Hi Darci

In what context are the sand bed filters used?

**Subject:** Sand Filters

Hi Nicole,
I work in Counsel's Office at NY State Parks and I am working with our regions as they complete their inventories and/or verifications for the UIC program. A few of the facilities managers have asked whether sand bed filters are Class V wells. They are not listed on EPA's table listing the wells, but we would like to be sure that these do not have to be inventoried. Can you confirm that they are not Class V wells?
