Subject: [SPAM-Phish] PFAS and Pesticide Packaging

Hi Ed,
Do you think we could steal 30 minutes from you and your team to get an update on the concerns regarding PFAS and pesticide containers?

Of particular interest from our perspective:

- Does the EPA see potential for discovering the PFAS issue in other packaging beyond what has been initially reported?
- How does dilution with water impact any concerns? Few if any professional use products are packaged in HDPE as RTU products.
- Does the EPA foresee a recall or other major interruption to supply and inventory if the issue is more widespread than initially reported?
- How will information be reported to industry? What's the SLA's role if any?

- Any idea on timelines?

Thanks, I know as always it's a busy time, but we value your willingness to communicate.

-Jim
