VIII. HAZARD DESCRIPTION

FIELD EVALUATION HAZARD DESCRIPTION: Place an 'X' in the box to indicate that the listed hazard exists. Describe the hazard in the space provided.

☐ A. HUMAN HEALTH HAZARDS

Not a serious health hazard at this time

Continue On Page 5

Continued From Page 4

HAZARD DESCRIPTION (continued)

☐ B. NON-WORKER INJURY/EXPOSURE

Not suspected

☒ C. WORKER INJURY/EXPOSURE

Residuals in drums may create a fire or explosion. A fire of unknown origin destroyed the main drum reprocessing building four years ago. The fire was of unknown origin.

☐ D. CONTAMINATION OF WATER SUPPLY

Not suspected

☐ E. CONTAMINATION OF FOOD CHAIN

Not suspected

☒ F. CONTAMINATION OF GROUND WATER

Some contamination from previously leaking drums is possible. Liquid pool in old burnt-down processing building is likely to be seeping into the ground. An organic odor was observed coming from the pool. The facility washes out the drums with detergent and the water just soaks into the ground

☒ G. CONTAMINATION OF SURFACE WATER

During a spill from the facility on 6/5/79, a large amount of wash water from the plant allegedly drained into a storm sewer and flowed into Hudson Bay. The owner of the facility denied that the soapy wastewater originated from his operations.

VIII. HAZARD DESCRIPTION (continued)

☐ H. DAMAGE TO FLORA/FAUNA

Not observed

☐ I. FISH KILL

Not observed

☐ J. CONTAMINATION OF AIR

Not observed

☒ K. NOTICEABLE ODORS

An organic odor was observed coming from the liquid pool on the floor of the former reprocessing building

☒ L. CONTAMINATION OF SOIL

Same as VIII F.

☒ M. PROPERTY DAMAGE

The former main reconditioning building was destroyed by a fire four years ago.

Continue On Page 7

Continued From Page 6

VIII. HAZARD DESCRIPTION (continued)

☒ N. FIRE OR EXPLOSION

The main reconditioning building burnt-down about four years ago. The source of the fire is unknown but based on the highly reactive nature of the chemical labels found at the site, the possibility of a future fire at the site exists.

☒ O. SPILLS/LEAKING CONTAINERS/RUNOFF/STANDING LIQUID

There is a standing pond of washwater mixed with rainwater on the floor of the burnt-down main reconditioning building

☒ P. SEWER, STORM DRAIN PROBLEMS

Excess wash water from his cleaning operation may drain into a nearby storm sewer as documented by the NJDEC on 6/5/79.

☐ Q. EROSION PROBLEMS

not observed

☐ R. INADEQUATE SECURITY

Chain link fence around property

☐ S. INCOMPATIBLE WASTES

Not observed

VIII. HAZARD DESCRIPTION (continued)

[X] T. MIDNIGHT DUMPING

Some small amounts of miscellaneous dumping was observed at the western edge of the site.

not observed

On 6/5/79 Tony Farrall of the NJDEC Hazardous Substance Branch went on a site visit to the facility to determine the source of a large quantity of soapy water running into a storm sewer on New York Ave and discharging into the Hudson River. He suspected that this spill was coming from the Operations at Ideal Cooperage.
