has been keeping our economy in survival mode and this has been keeping us positive for our future. You need to understand more about the challenges we have had with our economy.

We would respectfully request a meeting with you while you are in Alaska so we can ensure you hear from the people closest to the proposed Pebble Project. We believe 5 hours with a community your meeting with whom we have nothing in common with, this is basically sending a message to us that we do not matter to your organization.

Best Regards,

Lisa Reimers
