Meeting on Valley of Drums —

Meeting with Al Smith - EPA's action on Drum site - -

PL 92-500 - (allows funding, judicial proceeding attached to emergencies)

(Part 117 - 40CFR) - state & fed. agencies should respond to emergencies that affect public health and welfare -

responding to oil spills — now new response to hazardous spills -

farm - responded to potential spill — no money -
1, state managed disposal
2, EPA picked up material & restored —
farm entity that dealth with emergency situation —
EPA spent $100,000.

Valley - made commitments to state not to jeopardize valley
came up Fri - substantial materials to Wilson creek —
Fed law 311 prohibits that -

Stonebreaker - EPA on scene — in chg. Fed part.
new document in WDC - insisting states take a more active part - - -

10951483

Met with state rep - on EPA - state type meeting

- Type of meeting (Wilson attended) - meaningful -

fund - managed by ~~EP~~ Coast Guard
Reg. IV has not given " " rights in spill business
decisions made on scene - should reflect state thinking -

ALTERNATIVES
1) effort to contain surface runoff -
2) prevent ~~fun w~~ getting in Wilson Creek
Talked daily hr. Ron Scholer on site -

Refers to diagram -

Treatment system - 90 days

Plans -
effluent to Wilson Creek - Ron Scholer to go by & check on system

- Coast guard will leave man on site

- Can come back + repair if system fails -

spend another week to set up drums -

do not plan to do re-drumming unless org drum leaking —

piled up old bent drums —

do alone + get out —

— must limit to Coast Guard final emergency —

Close to $70.000 cost today — cannot exceed $100,000. today —

— Is someone in EPA (TSCA or RCRA)

— EPA can help maintain treatment —
— can keep system going — must tell public it has limited life —

— may have to wait for rain to pull discharge sample

Mooney - must keep system operating

- Will inceptor

— simple system could be enhanced

— everything (raw) should flow to treatment system

— method to get accurate information to press

Joint press release [finish treatment structure
Friday — — .
good time for press release
chem. analysis —

— Setting up drums - to Prevent leaking - pour into existing drum -

Dolan - Inventory — NEED PROTECTIVE EQUIPMENT

Money - Do inventory work - Dolan
2 weeks -

EPA can stay another week -

- Generators - may try to get assistance to identify drums -

- maybe try to get them to dispose of their drums after identification

- Keep treatment operation going -

- Water to do complete analysis of Wilson Creek -
Samples
Bio-Assay -
Effects

Everything Completed by June 1.

Press Conf - Tuesday

How to handle Major disaster —

— EPA + STATE — always available for press conf —

Do we need someone at site because of press other than Scholer

Plan in Frankfort —

STD. Answer — answer generally —

Ed Shelly to go up tomorrow

— Joint Press on Drum's
