Hi Thuy,

Here is the memo and the attachment. There is a lot of blank space on page 1 of the memo. I tried to give more space at the beginning of the 1st page and the blank space is not reduced by much. I know the 2nd page is the table and cannot be break up. It just looks a bit strange.

Thanks,

Yaorong

Yaorong
The cover memo mentioned Attachment I.5 before Attachment I.2, which according to when we learned how to write a memo, is wrong
So can you please move and rename current Attachment I.3 and I.4 to I.2 and I.3; current Attachment I.5 to Attachment I.4; and current Attachment I.2 to Attachment I.5
So the memo will read as such

> *A summary of the preliminary results is provided in the attached documents (**Attachment I.1, I.2, and I.3**). All sample analyses were based on the EPA Method 537.1[1]. Procedures for collecting the rinsate samples from the containers are included in **Attachment I.4**. For the actual insecticide product, the*

sample preparation step of Method 537.1 was modified to extract PFAS from the product of concern. EPA will be sharing the method used in this study as part of this continued investigation. The lowest detection limit is 0.0004 ppb (or 0.4 ppt) for some compounds and slightly higher for other compounds for the analysis of the rinse samples; and 0.004 ppb (or 4 ppt) for the product samples.

Pictures of these containers are shown in ***Attachment I.5***

Thanks
Thuy
