memo to file 1-17-80 E.S.

Universal Waste Co Utica N.Y.

The January 14 executive meeting agreed with the Task Force recommendation that this site should be left to the DEC to monitor.

Monitor site at a regular interval until problem is resolved (PCB).

Check on 7-80

7-24-80 Spoke to Jim Luz - (new contact now is Tom Keelty) - prelim testing of river shows 30 ppm + less of PCB air samples were negative - Seven more spls are in lab + results "coming". Owner agreed to remove soil believing it is a "few drums" Info by DEC shows 400 gal/yr were hauled by previous dumper + clean up could be more massive - location of this material not known yet - may not be willing to excavate large quantities due to $.

Will call me the results when ~~re~~ received
