Issues re: PR Approval.

- Rosario was a commentor at Public Hearing. The Responsiveness Summary addresses wide range of issues, including EQB capability concerns, environmental justice, and PR's SWMA Plan + its lack of public opportunities / EIS.

- Following public hearing, Rosario asked 2 questions "off the record" on EJ and a concern with EQB regulatory procedures. Carl Soderberg suggested a separate letter to Rosario on these 2 issues. -

Rosario raised more issues at hearing than noted in letter

- In view of RA interest in a letter, in view of our plans (see communication strategy) to send Responsiveness Summary to all requestor (Std. oper. procedure), we could combine the 3 elements in one letter:
  - RA "message" - customize
  - answer Q's following hearing - addresses all comments beyond those expressed at NGO mtg
  - send R Summary (- only responses to comments, not statement of approval

Then after public F.R. send R Sum to everyone

Issue: Responsiveness summary - timing of this - sh

- Another issue is whether, and timing, to translate the R.S. as suggested by Carl Soderberg. Connie Simon suggested Carl S. make these arrangements. Should we await translation before mailing English version?

- General concern: If RA opts to delay final approval publication to allow additional input from Rosario, et al, we are setting bad precedent for future hearings
