0900 BEGIN WALK THRU w/ OSC, MARNEY TAYLOR JOINS US FOR WALK THRU.
THE GREATEST PORTION OF THE MATERIALS HAVE BEEN MOVED TO THE PAINTED BLDG WHERE THE

CONTAINERS ARE SITTING ON PALLETS.
THE PLATING VATS WERE ALL OPEN SOME CONTAIN:
JUST SALTS & OTHERS SLUDGE WITH FLUIDS.
ONE OF THE SEPTIC TANKS USED FOR PLATING WAS
BROKE IN TRANSIT. THE CAD. VAT IS STILL
FULL & HAS NO COATING.
DURING THE WALK THRU ~~THIS~~ RAP OTHER DRUMS
WERE SEEN SCATTERED ABOUT THE SITE.
PECONOMY INSPECTION THE MAJORITY OF THE DRUMS
APPEARED TO CONTAIN MATERIAL.
THE PRP SUGGESTED VARIOUS QUESTIONS. HE :- @
HOW AS TO WHAT IS EXPECTED OF HIM. HIS
MAIN CONCERN IS THE DEMOLITION OF THE SITE.
IT APPEARS THAT HE NEED DIRECTION AS TO WHAT
IS EXPECTED OF HIM. HE HAS NO CONCEPT OF THE
GRAVITY OF THE SITUATION. HE IS INTERESTED TO SECURE
THE PORTION OF THE BUILDING CONTAINING THE
HAZ MAT. IT IS READY FOR DISPOSAL. THE
SUGGESTION THAT A-1 SECURE THE PROPER
PERMITS FOR THEIR DISPOSAL. THE LONGER
THIS MATERIAL SITS THE GREATER THE CHANCE
IT WILL BE DISTURBED. THE SITE HAS A HISTORY
FOR BEING A FAVORITE SPOT FOR VANDALS.
HE HAS HAD NO DIRECTION ON REMOVAL
FROM MDNR

0745 Called Mr McCallum to ascertain work schedule for Accomac. The contractor will continue scraping out the tanks & cold cutting the ends prior to using a torch to cut the tanks in half. I gave him instructions on safety protocol & reiterated that no tanks could leave the site w/o transport on my approval. The site has yet to be surveyed. Told Mr. I would spot check the activities this week.

1300 Met w/ Mick Tuesley Attorney Baker Est., Ken Thesen OSC, Mike Stuhan DPO, Karen Vaul Cercla Enforcm., Nora Hess Legal, for discussing the final soil treatment/removal @ AP.
They presented 4 options to deal w/ the soils. Vaul discussed procedure & insertion of a time schedule. Tuesday asked what would happen if they felt they could not afford the clean-up. Stuhan then explained legal enforcement of the administrative order issued by Baker & said other PRPs would probably be included in any further legal action

1800 9th Ave Pump

Accompanied TAM Carson & Lance & RPM Allison? to Ninth Ave Pump Company Indiana
Toured site to assess possibility of fence installation. The site appears essentially inaccessible for a fence around the property. Recommend fencing along access roads although I doubt a fence is really a permanent plan. If the locals want to get on site the nice & a fence won't stop them. The site is bounded by dense underbrush, swamp land, & roads & supposedly the locals are still dumping on the site
