Dear User

An email was sent to you from Lotus Domino containing special objects accessible only via Lotus Notes Client. The portion of the email that could be sent is included below.

If this is the first time you have received this type of message, Click Here for database access.

To access the original email with Lotus Notes please click this link ----->

The following Web nomination was received for Stedman,Richard

Click here for the "Web Panel/Ad Hoc Committee Nominations" view

If the web nomination's "Accept" button is not visible when viewing the record, please first review and edit (and approve, if appropriate) the expert's person document in the "Web Nominations in Progress" view under the "Candidate Pool" button. Once the nominated expert's person document is approved, then the "Accept" button in the "Web Nomination for Panel Being Formed" document will be visible.

Web Nomination for Panel or Committee Being Formed

Person	Stedman, Richard
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues
Additional expertise of nominee that relates to Panel's subject matter.	
Significant expertise and experience in exposure and risk assessment development and preparation..	
Sources of recent grant and/or contract support:	
unknown	

BioSketch:

Richard Stedman is the Air Pollution Control Officer for the Monterey Bay Air Pollution Resources District in California. From January 2001 to February 2009, Richard served as Executive Director of the Olympic Region Clean Air Agency (ORCAA) in Washington State. Prior to his job as ORCAA's Executive Director, he was the Manager and Principal Investigator of the Washington State Department of Health Cooperative Agreement Program with the federal Agency for Toxic Substances and Disease Registry. Richard started his air quality management career as a Senior Air Quality Engineer for the Santa Barbara County Air Pollution Control District in California. Richard serves on several Boards of Directors including the National Association of Clean Air Agencies, the California Air Pollution Control Officers Association, Breathe California Central Coast Chapter (BCCCC) and the Monterey Institute for Research in Astronomy. Currently, Richard is the President of the California Air Pollution Control Officers Association (CAPCOA). He is also President of BCCCC. In addition, Richard is Vice Chair of the Monterey Bay Community Power Project Development Advisory Committee, a community choice aggregation project. Mr. Stedman holds a Master of Science degree in Public Health/Toxicology from the University of Hawaii and a Bachelor's degree in Geography/Biology from the University of California at Santa Barbara.

The following Web nomination was received for Rubens,Sam

Click here for the "Web Panel/Ad Hoc Committee Nominations" view

If the web nomination's "Accept" button is not visible when viewing the record, please first review and edit (and approve, if appropriate) the expert's person document in the "Web Nominations in Progress" view under the "Candidate Pool" button. Once the nominated expert's person document is approved, then the "Accept" button in the "Web Nomination for Panel Being Formed" document will be visible.

Web Nomination for Panel or Committee Being Formed

Person	Rubens, Sam
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues

Additional expertise of nominee that relates to Panel's subject matter.

I have over 20 years of experience in the field of ambient air monitoring and data analysis and am the local co-chair for NACAA Monitoring Committee.

Sources of recent grant and/or contract support:

unknown

BioSketch:

I have been the administrator of the local air agency in Akron, Ohio and also an Assistant Environmental Health Director since 2012. I have been affiliated with NACAA since 2014 and am currently on their executive board as well as being the local co-chair for the Monitoring Committee. I teach courses at Kent State University in the College of Public Health, focusing on Air Quality and Environmental Health. I hold a BS in Chemistry and a Master's in Public Administration. I was involved in a research project coordinated by LADCO, focusing on source apportionment of PM2.5 in 2009. As part of my duties as Assistant EH Director, I have been requested to participate in many advisory boards.

BioSketch:

Philip Fine, Ph.D. is currently an Assistant Deputy Executive Officer in the Science & Technology Advancement Division at the South Coast Air Quality Management District in Diamond Bar, CA. His

responsibilities include oversight of all field and laboratory activities related to the AQMD ambient network of over 36 air monitoring stations, source testing, compliance testing, quality assurance, and all special air monitoring research projects focusing on air toxics and the local impacts of air pollution. Dr. Fine has also managed several planning activities, including Air Quality Management Plan/SIP development, particulate matter control strategies, climate and energy, meteorology and forecasting, air quality evaluation, emissions reporting, and air toxics risk assessment. Prior to joining the AQMD, he was a Research Assistant Professor at the University of Southern California, Los Angeles where he taught courses and conducted extensive research on particulate pollution, its health effects, atmospheric science, and measurement methods resulting in over 45 peer-reviewed scientific publications. Dr. Fine received his Ph.D. from California Institute of Technology in Environmental Engineering Science, and his bachelor's degree in Mechanical Engineering and Materials Science & Engineering from the University of California, Berkeley.

New biosketch below, and new CV attached. Keep me posted (b) (5) [redacted] on state vs. local. I'm confident I can work something out with the CA state agency or NACAA if needed.

"Philip Fine, Ph.D. is currently the Deputy Executive Officer for Planning, Rule Development & Area Sources at the South Coast Air Quality Management District (SCAQMD) in Diamond Bar, CA. He is responsible for oversight, administration, and direction of all activities of the Division, including all rulemaking functions, Air Quality Management Plan and SIP development, particulate matter and ozone control strategies, climate and energy policy, air quality modeling, meteorology and forecasting, air quality data evaluation, emissions reporting, and air toxics risk assessment. He also recently served as the Assistant Deputy Executive Officer for the Science & Technology Advancement Division in charge of all field and laboratory activities related to the AQMD ambient network of over 36 air monitoring stations, source testing, compliance testing, quality assurance, and all special air monitoring research projects. Dr. Fine has been a member of several CASAC panels, and currently serves as a member of the California Air Resources Board legislatively mandated Research Screening Committee. Prior to joining the SCAQMD, he was a Research Assistant Professor at the University of Southern California, Los Angeles where he taught courses and conducted extensive research on particulate pollution, its health effects, atmospheric science, and measurement methods resulting in over 50 peer-reviewed scientific publications. Dr. Fine received his Ph.D. from California Institute of Technology in Environmental Engineering Science, and his bachelor's degree in Mechanical Engineering and Materials Science & Engineering from the University of California, Berkeley."

Subject:	Request for Assistance – Nominations for the CASAC and the Science Advisory Board
Date:	Monday, April 18, 2016 2:08:06 PM

Dear Colleagues,

I am writing to ask your help in identifying a diverse range of qualified candidates to be considered for the Administrator's appointment to the U.S. Environmental Protection Agency's Clean Air Scientific Advisory Committee (CASAC) and the EPA Science Advisory Board (SAB). The CASAC and the SAB are chartered federal advisory committees that provide independent, expert advice to the EPA on a range of science, engineering and economic issues.

Each year, the SAB Staff Office publishes a Federal Register Notice announcing opportunities for the public to nominate candidate experts to serve on the CASAC, the SAB, and certain SAB standing committees. On April 6, 2016, the SAB Staff Office published a Federal Register Notice requesting public nominations of candidate experts to serve on the CASAC, the Chartered SAB and the following standing SAB committees: Chemical Assessment Advisory Committee, Drinking Water Committee, Environmental Economics Advisory Committee, Environmental Engineering Committee, and Radiation Advisory Committee. The notice describes the functions of and expertise needed for the CASAC, the Chartered SAB and the five SAB committees.

I invite you to nominate candidates for the CASAC and the SAB, and I also encourage you to share this request with others. Nominations to the SAB or the CASAC should be made using the web nomination form under the "Nomination of Experts" category at the bottom of the SAB (www.epa.gov/sab) or CASAC (www.epa.gov/casac) home pages, respectively.

Nominations are sought by May 6, 2016. Should you have questions about the nomination process or the broad charge to the CASAC or the SAB, please contact me or Thomas Carpenter (Designated Federal Officer for the SAB) at carpenter.thomas@epa.gov or Aaron Yeow (Designated Federal Officer for the CASAC) at yeow.aaron@epa.gov.

Thank you in advance for your assistance in identifying a diverse set of expert candidates for the CASAC and the SAB.

Dear Mr. Yeow,

I am writing to clarify the requirements necessary to fill the open CASAC position mentioned in your email message below to Dr. Young. It is my understanding that the candidates for this CASAC position need to be employed by either a state air agency or a multi-jurisdictional organization representing air agencies in a given region. Thank you for your help in better understanding the requirements.

To: Morris, Mallori G <mallori.morris@ncdenr.gov>
Subject: Nomination to CASAC

Dear Mallori Morris:

The EPA has various science advisory boards. I'm interested in one of their boards that deals with air quality. If NC is interested, I would like NC to nominate me.

I attach a short bio. As you can see I'm a statistician. I've spent several years looking into air quality and health effects largely pro bono. I've published several papers on air quality and health effects. I attach one. I've testified twice before the US House Committee on Science, Space and Technology. I live in Raleigh and I'm willing to come and talk to people in the NC Environmental Quality department.

A web site that will put you into the middle of things is

epa.gov/casac

https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/3cda169d2187c6c885257f85006d3af1!OpenDocument&TableRow=2.1#2.

I did send a note to Aaron Yeow and he responded**

I would appreciate being nominated, but obviously that is up to you all.

Stan Young

**

Our current opening on CASAC is for a person representing state air pollution control agencies with expertise in scientific /technical
fields relevant to air pollution and air quality issues.

Nominations can be made on our webpage (scroll down to Nomination of Experts): https://epa.gov/casac

Subject: CASAC Nomination Question
Date: Wednesday, April 20, 2016 3:52:58 PM

Aaron,
I hope all is well! Quick question for you from one of our members – Once EPA receives all the nominations for the CASAC openings, do you expect to post biosketches and ask for comment from the public? As I recall, there has usually been a comment period (maybe 21 days) on the list of nominations, but I wanted to make sure I was remembering correctly.
Thanks!

Date: Friday, April 22, 2016 11:18:45 AM

Hi Aaron,
I am planning to nominate myself for the chartered CASAC to represent state air pollution control agencies. I was wondering how I update my profile that I submitted in 2013?
Thanks!!
Jim

Subject: CASAC opening
Date: Tuesday, April 26, 2016 10:40:08 AM

Mr. Yeow,

I applied last year when there was an opening. The list of applicants was daunting. Is there reason to apply again, or is consideration unlikely after not being successful last time?
Since I am a practicing physician with no university affiliation and minimal research background, are such individuals ever placed on EPA committees. In the Academy of Pediatrics (they nominated me last time), they routinely put a practitioner on their committees - a sort of "realist" amongst the academicians, but I would guess that that is not necessarily the case with governmental agencies.
Thank you for your time.

Aaron-

Any word (b) (5) on state vs. local for the CASAC seat?

If local's do not qualify, there are two possible approaches

1. A letter from NACAA such that I "represent" the states (AQMD and thus I are NACAA members)
2. A letter from CARB such that I "represent" the state of California (I am actually on the state-law-mandated Research Screening Committee for CARB that considers me an "employee" of sorts)

I prefer the former and they seem willing.

Let me know.

Thanks

Subject: Question: 2016 Nominations for Membership on CASAC
Date: Tuesday, April 26, 2016 3:28:18 PM

Good afternoon,
I left you a voicemail last week and wanted to follow that up with a quick email. I had a question about the process by which we submit a nomination online. Is the online "New Expert Information" form just for personal details about the nominee? Is there a way to include supporting information or letters of support? Or is that done at a different stage? If there is someone more appropriate to send this question, please let me know.
Thank you for your help in this matter.
Best,
Lindsey

Date:	Wednesday, April 27, 2016 11:02:30 AM

Hi Lindsey,

Tom Brennan asked me to get back to you on your questions. For nominating experts to the Clean Air Scientific Advisory Committee (CASAC), the online nomination form will prompt you to supply information about the nominee, including his or her expertise and experience. If you wish to provide additional information beyond that requested in the online form, you also may send an email to Aaron Yeow, Designated Federal Officer for the CASAC (yeow.aaron@epa.gov).

In addition to seeking public nominations of experts to serve on the CASAC, we provide an opportunity for members of the public to provide comments on the full List of Candidates that will be posted on the CASAC website. After the nomination period closes, the List of Candidates will be available at www.epa.gov/casac at the bottom of the home page, under the category "Public Input on Membership." (You may wish to sign up for the RSS news feed to receive updates on the CASAC and its activities, including membership).

If you have other questions, please call me and I will try to help.

Regards.

Sheila,

You are correct that the current call for expert nominations to the CASAC is for an expert from a state air quality agency or consortium of state air quality agencies. The CASAC's authorizing statute requires [at CAA § 109(d)(2)] that the CASAC include at least one person representing State air pollution control agencies. The EPA has fulfilled this membership requirement by including on the CASAC at least one member from a state air quality agency or consortium of state air quality agencies.

Hi Clint,
Sorry, I was out of the office the past 2 weeks.
Yes, as stated in the FR requesting nominations, we will post the List of Candidates (which includes their biosketches) on the CASAC website for public comment. The public comment period is typically 21 days.

Subject: CASAC Nomination Question

Aaron,
I hope all is well! Quick question for you from one of our members – Once EPA receives all the nominations for the CASAC openings, do you expect to post biosketches and ask for comment from the public? As I recall, there has usually been a comment period (maybe 21 days) on the list of nominations, but I wanted to make sure I was remembering correctly.
Thanks!

Web Nomination for Panel or Committee Being Formed

Person	Boylan, James
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues

Additional expertise of nominee that relates to Panel's subject matter.

Dr. James Boylan is currently the Manager of the Planning & Support Program in the Air Protection Branch of the Georgia Environmental Protection Division. His modeling team consists of eight Ph.D. scientists and his emission inventory and regulatory development team consists of seven environmental engineers/scientists. Dr. Boylan is responsible for air dispersion modeling with AERMOD and CALPUFF required for PSD permit applications (SO2, NO2, CO, PM2.5, and lead); photochemical grid modeling with CMAQ and CAMx required for Georgia's ozone, PM2.5, and regional haze State Implementation Plans (SIPs); meteorological modeling with MM5 and WRF; emissions modeling with SMOKE and MOVES; the development of annual state-wide emission inventories for criteria pollutants; and the technical analyses for nonattainment area designation recommendations (ozone, PM2.5, lead, SO2, NO2). In addition, he is responsible for updating Georgia's Rules for Air Quality Control and developing and submitting all attainment demonstration SIPs, infrastructure SIPs, and rule revision SIPs to EPA. Previously, he worked at the Florida Department of Environmental Protection performing regulatory audits of stationary sources. He has a B.S. in Chemical Engineering from the University of Notre Dame, a M.S. in Chemical Engineering from Auburn University, and a M.S. and Ph.D. in Environmental Engineering from the Georgia Institute of Technology (under the direction of Dr. Armistead "Ted" Russell). Dr. Boylan's Ph.D. research included the development of the first comprehensive three-

dimensional Eulerian photochemical grid model (URM-1ATM) that included full ozone chemistry, heterogeneous sulfate chemistry, aerosol thermodynamics, wet deposition and scavenging, and the decoupled direct method (DDM) for ozone and particulate matter. This model was applied as part of the Southern Appalachian Mountain Initiative (SAMI) to simulate 1-hour maximum ozone, W126 ozone, speciated PM2.5, acid deposition (ANC), and regional haze. Also, he developed and published the first model performance goals and criteria for PM2.5 which has become the benchmark for most PM2.5 modeling projects both nationally and internationally. Dr. Boylan was one of the first modelers to merge traditional air permit dispersion modeling with photochemical grid models (PGMs) when he applied a PGM to evaluate the single source impacts on ozone and secondary PM2.5 from a coal-fired power plant as part of a PSD permitting review in 2009. In addition, he developed the “Inter-Pollutant Trading Ratio Approach” for accounting for secondary PM2.5 formation from SO2 and NOx in EPA’s AERMOD steady-state dispersion model. Over the past several years he has held numerous leadership positions within many regional and national workgroups. Dr. Boylan has authored 18 peer-reviewed journal articles on ozone and PM2.5 formation, has presented research findings at over 180 national, regional, and local conferences/meetings, and was awarded “Outstanding Reviewer Status” by Atmospheric Environment in 2015. In 2001, Dr. Boylan was inducted into the Sigma Xi Scientific Research Honor Society. Currently, Dr. Boylan serves on the CASAC Sulfur Oxides Review Panel.

Sources of recent grant and/or contract support:

Aaron-

Any word (b) (5) [redacted] on state vs. local for the CASAC seat?

If local's do not qualify, there are two possible approaches

1. A letter from NACAA such that I "represent" the states (AQMD and thus I are NACAA members)

2. A letter from CARB such that I “represent” the state of California (I am actually on the state-law-mandated Research Screening Committee for CARB that considers me an “employee” of sorts)

I prefer the former and they seem willing.

Let me know.

Thanks

Subject: EPA CASAC Nomintation
Date: Tuesday, May 03, 2016 11:41:00 AM

Dr. Honeycutt,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

BioSketch:

Patricia Mason Fritz, is a Research Scientist 3 with the Bureau of Toxic Substance Assessment in the

Center for Environmental Health. Pat holds B.S. degrees in biology from Syracuse University and SUNY College of Environmental Science and Forestry, and a masters in Environmental Engineering from Rensselaer Polytechnic Institute. Her research activities involve exposure assessment and toxicological risk assessment of chemical and biological contaminants in school, residential and occupational settings. Her work encompasses criteria and hazardous air pollutants, aerosols, aerobiology, asthma, indoor air quality, nanotechnology, mercury, and alternative energy. She responds to public inquiries about health effects from chemical and biological pollution, has developed and provided training on health effects of air pollutants, and has participated in multi-agency evaluations of environmental sampling data collected during community studies, and following industrial accidents, natural disasters and the World Trade Center attacks. Ms. Fritz has represented NYSDOH on the NYS Dept. of Transportation Ozone Action Day Advisory Committee, NYS DEC Nanomaterials Interagency Workgroup, NYS Energy Resource Development Authority Wind Energy Noise Program Advisory Committee, the U.S. EPA/CDC Ritualistic Uses of Mercury Task Force, NYS Toll Plaza task force and has served on multidisciplinary, technical and project advisory committees related to air pollution, transportation, energy and the environment.

Subject: CASAC Nomination Question

Hi Aaron,

I am planning to nominate myself for the chartered CASAC to represent state air pollution control agencies. I was wondering how I update my profile that I submitted in 2013?

Thanks!!

Jim

Mr. Rubens,
We received your self nomination for the CASAC. However, this year's membership seeks a person from a state air pollution control agency (or consortium of state air pollution control agencies). Unfortunately local air pollution control agencies would not qualify.
The CASAC can undoubtedly benefit from your expertise. Accordingly, we hope that we may consider you for service on future CASAC Committees and Panels. Again, we appreciate your time and effort, and hope that you will consider working with the CASAC as new opportunities arise. Should you have any questions, please feel free to contact me by telephone or e-mail.

Donna,
I received your self nomination for the CASAC. Attached and below are the biosketch and cv we have on file for you. Please let me know if you have any updates.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"
Biosketch:
"Dr. Donna Kenski is the Director of Data Analysis at Lake Michigan Air Directors Consortium (LADCO) in Rosemont, IL. She was awarded a Ph.D. in Environmental and Occupational Health Sciences (1997) and an M.S. in Public Health (1992) from the University of Illinois at Chicago. Her responsibilities at LADCO require working closely with their member states to develop supporting information for State Implementation Plans. Tasks encompass planning and implementing special-purpose monitoring studies; developing and applying statistical models to examine relationships between air quality, meteorology, and emissions; and applying exploratory and graphical data analysis techniques. Her areas of expertise and research activities include source-receptor modeling and other observation-based models for source attribution of PM2.5 and haze; ensemble trajectory analysis; conceptual model development integrating ambient data with theoretical and laboratory observations; visual display of quantitative data; and development and field testing of advanced monitoring technologies. In addition, Dr. Kenski's position at LADCO involves daily interaction with State, local, and Tribal monitoring personnel, such that she is well acquainted with their perspectives on air monitoring issues. She chairs a midwestern state data analysis workgroup, reviews journal articles for Environmental Science and Technology, Journal of the Air and Waste Management Association, Journal of Environmental Engineering, and Atmospheric Environment, and is frequently an invited speaker at regional and national air quality meetings. Dr. Kenski is also an Adjunct Associate Professor at the University of Illinois at Chicago and served for 3 years on U.S. EPA's Clean Air Scientific Advisory Committee. LADCO is a nonprofit organization funded by U.S. EPA and the states of Indiana, Illinois, Michigan, Minnesota, Ohio, and Wisconsin."

Dr. Blanz,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"
-Aaron

The following Web nomination was received for Goldman,Gretchen

Click here for the "Web Panel/Ad Hoc Committee Nominations" view

If the web nomination's "Accept" button is not visible when viewing the record, please first review and edit (and approve, if appropriate) the expert's person document in the "Web Nominations in Progress" view under the "Candidate Pool" button. Once the nominated expert's person document is approved, then the "Accept" button in the "Web Nomination for Panel Being Formed" document will be visible.

Web Nomination for Panel or Committee Being Formed

Person	Goldman, Gretchen
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Nominated by	Andrew A Rosenberg
Verification Email Address	arosenberg@ucsusa.org
Person Title	Dr.
Affiliation of Nominator	Center for Science and Democracy, Union of Concerned Scientists
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues

Additional expertise of nominee that relates to Panel's subject matter.

air pollution exposure science, environmental engineering, meterology, scientific integrity

Sources of recent grant and/or contract support:

none

BioSketch:

Dr. Gretchen Goldman has expertise in air pollution exposure science, meteorology, and environmental policy. She received a Ph.D. and M.S. in environmental engineering from the Georgia Institute of Technology and a B.S. in atmospheric science from Cornell University. Her research focused on statistical modeling of urban air pollution for use in epidemiologic studies of acute human health effects, and has been cited in EPA Integrated Science Assessments for NAAQS (2016 NOx ISA, 2015 draft SOx ISA, 2013 O3 ISA). Specifically, Dr. Goldman's work used geostatistical models to characterize measurement error from air pollution monitoring in order to assess the impact of this error on health risk assessments in time-series health studies. Following a postdoctoral research position, Dr. Goldman is now a lead analyst at the Union of Concerned Scientists, where her work focuses on a range of science policy issues. Her areas of study here have included NAAQS, climate change, scientific integrity at federal agencies, and hydraulic fracturing, among other topics. In terms of scientific advisory roles, Dr. Goldman currently serves as the Vice Chair of the Air and Climate Public Advisory Committee for the Metropolitan Washington Council of Governments, the metropolitan planning organization for the Washington, D.C. region and she serves on the Advisory Board for the nonprofit InfluenceMap. She played an advisory role for Engineers for a Sustainable World and has submitted technical comments and testimony on many federal rulemaking processes.

Person Title	Mr.
Affiliation of Nominator	Private Toxicology Consultant
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues

Additional expertise of nominee that relates to Panel's subject matter.

Substantial expertise in toxicology, human health risk assessment and cost benefit analysis

Sources of recent grant and/or contract support:

unknown

BioSketch:

Larry Gephart is a Private Toxicology Consultant, providing expertise to industry, nonprofit organizations, and government on air quality and health issues. Prior to his current position, Gephart was a Distinguished Scientific Associate with ExxonMobil Biomedical Sciences, Inc. (EMBSI) , where he worked for 23 years. During his tenure at ExxonMobil, Gephart served a leadership role for the EMBSI air quality strategic science program and developed a research strategy to meet regulatory and stewardship requirements. He also represented ExxonMobil on various industry trade groups, including the American Petroleum Institute, where he provided the initiative and expertise to gain funding for a $4.2million multi-year research program designed to improve decision-making for the National Ambient Air Quality Standards (NAAQS) for ozone and PM. A number of the human clinical, epidemiology, and toxicology studies from this program have been fundamental to the NAAQSs for these pollutants. Over the course of many years, Gephart provided numerous technical reports, comments, and presentations to the Environmental Protection Agency, the Office of Management and Budget, the Department of Energy, various congressional committees, and other governmental organizations on NAAQS related issues. The goal of this work was to improve the underlying science documents, risk and exposure assessments, and data and methods to perform cost benefit analysis used in NAAQS decision-making. Gephart received a Master of Public Health with a toxicology specialization from the University of Michigan and is a Diplomat of the American Board of Toxicology. He was appointed as a member to the EPA Federal Advisory Committee on Acute Exposure Guideline Levels, serving for four years. He is also an Associate Member of the Society of Toxicology, a Member of the American Industrial Hygiene Association, and former Chair of the AIHA Emergency Exposure Planning Guideline Committee.

Web Nomination for Panel or Committee Being Formed

Person	Kenski, Donna
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues
Additional expertise of nominee that relates to Panel's subject matter.	
Air quality modeling, monitoring, and data analysis; air pollution health effects; biostatistics	
Sources of recent grant and/or contract support:	
USEPA, States of IL, IN, OH, MI, MN, and WI	

BioSketch:

Dr. Donna Kenski is the Director of Data Analysis at Lake Michigan Air Directors Consortium (LADCO) in Rosemont, IL. She was awarded a Ph.D. in Environmental and Occupational Health Sciences (1997) and an M.S. in Public Health (1992) from the University of Illinois at Chicago. Her responsibilities at LADCO require working closely with their member states to develop supporting information for State Implementation Plans. Tasks encompass planning and implementing special-purpose monitoring studies; developing and applying statistical models to examine relationships between air quality, meteorology, and emissions; and applying exploratory and graphical data analysis techniques. Her areas of expertise and research activities include source-receptor modeling and other observation-based models for source attribution of PM2.5 and haze; ensemble trajectory analysis; conceptual model development integrating ambient data with theoretical and laboratory observations; visual display of quantitative data; and

development and field testing of advanced monitoring technologies. In addition, Dr. Kenski's position at LADCO involves daily interaction with State, local, and Tribal monitoring personnel, such that she is well acquainted with their perspectives on air monitoring issues. She chairs a midwestern state data analysis workgroup, reviews journal articles for Environmental Science and Technology, Journal of the Air and Waste Management Association, Journal of Environmental Engineering, and Atmospheric Environment, and is frequently an invited speaker at regional and national air quality meetings. Dr. Kenski is also an Adjunct Associate Professor at the University of Illinois at Chicago and served for 3 years on U.S. EPA's Clean Air Scientific Advisory Committee. LADCO is a nonprofit organization funded by U.S. EPA and the states of Indiana, Illinois, Michigan, Minnesota, Ohio, and Wisconsin.

Aaron -- the cv and biosketch are ok as is. Here's my response to your additional question:

Many years of working for the midwestern states have given me a deep understanding of the challenges that states face in meeting the requirements of the NAAQS and providing their residents with clean air. While I share the academics' training and knowledge of air quality health science, I also know the details of states' struggles to implement air quality regulations. From establishing and operating air quality monitors, to developing accurate emission inventories, to modeling air quality episodes and relaying complex model results and uncertainties to the public, these challenges are the real-world result of NAAQS implementation. By bringing this perspective to the panel, I provide some important balance and practical knowledge of the strengths and limitations of states in achieving healthy air quality.

Aaron-

Any word (b) (5) [redacted] on state vs. local for the CASAC seat?

If local's do not qualify, there are two possible approaches

1. A letter from NACAA such that I "represent" the states (AQMD and thus I are NACAA members)
2. A letter from CARB such that I "represent" the state of California (I am actually on the state-law-mandated Research Screening Committee for CARB that considers me an "employee" of sorts)

I prefer the former and they seem willing.

Let me know.

Thanks

Ms. Tin,
We received your self nomination for the CASAC. However, this year's membership seeks a person from a state air pollution control agency (or consortium of state air pollution control agencies). The CASAC can undoubtedly benefit from your expertise. Accordingly, we hope that we may consider you for service on future CASAC Committees and Panels. Again, we appreciate your time and effort, and hope that you will consider working with the CASAC as new opportunities arise. Should you have any questions, please feel free to contact me by telephone or e-mail.

The following Web nomination was received for Kenski,Donna

Click here for the "Web Panel/Ad Hoc Committee Nominations" view

If the web nomination's "Accept" button is not visible when viewing the record, please first review and edit (and approve, if appropriate) the expert's person document in the "Web Nominations in Progress" view under the "Candidate Pool" button. Once the nominated expert's person document is approved, then the "Accept" button in the "Web Nomination for Panel Being Formed" document will be visible.

Web Nomination for Panel or Committee Being Formed

Person	Kenski, Donna
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Nominated by	Scott Jenkins
Verification Email Address	jenkins.scott@epa.gov
Person Title	
Affiliation of Nominator	US EPA
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues
Additional expertise of nominee that relates to Panel's subject matter.	
Sources of recent grant and/or contract support:	
unknown	

BioSketch:

Dr. Donna Kenski is the Director of Data Analysis at Lake Michigan Air Directors Consortium (LADCO) in Rosemont, IL. She was awarded a Ph.D. in Environmental and Occupational Health Sciences (1997) and an M.S. in Public Health (1992) from the University of Illinois at Chicago. Her responsibilities at LADCO require working closely with their member states to develop supporting information for State

Implementation Plans. Tasks encompass planning and implementing special-purpose monitoring studies; developing and applying statistical models to examine relationships between air quality, meteorology, and emissions; and applying exploratory and graphical data analysis techniques. Her areas of expertise and research activities include source-receptor modeling and other observation-based models for source attribution of PM2.5 and haze; ensemble trajectory analysis; conceptual model development integrating ambient data with theoretical and laboratory observations; visual display of quantitative data; and development and field testing of advanced monitoring technologies. In addition, Dr. Kenski's position at LADCO involves daily interaction with State, local, and Tribal monitoring personnel, such that she is well acquainted with their perspectives on air monitoring issues. She chairs a midwestern state data analysis workgroup, reviews journal articles for Environmental Science and Technology, Journal of the Air and Waste Management Association, Journal of Environmental Engineering, and Atmospheric Environment, and is frequently an invited speaker at regional and national air quality meetings. Dr. Kenski is also an Adjunct Associate Professor at the University of Illinois at Chicago and served for 3 years on U.S. EPA's Clean Air Scientific Advisory Committee. LADCO is a nonprofit organization funded by U.S. EPA and the states of Indiana, Illinois, Michigan, Minnesota, Ohio, and Wisconsin.

BioSketch:

Mr. Bart Croes is currently Chief, Research Division, California Air Resources Board and director of the State's health, exposure, atmospheric processes, emission control, and economics research programs for air pollution. This includes responsibility for setting California ambient air quality standards. An atmospheric scientist with a background in air quality simulation modeling and a P.E. in Chemical

Engineering (California), his former responsibilities include California's air-quality measurement network design, data management and data analysis programs, and evaluation of the environmental fate of non-oxygenated and ethanol alternatives to MTBE in gasoline (1998-2000). Mr. Croes was the program manager for the 1997 Southern California Ozone Study (SCOS97-NARSTO), the SCOS97-NARSTO Aerosol Program and Radiation Study, California's Particulate Matter Research Program, the California Acid Deposition Monitoring Program, atmospheric chemistry and modeling research, and California Clean Air Act ozone transport research (1992-1998). Mr. Croes holds advanced degrees with an M.S. (Chemical Engineering) from the University of California at Santa Barbara, 1983, and a B.S. (Chemical Engineering) from the California Institute of Technology, 1979. He is Public Sector Co-Chair for the NARSTO Executive Assembly and former member of the National Research Council Committee on Research Priorities for Airborne Particulate Matter (1998-2004). Mr. Croes has been a peer reviewer for the National Research Council, the U.S. EPA, and numerous journals, and received the Editors' Citation for Excellence in Refereeing from the Journal of Geophysical Research (1997). He has published peer-reviewed articles on air quality simulation modeling, emission inventory evaluation, reactivity-based VOC controls, acid deposition, the weekend effect for ozone and PM, PM data analysis and trends, and diesel particle traps.

Subject: CASAC Nomination
Date: Thursday, May 05, 2016 3:08:00 PM

Mr. Croes,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

air pollution	
Sources of recent grant and/or contract support:	
unknown	

BioSketch:

Dr. Loren Raun serves as the Chief Environmental Scientist for the City of Houston with a dual role as

researcher at Rice University. She draws on significant experience and accomplishments as a researcher, educator, and leader to advise the city on air pollution, its local association with adverse human health effects and impacts from proposed state and federal policy. Dr. Raun received her PhD and MS in Environmental Science from Rice and her BS in geophysics from the University of Texas, Austin. Her research focus involves assessing the relationship between air pollution mixtures and increased risk of acute adverse health effects on a holistic level and evaluating the difference in risk for sensitive subpopulations (including children). The ultimate goal of this work is to use the information locally to improve the health of the community and also globally to provide a framework by which others can benefit. Specifically, current research projects include understanding the impacts of Houston metal particulate air pollution on the health of the community; identifying multipollutant mixture concentration levels that trigger asthma attacks in Houston and the cost of the use of ambulances to treat pollution triggered attacks and assessing the association between benzene air pollution and increased cancer risk in communities bordering refineries in Houston. Dr. Raun teaches human health risk assessment and applied environmental statistics at the undergraduate and graduate level, for which she was awarded the Rice University Excellence in Teaching and Mentoring Award in 2016. She serves on executive board of the Regional Air Planning Advisory Committee, is a past member of the EPA Science Advisory Board, Risk and Technology Review Methods Panel, and continues collaborations with the Centers for Disease Control and Prevention, Air Pollution and Respiratory Health Branch where she served as a visiting scientist.

Subject: CASAC Nomination

Dr. Blanz,

You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)

The Federal Register notes provides background on the request for nominations and the role of the CASAC.

Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.

In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Web Nomination for Panel or Committee Being Formed

Person	Moore, Jr.,Charles Thomas (Tom)
Panel or Committee Being Formed	2016 CASAC Annual Membership
Potential Committee Relationship	CASAC
Self Nomination	
Special Expertises Required	Represent state air pollution control agencies with expertise in scientific/technical fields relevant to air pollution and air quality issues

Additional expertise of nominee that relates to Panel's subject matter.

Evaluation of ozone and PM transport and contributions of all anthropogenic and other source categories, and fluxes from global air quality models

Sources of recent grant and/or contract support:

Western states, EPA, National Park Service, Joint Fire Sciences Program, Bureau of Land Management, American Petroleum Institute

Aaron,

Yes, I would like to be considered for CASAC. Attached are copies of my CV and bio.

Here is my response to the question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?":

For over 20 years, I have had the opportunity to engage in every level of environmental policy and management in one of the most unique states in the country. Texas is incredibly diverse in terms of its size (the state is larger than France), geography (the state includes plains, mountains, deserts, forests, and beaches), people (Texas is the second-most populous state, but also includes vast areas of sparsely populated land), and economy (Texas has a gross domestic product larger than that of Australia, South Korea, or Spain and is the nation's leading exporter). In the years I have served at the TCEQ, Texas' population and economy have continued to change dramatically. Texas has three of the top five fastest growing metropolitan areas and four of the eleven largest cities in the United States. In 2014 (the most recent year available), Texas had the second fastest growing economy in the United States and its oil production was nearly equal to that of Iran or Iraq. Importantly, much of the population and economic growth occurring in Texas has been accompanied by a decrease in ambient criteria pollutant concentrations, including ozone, as well as hazardous air pollutants.

The TCEQ has fully integrated the use of sound science in protecting our state's natural resources. My toxicology and chemical risk assessment background is used daily to address the unique environmental challenges within Texas that come from the pairing of such diversity. For example, because the greater Houston area has the country's fourth largest population and has historically lacked zoning, I have considerable experience in assessing health risks of vulnerable communities living near major industrial sources. Under my leadership, my division has reviewed literature on thousands of air pollutants, integrated data across numerous studies and fields of science, and developed health protective inhalation toxicity factors for use in both permitting and monitoring evaluations. Many of these values have been peer reviewed and even incorporated by other state and national organizations. I have first-hand experience in every step of the process, from review and derivation of the toxicity value, to implementation of the screening level, to evaluating potential risks of nonconformance. In addition to my experience with state toxicity factors, I have also conducted in-depth analyses of national ambient air quality standards (NAAQS) and have been an active participant in the EPA's external review process, as well as numerous work groups and panels on the science behind the standard. I am passionate about the importance of collegial interactions in forming sound, impactful policy decisions, including setting the level of the NAAQS.

For these reasons, I believe my background, skills, and experience would bring diversity to the chartered CASAC in a number of meaningful ways. CASAC membership has typically not included a representative from the southwest area of the country, nor an area of such complicated pollutant dynamics. As noted, Texas is highly diverse and is constantly changing. Texas' ambient air pollutant concentrations are also influenced by a wide range of sources, including natural, mobile, stationary point, and international sources. My on-the-ground experience with the consequences of a variety of pollutant sources, and the issues of background pollutant concentrations would provide a unique

and important addition to the CASAC. In addition, most members of CASAC are highly specialized experts in a particular field of study (e.g., atmospheric chemistry, pulmonary physiology, ecology) or a particular pollutant issue (e.g., particulate matter). To my knowledge, no other CASAC members have my depth of experience in formal chemical risk assessment across different classes of pollutants and integrating broad spectra of human and animal toxicity data into a final health protective toxicity value. Finally, I also have lengthy experience in clearly articulating underlying scientific data to non-scientists and engaging various groups of interested parties, including scientific experts, environmental groups, media, legislators, and policy makers, to ensure the toxicity factor derivation process is transparent, scientifically sound, and understandable. I think I would be an excellent addition to the CASAC both as a scientist with extensive chemical inhalation risk assessment expertise and as a representative of a state that implements these rules every day. I highly respect the work of CASAC and the EPA and the importance of setting health protective pollutant levels. I welcome the opportunity to continue to work toward the shared goal of responsible environmental stewardship consistent with continued economic success.
Thank you for your consideration,
Mike

Subject: EPA CASAC Nomintation

Dr. Honeycutt,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Importance:	High

Hello, Aaron – I haven't talked with you for a couple of years. Hope things are going well for you.

I am following up on my CASAC self-nomination today, see: https://yosemite.epa.gov/sab/sabpeople.nsf/NominationThankYou/?ReadForm&UNID=76E1640543B4208F85257FAB006F1A50.

I reviewed the FR notice and the "process page" for CASAC nominations before I filled out the on-line nomination form. I don't think there is a way to attach a file. I also wasn't sure how much detail to put into the "Additional expertise of nominee that relates to Panel's subject matter." box. I would glad to provide a more detailed CV than my current resume (attached). Other documentation that may be useful in considering me are letters of recommendation. Are those considered in selecting CASAC members?

Several western state air agencies encouraged me to apply. I bring significant experience and expertise with technical analysis and planning for diverse air quality issues across the West. Most recently I have focused on background ozone, interstate and global transport, and contributions of both anthropogenic and natural sources to ozone, PM, regional haze, and nitrogen deposition.

Sincerely yours, Tom

Tom Moore, WRAP Air Quality Program Manager

Mr. Turner,

Thank you for your nomination of Dr. Loren Raun for the EPA's Clean Air Scientific Advisory Committee. However, this year's membership seeks a person from a state air pollution control agency (or consortium of state air pollution control agencies).

The CASAC can undoubtedly benefit from Dr. Raun's expertise. We appreciate your time and effort, and hope that you will consider nominating Dr. Raun to other CASAC panels and committees as new opportunities arise. Should you have any questions, please feel free to contact me by telephone or e-mail.

Subject: RE: EPA CASAC Nomintation

Aaron,

Yes, I would like to be considered for CASAC. Attached are copies of my CV and bio.

Here is my response to the question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?":

For over 20 years, I have had the opportunity to engage in every level of environmental policy and management in one of the most unique states in the country. Texas is incredibly diverse in terms of its size (the state is larger than France), geography (the state includes plains, mountains, deserts, forests, and beaches), people (Texas is the second-most populous state, but also includes vast areas of sparsely populated land), and economy (Texas has a gross domestic product larger than that of Australia, South Korea, or Spain and is the nation's leading exporter). In the years I have served at the TCEQ, Texas' population and economy have continued to change dramatically. Texas has three of the top five fastest growing metropolitan areas and four of the eleven largest cities in the United States. In 2014 (the most recent year available), Texas had the second fastest growing economy in the United States and its oil production was nearly equal to that of Iran or Iraq. Importantly, much of the population and economic growth occurring in Texas has been accompanied by a decrease in ambient criteria pollutant concentrations, including ozone, as well as hazardous air pollutants.

The TCEQ has fully integrated the use of sound science in protecting our state's natural resources. My toxicology and chemical risk assessment background is used daily to address the unique environmental challenges within Texas that come from the pairing of such diversity. For example, because the greater Houston area has the country's fourth largest population and has historically lacked zoning, I have considerable experience in assessing health risks of vulnerable communities living near major industrial sources. Under my leadership, my division has reviewed literature on thousands of air pollutants, integrated data across numerous studies and fields of science, and

developed health protective inhalation toxicity factors for use in both permitting and monitoring evaluations. Many of these values have been peer reviewed and even incorporated by other state and national organizations. I have first-hand experience in every step of the process, from review and derivation of the toxicity value, to implementation of the screening level, to evaluating potential risks of nonconformance. In addition to my experience with state toxicity factors, I have also conducted in-depth analyses of national ambient air quality standards (NAAQS) and have been an active participant in the EPA's external review process, as well as numerous work groups and panels on the science behind the standard. I am passionate about the importance of collegial interactions in forming sound, impactful policy decisions, including setting the level of the NAAQS.

For these reasons, I believe my background, skills, and experience would bring diversity to the chartered CASAC in a number of meaningful ways. CASAC membership has typically not included a representative from the southwest area of the country, nor an area of such complicated pollutant dynamics. As noted, Texas is highly diverse and is constantly changing. Texas' ambient air pollutant concentrations are also influenced by a wide range of sources, including natural, mobile, stationary point, and international sources. My on-the-ground experience with the consequences of a variety of pollutant sources, and the issues of background pollutant concentrations would provide a unique and important addition to the CASAC. In addition, most members of CASAC are highly specialized experts in a particular field of study (e.g., atmospheric chemistry, pulmonary physiology, ecology) or a particular pollutant issue (e.g., particulate matter). To my knowledge, no other CASAC members have my depth of experience in formal chemical risk assessment across different classes of pollutants and integrating broad spectra of human and animal toxicity data into a final health protective toxicity value. Finally, I also have lengthy experience in clearly articulating underlying scientific data to non-scientists and engaging various groups of interested parties, including scientific experts, environmental groups, media, legislators, and policy makers, to ensure the toxicity factor derivation process is transparent, scientifically sound, and understandable. I think I would be an excellent addition to the CASAC both as a scientist with extensive chemical inhalation risk assessment expertise and as a representative of a state that implements these rules every day. I highly respect the work of CASAC and the EPA and the importance of setting health protective pollutant levels. I welcome the opportunity to continue to work toward the shared goal of responsible environmental stewardship consistent with continued economic success.

Thank you for your consideration,

Mike

Subject: EPA CASAC Nomintation

Dr. Honeycutt,

You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC)

in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Subject: Moore CASAC nomination followup
Importance: High

Hello, Aaron – I haven't talked with you for a couple of years. Hope things are going well for you.

I am following up on my CASAC self-nomination today, see: https://yosemite.epa.gov/sab/sabpeople.nsf/NominationThankYou/?ReadForm&UNID=76E1640543B4208F85257FAB006F1A50.

I reviewed the FR notice and the "process page" for CASAC nominations before I filled out the on-line nomination form. I don't think there is a way to attach a file. I also wasn't sure how much detail to put into the "Additional expertise of nominee that relates to Panel's subject matter." box. I would glad to provide a more detailed CV than my current resume (attached). Other documentation that may be useful in considering me are letters of recommendation. Are those considered in selecting CASAC members?

Several western state air agencies encouraged me to apply. I bring significant experience and expertise with technical analysis and planning for diverse air quality issues across the West. Most recently I have focused on background ozone, interstate and global transport, and contributions of both anthropogenic and natural sources to ozone, PM, regional haze, and nitrogen deposition.

Sincerely yours, Tom

Subject: RE: CASAC Nomination

Aaron,
I didn't realize how out-of-date my CV was and need 2-3 days more. Is there a hard deadline?
Thanks,
Bart

Subject: CASAC Nomination

Mr. Croes,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Dear Mr. Yeow,

I am writing to clarify the requirements necessary to fill the open CASAC position mentioned in your email message below to Dr. Young. It is my understanding that the candidates for this CASAC position need to be employed by either a state air agency or a multi-jurisdictional organization representing air agencies in a given region. Thank you for your help in better understanding the requirements.

To: Morris, Mallori G <mallori.morris@ncdenr.gov>
Subject: Nomination to CASAC

Dear Mallori Morris:

The EPA has various science advisory boards. I'm interested in one of their boards that deals with air quality. If NC is interested, I would like NC to nominate me.

I attach a short bio. As you can see I'm a statistician. I've spent several years looking into air quality and health effects largely pro bono. I've published several papers on air quality and health effects. I attach one. I've testified twice before the US House Committee on Science, Space and Technology. I live in Raleigh and I'm willing to come and talk to people in the NC Environmental Quality department.

A web site that will put you into the middle of things is

epa.gov/casac

https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/3cda169d2187c6c885257f85006d3af1!OpenDocument&TableRow=2.1#2.

I did send a note to Aaron Yeow and he responded**

I would appreciate being nominated, but obviously that is up to you all.

Stan Young

**

Our current opening on CASAC is for a person representing state air pollution control agencies with expertise in scientific /technical
fields relevant to air pollution and air quality issues.

Nominations can be made on our webpage (scroll down to Nomination of Experts): https://epa.gov/casac

Importance: High

Hello, Aaron – I haven't talked with you for a couple of years. Hope things are going well for you.

I am following up on my CASAC self-nomination today, see: https://yosemite.epa.gov/sab/sabpeople.nsf/NominationThankYou/?ReadForm&UNID=76E1640543B4208F85257FAB006F1A50.

I reviewed the FR notice and the "process page" for CASAC nominations before I filled out the on-line nomination form. I don't think there is a way to attach a file. I also wasn't sure how much detail to put into the "Additional expertise of nominee that relates to Panel's subject matter." box. I would glad to provide a more detailed CV than my current resume (attached). Other documentation that may be useful in considering me are letters of recommendation. Are those considered in selecting CASAC members?

Several western state air agencies encouraged me to apply. I bring significant experience and expertise with technical analysis and planning for diverse air quality issues across the West. Most recently I have focused on background ozone, interstate and global transport, and contributions of both anthropogenic and natural sources to ozone, PM, regional haze, and nitrogen deposition.

Sincerely yours, Tom

Subject: Moore CASAC nomination followup
Importance: High

Hello, Aaron – I haven't talked with you for a couple of years. Hope things are going well for you.

I am following up on my CASAC self-nomination today, see: https://yosemite.epa.gov/sab/sabpeople.nsf/NominationThankYou/?ReadForm&UNID=76E1640543B4208F85257FAB006F1A50.

I reviewed the FR notice and the "process page" for CASAC nominations before I filled out the on-line nomination form. I don't think there is a way to attach a file. I also wasn't sure how much detail to put into the "Additional expertise of nominee that relates to Panel's subject matter." box. I would glad to provide a more detailed CV than my current resume (attached). Other documentation that may be useful in considering me are letters of recommendation. Are those considered in selecting CASAC members?

Several western state air agencies encouraged me to apply. I bring significant experience and expertise with technical analysis and planning for diverse air quality issues across the West. Most recently I have focused on background ozone, interstate and global transport, and contributions of both anthropogenic and natural sources to ozone, PM, regional haze, and nitrogen deposition.

Sincerely yours, Tom

Dear Mr. Yeow,

I am writing to clarify the requirements necessary to fill the open CASAC position mentioned in your email message below to Dr. Young. It is my understanding that the candidates for this CASAC position need to be employed by either a state air agency or a multi-jurisdictional organization representing air agencies in a given region. Thank you for your help in better understanding the requirements.

Subject: Nomination to CASAC

Dear Mallori Morris:

The EPA has various science advisory boards. I'm interested in one of their boards that deals with air quality. If NC is interested, I would like NC to nominate me.

I attach a short bio. As you can see I'm a statistician. I've spent several years looking into air quality and health effects largely pro bono. I've published several papers on air quality and health effects. I attach one. I've testified twice before the US House Committee on Science, Space and Technology. I live in Raleigh and I'm willing to come and talk to people in the NC Environmental Quality department.

A web site that will put you into the middle of things is

epa.gov/casac

Tom,

Can you send your updated cv? Also, for the biosketch, the resume file you sent is kind of long. Can you shorten it to 1-2 paragraphs?

Aaron – sorry for the delay. I have been traveling last week and this week. I will send an updated cv this week. You can use the file I sent you on the 6th as my biosketch.

Thanks.

Tom,

Attached are the biosketch and cv that we have on file for you. Please let me know if you would like to update them.

In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Importance: High

Hello, Aaron – I haven't talked with you for a couple of years. Hope things are going well for you.

I am following up on my CASAC self-nomination today, see: https://yosemite.epa.gov/sab/sabpeople.nsf/NominationThankYou/?ReadForm&UNID=76E1640543B4208F85257FAB006F1A50.

I reviewed the FR notice and the "process page" for CASAC nominations before I filled out the on-line nomination form. I don't think there is a way to attach a file. I also wasn't sure how much detail to put into the "Additional expertise of nominee that relates to Panel's subject matter." box. I would glad to provide a more detailed CV than my current resume (attached). Other documentation that may be useful in considering me are letters of recommendation. Are those considered in selecting CASAC members?

Several western state air agencies encouraged me to apply. I bring significant experience and expertise with technical analysis and planning for diverse air quality issues across the West. Most recently I have focused on background ozone, interstate and global transport, and contributions of both anthropogenic and natural sources to ozone, PM, regional haze, and nitrogen deposition.

Sincerely yours, Tom

Mr. Butler,
You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)
The Federal Register notes provides background on the request for nominations and the role of the CASAC.
Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.
In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Dr. Young,

The CASAC's authorizing statute requires [CAA § 109(d)(2)] that the CASAC include at least one person representing State air pollution control agencies. The EPA has interpreted this requirement to be one person from a state air quality agency or consortium of state air quality agencies. If you are not from a state air quality agency or consortium of state air quality agencies, you would not qualify for this year's opening. The CASAC has openings every year as well as openings for CASAC panels as the need arises. The CASAC can undoubtedly benefit from your expertise and we hope you would consider applying in the future.

Should you have any questions, please feel free to contact me by telephone or e-mail.

---

Hello Aaron,
Here is the additional information that I can pass along to you for Director Butler:
"How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"
I believe my educational background as well as my 25 years of experience at Ohio EPA has provided me with a superior blend of policy, science, and technical skill that would be a unique counterbalance to the otherwise singularly science-focused representation on the CASAC. I understand the highly complex and technical subject matter evaluated by CASAC but would bring the experience necessary to find the appropriate balance between environmental protection and business development. In addition, my experience in compliance assistance to businesses, understanding the impacts of regulations on those businesses, and being able to effectively communicate between the technical experts, regulators, and lay people, will bring a welcome and necessary balance to the group.
Also see attached revised more detailed bio.
Please let me know if there is any additional information that you need.
Thanks.
Bob

Hello Aaron,
Here is the additional information that I can pass along to you for Director Butler:
"How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"
I believe my educational background as well as my 25 years of experience at Ohio EPA has provided me with a superior blend of policy, science, and technical skill that would be a unique counterbalance to the otherwise singularly science-focused representation on the CASAC. I understand the highly complex and technical subject matter evaluated by CASAC but would bring the experience necessary to find the appropriate balance between environmental protection and business development. In addition, my experience in compliance assistance to businesses, understanding the impacts of regulations on those businesses, and being able to effectively communicate between the technical experts, regulators, and lay people, will bring a welcome and necessary balance to the group.
Also see attached revised more detailed bio.
Please let me know if there is any additional information that you need.
Thanks.
Bob

Mr. Aaron Yeow

Science Advisory Board

United States Environmental Protection Agency

Dear Mr. Yeow,

I am submitting this letter of support for Dr. Michael E. Honeycutt, who is being considered for the Clean Air Scientific Advisory Committee (CASAC) at the United States Environmental Protection Agency (USEPA). Dr. Honeycutt is currently the Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ), a large, complex organization in the State of Texas with a tremendous array of responsibilities for environmental issues. He is a respected toxicologist and risk assessor with a wide breadth of experience in both environmental science and public policy. Under his direction and leadership, the Toxicology Division has brought about numerous improvements to its new air contaminant risk assessment process, including the in-depth evaluation of over 95 individual chemicals, and has done so while *increasing* public participation and transparency. Through these assessments and the publication of many of these results in peer-reviewed literature, Dr. Honeycutt has established the TCEQ as a well-respected risk assessment organization both within his home state and in government organizations throughout the world. Throughout his tenure at the TCEQ, he has served on six external review panels, helped organize five international conferences, served on the editorial board of *Environmental Toxicology & Chemistry*, and is an adjunct professor at Texas A&M University School of Rural Public Health's Department of Environmental and Occupational Health, all of which demonstrate his willingness and dedication to working with other scientists, including those that do not share his point of view, on important scientific topics. Finally, through his numerous appearances as an expert witness in both state and federal congressional hearings, Dr. Honeycutt has repeatedly proven himself as a competent, well-read scientist with common sense approaches to highly complex issues and sound judgement. Dr. Honeycutt has enjoyed a superb record of achievement in regulatory and environmental health in the State of Texas and would bring substantive scientific and regulatory perspectives and judgement to the CASAC.

Please feel free to contact me should you have any additional questions. I support Dr. Honeycutt's consideration for this position because of his high personal and professional integrity, commitment to excellence in science and public policy, and proven leadership skills in dealing with complex environmental issues. He would make an excellent contribution to the USEPA's CASAC.

Sincerely,

Scott A. Thompson

Dear Sir or Madam,

This is in response to public comments about candidates for the Administrator's appointment to the Clean Air Scientific Advisory Committee (CASAC).

I have known Dr. Michael Honeycutt for more than 10 years and I have done extensive research for his group at TCEQ. As a statistical consultant I helped TCEQ develop several human health risk assessments to establish safe levels as well as the most recent TCEQ risk assessment guidelines. These projects were very closely overseen by Dr. Honeycutt. He was always supportive of the most scientifically sound methodology without compromising the health risks to the public. Dr. Honeycutt would not have budgetary restictions limiting the quality of research to meet the highest standards in the interest of protecting human health and safety.

Dr. Honeycutt is well respected by his co-workers at TCEQ and has always been very open to ideas and learning from peers and consultants. In my more than 10-year relationship with TCEQ, I can say that Dr. Honeycutt always has worked in the interst of human health.

I would highly recommend Dr. Honeycutt for EPA's CASAC. I think that Dr. Honeycutt experience and work ethics would be an asset for EPA's CASAC. Please feel free to contact me with any additional information you may need,

Sincerely,

Subject:	Public Comment on the List of Candidates For the Environmental Protection Agency's Clean Air Scientific Advisory Committee
Date:	Tuesday, June 21, 2016 1:13:28 PM

Mr. Yeow,

I am writing to offer a public comment for consideration by the SAB Staff Office on the nomination of Dr. Honeycutt as a Candidate for appointment to the CASAC. I highly recommend that Dr. Honeycutt is appointed to CASAC. I have known him for about 5 years in his official capacity as the director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ) and also as an adjunct faculty member in the Interdisciplinary Faculty of Toxicology program that I direct now at Texas A&M University. Dr. Honeycutt is an accomplished risk assessor with outstanding experience and credentials. He is a very knowledgeable individual and a state government official that is still very much involved in the science and practice of toxicology and environmental health science. I am very much impressed by his broad range of knowledge on many issues in toxicology and risk assessment, from mechanisms of toxicity to regulatory frameworks and statutes. Michael is a balanced, fair and thoughtful professional who has much to offer to CASAC and EPA. He represents one of the major State regulatory agencies in the US, a perspective that is trend-setting in many ways and very important to hear. TCEQ, under his leadership, has established comprehensive formal guidelines for risk assessments and his agency is filling many voids that are left by the glacial pace at which NCEA and other regulatory parts of EPA work. While not always agreeable with the rules and regulations proposed by the Federal or State governments, TCEQ has been transparent and thoughtful with articulating their position. I have never felt that when I disagree with their position that it is because it was opaque and unclear. I have an utmost respect for Dr. Honeycutt, even if I disagreed with him on several occasions. I strongly believe that CASAC will benefit strongly from his involvement as a person who will be engaged and active, yet not activist.

In summary, I am again in full accord with the nomination and am encouraging you and the SAB to accept his nomination.

Dear Mr. Yeow,

I am writing in support of the nomination of Dr. Michael Honeycutt, Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ), for appointment to the Clean Air Scientific Advisory Committee. During my tenure at the Texas Commission on Environmental Quality, including my time as the agency's Executive Director, I had the opportunity to work closely with Dr. Honeycutt on many matters that affected public health and the environment. Dr. Honeycutt is skilled in using the knowledge he has gained to prepare and implement insightful strategies to ensure that the public is not adversely affected by actions under the regulatory control of the Texas Commission on Environmental Quality. As is most often the case, many of the issues he has been engaged in are issues that are complex both scientifically and from a public policy perspective. One of Dr. Honeycutt's key attributes is his ability to find solutions that are the most effective and efficient in achieving the regulating agency's objective. By selecting Dr. Honeycutt, the EPA will be able to rely on this expertise when developing and implementing national environmental policy initiatives. I believe Dr. Honeycutt will be a substantive addition to the Clean Air Scientific Advisory Committee and I support his appointment to the committee.

Sincerely,

Jeff Saitas

Mr. Yeow:

I strongly endorse Dr. Michael Honeycutt's nomination for CASAC.

Dr. Honeycutt is as extraordinarily creative as he is intellectual, and is a consummate professional. He's a great listener and communicato, principled, ethical and accountable. In short, he is the best and brightest in his field that I have come across in my 30+ years practicing environmental law across the United States.

Mr. Yeow:
I strongly endorse Dr. Michael Honeycutt's nomination for CASAC.
Dr. Honeycutt is as extraordinarily creative as he is intellectual, and is a consummate professional. He's a great listener and communicato, principled, ethical and accountable.
In short, he is the best and brightest in his field that I have come across in my 30+ years practicing environmental law across the United States.

Subject: CASAC Nomination - Dr. Michael Honeycutt - Public Comment Submittal
Date: Tuesday, June 21, 2016 3:21:12 PM

Mr. Yeow –

The following is a recommendation in support of the nomination of Dr. Michael Honeycutt to serve on CASAC.

My name is Jed Anderson and I am an environmental attorney in Houston, Texas. I was formerly with Baker Botts and Vinson & Elkins—and a Professor of Law at the University of Houston Law School where I taught the Clean Air Act. I know Dr. Honeycutt and have watch his work closely in Texas for many years.

Dr. Honeycutt is extremely well qualified, articulate, and brings a wealth of knowledge on the nexus between air quality and health. It is hard to imagine a person who could better serve CASAC. Dr. Honeycutt has testified several times before Congress and is renowned and respected in his field. His voice and discernment would be significant assets to CASAC. Even to those who may disagree with some of his points, Dr. Honeycutt seems to be respected and admired. Dr. Honeycutt from my observations always appears to listen to other's opinions, and to engage with them in ways that are respectful and make whatever decisions are made—that much better.

I emphatically endorse the nomination of Dr. Michael Honeycutt to serve on CASAC. If you have questions of me or I can be of further assistance to you in your discernment process, please let me know. - Jed

From: Lucy Fraiser
To: Yeow, Aaron
Subject: Dr. Michael Honeycutt"s Nomination to CASAC
Date: Tuesday, June 21, 2016 3:37:38 PM

Dear Mr. Yeow,

I am writing to convey my support for the nomination of Dr. Michael Honeycutt to the CASAC. I do not know of any state agency representative that is better qualified to provide unbiased strategic advice to the EPA.

I worked with Dr. Honeycutt at the TCEQ in the 1990's and continue to have professional interactions with him in his current position as Director of the Toxicology Division at the TCEQ. I find Dr. Honeycutt to be sincere and honest with regard to his opinions, but also someone that is adept at consensus building. He has a knack for collaborative problem solving, a valuable trait in members of committees such as the CASAC.

Dr. Honeycutt is a recognized expert in Toxicology and the application of toxicology in the development of health-based regulatory levels. Under his direction, the TCEQ has vastly improved the scientific underpinnings of the health-based levels published by the agency and used in air permitting and remediation projects in the state of Texas. Dr. Honeycutt is responsible for establishing consistent and well-documented procedures for developing inhalation and oral toxicity benchmarks used by the TCEQ, as well as external peer review procedures that help to ensure that the benchmarks consider the latest science and are of the highest quality.

Dr. Honeycutt is also a highly-respected expert on the science and implementation of the NAAQS. He directs a team of highly-qualified toxicologists that are specifically focused on the risk assessment of criteria air pollutants. He is currently coordinating the conduct of a study on ozone exposure and asthma incidence, which is being conducted by in-house TCEQ staff in collaboration with external and highly-respected researchers. To my knowledge, Dr. Honeycutt is the only TCEQ Toxicology Division Director to initiate health effects research projects sponsored by the TCEQ. He was also directly responsible for health effects research projects conducted either in-house or by collaborating researchers in the past on weight-of-evidence analysis, near-roadway pollutant concentrations, and health studies conducted in fence-line neighborhoods.

Finally, Dr. Honeycutt has extensive human health risk assessment expertise, which represents a void on the CASAC that should be filled. He has expertise in the areas of chemical toxicokinetics and toxicodynamics, has performed numerous human health and environmental risk assessments, including direct (inhalation) and indirect exposure pathways (oral and dermal) from air emissions of permitted sources, and has overseen the review of many risk assessments submitted to the TCEQ in support of closure activities at Resource Conservation and Recovery Act (RCRA) and state Superfund sites.

I appreciate your consideration of my comments in connection with Dr. Honeycutt's nomination.

I would like to support the nomination of Dr. Honeycutt to the state position on CASAC.
I have worked with Dr. Honeycutt for many years dealing with air quality issues in the Barnett Shale. Dr. Honeycutt is very unique. While he has tremendous scientific knowledge about toxic air pollutants and their health effects, he is very good at using more simple language to express that knowledge to people like myself who do not have as much scientific background. Dr. Honeycutt and I have not always agreed on certain issues, but I always knew he was speaking truthfully and I always valued his opinion.

Dear Mr. Yeow,

I have just learned that Michael Honeycutt of the TCEQ has been nominated to fill a position on CASAC. I am writing to let you know that I whole heartedly support his nomination. I have known Dr. Honeycutt for many years. I was formerly the General Counsel of the TNRCC (predecessor agency to the TCEQ) from 1991 – 1995. Since 1995 I have been in private practice but have maintained many relationships at the TCEQ. I have always found Dr. Honeycutt to provide accurate information on matters of health effects, toxicity and review of ambient air monitoring. I have often reached out to him to get a better understanding of the agency's analysis and decision making process on these topics and have found him to be knowledgeable, thorough and accurate in his explanations. In my opinion he would be a wonderful resource and make a great contribution as a member of CASAC.

Sincerely,

Celina Romero

Subject: Administrator's appointment to the Clean Air Scientific Advisory Committee (CASAC)
Date: Wednesday, June 22, 2016 11:30:07 AM

Dear Mr. Yeow,

I am pleased to support the appointment of Dr. Michael Honeycutt to the Clean Air Scientific Advisory Committee (CASAC) of the United States Environmental Protection Agency. Dr. Honeycutt has twenty years of toxicology and risk assessment experience with the State of Texas, which has a large and diverse geography, population, and range of emission sources, much like the State of California. He is well-versed in the literature dealing with the health effects of air pollutants and has a proven record of applying risk assessment principles to arrive at regulatory decisions that are health-protective yet economically and technically feasible. As a human health risk assessor, he is particularly adept at integrating toxicology, human clinical, and epidemiology data, a skill set that would greatly benefit the CASAC. Dr. Honeycutt is an exceptionally qualified candidate and I encourage you to select him to serve on CASAC.

Dear Aaron Yeow,

I would like to express my enthusiastic support for Dr. Michael E. Honeycutt's appointment to the EPA Clean Air Scientific Advisory Committee.

Having participated in a 2015 3-day workshop (with 200 attendees) for the Texas Commission on Environmental Quality, that he organized and chaired on "Ozone NAAQ Science and Policy", I was impressed by his objectivity on, and mastery of air-quality issues.

My experience on the EPA CASAC-PM subcommittee convinces me that Dr. Honeycutt's participation on CASAC will be of great service to the EPA as well as to the future health of the American public. His Curriculum Vitae attests to his qualifications and long dedication to the role of science in air-quality regulation. He is excellent in group deliberations, respects all viewpoints, has great depth of expertise, and is hard-working by nature.

In sum, he will both add expertise to, and help maintain the credibility of the EPA's CASAC.

Thank you for the opportunity to submit this recommendation.

Most sincerely,

Robert F. Phalen

Subject: CASAC nomination public comment for Michael Honeycutt
Date: Friday, June 24, 2016 12:25:59 PM

Dear Mr. Aaron Yeow,

I am honored to submit this email of support for Dr. Michael Honeycutt's nomination for the state position on EPA's Clean Air Scientific Advisory Committee. His awards, expertise in the field of toxicology, management experience, communication skills, contributions to the literature (i.e., articles and book chapters), and health promotion in communities that are highlighted in his curriculum vita (CV) only touch the surface of Dr. Honeycutt's dedicated spirit and leadership qualities. For example, his CV doesn't capture his heart for helping others (e.g., quality of life improvement, students, etc.). I was grateful that he made time in his busy schedule to come speak to my public health nursing students about toxicology, environmental health, and share "real world" examples that fostered the students' learning. The students were engaged by his interactive presentation and they spoke highly of him. As he has genuinely poured into my students, I think he will invest himself in the same manner in service to the committee. I believe Dr. Honeycutt will be an amazing asset to the EPA's Clean Air Scientific Advisory Committee.

Respectfully,

Shalonda

Aaron:
I attended a webinar at which Dr. Honeycutt was the central presenter last year.
That webinar dealt specifically with Ozone and his knowledge and understanding were clearly encyclopedic. He also brought a level of common sense to his presentation that was a welcome change from the run of the mill presentations in such venues.
Please accept this email as my support for Dr. Honeycutt's nomination to the CASAC.
Thanks for your time and attention.

To who it may concern,

I am writing to endorse the selection of Dr. Michael Honeycutt as a nominee to the Clean Air Scientific Advisory Committee. I have known Dr. Honeycutt for more than 25 years. I served as a member of his graduate advisory committee at the University of Louisiana, Monroe where I was directly involved in his research. We have published together. I have continued to follow Dr. Honeycutt's career, particularly as he has been involved in decisions that have drawn close public scrutiny. I have followed his work in the area of ozone standards where he and his team offered an extensive, critical review of EPA recommendations on ozone levels. I have read Dr. Honeycutt's analysis and I find the review to be insightful in pointing out the limitations of the models employed in the EPA's "Health Risk and Exposure Assessment for Ozone." Dr. Honeycutt recognizes the importance of improved research, better data and stronger models, all of which are much needed for the best decisions in the public interest. In my experience, this is typical of Dr. Honeycutt's approach to science – I believe he fairly reviews the best-available data and uses careful interpretations to arrive at the best decisions to serve the public.

Throughout all of my experience with Dr. Honeycutt I have been consistently impressed with the quality of his science, his dedication to knowing as much as possible about any issue, the absence of bias in his interpretations and the application of clear, critical analysis of available data. He has been thoroughly trustworthy, smart and insightful as a toxicologist. He consistently seeks the input of opposing views and is open to scrutiny and self-examination of bias. There is no question of his desire to serve the public good. He is a careful, scrupulous scientist.

Sincerely,

Mr. Yeow,
I am writing in support of Dr. Michael Honeycutt's nomination to join the Clean Air Scientific Advisory Committee (CASAC). I have known Dr. Honeycutt since 1996 when we both worked at the Texas Commission on Environmental Quality, and since 2002 when I joined Valero as in-house counsel. It has always been a pleasure to work with Dr. Honeycutt both as a colleague and, on the other side of the equation, as a regulated entity. What I have found most impressive about Dr. Honeycutt is his consistent and steadfast loyalty to science with a dedication that does not waver regardless of the audience, the politics around an issue, or the tug of personal or professional relationships. He is without a doubt one of the smartest and most intellectually honest people I have ever met and, luckily for me, has the rare talent of being able to distill complicated technical issues so that ordinary people can understand them. On a more personal note I will tell you that Michael is also an extremely thoughtful and all-around agreeable person. He's the type of super-smart person you want to work with and I cannot imagine a better addition to CASAC.
Thank you for the opportunity to provide comments in support of Dr. Honeycutt. If you have any questions please do not hesitate to contact me at (210) 345-5894.

Date: Tuesday, June 28, 2016 12:22:53 PM

Dear Mr. Yeow,

I am writing to express my enthusiastic support for the nomination of Dr. Michael Honeycutt for the Clean Air Scientific Advisory Committee.

Before coming to NASA 8 years ago, I worked for Dr. Honeycutt in the Toxicology Section of the Texas Commission on Environmental Quality. Dr. Honeycutt has worked tirelessly over the past 20 years to ensure acceptable air quality for the people of the State of Texas. He has focused pollution reduction efforts through the establishment of an air pollutant watch list, which has led to the successful reduction of ambient pollution to levels that are no longer of potential concern for human health in several key areas. He exhibits and expects the highest levels of scientific integrity from his team. His pursuit of scientific excellence is reflected in the development of peer-reviewed, scientifically sound guidelines for establishing chemical-specific air concentrations set to protect human health and welfare. He also oversees the review of analytical testing methodologies and data for acceptability in human health risk assessments, and oversees and conducts critical toxicological health effects reviews of the results of ambient monitoring projects. Taken together, I believe this experience will enable him to critically evaluate the technical bases for EPA's national ambient air quality standards and address research related to air quality, sources of air pollution, and strategies to attain and maintain air quality standards.

I strongly encourage you to select Dr. Michael Honeycutt as a CASAC member. His expertise is ideal for serving as an advisor to the EPA as you strive to make scientifically sound decisions regarding the national ambient air quality standards.

Sincerely,

Subject: FW: Support for Dr. Honeycutt Appointment

Dear Mr. Yeow,

I would like to support Dr. Michael Honeycutt for appointment to the Clean Air Scientific Advisory Committee (CASAC) for the following reasons:

- He is at the forefront of toxicology and has extensive knowledge of the National Ambient Air Quality Standards (NAAQS) and issues that states face in planning for those NAAQS
- He has a wide range of experience dealing with multiple industries and air quality issues
- He is a board certified toxicologist with deep technical knowledge and experience in assessing the health effects of air pollution, as such he's knowledgeable about the uncertainties associated with trying to quantify health effects and setting a standard that adequately protects public health
- He is keenly aware of the policy ramifications of the EPA's scientific assessments
- He would bring a geographical diversity to CASAC, not being from the West or the East Coast

Thanks,

Bob Dickinson, Director

From:	Ralph Marquez
To:	Yeow, Aaron
Subject:	CASAC nominations
Date:	Tuesday, June 28, 2016 8:04:59 PM

Ms. Yeow:
It is my pleasure to support Dr. Michael Honeycutt for an appontment to CASAC.
As a Commissioner at the Texas Commission on Environmental Quality from 1995 to 2006, I had the opportunity to observe Dr. Honeycutt's work ethics and professionalism. He is outstanding in both areas.
As an example of his initiative, Dr. Honeycutt proposed and executed a program to review the environmental safety limits of many chemicals manufctured or used in Texas. He developed this program to inlude peer review of the work of his toxicology team which attrcted many well recognized toxicologists throughout the country and bacame a model for these types of evaluations.
Dr. Honeycutt is not only an excelent and reputable toxicologist, he has the ability to communicate this difficult subject in a plain and clear language. He has shared his knowledge frequently with groups ranging from schools to Congressional committees.

I sincerely believe that Dr. Honeycutt will be an asset to CASAC and will help improve the practice of using the best scientific knowledge in setting air standards.

I strongly support the appointment of Dr. Honeycutt to CASAC.

Mr. Aaron Yeow

Designated Federal Officer

U.S. Environmental Protection Agency

Dear Mr. Yeow,

I am pleased to support the candidacy of Dr. Michael Honeycutt for the U.S. Environmental Protection Agency's Clean Air Scientific Advisory Committee. Dr. Honeycutt is currently Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ). He has maintained employment at TCEQ since 1996 and manages his staff of Toxicologists. He routinely oversees health effects reviews of air permit applications, oversees the review of the results of ambient air monitoring projects, and oversees the reviews of human health risk assessment for hazardous waste sites. He is also overseeing the development of inhalation toxicity factors for 98 chemicals using techniques he was involved with developing at TCEQ.

Dr. Honeycutt also has extensive experience in human health and environmental risk assessment, particularly as they related to issues concerning air quality. He has served on numerous external scientific committees, participated in and helped organize five international scientific conferences and has provided invited testimony at several congressional hearings. He also holds both a B.S. and Ph.D. in Toxicology from the University of Louisiana at Monroe.

Based on Dr. Honeycutt's experience and education, I believe that he would be extremely well qualified to serve on the U.S. Environmental Protection Agency's Clean Air Scientific Advisory Committee. In my personal interactions with Dr. Honeycutt, he is an excellent communicator, works well in group settings, and is a very nice person to be around. I think he would make an excellent and highly contributory member of your committee. Based on my past experience with Scientific Advisory Board and Scientific Advisory Panel EPA committees and, particularly, as the past Chairman of the Environmental Protection Agency's Federal Insecticide, Fungicide, and Rodenticide Act Scientific Advisory Panel from 1999 to 2002, I would very much recommend Dr. Honeycutt to an EPA committee, particularly as related to clean air, toxic substances, and human and environmental risk assessment.

Mr. Aaron Yeow, Designated Federal Officer, USEPA yeow.aaron@epa.gov
Dear Mr Yeow,
Concerning the above subject matter I am writing to you because I have been asked to support the candidature of Dr Michael Honeycutt for appointment to USEPA's Clean Air Scientific Committee believing he meets all the necessary criteria as summarised below and as provided in his CV (attached herein).

BACKGROUND PROCESS FOR COMMITTEE/PANEL FORMATION

The Clean Air Scientific Advisory Committee (CASAC) was established under section 109(d)(2) of the Clean Air Act (CAA or Act) (42 U.S.C. 7409) as an independent scientific advisory committee. The CASAC provides advice, information and recommendations on the scientific and technical aspects of air quality criteria and NAAQS under sections 108 and 109 of the Act. As required under the CAA section 109(d), the CASAC is composed of seven members, with at least one member of the National Academy of Sciences, one physician, and one person representing state air pollution control agencies. The SAB Staff Office is seeking nominations of experts to serve on the CASAC who represent state air pollution control agencies and who have demonstrated high levels of competence, knowledge, and expertise in scientific/technical fields relevant to air pollution and air quality issues. The SAB Staff Office is especially interested in scientists with expertise described above who have knowledge and experience in air quality relating to criteria pollutants.

Honeycutt,Michael
Texas Commission on Environmental Quality
Dr. Michael Honeycutt is the director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ). He has been employed by the TCEQ since 1996 and has managed the division of 14 toxicologists since 2003. His responsibilities include overseeing health effects reviews of air permit applications, overseeing the review of the results of ambient air monitoring projects, and overseeing the reviews of human health risk assessments for hazardous waste sites. Dr. Honeycutt spearheaded the updating of TCEQ's method for deriving chemical toxicity factors, which has been through two independent external scientific peer reviews and multiple rounds of public comment. He has overseen the development of inhalation toxicity factors for 98 chemicals using this process and has published numerous articles and book chapters on chemical risk assessment. Recent areas of research include risk analysis and characterization of emissions from natural gas operations and hydraulic fracturing, weight-of-evidence analyses in chemical risk assessment, and concentration-response considerations in ozone risk assessment. He has extensive experience and knowledge of the risk assessment and the regulation of both criteria and non-criteria air pollutants. Dr. Honeycutt serves as a technical resource in the areas of chemical toxicokinetics and toxicodynamics, and human health and environmental risk assessment, particularly as they relate to issues concerning air and water quality, drinking water contamination, and soil contamination. Dr. Honeycutt is an adjunct professor in two departments at Texas A&M University, serves or has served on numerous external scientific committees, participated in and helped organize five international scientific conferences, and has provided invited testimony at several Congressional hearings. He also serves as an expert witness in public and state legislative hearings, participates in public meetings, and has conducted hundreds of media interviews. He earned both a B.S. and Ph.D. in Toxicology from the University of Louisiana at Monroe. His research is funded entirely by the State of Texas.

As a fellow research worker familiar with the intricacies and controversies characteristic of modern air pollution/air quality science, I first became aware around 5 years ago of Dr Honeycutt's contribution to the field through his (and my) association - via an email address list coordinated by US Army Physician Dr John Dale Dunn - with a group of (mainly US-based) scientists of various disciplines who are unconvinced of the logic frequently promulgated by the regulatory authorities involved i.e. as a means of justifying their approach namely:
a) the health impact (cf. changes in mortality incidence allegedly caused by urban air pollution) is reliably assessed by making measurements of particular matter mass e.g. PM10 and/or PM2.5 as their 24hr and/or annual averages on samples of air taken outdoors - **false premise** (given that the established mortality relative risk quotients RR ordinarily are close to 1.00 = zero effect coupled with the fact that those mostly affected are frail, elderly, people whose attributed health is susceptible to confounding unrelated to air pollution *per se*)
b) PM10/2.5 are intrinsically toxic by virtue of their mass (concentration) irrespective of any variation in chemical composition and presence of weighable substances that are relatively inert chemically and or biologically speaking - **false premise** (given the absence of a specific, coherent, biological mechanism)

c) because PM2.5 (presumably) is more toxic than PM10 on a mass/mass basis, measurement of its concentration in a given volume of air provides a more reliable indication of health impact - **questionable** (given that the particle fraction designated as PM10 ipso facto necessarily includes/ought to include all the PM2.5 present)
d) PM is directly causal (i.e. harmful) health wise irrespective of any effect potential or otherwise of the (inherently toxic) gaseous and/or volatile/semi-volatile co-pollutants simultaneously present - **false premise** (PM is used as a convenient surrogate - nothing more nothing less)
e) air pollution allegedly causes premature mortality of a significant extent and degree such that remediation of the said pollution according to some arbitrarily set (blanket) standard automatically saves lives or prevents deaths of considerable monetary value to society this far outweighing the costs involved - **false premise** (given that, amongst other things, the activities responsible for the pollution often have positive economic consequences plus help preserve/protect public health in their own right whence enforced elimination of such pollution without due consideration of all the consequences may well mean that in practice the cure is worse than the complaint)
f) estimation of numbers of "premature" deaths allegedly attributable to air pollution (measured as PM) such that by using V(O)SL of US$9 million approx. per life potentially able to be saved highly favourable benefit/cost ratios are thereby made available - **false premise***
*NB rather than numbers of premature deaths, changes in life expectancy typically e.g. in the USA estimated as just a few months maximum are a more realistic measurement cf. http://www.euro.who.int/__data/assets/pdf_file/0006/189051/Health-effects-of-particulate-matter-final-Eng.pdf plus, also, Dr Honeycutt's Power Point lecture attached available at:
http://science.house.gov/sites/republicans.science.house.gov/files/documents/Honeycutt%20Power%20Point%20PDF.pdf
. This being so should remediation of air pollution, as claimed, improve health this would be expected to contribute to the general trend of steadily increasing life expectancy with its attendant fiscal strains (i.e. increased costs). On the other hand it is conceivable that remediation of air pollution, through increased levels of stress of different kinds, has an adverse effect on public health in which case decreased life expectancy (effects) is to be expected in some cases.
g) PM is unique (in comparison with the other pollutants present) in that no threshold exists below which the toxic effect ceases/disappears - **false premise** (because , ordinarily, "the dose makes the poison" one is entitled to set a lower limit below which to all intents and purposes the pollutant in question is "safe" with there being no obvious reason why in practice PM should be treated differently to the other recognized categories of pollutant in this respect).
etc., etc.
As can be seen by referring to the 2 attachments authored by Dr Honeycutt included herein I think it can be safely assumed that he is skeptical of many of the tenets of modern day air pollution regulatory science as summarised above. In the final analysis, actual consequences of a particular action are what counts public health wise. Given that the estimates uitilised as the basis of government policy are typically founded more on the precautionary principle (PP) involving tenuous hypotheses as discussed above than anything concrete, this amounts to a luxury we can no longer afford (if we ever did!). Viewed in this context, Dr Honeycutt in my opinion is someone well suited to helping the Clean Air Scientific Advisory Committee (CASAC) formulate the new course it desparately needs if it is to address adequately the complex problems of ambient air quality control and/or maintenance we face both outdoors and indoors (where we spend most of our lives) in this day and age.
Yours faithfully,
John Hoare,
Secretary, AIR Inc

Dear Mr. Yeow:

July 5th 2016

Mr. Aaron Yeow

Designated Federal Officer

Science Advisory Board (SAB) Staff Office, Environmental Protection Agency (EPA)

Dear Mr. Yeow:

This letter is in support of the nomination of Dr. Michael Honeycutt for a position on the Environmental Protection Agency's Clean Air Scientific Advisory Committee (CASAC).

For the past several years, Dr. Honeycutt has directed the toxicology division of the Texas Commission on Environmental Quality (TCEQ). Because of his position at TCEQ, I have interacted with Dr. Honeycutt on several occasions. What's more, I have had extensive discussions with his staff regarding technical issues pertaining to air quality. As a result of these numerous discussions, I have found the toxicology division, as a whole, and Dr. Honeycutt, in particular, to have high levels of competence, knowledge, and expertise in scientific/technical fields relevant to air pollution and air quality issues – these exact qualities the EPA is seeking.

Throughout our numerous interactions, I have found a high level of scientific quality from evaluations provided by the toxicology division of TCEQ, and this is due in large part to processes and analytical procedures that Dr. Honeycutt has established. In addition to using technical information to inform TCEQ decision making, the toxicology division has provided a forum to receive and analyze relevant information from external stakeholder sources to ensure decisions are made with the best available information. External comments are encouraged, reviewed and respected, and, following TCEQ consideration, are either incorporated in TCEQ decisions, or are not included with specific rationale provided. This demonstrates a commitment to consider all information and provides evidence for what Dr. Honeycutt has accomplished at TCEQ. As a result, the toxicology division of TCEQ has provided numerous programs to improve the air quality across the state. Finally, the EPA would benefit from Dr. Honeycutt as a committee member as he provides perspectives from a State official who would have to deal with the very same issues EPA faces regarding air quality.

It is without hesitation that I support the placement of Dr. Honeycutt to this important committee. Please do not hesitate to contact me if you require additional information.

Thanks

RE: Recommendation for Dr. Michael Honeycutt for EPA's Clean Air Scientific Advisory Committee

Dear Mr. Yeow,

I am writing this note to recommend Dr. Michael Honeycutt for a position with the EPA's Clean Air Scientific Advisory Committee (CASAC). Undoubtedly, Dr. Honeycutt will be an outstanding and productive member of CASAC, and provide thoughtful leadership. I have known Dr. Honeycutt for almost 20 years and have always been impressed with his deep understanding of air pollution issues, the toxicology and epidemiology associated with criteria pollutants and other contaminants in air (and other media), and his keen risk communication skills, both verbal and written.

His position as the Toxicology Division Director at the Texas Commission on Environmental Quality (TCEQ) has been one of success and growth. He has championed many complex air pollution initiatives and studies; sometimes controversial but always with great scientific integrity and acumen. He is highly regarded in his field, and has improved the regulatory/toxicology processes within the TCEQ since he began his tenure there. Dr. Honeycutt is a team player that facilitates difficult discussions and participates in scientific discourse even with opposing viewpoints.

I have worked with many toxicologists in my 25+ year career, and few possess the ability to thoroughly evaluate large data sets and communicate issues in as skilled of a manner as Dr. Honeycutt. I wholly believe that he will be a tremendous asset to CASAC, and it is with great confidence that I recommend him for your position.

I can be reached via email at khtyndall@gmail.com if you have any questions or need additional information.

Kind regards,

Kirby Tyndall, Ph.D., DABT

Subject:	CASAC Nomination
Date:	Thursday, July 07, 2016 10:09:22 AM

Dear Mr. Yeow:

I would like to recommend Dr. Michael Honeycutt for a position on the CASAC.

I used to work in the TCEQ Toxicology Division that Mike is the head of now. I have known Mike for quite a few years and I have been impressed with his leadership in the agency and his adherence to using the best science in the decision-making process. With all of the industry, politics, and air pollution issues that come up in a large state like Texas, the job of the regulator is not an easy one. Mike has done very well in his tenure here in Texas. He has not always agreed with EPA positions on NAAQSs and other policies and I think that would be an asset to the CASAC. I'm sure you don't just want "yes men and women" on the Committee.

In conclusion, it is my opinion that Dr. Honeycutt would be an excellent choice for a position on the CASAC.

Thank you for your time and consideration,

Dr. Thomas Dydek, PhD, DABT, PE

Dear Mr. Yeow:

This email is provided in support for the appointment of Dr. Michael Honeycutt to the CASAC.

I have worked with Dr. Honeycutt on several occasions and have found his expertise and level of knowledge in the areas of air pollution / air quality to be substantial. In addition, Dr. Honeycutt is able to state his positions in a fashion that clearly demonstrates both his eloquence and competence. In the past, Dr. Honeycutt has testified before the US Congress in a clear and convincing way.

For these reasons, Dr. Honeycutt would, in my opinion, provide valuable expertise and thoughtfulness as a CASAC member.

Kind regards and be well.

Dear Mr. Yeow,

I enthusiastically support Dr. Michael E. Honeycutt, who is being considered for the Clean Air Scientific Advisory Committee (CASAC) at the United States Environmental Protection Agency. Dr. Honeycutt is currently the Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ), the environmental agency for the State of Texas with a tremendous array of responsibilities for complex issues, including air quality. Dr. Honeycutt is a highly respected toxicologist with a high level of responsibility at TCEQ and he has an excellent reputation for being ethical, principled, and thoughtful. He has enjoyed a superb record of achievement in regulatory and environmental health in the State of Texas and would bring substantive scientific and regulatory perspectives and judgment to the CASAC.

Dr. Honeycutt has numerous publications and book chapters in the area of regulatory toxicology and risk assessment. He has also participated in many workshops related to dose response approaches in relation to human risk assessment. Based on his many contributions to regulatory toxicology including his expertise in air quality, and his superb work ethic, I strongly feel he is very well qualified to be on the CASAC of the US EPA.

Thank you very much for your consideration.

Please do not hesitate to contact me should you have any questions or need additional information.

Best Regards,

Moorthy

Dear Mr. Yeow

I am writing in support of the nomination of Michael Honeycutt to the Clean Air Scientific Advisory Committee. I am currently a Distinguished Research Fellow at ScitoVation, LLC. Previously I was the Director of the Center for Human Health Assessment at the Hamner Institutes for Health Sciences. I have known and interacted with Michael Honeycutt for many years and respect his integrity, his knowledge of risk assessment practices, and his scientific excellence. In his position as Director of the Toxicology Division of the Texas Commission on Environmental Quality, he has demonstrated the ability to marshal the best available science in support of complex decisions on environmental exposure issues. He has fostered the use of the newest techniques in risk assessments, including benchmark dose modeling and physiologically based pharmacokinetic modeling, and has played a major role in the Alliance for Risk Assessment's activities to improve risk assessment practice. He has a strong record of transparent, objective risk assessment practice at TCEQ and a reputation for high integrity and ethical standards. I was particularly impressed with his insightful remarks at a hearing of the House Energy & Commerce Subcommittee on Environment & the Economy on the EPA's IRIS program. In both his testimony and his responses to questions he showed an ability to avoid any perception of bias while providing clear and cogent evidence. I believe he would prove to be a highly valuable addition to the CASAC.

Sincerely,

Harvey J. Clewell III, PhD, DABT, FATS

Subject: Question about format for comments on CASAC candidates
Date: Tuesday, July 12, 2016 10:20:41 AM

I left you a brief, cryptic message a minute ago. I would like to know if statements of support for Dr. James Boylan as a CASAC candidate should be in the body of an e-mail or in a formal letter attached to an e-mail? I can do either way but wanted to know what you commonly prefer. Thanks.

John

Subject: Appointment to the USEPA's Clean Air Scientific Advisory Committee

Mr. Aaron Yeow, Designated Federal Officer, USEPA yeow.aaron@epa.gov
Dear Mr Yeow,
Concerning the above subject matter I am writing to you because I have been asked to support the candidature of Dr Michael Honeycutt for appointment to USEPA's Clean Air Scientific Committee believing he meets all the necessary criteria as summarised below and as provided in his CV (attached herein).

BACKGROUND PROCESS FOR COMMITTEE/PANEL FORMATION

The Clean Air Scientific Advisory Committee (CASAC) was established under section 109(d)(2) of the Clean Air Act (CAA or Act) (42 U.S.C. 7409) as an independent scientific advisory committee. The CASAC provides advice, information and recommendations on the scientific and technical aspects of air quality criteria and NAAQS under sections 108 and 109 of the Act. As required under the CAA section 109(d), the CASAC is composed of seven members, with at least one member of the National Academy of Sciences, one physician, and one person representing state air pollution control agencies. The SAB Staff Office is seeking nominations of experts to serve on the CASAC who represent state air pollution control agencies and who have demonstrated high levels of competence, knowledge, and expertise in scientific/technical fields relevant to air pollution and air quality issues. The SAB Staff Office is especially interested in scientists with expertise described above who have knowledge and experience in air quality relating to criteria pollutants.

Honeycutt,Michael
Texas Commission on Environmental Quality
Dr. Michael Honeycutt is the director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ). He has been employed by the TCEQ since 1996 and has managed the division of 14 toxicologists since 2003. His responsibilities include overseeing health effects reviews of air permit applications, overseeing the review of the results of ambient air monitoring projects, and overseeing the reviews of human health risk assessments for hazardous waste sites. Dr. Honeycutt spearheaded the updating of TCEQ's method for deriving chemical toxicity factors, which has been through two independent external scientific peer reviews and multiple rounds of public comment. He has overseen the development of inhalation toxicity factors for 98 chemicals using this process and has published numerous articles and book chapters on chemical risk assessment. Recent areas of research include risk analysis and characterization of emissions from natural gas operations and hydraulic fracturing, weight-of-evidence analyses in chemical risk assessment, and concentration-response considerations in ozone risk assessment. He has extensive experience and knowledge of the risk assessment and the regulation of both criteria and non-criteria air pollutants. Dr. Honeycutt serves as a technical resource in the areas of chemical toxicokinetics and toxicodynamics, and human health and environmental risk assessment, particularly as they relate to issues concerning air and water quality, drinking water contamination, and soil contamination. Dr. Honeycutt is an adjunct professor in two departments at Texas A&M University, serves or has served on numerous external scientific committees, participated in and helped organize five international scientific conferences, and has provided invited testimony at several Congressional hearings. He also

serves as an expert witness in public and state legislative hearings, participates in public meetings, and has conducted hundreds of media interviews. He earned both a B.S. and Ph.D. in Toxicology from the University of Louisiana at Monroe. His research is funded entirely by the State of Texas.

As a fellow research worker familiar with the intricacies and controversies characteristic of modern air pollution/air quality science, I first became aware around 5 years ago of Dr Honeycutt's contribution to the field through his (and my) association - via an email address list coordinated by US Army Physician Dr John Dale Dunn - with a group of (mainly US-based) scientists of various disciplines who are unconvinced of the logic frequently promulgated by the regulatory authorities involved i.e. as a means of justifying their approach namely:

a) the health impact (cf. changes in mortality incidence allegedly caused by urban air pollution) is reliably assessed by making measurements of particular matter mass e.g. PM10 and/or PM2.5 as their 24hr and/or annual averages on samples of air taken outdoors - **false premise** (given that the established mortality relative risk quotients RR ordinarily are close to 1.00 = zero effect coupled with the fact that those mostly affected are frail, elderly, people whose attributed health is susceptible to confounding unrelated to air pollution *per se*)

b) PM10/2.5 are intrinsically toxic by virtue of their mass (concentration) irrespective of any variation in chemical composition and presence of weighable substances that are relatively inert chemically and or biologically speaking - **false premise** (given the absence of a specific, coherent, biological mechanism)

c) because PM2.5 (presumably) is more toxic than PM10 on a mass/mass basis, measurement of its concentration in a given volume of air provides a more reliable indication of health impact - **questionable** (given that the particle fraction designated as PM10 ipso facto necessarily includes/ought to include all the PM2.5 present)

d) PM is directly causal (i.e. harmful) health wise irrespective of any effect potential or otherwise of the (inherently toxic) gaseous and/or volatile/semi-volatile co-pollutants simultaneously present - **false premise** (PM is used as a convenient surrogate - nothing more nothing less)

e) air pollution allegedly causes premature mortality of a significant extent and degree such that remediation of the said pollution according to some arbitrarily set (blanket) standard automatically saves lives or prevents deaths of considerable monetary value to society this far outweighing the costs involved - **false premise** (given that, amongst other things, the activities responsible for the pollution often have positive economic consequences plus help preserve/protect public health in their own right whence enforced elimination of such pollution without due consideration of all the consequences may well mean that in practice the cure is worse than the complaint)

f) estimation of numbers of "premature" deaths allegedly attributable to air pollution (measured as PM) such that by using V(O)SL of US$9 million approx. per life potentially able to be saved highly favourable benefit/cost ratios are thereby made available - **false premise***

*NB rather than numbers of premature deaths, changes in life expectancy typically e.g. in the USA estimated as just a few months maximum are a more realistic measurement cf. http://www.euro.who.int/__data/assets/pdf_file/0006/189051/Health-effects-of-particulate-matter-final-Eng.pdf plus, also, Dr Honeycutt's Power Point lecture attached available at:

http://science.house.gov/sites/republicans.science.house.gov/files/documents/Honeycutt%20Power%20Point%20PDF.pdf

. This being so should remediation of air pollution, as claimed, improve health this would be expected to contribute to the general trend of steadily increasing life expectancy with its attendant fiscal strains (i.e. increased costs). On the other hand it is conceivable that remediation of air pollution, through increased levels of stress of different kinds, has an adverse effect on public health in which case decreased life expectancy (effects) is to be expected in some cases.

g) PM is unique (in comparison with the other pollutants present) in that no threshold exists below which the toxic effect ceases/disappears - **false premise** (because , ordinarily, "the dose makes the poison" one is entitled to set a lower limit below which to all intents and purposes the pollutant in question is "safe" with there being no obvious reason why in practice PM should be treated differently to the other recognized categories of pollutant in this respect).

etc., etc.

As can be seen by referring to the 2 attachments authored by Dr Honeycutt included herein I think it can be safely assumed that he is skeptical of many of the tenets of modern day air pollution regulatory science as summarised above. In the final analysis, actual consequences of a particular action are what counts public health wise. Given that the estimates uitilised as the basis of government policy are typically founded more on the precautionary principle (PP) involving tenuous hypotheses as discussed above than anything concrete, this amounts to a luxury we can no longer afford (if we ever did!). Viewed in this context, Dr Honeycutt in my opinion is someone well suited to helping the Clean Air Scientific Advisory Committee (CASAC) formulate the new course it desparately needs if it is to address adequately the complex problems of ambient air quality control and/or maintenance we face both outdoors and indoors (where we spend most of our lives) in this day and age.

Yours faithfully,

John Hoare,

Subject: Support of nomination of Dr. Michael Honeycutt for the Administrator's appointment to the Clean Air Scientific Advisory Committee (CASAC).

Dear Mr. Yeow:

July 5th 2016

Mr. Aaron Yeow
Designated Federal Officer
Science Advisory Board (SAB) Staff Office, Environmental Protection Agency (EPA)

Dear Mr. Yeow:

This letter is in support of the nomination of Dr. Michael Honeycutt for a position on the Environmental Protection Agency's Clean Air Scientific Advisory Committee (CASAC).

For the past several years, Dr. Honeycutt has directed the toxicology division of the Texas Commission on Environmental Quality (TCEQ). Because of his position at TCEQ, I have interacted with Dr. Honeycutt on several occasions. What's more, I have had extensive discussions with his staff regarding technical issues pertaining to air quality. As a result of these numerous discussions, I have found the toxicology division, as a whole, and Dr. Honeycutt, in particular, to have high levels of competence, knowledge, and expertise in scientific/technical fields relevant to air pollution and air quality issues – these exact qualities the EPA is seeking.

Throughout our numerous interactions, I have found a high level of scientific quality from evaluations provided by the toxicology division of TCEQ, and this is due in large part to processes and analytical procedures that Dr. Honeycutt has established. In addition to using technical information to inform TCEQ decision making, the toxicology division has provided a forum to receive and analyze relevant information from external stakeholder sources to ensure decisions are made with the best available information. External comments are encouraged, reviewed and respected, and, following TCEQ consideration, are either incorporated in TCEQ decisions, or are not included with specific rationale provided. This demonstrates a commitment to consider all information and provides evidence for what Dr. Honeycutt has accomplished at TCEQ. As a result, the toxicology division of TCEQ has provided numerous programs to improve the air quality across the state. Finally, the EPA would benefit from Dr. Honeycutt as a committee member as he provides

perspectives from a State official who would have to deal with the very same issues EPA faces regarding air quality.
It is without hesitation that I support the placement of Dr. Honeycutt to this important committee.
Please do not hesitate to contact me if you require additional information.
Thanks

July 5, 2016
Mr. Aaron Yeow
Designated Federal Officer
US Environmental Protection Agency
RE: Recommendation for Dr. Michael Honeycutt for EPA's Clean Air Scientific Advisory Committee
Dear Mr. Yeow,
I am writing this note to recommend Dr. Michael Honeycutt for a position with the EPA's Clean Air Scientific Advisory Committee (CASAC). Undoubtedly, Dr. Honeycutt will be an outstanding and productive member of CASAC, and provide thoughtful leadership. I have known Dr. Honeycutt for almost 20 years and have always been impressed with his deep understanding of air pollution issues, the toxicology and epidemiology associated with criteria pollutants and other contaminants in air (and other media), and his keen risk communication skills, both verbal and written.
His position as the Toxicology Division Director at the Texas Commission on Environmental Quality (TCEQ) has been one of success and growth. He has championed many complex air pollution initiatives and studies; sometimes controversial but always with great scientific integrity and acumen. He is highly regarded in his field, and has improved the regulatory/toxicology processes within the TCEQ since he began his tenure there. Dr. Honeycutt is a team player that facilitates difficult discussions and participates in scientific discourse even with opposing viewpoints.
I have worked with many toxicologists in my 25+ year career, and few possess the ability to thoroughly evaluate large data sets and communicate issues in as skilled of a manner as Dr. Honeycutt. I wholly believe that he will be a tremendous asset to CASAC, and it is with great confidence that I recommend him for your position.
I can be reached via email at khtyndall@gmail.com if you have any questions or need additional information.
Kind regards,
Kirby Tyndall, Ph.D., DABT

Subject: CASAC Nomination

Dear Mr. Yeow:

I would like to recommend Dr. Michael Honeycutt for a position on the CASAC.

I used to work in the TCEQ Toxicology Division that Mike is the head of now. I have known Mike for quite a few years and I have been impressed with his leadership in the agency and his adherence to using the best science in the decision-making process. With all of the industry, politics, and air pollution issues that come up in a large state like Texas, the job of the regulator is not an easy one. Mike has done very well in his tenure here in Texas. He has not always agreed with EPA positions on NAAQSs and other policies and I think that would be an asset to the CASAC. I'm sure you don't just want "yes men and women" on the Committee.

In conclusion, it is my opinion that Dr. Honeycutt would be an excellent choice for a position on the CASAC.

Thank you for your time and consideration,

Dr. Thomas Dydek, PhD, DABT, PE

Dear Mr. Yeow:

This email is provided in support for the appointment of Dr. Michael Honeycutt to the CASAC.

I have worked with Dr. Honeycutt on several occasions and have found his expertise and level of knowledge in the areas of air pollution / air quality to be substantial. In addition, Dr. Honeycutt is able to state his positions in a fashion that clearly demonstrates both his eloquence and competence. In the past, Dr. Honeycutt has testified before the US Congress in a clear and convincing way.

For these reasons, Dr. Honeycutt would, in my opinion, provide valuable expertise and thoughtfulness as a CASAC member.

Kind regards and be well.

Subject: Clean Air Scientific Advisory Committee (CASAC).

Dear Mr. Yeow,

I enthusiastically support Dr. Michael E. Honeycutt, who is being considered for the Clean Air Scientific Advisory Committee (CASAC) at the United States Environmental Protection Agency. Dr. Honeycutt is currently the Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ), the environmental agency for the State of Texas with a tremendous array of responsibilities for complex issues, including air quality. Dr. Honeycutt is a highly respected toxicologist with a high level of responsibility at TCEQ and he has an excellent reputation for being ethical, principled, and thoughtful. He has enjoyed a superb record of achievement in regulatory and environmental health in the State of Texas and would bring substantive scientific and regulatory perspectives and judgment to the CASAC.

Dr. Honeycutt has numerous publications and book chapters in the area of regulatory toxicology and risk assessment. He has also participated in many workshops related to dose response approaches in relation to human risk assessment. Based on his many contributions to regulatory toxicology including his expertise in air quality, and his superb work ethic, I strongly feel he is very well qualified to be on the CASAC of the US EPA.

Thank you very much for your consideration.

Please do not hesitate to contact me should you have any questions or need additional information.

Best Regards,

Moorthy

Subject: CASAC nominations

Dear Mr. Yeow

I am writing in support of the nomination of Michael Honeycutt to the Clean Air Scientific Advisory Committee. I am currently a Distinguished Research Fellow at ScitoVation, LLC. Previously I was the Director of the Center for Human Health Assessment at the Hamner Institutes for Health Sciences. I have known and interacted with Michael Honeycutt for many years and respect his integrity, his knowledge of risk assessment practices, and his scientific excellence. In his position as Director of the Toxicology Division of the Texas Commission on Environmental Quality, he has demonstrated the ability to marshal the best available science in support of complex decisions on environmental exposure issues. He has fostered the use of the newest techniques in risk assessments, including benchmark dose modeling and physiologically based pharmacokinetic modeling, and has played a major role in the Alliance for Risk Assessment's activities to improve risk assessment practice. He has a strong record of transparent, objective risk assessment practice at TCEQ and a reputation for high integrity and ethical standards. I was particularly impressed with his insightful remarks at a hearing of the House Energy & Commerce Subcommittee on Environment & the Economy on the EPA's IRIS program. In both his testimony and his responses to questions he showed an ability to avoid any perception of bias while providing clear and cogent evidence. I believe he would prove to be a highly valuable addition to the CASAC.

Sincerely,

Hi Aaron,

I see that George Allen's term as the "state agency" representative on CASAC is coming to an end and that the agency is seeking comments on a short list of new candidates. I'm not familiar with all the names, but have worked with Bart Croes, Donna Kenski, Tom Moore and (to a lesser extent) Jim Boylan, and think they would all be good choices. When my (2001-07) term on CASAC was expiring, the EPA DFO at the time, Fred Butterfield, asked for recommendations, and Bart and Donna were at the top of my list. As I recall, Donna wasn't able to serve her full term (b) (6) [redacted]. I think she did an excellent job during the few years she was on CASAC and I'm sure she would appreciate the opportunity to at least finish a full 6-year term.

I think Bart Croes would be a particularly good choice, given his outstanding reputation and invaluable long-term experience as Director of the CARB Research Division. Having served with Bart on several past committees and workgroups, I know he is an outstanding team player who provides exceptionally thoughtful and insightful advice. I had several very positive experiences seeking and receiving advice, contacts and scientific references from Bart during the time I was on CASAC. I think California has air quality and climate research and regulatory programs which are substantially more advanced than those in any other state, and EPA would benefit greatly from the scientific advise and practical experience Bart could provide to CASAC.

Clean Air Watch
1250 Connecticut Ave. NW
Suite 200
Washington, DC 20036

July 13, 2016

Dear Mr. Yeow:

Thank you so much for providing the public with the opportunity to comment on the candidates to join EPA's Clean Air Scientific Advisory Committee, as explained in EPA's June 20, 2016 notice.
https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/3CDA169D2187C6C885257F85006D3AF1/$File/List%20of%20Candidates-CASAC.pdf

Clean Air Watch, a non-profit environmental organization, has reviewed the candidates nominated to fill the state "seat" on CASAC. The committee performs a vital function and the perspective of a state-based scientist is critical.

On the whole, we are extremely impressed with the qualifications of the nominees. We would like, however, to single out for special praise Mr. Bart Croes of the California Air Resources Board. As your brief summary of his qualifications notes, Mr. Croes is a distinguished scientist with a wide-ranging background as well as particular knowledge of the sort of air quality issues that CASAC must confront. He has published numerous peer-reviewed articles on relevant topics, is both a present and former member of various National Research Council committees, and continues to have hands-on experience with challenging air pollutions issues in California.

In short, we don't believe EPA could find a better, more objective and more experienced member of CASAC. We hope you will give Mr. Croes appropriate consideration for the position.

Once again, thank you very much for the opportunity to comment.

Sincerely,

Frank O'Donnell
President,
Clean Air Watch

Washington, DC 20036
July 13, 2016
Dear Mr. Yeow:
Thank you so much for providing the public with the opportunity to comment on the candidates to join EPA's Clean Air Scientific Advisory Committee, as explained in EPA's June 20, 2016 notice.
https://yosemite.epa.gov/sab/sabproduct.nsf/LookupWebProjectsCurrentCASAC/3CDA169D2187C6C885257F85006D3AF1/$File/List%20of%20Candidates-CASAC.pdf
Clean Air Watch, a non-profit environmental organization, has reviewed the candidates nominated to fill the state "seat" on CASAC. The committee performs a vital function and the perspective of a state-based scientist is critical.
On the whole, we are extremely impressed with the qualifications of the nominees. We would like, however, to single out for special praise Mr. Bart Croes of the California Air Resources Board. As your brief summary of his qualifications notes, Mr. Croes is a distinguished scientist with a wide-ranging background as well as particular knowledge of the sort of air quality issues that CASAC must confront. He has published numerous peer-reviewed articles on relevant topics, is both a present and former member of various National Research Council committees, and continues to have hands-on experience with challenging air pollutions issues in California.
In short, we don't believe EPA could find a better, more objective and more experienced member of CASAC. We hope you will give Mr. Croes appropriate consideration for the position.
Once again, thank you very much for the opportunity to comment.
Sincerely,
Frank O'Donnell
President,
Clean Air Watch

Aaron,

It has been a while since we have seen each other… about of long of an absence of having a CASAC meeting as I can recall over the last decade. That said, I understand you all are consider Jim Boylan as the State/Local rep on CASAC. I think he would be a great choice, but then I may be biased (he was my Ph.D. student). Why do I say this:

First, and foremost, looking at CASAC's mission (scientific advice to the Administrator), you will be very hard pressed to find a person working at a state/local agency that has both the scientific background/qualification and the success within a state/local/tribe air quality management agency. He has published over 20 journal articles and has an h-index of over 10. Many professors have not done so well. The publications are all in areas germane to what CASAC is supposed to provide advice. Indeed, over the past 14 years (i.e., since graduating from Georgia Tech), Dr. Boylan has been providing scientific technical support to Georgia EPD in the form of air quality modeling and emission inventory development. This work has allowed Georgia EPD to develop designation recommendations, attainment demonstrations, and maintenance plans for ozone, PM2.5, SO2, NO2 and lead. In addition, many of the Georgia air quality rule revisions and PSD permit approvals were supported by his technical work. Dr. Boylan's efforts to integrate new scientific developments into the NAAQS implementation and planning efforts has made the Georgia EPD modeling team one of the most advanced state air quality modeling groups in the country. This is directly in line with the type of background CASAC desires, and Dr. Boylan is extremely knowledgeable in the relevant areas.

Second, knowing Dr. Boylan personally, he is the kind of guy who works collaboratively and constructively. He says what needs to be said, but is not overly verbose. He does his homework, and will do more than his share of the work. Oh… he was a great graduate student, too.

I hope this helps… I have known a number of the recent state representatives on CASAC, and I think Dr. Boylan will continue the legacy of having some really great people who can represent the state/local/tribal agencies with a scientific perspective.

Cheers,

Armistead (Ted) Russell

Mr. Aaron Yeow

Designated Federal Officer

Washington DC

RE: Supporting the nomination of Dr. Robert Blanz

2016 CASAC Annual Membership

Invitation for Public Comment on the List of Candidates

For the Environmental Protection Agency's

Clean Air Scientific Advisory Committee

Dear Mr. Aaron Yeow,

To support the nomination of Dr. Robert Blanz of Little Rock, Arkansas for service on the Clean Air Act Scientific Advisory Board (SAB) I take advantage of your June 20, 2016, invitation to comment.

Before Dr. Blanz left to serve the state of Arkansas, I served with him at a non-profit environmental organization known as the Arkansas Environmental Federation (AEF) and our work together taught me the depth of his technical skill with air quality issues, and his competence knowledge and expertise at digesting and then explaining the science and the problems in matters like the ones the SAB now faces. Dr. Blanz has first-hand knowledge of the difficulties that states like Arkansas face when they deal with background ozone levels and implement national ambient air quality standards. First-hand experience and the ability to explain it is why Dr. Blanz is an excellent choice for the EPA SAB.

Had my history with Dr. Blanz ended at the AEF that would have been enough for me to recommend him to the EPA SAB assignment, but there is more. Years ago, Dr. Blanz advised me as a client about environmental permitting and helped me understand the multidisciplinary work in the field of hazardous waste. With his help, the company got a permit for a treatment storage

and disposal facility, and his help related the disciplines that a sound EPA SAB member needs to understand the health aspects of the clean air act priority pollutants. (i.e., ozone, particulate matter, carbon monoxide, nitrogen oxides, sulfur dioxide, and lead) So I can also attest to Dr. Blanz's substantial expertise in the interrelated disciplines of human health and the environment that include analytical chemistry; ecological sciences and ecological assessment; engineering; geochemistry; hydrology; hydrogeology; modeling; risk assessment; statistics; and toxicology. I recommend him without reservations for this appointment. If you give him the assignment, he is going to help EPA.

Since 1999 I have worked for Ash Grove Cement Company, and I am currently their Director of Alternative Fuel and Resource Recovery with over thirty years of experience in environmental matters.

A longtime leader in the cement manufacturing industry, Ash Grove Cement Company, headquartered in Overland Park, Kan., operates cement plants in eight states across the country. The Ash Grove Cement Company has a strong and longstanding tradition of service, reliability, and quality that reaches back more than 134 years. A pioneer of the lime and cement industries, the Company was incorporated in Missouri in 1882 as the Ash Grove White Lime Association.

The eight cement plants operating in the Ash Grove system are some of the most efficient and best maintained in the country and have an annual production capacity of nearly 9 million tons of cement. Ash Grove is the sixth largest cement manufacturer in the United States. The quality portland and masonry cements produced at these plants are used in the construction of highways, bridges, commercial and industrial complexes, single and multi-family homes, and a myriad of other structures fundamental to America's economic vitality and quality of life.

Sincerely,

Michael Harrell

Subject: CASAC Nomination - Dr. Michael Honeycutt
Date: Friday, July 15, 2016 10:50:47 AM

Mr. Yeow,

In my role in air quality monitoring in Houston, Texas, I have worked with Dr. Honeycutt for over ten years. We have worked together on gaining an understanding of the complex chemistry that is the Houston air shed. Houston has seen an improvement in air quality over the past twenty years. The number ozone exceedance days has decreased, the monitored levels of volatile organic compounds has decreased and the monitored particulate matter levels have decreased. This has occurred in part due to the TCEQ following the air quality science and implementing regulations that attack the right problem. The Toxicology Division in TCEQ had a role to play in guiding the development of the regulations and Dr. Honeycutt was integral to that discussion. He understands the challenge we face in improving air quality. As evidenced by his body of work he understands the public health and environmental impact of improving air quality. The CASAC, EPA, and the public would be well served by adding Dr. Honeycutt to the committee.

I appreciate the opportunity to support Dr. Honeycutt's nomination to the CASAC.

Subject: In support Dr. Michael Honeycutt"s appointment to CASAC
Date: Friday, July 15, 2016 11:29:06 AM
Attachments: image004.png

I am writing in support of Dr. Michael Honeycutt's nomination to serve as the State Representative on the EPA's Clean Air Scientific Advisory Committee (CASAC).
Dr. Honeycutt is the Director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ) where he manages more than a dozen toxicologists focused on technical and risk assessment support for TCEQ. Dr. Honeycutt has extensive knowledge in the field of air quality with experience in ambient air monitoring, air permitting, air toxics and criteria air pollutants. He is recognized as an expert in the field of risk assessment and air quality and has provided expert testimony before Congress on the recently enacted NAAQS for ozone and the economic impact of air quality risk assessments.
While serving as the Toxicology Division Director of TCEQ, Dr. Honeycutt spearheaded the development of inhalation Effect Screening Levels (ESLs) and oral toxicology benchmark values. Under Dr. Honeycutt's leadership, TCEQ conducted risk assessments addressing important air quality toxicological data gaps, most notably establishing toxicity values for arsenic and 1,3-butadiene as well as five thousand toxicity factors for chemicals of particular interest to Texas. Dr. Honeycutt and his staff have always been available to share information and insight about their program and methodologies. TCEQ has set the bar for thoughtful and rigorous science-based risk assessments and is recognized as a valuable toxicological resource for state air quality agencies.
As a state government air quality toxicologist, Dr. Honeycutt has acquired experience and knowledge that would be an asset to the CASAC. He brings a pragmatic and state-focused perspective on national air-quality issues. He would be an excellent addition to committee. I fully endorse his nomination and appointment to CASAC.

Subject:	Comment on Candidates for EPA"s Clean Air Scientific Advisory Committee
Date:	Saturday, July 16, 2016 3:41:20 PM

Dear Mr. Yeow:

I am writing to support the appointment of Dr. Michael Honeycutt to EPA's Clean Air Scientific Advisory Committee (CASAC).

Dr. Honeycutt clearly meets the qualifications for appointment to CASAC. As director of the Toxicology Division of the Texas Commission on Environmental Quality, he is charged with evaluating human health risks associated with an array of air emissions from some of the largest and most complex industrial operations in the world. I believe that this type of work suits Dr. Honeycutt to CASAC's statutory mission, which is to "recommend to the [EPA] Administrator any new national ambient air quality standards and revisions of existing criteria and standards as may be appropriate" and to "advise the Administrator" on a variety of related matters. See 42 U.S.C. section 7409(d)(2)(B)-(C). Through the combination of his subject-matter expertise and his professional responsibilities, Dr. Honeycutt is uniquely well-suited to represent the Texas Commission on Environmental Quality and other state air pollution control agencies in the CASAC.

In addition, I believe that Dr. Honeycutt's participation in the CASAC will result in highly effective communications to the EPA Administrator that will benefit EPA's rulemaking process. I have personally observed Dr. Honeycutt's unique ability to convey the import of complex and detailed scientific information in a discrete and transparent manner. CASAC's recommendations form an important part of decisions on national ambient air quality standards and are studied by the public and by courts reviewing EPA's actions. By combining his communication abilities with his clear scientific expertise, I believe that Dr. Honeycutt would assist the CASAC not only in formulating appropriate and defensible recommendations, but also in maximizing the clarity and effectiveness of the transmission of those scientific judgments to the EPA Administrator.

To summarize, I believe that Dr. Honeycutt not only clearly meets the qualifications to be appointed to the CASAC, but also offers exceptional abilities to represent state agencies well and to strengthen the CASAC's recommendations to EPA. I encourage you and all others involved to support his appointment to the CASAC.

Kind Regards,

Zach Craft

Date: Tuesday, July 19, 2016 2:02:17 PM

Good afternoon Aaron! I hope that your week is off to a good start. I am writing to you today to share my impressions of and experiences with Dr. James Boylan. I have worked with Dr. Boylan for over 15 years, but it was during the VISTAS regional haze effort that I began to respect his ability to take very difficult concepts and not only break them down into reasonable parts, but to communicate those parts to people of varying degrees of understanding of the issues at hand. What I believe makes Jim an ideal addition to the Advisory Committee is his ability to bring a state perspective to the issues, and in particular, I admire his ability to think beyond the normal, accepted ways of thinking. To me, as a scientist, high praise for a person comes from their ability to question the expected and to provide alternative ways of thinking. Jim is a well-spoken individual, and is well liked and respected in his field. As such. I recommend Dr. Boylan's as a nominee for the Clear Air Scientific Advisory Committee.
Thank you for your time. I hope you have a great weekend.

Subject: CASAC Nomination - James Boylan

Good afternoon Aaron! I hope that your week is off to a good start. I am writing to you today to share my impressions of and experiences with Dr. James Boylan. I have worked with Dr. Boylan for over 15 years, but it was during the VISTAS regional haze effort that I began to respect his ability to take very difficult concepts and not only break them down into reasonable parts, but to communicate those parts to people of varying degrees of understanding of the issues at hand. What I believe makes Jim an ideal addition to the Advisory Committee is his ability to bring a state perspective to the issues, and in particular, I admire his ability to think beyond the normal, accepted ways of thinking. To me, as a scientist, high praise for a person comes from their ability to question the expected and to provide alternative ways of thinking. Jim is a well-spoken individual, and is well liked and respected in his field. As such. I recommend Dr. Boylan's as a nominee for the Clear Air Scientific Advisory Committee.

Thank you for your time. I hope you have a great weekend.

Date: July 19, 2016 at 3:05:30 PM EDT
To: "jones.enesta@epa.gov" <jones.enesta@epa.gov>
Subject: Question on CASAC Nominations

Enesta,
Hope you're doing well. I had a quick question about the process for nominating members of the Clean Air Scientific Advisory Committee:
Last month EPA solicited comment on a list of nominees to join the committee:
https://yosemite.epa.gov/sab/sabproduct.nsf/RSSRecentHappeningsCASAC/3CDA169D2187C6C885257F85006D3AF1/$File/List%20of%20Candidates-CASAC.pdf. That comment period is up tomorrow, July 20.
I was wondering if EPA will be making those comments publicly available somewhere? There's no regulations.gov docket set up as far as I can tell. I see the reminder that the comments are "subject to release" under FOIA, but I'd like to avoid that process if possible.
Thanks,
Patrick

From: Stephen Minick
To: Yeow, Aaron
Subject: Clean Air Scientific Advisory Committee Nomination
Date: Tuesday, July 19, 2016 7:50:35 PM

Mr. Yeow,

It is my understanding that Dr. Michael Honeycutt, Director of the Toxicology Division of the Texas Environmental Quality Commission (TCEQ) has been nominated to serve on EPA's Clean Air Scientific Advisory Committee (CASAC). Please allow me this opportunity to offer my endorsement of Dr. Honeycutt for this position and urge your favorable consideration of his selection.

I have known and worked with Dr. Honeycutt for a number of years, both as a colleague at the TCEQ and later as a representative of business interests and local chambers of commerce whose members are often interested in and affected by decisions of the agency based on guidance from Dr. Honeycutt and his staff. I can state absolutely that I have never worked with anyone more professional, more objective in their decision making or more technically capable in their field than Dr. Honeycutt. Even when I have preferred a different answer to a technical decision from him, I have never been able to critique his approach or the validity of his decision on a technical basis.

As the ongoing review and potential revision of air quality standards continues, the focus on the technical merit of those decisions will only increase as will the importance of insuring that the review process meet the highest technical and professional standards. You will find no candidate better capable of meeting this challenge than Dr. Honeycutt.

Thank you for the opportunity to provide a perspective on this decision and for your favorable consideration. If you have any questions or need additional information, please do not hesitate to contact me.

Date: Wednesday, July 20, 2016 8:49:02 AM

Mr. Aaron Yeow,

I am writing in support of Dr. Honeycutt for the state position on EPA's Clean Air Scientific Advisory Committee. Dr. Honeycutt is the director of the Toxicology Division of the Texas Commission on Environmental Quality (TCEQ), the state's air pollution control agency. In this position, he oversees the health effects reviews of air permit applications and ambient air monitoring projects. Dr. Honeycutt established a peer-reviewed process for developing toxicity factors used in TCEQ's air permitting process to evaluate air dispersion modeling's predicted impacts. Dr. Honeycutt demonstrates a high level of competence, knowledge, and expertise in the science relevant to air pollution and air quality issues. He often serves as an expert witness in public and state legislative hearings on a variety of air related topics. Dr. Honeycutt is an adjunct professor at Texas A&M University, has published many articles in the peer-reviewed literature, serves on external committees, and has provided invited testimony at Congressional hearings.

Thank you,

Hello Mr. Yeow: I would just like to state the Dr. Michael Honeycutt is an excellent choice to serve on this committee. In addition to his excellent credentials as a toxicologist especially in the area of human risk assessment he is a thoughtful caring scientist that has the unique ability to work with both scientist and citizens. I highly support Dr. Honeycutt for serving on this committee. Thanks Tommy

Stuart,

There is no docket for these. You would need to file a FOIA for them.

From: mark vickery
To: Yeow, Aaron
Subject: Nomination to Clean Air Scientific Advisory Committee
Date: Wednesday, July 20, 2016 1:25:44 PM

Dear Mr. Yeow,

I am pleased to write to you in support of Dr. Michael Honeycutt's nomination to the Clean Air Scientific Advisory Committee (CASAC). As the former Executive Director at the Texas Commission on Environmental Quality, I worked along side Dr. Honeycutt for over 16 years and for the last 4 years as a private consultant.

During my time at TCEQ, Dr. Honeycutt was an invaluable asset to the agency as an extraordinary scientist and a voice of reason. The TCEQ's mission is to protect the state's public health and natural resources consistent with sustainable economic development. Dr. Honeycutt is the embodiment of this mission as proven through his tireless efforts to bring defensible science and common sense to the multitude of issues involved in protecting the environment of our great state.

One of the things that impressed me the most about Dr. Honeycutt's work and that of his staff was the attention to detail used in evaluating regulatory decisions. It is a daunting task to simply read the voluminous information that accompanies regulatory rule making and guidance. Dr. Honeycutt always took the time to consider all of the scientific data and comments presented on issues regardless of where the information came from. This commitment to listen to all sides of an issue is critical in making sound decisions.

In addition, Dr. Honeycutt has the superior credentials and experience to serve on the CASAC. He has 20 years of experience in addressing the same types of issues that come before CASAC and has the skills to present scientific data in a manner that all of the general public can understand. This attribute is often underestimated in governmental bodies.

I whole heartedly support the nomination of Dr. Michael Honeycutt to the CASAC. Thank you for the opportunity to comment.

Sincerely,

Mark Vickery

This is written on behalf of Michael Honeycutt. I have known Michael for at least 20 years. During that time, Michael has been involved with a number of projects at the Texas environmental agency that involved one of my clients. Without exception, I have found Michael to be objective and scientific in the way that he approaches issues. He is not influenced by politics but only by scientific fact. As such, he would be a wonderful addition to the CASAC.

Michael has also been responsible for developing a highly respected team of toxicologists at the TCEQ. He is highly regarded at the agency and has shown tremendous leadership skills.

Please do not hesitate to call or write if you have any questions. Thanks.

Mr. Yeow,

Please see the Texas Chemical Council's attached letter of support for Dr. Honeycutt's nomination to the CASAC. These got stuck in my outbox yesterday while traveling. I hope you will still consider them during the appointment process. We greatly appreciate the opportunity to provide comments to EPA on this important issue.

Regards,

~Martha

Hi Aaron:

Now that the deadline has passed, does EPA plan to make public (or release upon request) all of the comments received? I'm asking because various parties are sending me their comments on an ad hoc basis, but I'd like to get a comprehensive picture of everything that has been submitted.

Thanks,

Sean

Dear Administrator McCarthy and Mr. Yeow,

We understand the Texas Commission on Environmental Quality Chief Toxicologist Michael Honeycutt is strongly campaigning for a position on the EPA's Clean Air Science Advisory Committee. Last year we submitted the attached comments stating our objections to his nomination. Although we have nothing to add to last year's comments, we are writing to renew our objections to Dr. Honeycutt's nomination. Dr. Honeycutt is an opponent of EPA science and would only politicize this important body. If you wish to discuss our objections further, please don't hesitate to contact us.

Mr. Butler,

You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)

The Federal Register notes provides background on the request for nominations and the role of the CASAC.

Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.

In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

Subject: EPA Clean Air Scientific Advisory Committee

Mr. Butler,

You have been nominated as a candidate for EPA's Clean Air Scientific Advisory Committee (CASAC) in response to a Federal Register Notice published on April 6, 2016 soliciting nominations (https://www.gpo.gov/fdsys/pkg/FR-2016-04-06/pdf/2016-07918.pdf)

The Federal Register notes provides background on the request for nominations and the role of the CASAC.

Please let me know if you would like to be considered, and if so, please submit a recent cv and biosketch. The biosketch should be 1-2 paragraphs and should highlight the following: current position, educational background, area of expertise and research activities, sources of research funding (for the last 2 years), and service on other advisory committees, professional societies. Biosketches are posted to the SAB/CASAC websites as part of candidate lists posted for public comment and as background on appointed members of committees and panels.

In addition, at this stage of our process, we are asking all candidates one additional question, "How will your background, skills, and experience contribute to the diversity of the chartered CASAC?"

-Aaron

---

Dear Dr. Kenski,

Congratulations on your invitation to serve on the EPA Clean Air Scientific Advisory Committee. Please find attached, your invitation letter from the EPA Administrator Gina McCarthy inviting you to serve as a member of the CASAC. Over the past year the CASAC has engaged in a variety of advisory activities of significant importance to the EPA. I have every expectation that in the days ahead the agency's need for the expert advice and guidance that only the CASAC can provide will be in even more demand. Your contribution to future agency efforts is much needed and appreciated.

Please return the acceptance form to Aaron Yeow, the Designated Federal Officer for the CASAC, by fax or email at your earliest convenience. A hard copy of the invitation letter is in the regular mail.

Thank you for your consideration.

Sincerely.

Christopher S. Zarba

Mr. Butler,

Thank you for your interest in serving on the U.S. Environmental Protection Agency (EPA) Clean Air Scientific Advisory Committee (CASAC). EPA has completed the process of appointing members to this Committee and unfortunately we are not able to include you on the Committee. We received many nominations and appointments were constrained by committee size and balance of disciplinary expertise.

The CASAC can undoubtedly benefit from your expertise. Accordingly, we hope that we may consider you for service on future CASAC Committees and Panels. Again, we appreciate your time and effort, and hope that you will consider working with the CASAC as new opportunities arise. Should you have any questions, please feel free to contact me by telephone or e-mail.
