INTER-OFFICE CORRESPONDENCE

St Louis Park PLANT

DATE January 15, 1972

US EPA RECORDS CENTER REGION 5

515679

TO Mr. T. J. Bryant

FROM N. L. Finch

SUBJECT Plant Property

The attached is not schedule B as mentioned in Tom Remington's suggested offer to the City, but note that will be used in putting together schedule B. Tom and I will revise this on Monday and send you a finished draft.

You questioned September as only a figurative date and the more the date is thrown out, it has to be considered a target date. Until some firm bids on demolition or removing the plant facilities are obtained, we don't know if September is even a good guess. Again, the best solution is to have the City take the facility "as is" and walk away July 1 with the money in the pocket, as decided for the pocket anyway.
