FEMA NATIONAL RESPONSE COORDINATION CENTER TRIFOLD – Tropical Depression Harvey

As of August 31, 2017 (12:00 p.m. EDT)

SITUATION

CURRENT SITUATION:

The remnants of Harvey will track northeast across the Tennessee and Ohio Valley over the next couple of days. Heavy rainfall will expand northward with locally 10 inches expected across western Tennessee and Kentucky. This will likely lead to locally significant flooding. Rain will diminish over Louisiana, but major to record flooding will continue across southeast Texas and southwest Louisiana through next week. Hurricane Irma's movements are being monitored. *(NOAA Update, August 31, 2017, 11:00 a.m. EDT)*

ACTIONS TO DATE:

If the messaging around the fuel situation becomes heightened and people start to excessively purchase fuel, this will impact available supplies. *(DOE, August 31, 2017, 11:00 a.m. EDT)*

NEXT ACTIONS:

Housing & Sheltering: ESF-6, in coordination with Red Cross, state, and field, is exploring multiple options for providing shelter for up to 80,000 people for several months.
