Subject: Lower Ley Creek Proposed Plan

Pam,

I am reviewing the Proposed Plan for the Town. Within the document, it indicates that dredge spoils from the 1970's dredging project were placed on upland areas including the Salina landfill.

I have never found any documentation that confirms that.

The proposed Plan (page 5) mentions flood construction blueprints but they are not included in the RI Report. Do these blueprints show dredge spoils being placed in the Salina Landfill?
