SUBJECT: Taylor Site Samples

week of 1/15/79 — 1/19/79 (about Wed)

learned from Ed Dane that our samples that they were working on in the crime lab contained substances that they were not well equipped to deal with

1/19/79 (Fri)

Jack McClure asked me to pick up 8 samples (4 drum + 4 water) from the crime lab and take to the Ag lab — went to crime lab and watched Ed D split the 4 drum samples and retain part of each — took the 8 samples to the Ag lab — (chain of custody attached)

1/24/79

picked up extractions of 4 water samples at Ag lab (Scott B had prepared extractions suitable for mass spec) and took to crime lab for 'solvent' analysis (also picked up results)

1/25/79

took results from Ag lab and crime lab to Jack at dept office
