Now that the pebble litigation is settled, should we respond to this message?

I will look into this. I am happy to meet with them (and even to visit Alaska if that will help and if I can make the scheduling work). **Ex. 5 - Deliberative Process - Attorney Client**

Hey Justin!

So Ryan's proposal was to get your input on this and potentially have you handle it. Can you take a look at the below info, please?

Thanks!

Ryan,

Attached is some history on Agency interactions with Iliamna Natives Limited Corporation that was provided by Region 10. I have discussed the meeting request with Michelle Pirzadeh and she noted that former Regional Administrator Dennis McLerran and other political leaders in the Obama Administration met with Lisa Reimers and other representatives and residents of Iliamna. We think it would be helpful for Administrator Pruitt and/or his leadership team to meet with Lisa Reimers (and if possible to visit Iliamna, the Pebble Mine site, and other areas of the Bristol Bay watershed). The Agency appears to be quite close to resolving our litigation with PLP, so if a meeting were to occur after that settlement is made public, there might be more to discuss in this meeting.

Please let us know if you need additional information.

Jane

Hey Jane, is this something you could provide any guidance or input on? Ryan asked me to reach out to you about it.

Thanks!

Dear Mr. Pruitt,

Congratulations to help make America Great Again!
We celebrated that Trump become our President because of the attacks to our little Village Corporation and the attacks on our business that created jobs for our community. The previous administration of EPA and Obama made our business lose jobs and business by their Bristol Bay Watershed assessment. This was politically driven by environmental groups and others who did not want to see our business grow to help our country. The EPA administration made up a group of scientist that were bias against resource development and the Pebble Project. The consultants already had an opinion against Pebble. They basically lied and did a hypothetical mine of worse case scenarios. The 404 (c) clean water act would huge negatively impacted on our ANCSA lands (lands our Natives own for purpose to prosper our shareholders for profit). Our lands are 15 miles away from Pebble, we wrote letters and tried to meet with Obamas administration, only to find out that administration was already wined and dined by the groups against us. We had everything stacked against us and our business has suffered and our people are literally in dire straits without jobs. We have no one to help us and the mainstream media except FOX news gave us a fair story. All the media and polls that were presented were against us. The Former President even flew to Dillingham (150 miles away from our home and who does not want to lose control over us) and they made it all about being against Pebble. They put a show on for him and we were disregarded. We even had Dennis Mclarren (EPA based out of Seattle) yell at us for talking to the press, we stated that EPA would not listen to us that this would have serious negative impact on us, this Bristol Bay watershed assessment. I personally was served papers by EPA and my only guess was because I supported Pebble.
I am not sure if you will get this email and if one of the former EPA employees ploys to stop any information to get to you, than our community will continue to lose hope. We did receive a letter from EPA and we are not sure if it's one of their games to undermine us.
We personally want to meet with you and we would like you to visit Iliamna. We want to save our businesses and our jobs for our community. We do not want others speaking for us and using the media to disregard us anymore. If anyone should understand how the media can be your worse enemy, I believe it would President Trump and you.
My contact information is:
Lisa Reimers
Iliamna Natives Limited
9078300987
I really hope we can survive until we have contact with your office. Especially with the Bristol Bay Watershed hanging over our heads and hurting our Native Corporation.

Kind Regards,
Lisa
