Subject: Pesticide Risk Assessment for Pollinators: First Pages

Dear All,

Hope you all are doing well.

This is to inform you that I am ready with the first page proofs of the book "Pesticide Risk Assessment for Pollinators". I have attached the first batch of the proofs here and will send the rest of them with a following email.

You will need to have Adobe Acrobat Reader software to read page proofs. This is free software and is available for user downloading at:

http://www.adobe.com/products/acrobat/readstep2.html.

Attached is a file on how to e-annotate the proofs.

Any queries to your chapter that the copyeditor and typesetter may have noted should be responded to by making the necessary revisions directly to the page proofs.

The corrected page proofs are to be returned to me, Shikha Sharma at [shikha.sharma@aptaracorp.com] within 14 days from the date of receipt i.e **March 13, 2014.**

Some important points should be made about your work on the proofs; I urge you to keep them in mind when reviewing your pages.

1. Please keep corrections to a minimum. In particular, changes that cause text to move to another page should be avoided if at all possible as these are difficult to implement and will affect the pagination. Please note that the corrections should be marked carefully on to the proofs. Illegible marking may introduce new errors.

2. The proofs have been prepared from the manuscript submitted. These proofs provide you with an opportunity to review your manuscript, respond to any unanswered queries, provide missing material or information, and check for accuracy. Make your revisions directly on the page proofs and do not send back a revised manuscript. Answers to any of the copyeditor's queries are also to be made to the proofs and not replied to on the manuscript.

3. Check all figures along with the text and legends. Please make sure that permission statements appear as necessary. Mark any needed changes directly on the copy.

4. This is your last opportunity to check your contribution. Updated page proofs will be made available to only the publisher.

5. I would request you to please return the marked proofs by the above mentioned date as it would help in maintaining the schedule and for printing the book on time. The printer date can be realized only if each deadline is met and if the proofs received back from you are not heavily altered. Early delays can become cumulative in the later stages of production and heavy corrections to the text or art can postpone the bound book by several weeks.

Please let me know in case of any questions.

Best Regards,

Shikha
