Person Contacted Peter Niemic

Phone No. FTS 755-1212

Location OPTS Enforcement

Subject Level of Clean-up for PCB spills

Summary Peter said the draft guidance circulating at HQ requires/suggests cleanup be carried ~~at~~ out to background or pre-existing levels. However, the guidance recognizes that this is not always ~~per~~ practical, or environmentally sound. Thus it is necessary for the regions to use discretion on a case by case basis. I requested to be sent a copy of the draft guidance, ~~but~~ Peter said he would need his supervisors approval to send out a draft document.
