Cannot map locations because of missing or bad coordinates
note: AECOM is doing some fixes to obvious lat/long problems (e.g. positive lat values), this table shows the uncorrected coordinates.

units do not seem consistent with matrix type

some units don't seem correct at all (ex: "ug" for surface water) - these result cannot be used
Note: 10/3/10 feedback from Environmental Standards: Sediment samples with water units are all TCLP results.
However, there is no way to know this by the matrix, analysis, or method codes.)
