It should be like the last meeting and I think you should have the names. Or I can forward the invite once I receive it.

OR I can share the names if you don't have them.

Rashmi,

Do you want to send me the names on your end and I will schedule the teams meeting?

Thanks,

Stacey

Yes. This would work. Can you please send us the invite?

I will copy both in my reply.

Hi Rashmi,

Please see if Tuesday, March 15, 2022 from 4:00- 4:30 PM fits into the FDACS and FFV schedules for a follow-up discussion on the clothianidin citrus S18 in response to CBD public comments on the NOR.

Also, in your response to the questions below, please copy: Branch Chief, Eric Bohnenblust (Bohnenblust.Eric@epa.gov) and Acting Senior Regulatory Specialist, Ruthanne Louden (louden.ruthanne@epa.gov).

Thanks,

Stacey

Hello Stacey,

Please give me a call when you get some time. Thanks

Regards,
Rashmi

Hi Rashmi,

EPA would like to better understand the clothianidin/citrus use pattern. Please provide responses to the following questions: Do you know if the emergency use of clothianidin is ONLY for immature trees and how does FDACS define immature trees? Or, does the S18 include all trees above a given age range, and bearing fruit? It is EPA's understanding that the use pattern is for 3-5 year old trees. Confirm whether or not this means ONLY trees that are not harvested, or both bearing and non-bearing citrus.

In addition, do you have any information yet that you can send about the registered alternatives and acreage lost that can support the critical need of this S18 for Florida citrus growers? If so, please share at your earliest convenience. If you do not have any updated information at this time to justify the critical need, do you have a timeframe in which to submit this data?

Thanks and let me know if you would like to discuss. I will schedule a brief call.

Stacey
