Subject: RE: 210 Slauson - Liquid Waste Removal and Frac Tank Decontamination

Hi Alex,
My suggestion is to check the LEL before the contractor leaves on Thursday. If there is an issue (say <20%), then please go back on Friday.

Cheers,

Ben Castellana, Ph.D.

Ben,

Thanks for forwarding the email, I will call him shortly to confirm the 0700 hour start time. Do you need me to stay for the degrassing and dcontamination of the frac tank if it goes into Friday?

Alejandro Lara Jr.
Project Scientist – START Team

Hi all,
Brett has been having trouble responding to the Weston Solutions emails. Alex, you may need to call him to coordinate over the phone.

Thank you,

Ben Castellana Ph.D.

Greetings,

We are scheduled to begin setup for the liquid waste removal at about 7:00 Am on Thursday. We will not be starting the actual removal until 8:00 AM at the earliest following set up, final planning and a tailgate safety meeting. We should be able to complete pumping of the free liquid into the vacuum truck fairly quickly. We also hope to complete the degassing and decontamination of the frac tank on Thursday. There is a possibility that the degassing and decontamination work extends into Friday if necessary.

Ben, Could you please forward this message to Alex Lara and others at Weston. I am receiving error messages from Weston when sending them emails.

Thanks.

Hi Jon and Alex,
To my knowledge, yes. It would be best if Alex reached out to Brett Bowyer to coordinate. Please also know that AQMD are meant to be on site to collect some samples of other media, but specifically not the ER waste. Call me, Harry, or Rob immediately if there are any issues.

Cheers,

Ben

Hi Ben,

Rod is out of the office this week, but we have Alex Lara available to support the work on Thursday. Reading through the email chain below – is this slated to start at 0800 still?

Thanks,
Jon Colomb

Hi Rod,
Can you or your designee be available to oversee the removal of wastes at the Slauson site on Thursday? I'm in SFO on training all week.

Please let me know who from START will be on site, and keep me informed of site progress.

Thank you,

Ben Castellana Ph.D.

Subject: RE: ER Waste Removal

Hello Ben,

I am trying to arrange for the disposal of all of the containerized waste as quickly as possible. I have Kvac tentatively set up to remove the liquid waste and decontaminate the baker tank for this Thursday (May 9th, 2019). They will be removing the waste via vacuum truck and disposing of it as hazardous waste (due primarily to the flammability) at Demeno Kerdoon in Compton, California. They will also be decontaminating the Baker Tank and removing the rinsate water. This will involve confined space entry and the use of a pressure washer on site. We tentatively plan on getting started with a tailgate safety meeting at the Site at 8:00 AM on Thursday. I am still waiting for final approval from the Client regarding the costs associated with this effort, but expect to have it shortly. I will confirm with all as soon as I can regarding this schedule.

With respect to the solid waste, I am waiting for some final analyses (benzene

TCLP) to come back from the lab. I suspect that these results might show the solid material is less than the treatment standard for benzene, which may allow us to direct landfill the material as a hazardous waste at Clean Harbors Buttonwillow facility. I should have a schedule for the removal of the solid waste later this week.
