Margaret,

Thanks for all you help in arranging the meeting with the DuPont telomer folks. I think the meeting was extremely helpful and forcefully conveyed the high level of concern EPA has on the issue. I also heard from Gary and Bob on the meeting that followed with the TRP and their concerns about the information flow to EPA. I think Gary will be contacting you directly to follow up to get you what you need. If I can be of any help in facilitating the effort to provide information, please give me a call.

I also enjoyed getting a chance to be among colleagues who I respect so highly. Keep the faith!

Mike
