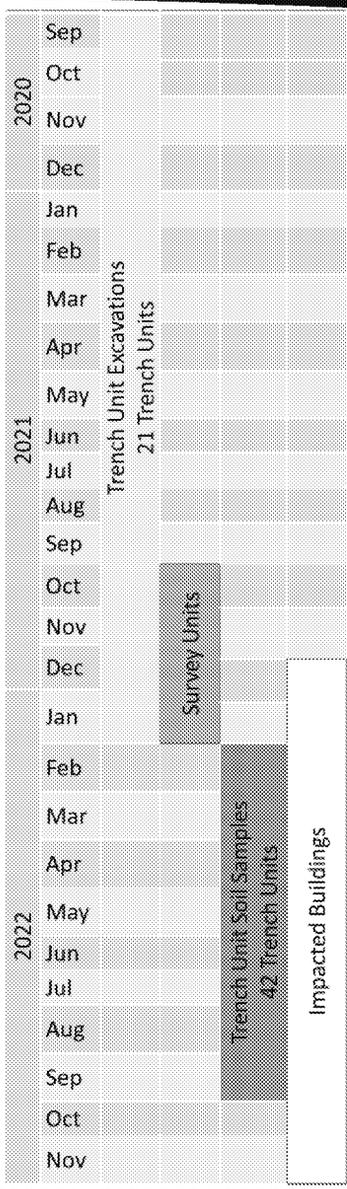
TRENCH UNIT EXCAVATIONS
100% of soil excavated and scanned, systematic soil samples collected

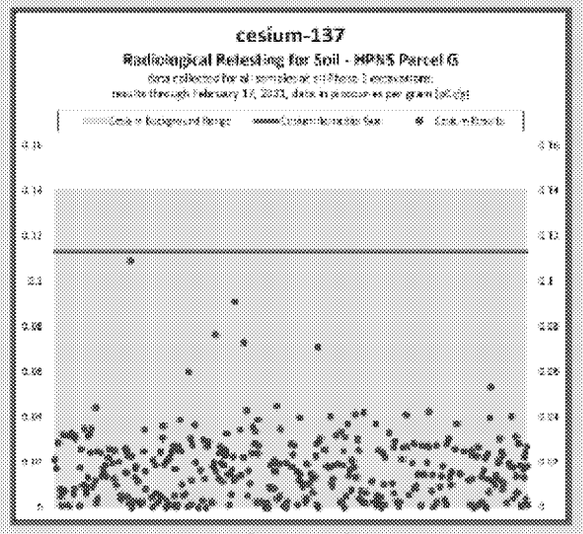
SURVEY UNITS
100% surface scans & sampling of accessible soil areas at former building sites and crawl spaces

TRENCH UNIT SOIL SAMPLES
100% surface scans of accessible areas and systematic soil sampling

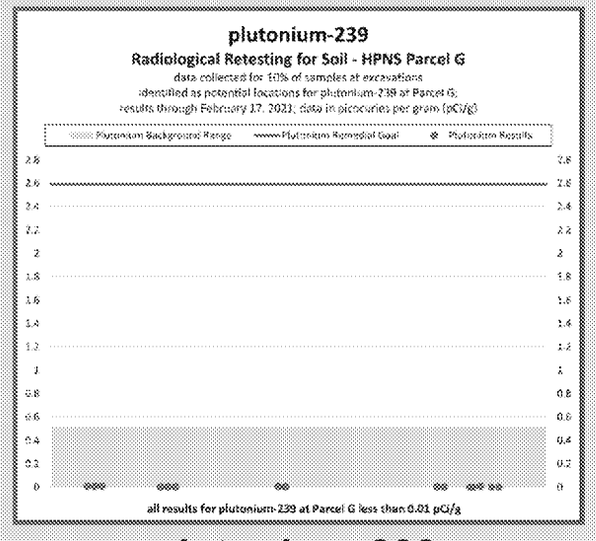
IMPACTED BUILDINGS
100% surface scans of accessible areas and interior surface sampling

Planned completion of Parcel G fieldwork and analysis →

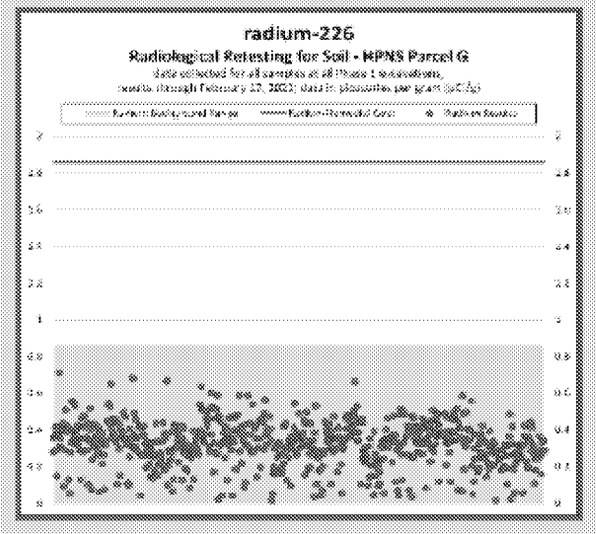




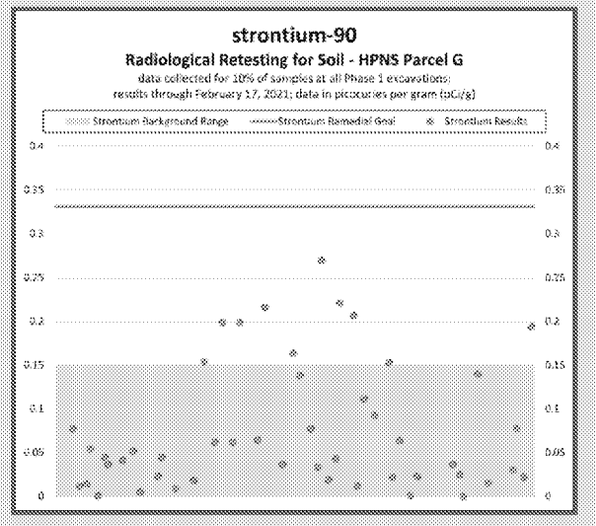
cesium-137



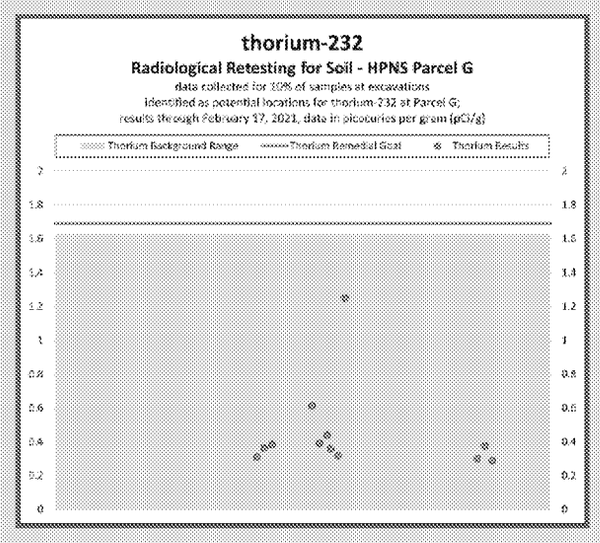
plutonium-239



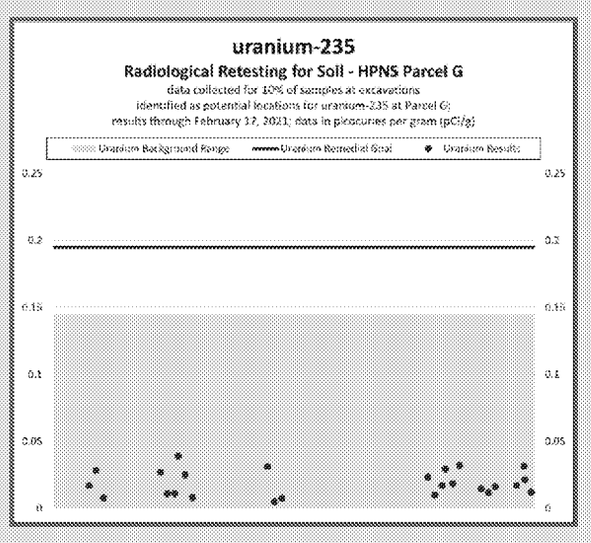
radium-226



strontium-90



thorium-232



uranium-235
