(FRI.) 12 JUL. 91

mg/kg/day = milligrams per kilogram per day

Carcinogenic PAHs = benzo (a) pyrene, benzo (j) fluoranthene, and indeno (1,2,3-cd) pyrene.

UG/L = micrograms/liter

MG/L = milligrams/liter

UG/KG = micrograms/kilogram → (PPB)

MG/KG = milligrams/kilogram → (PPM)

$°C = (°F - 32) \times 5/9 \; (\approx 0.55)$

$°F = °C \times \frac{9}{5} \; (\approx 1.8) + 32$

ng/g = nanograms/gram

1 KG = 2.2 lbs. = 1,000 g

$\frac{1}{1,000}$ g = mg (milligram)

$\frac{1}{1,000,000}$ g = μg (microgram)

1 ng = 1 nanogram = 10^{-9} gram = .00000001 gram = one billionth (10^{-9}) gram.

1 pg = 1 picogram = 10^{-12} gram = .000000000001 = one trillionth (10^{-12}) gram.

1 μg = 1 microgram = 10^{-6} gram = .000001 = one millionth (10^{-6}) gram.

1 mg = 1 milligram = 10^{-3} gram = .001 = one thousandth (10^{-3}) gram.
