November 10, 1975

Mr. Blake Biles
Office of Enforcement
United States Environmental
Protection Agency
Waterside Mall
401 M Street, S. W.
Washington, D. C. 20460

Dear Mr. Biles:

As discussed Friday during our telephone conversation, I am finding the mechanics of assembling the information for responding to the questionnaire attached to Mr. Stanley W. Legro's letter of October 17 to be very time consuming. As you know I was not able to meet the 14-day requirement for supplying recent information.

At your request I have attempted to predict the dates when I will be able to forward meaningful responsive information. The best estimate I can reach at this time is that I may be able to supply the requested information by December 15. It is my personal belief that if the information is supplied in one report, it would give a more complete description of the available PCB - PCT information.

One of the principal reasons for the delay is that polychlorinated terphenyl (PCT) information is requested. Since Monsanto terminated the manufacture and sale of these materials in 1972 and since no environmental effects have been reported, I suggest you may consider deleting the PCT request at this time.

566178

4

As you suggested, it is possible that some of the available PCB information could be forwarded before the final report is submitted. Since much of the information I have reviewed to date consists of many interrelated parts, I would be concerned that the submission of partial information may lead to misunderstandings, or more likely, create the need for time consuming explanations which may defeat the purpose and still prolong the completion of the report.

Your favorable consideration of a time extension would be sincerely appreciated.

Sincerely,

W B Papageorge

Pydraul 280 contains PCBs (maybe used in air conditioners)

(d) See Exhibit L. Total amounts of waste are shown. Concentration and type of PCB compound or mixture are unknown.

(e) See 5a for name and location. See Exhibit K for amount disposed.

6. See Exhibit A. Monsanto Company does not import or reclaim PCB compounds or mixtures. Composition of disposed material is unknown but can range from ppm level to 100% by weight PCB.

7. (a) See Exhibit M for Sauget, Illinois facility waste effluent analyses. See Exhibit N for Anniston, Alabama facility water effluent analyses. For PCB emissions to the atmosphere at the Sauget, Illinois facility see Exhibit O. Analyses of air emissions were not made at the Anniston, Alabama facility.

(b) See Exhibits M, N and O.

(c) No information is available regarding the Anniston, Alabama facility. No information is available relating to PCB concentration in the air in the area of the Sauget, Illinois facility. Samples of the Mississippi River were taken in 1972. Results were as follows:

*Sample Date	Location	mg/l PCB
10/30/72	T.B. Bridge (downstream)	0.00012
12/13/72	Chain of Rocks Bridge (upstream)	0.0002 - 0.0004
12/12/72	N. of Ill. River (upstream)	0.0002 - 0.0004

*Analytical blank value at 0.00005-0.00017

8. (a) PCB compounds or mixtures are liquids and are transported in bulk or in steel drums.

(b) See Exhibit P for transporters of PCB compounds or mixtures from Monsanto facilities. Transporters of material returned for disposal can be any common carrier serving the St. Louis, Missouri area.

9. Monsanto Company is not aware of any occasion in which PCB compounds or mixtures were introduced into the environment which is not already known to representatives of the Environmental Protection Agency. Examples include the contamination of fish meal in North Carolina, the drainage of fluid from a transformer in transit in Tennessee and the leakage of fluid from a damaged transformer in the Duwamish waterway in Washington.

10. Monsanto Company is not aware of any health or environmental effects resulting from the introduction of PCB compounds or mixtures into the environment which has not been reported in the scientific and popular press and already known to representatives of the Environmental Protection Agency.

11. (a) Monsanto Company has received reports that about 1800 drums of PCB compounds or mixtures are being offered by a company located in the northeastern U.S. for sale for any application. This information was received from Mr. Robert Laham, Hub Fabric Leather Company, 7 Charlton Street, Everett, Massachusetts 02149. This has been discussed with a representative of the Environmental Protection Agency.

Recently Pyramid Chemical Sales Company, 1035 Virginia Drive, Fort Washington, Pennsylvania 19034 has advertised the availability for any application of Aroclor 1221, Aroclor 1232 and Arclor 5460. A representative of the Environmental Protection Agency has been informed.

This letter was sent out undated. It was mailed on 10-23-75

Date - 10/17/75

Monsanto Industrial Chemicals Com
800 N. Lindbergh Boulevard
St. Louis, Missouri 63166

Gentlemen:

Recent governmental sampling data indicate the presence of Polychlorinated Biphenyls (PCBs) and comparable chemical substances in the air, in water bodies, and in fish in several areas of the country. In order to determine the nature and extent of the possible adverse effects resulting from the presence of PCB compounds in the environment, the Environmental Protection Agency (EPA), in cooperation with other federal and State agencies, is attempting to determine the sources and amounts of PCBs entering the environment. It is important that this effort be carried out without delay.

It is our understanding that your company handles PCB compounds or mixtures or comparable chemical substances in its operations. I am therefore requesting, pursuant to the authority provided by Section 308 of the Federal Water Pollution Control Act, as amended, 33 U.S.C. 1318, and Section 114 of the Clean Air Act, as amended, 42 U.S.C. 1857c-9, that your company furnish EPA with information pertaining to your use and handling of PCBs and comparable chemical substances. In addition to a general description, which should include information as to sources, quantities, uses, and ultimate disposition, you should respond in detail to the enclosed questions. If any question is not applicable to your company or operations, please so indicate by responding "not applicable."

The information requested herein must be provided notwithstanding its possible characterization as confidential information or trade secrets. Should you so request, however, any information (other than effluent or emission data) which the Administrator of this Agency determines to constitute methods or processes entitled to protection as trade secrets will be maintained as confidential, pursuant to procedures specified in 40 CFR Part 2.

Within 14 days of receipt of this letter, your company must provide all information concerning your current status and activities and covering the twelve month period immediately preceding receipt of this letter.

Within 30 days following receipt of this letter, your company must provide all information for all of the prior years indicated.

The information required herein should be sent directly to the address indicated below. If you have any questions you may call the person indicated below or Mr. Blake A. Biles of our office at (202) 755-8731.

We appreciate your prompt cooperation in this matter.

Sincerely yours,

Stanley W. Legro

Dear Mr. Stephenson:

Attached is a response to the questionnaire which accompanied Mr. Stanley Legro's letter dated October 17, 1975.

To the best of my knowledge and belief, the information contained in this response represents the best information available to Monsanto.

If I can be of further assistance, please let me know.

Sincerely,

W. B. Papageorge

POLYCHLORINATED BIPHENYL (PCB) COMPOUNDS OR MIXTURES

In this response the phrase "PCB compound or mixture" includes those materials listed under Base Products in Exhibit A.

1. (a) Monsanto Industrial Chemicals Company does not import PCB compounds or mixtures. Amounts produced for 1971, 1972, 1973, 1974 and the first three quarters of 1975 are included in Exhibit C.

   (b) Production facilities:

   For 1971 and 1972

   Monsanto Company
   Box 249
   Anniston, Alabama 36201

   For 1971 to present

   Monsanto Company
   Route 3
   Sauget, Illinois 62201

   The amounts produced at the Anniston, Alabama plant are shown on Exhibit D. The Sauget, Illinois unit produced the amounts shown on Exhibit E. Wholesale and retail outlets are not used.

   (c) See Exhibit F for 1971, Exhibit G for 1972, Exhibit H for 1973 and 1974 and Exhibit I for 1975. The PCB compounds or mixtures from the Anniston, Alabama facility are listed in Exhibit D. The remaining were shipped from the Sauget, Illinois facility.

2. (a) See Exhibit A - pages 2, 3 and 4 and Exhibit B.

   (b) See Exhibit A - pages 2, 3 and 4.

   (c) The PCB compounds or mixtures used were produced by Monsanto. See 1(b).

   (d) Production facilities are those shown under 1(b) and for 1971 and 1972 also included Monsanto Company, 1700 South Second Street, St. Louis, Missouri 63177. Products distributed through Monsanto's Anniston, Alabama unit are shown on Exhibit D. All Pyranol products were distributed through the St. Louis, Missouri facility. Remainder of products distributed through the Sauget, Illinois unit. Amounts distributed are shown on the exhibits listed in 2e below.

(e) See Exhibit F for 1971, Exhibit G for 1972, Exhibit H for 1973 and 1974 and Exhibit I for 1975. The products obtained from the Anniston, Alabama facility are listed in Exhibit D. The Pydraul products originated at the St. Louis, Missouri unit. The remaining were shipped from the Sauget, Illinois facility. We do not manufacture consumer products containing PCB compounds or mixtures.

3. (a) During 1971 and 1972 PCB compounds or mixtures were used as heat transfer fluids, hydraulic fluids and in transformers and capacitors. During the latter part of 1972, 1973, 1974 and 1975 PCB compounds or mixtures are only present in transformers and capacitors.

(b) See Exhibit J. Amounts shown are for total Monsanto Company usage. No records are available to determine specific company facility. Inerteen was used in transformers. Pydrauls in air compressors. Therminols in industrial heat transfer systems.

(c) The PCB products were all produced by Monsanto Company. The specific sources are shown on Exhibit J.

4. PCB compounds or mixtures are not reclaimed.

5. (a) During 1971 and 1972 solid waste material contaminated with PCB compounds or mixtures were buried in a secure landfill located within a fenced area on property owned by Monsanto Company at the Anniston, Alabama facility. Similar waste has also been buried in a secure landfill located on Monsanto Company property at the Sauget, Illinois facility during the period 1971 - 1975. Liquid wastes have been disposed by incineration for the period 1971 - 1975 in a high temperature unit located at the Sauget, Illinois facility. During 1975 solid waste was sent to Texas Ecologists, P. O. Box 307, Robstown, Texas 78380.

(b) Waste materials containing PCB compounds or mixtures are received from many sources. The type of PCB compound or mixture in the waste is unknown. The concentration is also unknown. Solid waste is estimated as containing levels ranging from the ppm level to 50% by weight. Liquid waste is estimated to contain about 90% PCB compound or mixture.

For amounts disposed see Exhibit K. Note the amounts shown refer to the total weight of waste. The actual PCB content is unknown.

(c) See Exhibit K for total waste disposed. Concentration and type of PCB compound or mixture are unknown.

EXHIBITS TO Monsanto Company December 11, 1975 letter.

From: Colin Gaskin
National Urban/Rural Fellow

To: Michael Mintzer
N.Y. Caribbean Superfund Branch

Date: March 3, 1992

Exhibit A:
Listing of Monsanto products containing polychlorinated biphenyls ("PCB's") organized by "Base Products" (Aroclors) and by Aroclor containing products (such as hydraulic fluids, etc) with the percentage of PCB's contained in each product.

Exhibit B:
Listing of products containing PCB's or PCT's (polychlorinated triphenyls) sold in each of 1971 through and including 1975.

Exhibit C (revised 12/22/75 with additional notation "see attached revised copy"):
Production in each of 1971 through and including 1975 (in thousands of pounds) of PCB's and PCT's by Aroclor. Also contained in Exhibit C is a letter to EPA indicating knowledge of errors in the production schedule and up dated information included in the letter.

Exhibit C (Revised):
Revised production in each of 1971 through and including 1975 (in thousands of pounds) of PCB's and PCT's by Aroclor.

EXHIBIT D:
Production in each of 1971 and 1972 (in thousands of pounds) of PCB's and PCT's by Aroclor in Monsanto's Anniston, Alabama facility.

Exhibit E:
Production in each of 1971 through and including 1975 (in thousands of pounds) of PCB's and PCT's by Aroclor in Monsanto's Sauget, Illinois facility.

Exhibit F:
Customer sales reports for 1971 - 1972

Exhibit G:
Customer sales reports for 1972 - 1973

Exhibit H:
Customer sales reports for 1974

Exhibit I:
Customer sales reports for 1975

Exhibit J:
Monsanto Company usage of products containing PCB's and PCT's in each of 1971 through and including 1975.

Exhibit K:
Monsanto PCB contaminated waste disposed in each of 1971 through and including 1974.

Exhibit K (Revised):
See Exhibit K. There are adjustments to some numbers.

Exhibit L (Revised):
List of PCB waste returns by vendor in each of 1971 through and including 1975 including number of pounds returned.

Exhibit M:
Monsanto Company's Sauget, Illinois facility's waste effluent analyses.

Exhibit N:
Letter dated November 13, 1972 from Alabama Water Improvement Commission to Gene L. Jessee, Plant Manager, Monsanto Company in Anniston, Alabama regarding monthly monitoring of PCB losses to Snow Creek. Charts showing the amounts of discharge into the environment are also contains in Exhibit N.

Exhibit O:
Information concerning concentration of PCB in the atmosphere of Monsanto Company's Sauget, Illinois facility.

Exhibit P:
List of transporters of PCB compounds and mixtures for Monsanto Company.

Mr. Earl J. Stephenson
Director, Enforcement Division
Environmental Protection Agency
1735 Baltimore
Kansas City, Missouri 64108

Dear Mr. Stephenson:

Attached is a response to the questionnaire which accompanied Mr. Stanley Legro's letter dated October 17, 1975.

To the best of my knowledge and belief, the information contained in this response represents the best information available to Monsanto.

If I can be of further assistance, please let me know.

Sincerely,

W. B. Papageorge

W. B. Papageorge

Within 14 days of receipt of this letter, your company must provide all information concerning your current status and activities and covering the twelve month period immediately preceding receipt of this letter.

Within 30 days following receipt of this letter, your company must provide all information for all of the prior years indicated.

The information required herein should be sent directly to the address indicated below. If you have any questions you may call the person indicated below or Mr. Blake A. Biles of our office at (202) 755-8731.

We appreciate your prompt cooperation in this matter.

Sincerely yours,

Stanley W. Legro
Assistant Administrator

November 10, 1975

Mr. Blake Biles
Office of Enforcement
United States Environmental
Protection Agency
Waterside Mall
401 M Street, S. W.
Washington, D. C. 20460

Dear Mr. Biles:

As discussed Friday during our telephone conversation, I am finding the mechanics of assembling the information for responding to the questionnaire attached to Mr. Stanley W. Legro's letter of October 17 to be very time consuming. As you know I was not able to meet the 14-day requirement for supplying recent information.

At your request I have attempted to predict the dates when I will be able to forward meaningful responsive information. The best estimate I can reach at this time is that I may be able to supply the requested information by December 15. It is my personal belief that if the information is supplied in one report, it would give a more complete description of the available PCB - PCT information.

One of the principal reasons for the delay is that polychlorinated terphenyl (PCT) information is requested. Since Monsanto terminated the manufacture and sale of these materials in 1972 and since no environmental effects have been reported, I suggest you may consider deleting the PCT request at this time.

4

As you suggested, it is possible that some of the available PCB information could be forwarded before the final report is submitted. Since much of the information I have reviewed to date consists of many interrelated parts, I would be concerned that the submission of partial information may lead to misunderstandings, or more likely, create the need for time consuming explanations which may defeat the purpose and still prolong the completion of the report.

Your favorable consideration of a time extension would be sincerely appreciated.

Sincerely,

W B Papageorge

POLYCHLORINATED BIPHENYL (PCB) COMPOUNDS OR MIXTURES

In this response the phrase "PCB compound or mixture" includes those materials listed under Base Products in Exhibit A.

1. (a) Monsanto Industrial Chemicals Company does not import PCB compounds or mixtures. Amounts produced for 1971, 1972, 1973, 1974 and the first three quarters of 1975 are included in Exhibit C.

   (b) Production facilities:

   For 1971 and 1972

   Monsanto Company
   Box 249
   Anniston, Alabama 36201

   For 1971 to present

   Monsanto Company
   Route 3
   Sauget, Illinois 62201

   The amounts produced at the Anniston, Alabama plant are shown on Exhibit D. The Sauget, Illinois unit produced the amounts shown on Exhibit E. Wholesale and retail outlets are not used.

   (c) See Exhibit F for 1971, Exhibit G for 1972, Exhibit H for 1973 and 1974 and Exhibit I for 1975. The PCB compounds or mixtures from the Anniston, Alabama facility are listed in Exhibit D. The remaining were shipped from the Sauget, Illinois facility.

2. (a) See Exhibit A - pages 2, 3 and 4 and Exhibit B.

   (b) See Exhibit A - pages 2, 3 and 4.

   (c) The PCB compounds or mixtures used were produced by Monsanto. See 1(b).

   (d) Production facilities are those shown under 1(b) and for 1971 and 1972 also included Monsanto Company, 1700 South Second Street, St. Louis, Missouri 63177. Products distributed through Monsanto's Anniston, Alabama unit are shown on Exhibit D. All Pydraul products were distributed through the St. Louis, Missouri facility. Remainder of products distributed through the Sauget, Illinois unit. Amounts distributed are shown on the exhibits listed in 2e below.

(e) See Exhibit F for 1971, Exhibit G for 1972, Exhibit H for 1973 and 1974 and Exhibit I for 1975. The products obtained from the Anniston, Alabama facility are listed in Exhibit D. The Pydraul products originated at the St. Louis, Missouri unit. The remaining were shipped from the Sauget, Illinois facility. We do not manufacture consumer products containing PCB compounds or mixtures.

3. (a) During 1971 and 1972 PCB compounds or mixtures were used as heat transfer fluids, hydraulic fluids and in transformers and capacitors. During the latter part of 1972, 1973, 1974 and 1975 PCB compounds or mixtures are only present in transformers and capacitors.

(b) See Exhibit J. Amounts shown are for total Monsanto Company usage. No records are available to determine specific company facility. Inerteen was used in transformers. Pydrauls in air compressors. Therminols in industrial heat transfer systems.

(c) The PCB products were all produced by Monsanto Company. The specific sources are shown on Exhibit J.

4. PCB compounds or mixtures are not reclaimed.

5. (a) During 1971 and 1972 solid waste material contaminated with PCB compounds or mixtures were buried in a secure landfill located within a fenced area on property owned by Monsanto Company at the Anniston, Alabama facility. Similar waste has also been buried in a secure landfill located on Monsanto Company property at the Sauget, Illinois facility during the period 1971 - 1975. Liquid wastes have been disposed by incineration for the period 1971 - 1975 in a high temperature unit located at the Sauget, Illinois facility. During 1975 solid waste was sent to Texas Ecologists, P. O. Box 307, Robstown, Texas 78380.

(b) Waste materials containing PCB compounds or mixtures are received from many sources. The type of PCB compound or mixture in the waste is unknown. The concentration is also unknown. Solid waste is estimated as containing levels ranging from the ppm level to 50% by weight. Liquid waste is estimated to contain about 90% PCB compound or mixture.

For amounts disposed see Exhibit K. Note the amounts shown refer to the total weight of waste. The actual PCB content is unknown.

(c) See Exhibit K for total waste disposed. Concentration and type of PCB compound or mixture are unknown.

(d) See Exhibit L. Total amounts of waste are shown. Concentration and type of PCB compound or mixture are unknown.

(e) See 5a for name and location. See Exhibit K for amount disposed.

6. See Exhibit A. Monsanto Company does not import or reclaim PCB compounds or mixtures. Composition of disposed material is unknown but can range from ppm level to 100% by weight PCB.

7. (a) See Exhibit M for Sauget, Illinois facility waste effluent analyses. See Exhibit N for Anniston, Alabama facility water effluent analyses. For PCB emissions to the atmosphere at the Sauget, Illinois facility see Exhibit O. Analyses of air emissions were not made at the Anniston, Alabama facility.

(b) See Exhibits M, N and O.

(c) No information is available regarding the Anniston, Alabama facility. No information is available relating to PCB concentration in the air in the area of the Sauget, Illinois facility. Samples of the Mississippi River were taken in 1972. Results were as follows:

*Sample Date	Location	mg/l PCB
10/30/72	T.B. Bridge (downstream)	0.00012
12/13/72	Chain of Rocks Bridge (upstream)	0.0002 - 0.0004
12/12/72	N. of Ill. River (upstream)	0.0002 - 0.0004

*Analytical blank value at 0.00005-0.00017

8. (a) PCB compounds or mixtures are liquids and are transported in bulk or in steel drums.

(b) See Exhibit P for transporters of PCB compounds or mixtures from Monsanto facilities. Transporters of material returned for disposal can be any common carrier serving the St. Louis, Missouri area.

9. Monsanto Company is not aware of any occasion in which PCB compounds or mixtures were introduced into the environment which is not already known to representatives of the Environmental Protection Agency. Examples include the contamination of fish meal in North Carolina, the drainage of fluid from a transformer in transit in Tennessee and the leakage of fluid from a damaged transformer in the Duwamish waterway in Washington.

10. Monsanto Company is not aware of any health or environmental effects resulting from the introduction of PCB compounds or mixtures into the environment which has not been reported in the scientific and popular press and already known to representatives of the Environmental Protection Agency.

11. (a) Monsanto Company has received reports that about 1800 drums of PCB compounds or mixtures are being offered by a company located in the northeastern U.S. for sale for any application. This information was received from Mr. Robert Laham, Hub Fabric Leather Company, 7 Charlton Street, Everett, Massachusetts 02149. This has been discussed with a representative of the Environmental Protection Agency.

Recently Pyramid Chemical Sales Company, 1035 Virginia Drive, Fort Washington, Pennsylvania 19034 has advertised the availability for any application of Aroclor 1221, Aroclor 1232 and Arclor 5460. A representative of the Environmental Protection Agency has been informed.

OTS
Copy 1/2

December 22, 1975

Mr. Earl J. Stephenson
Director, Enforcement Division
Environmental Protection Agency
1735 Baltimore
Kansas City, Missouri 64108

Dear Mr. Stephenson:

I have carefully reviewed the information I forwarded to you on December 11 and have the following corrections, additions and comments to offer.

1(a) Exhibit C which was sent to you was not complete. A revision is attached.

1(c) Note that Exhibit I is for the period ending June, 1975. All quantities shown for the months July thru December in this report are for 1974.

2(a) In Exhibit A, I grouped the PCB products by application. I did not intend to imply that the materials listed under Base Products were not distributed "as is" to these applications.

Base Products were sold directly to the following uses:

Transformer and Capacitor Fluids

Aroclor 1016
Aroclor 1242
Aroclor 1254
Aroclor 1260

ED_013603_00000020-00121

Plasticizer Applications

Aroclor 1221
Aroclor 1232
Aroclor 1242
Aroclor 1248
Aroclor 1254
Aroclor 1260
Aroclor 1262
Aroclor 5060
Aroclor 5432
Aroclor 5442
Aroclor 5460

2(d) Products distributed thru Monsanto's Anniston, Alabama unit included the Aroclor 6000 series as well as those shown on Exhibit D.

2(e) See comment 1(c) above regarding Exhibit I. See comment 2(d) above regarding products from the Anniston, Alabama facility.

5(b) Exhibit K has been revised to correctly reflect proper breakdown. Totals are not changed.

5(d) Exhibit L has been revised to show accurate totals.

7(a) Water effluent from the Sauget, Ill. facility is discharged to the Municipal Treatment Plant.

8(a) The majority of the PCB components or mixtures and the products we make using PCB components or mixtures are liquids and are transported in bulk or in steel drums as I indicated previously. Bulk shipments are made in railroad tank cars and tank trucks in every case. Tank truck deliveries involved customer pickup. Two products which we formerly manufactured were solids. These were Aroclor 5460 and Montar 5. Aroclor 5460 was shipped in 100# multiwall paper bags. Montar 5 was shipped in 40 gallon fiber drums.

I hope you find this information helpful. If I can be of further service, please let me know.

Sincerely,

W B Papageorge

W. B. Papageorge
