Subject: May 15-16 Scheduling Request for Administrator Pruitt

Sydney,

I hope this finds you doing well. Cam Savage suggested that I reach out to you to submit my scheduling request for Administrator Pruitt to address our Indiana Leadership Forum group.

The Indiana Leadership Forum is a 501(c)(3) non-profit organization dedicated to educating Indiana's most talented business and community leaders about government, politics and policy to prepare them for greater civic involvement and leadership roles in their communities. The group was founded in 1994 by Indiana businessman, and former White House official, Al Hubbard. I have been serving as the Executive Director of the group since 2012. Each year, we bring a class of 25 professionals to Washington, D.C. toward the end of the program to meet with federal officials and policy experts.

We would greatly appreciate the opportunity to bring the group to the EPA to hear from Administrator Pruitt.

In terms of scheduling, we have time available on the afternoon of Monday, **May 15th** and also various times on Tuesday, **May 16th**. Is it possible for us to schedule a visit on one of those days?

I'm copying Kacey Shriner who is coordinating all the logistics for the trip.

Thank you so much for your time and consideration of this request.

Hi Sydney!

Yes, 10 a.m. on June 20th is perfect. Thank you!

Unfortunately, Mr. Donohue is traveling on May 9th. Any chance May 5th anytime between noon and 1:15 pm is he available? I realize the time is during the traditional lunch hour but we could make it a short meeting. Or what about May 11th? Thank you for your time and help.

Best regards,

Leila

Generally yes—but we might be able to figure something out for late morning on the 3rd although it's tight. We have meetings scheduled in the Senate that morning and a lunch on the House side.

On the 2nd (Tuesday) our morning meetings will be at the Willard- and if it's easier for him to come to us that morning but not the lunch meeting we can work that out too. That day he could have his pick of time slots for the afternoon after lunch (assuming the lunch hour still does not work). We have a dinner back at the Willard at 6pm but would be able to come to you up until about 4:30 I think.

If the 2nd really is too tight, we have a board meeting all day on the 1st… would he be interested at all in attending/speaking to- our opening dinner the evening of the 1st at the Willard? He wouldn't have to stay if he didn't want to… just an option. Congressman Bill Johnson (R-OH) will be attending that dinner as he has been a great ally of ours.

Ryan, I hope you are doing well with your transition to the EPA. I will be visiting Washington, DC with several of my colleagues in the commercial vehicle industry and hope that you could meet with us on Wednesday, April 19th.

The participants in the meeting would be the President of the Truck and Engine Manufacturers Association (EMA) and executives from the major manufacturers – Cummins, Navistar, Paccar, Daimler and Volvo. Our intent is to discuss industry regulatory issues including the Phase 2 Fuel Efficiency and Greenhouse Gas regulations and the potential for a future low NOx rule.

We can be flexible on the timing for a meeting on April 19th. We are hoping that you would also invite other leaders in the Agency that could contribute to the discussion.

Please let me know what time would work and thanks for your consideration,

Brian

Subject: Attendees for April 6 Meeting with Consumer Product Industry

Hi Sydney,

It was good talking to you yesterday morning. Thanks for setting 4:00 on April 6 as the time and date for the meeting between Administrator Pruitt and the trade association for the consumer product industry, the Consumer Specialty Products Association (CSPA). We understand that we have a 30-minute window with the Administrator.

You asked for a list of topics. The point of the meeting, from our perspective, will be to introduce Administrator to the industry and its role in the U.S. economy, and to share our position on our top regulatory and legislative priorities. Those are listed in the attached letter to President Trump and, in more detail, the letter to Administrator Pruitt on Safer Choice. We'll be concise on addressing each of those points. We'll likely skip the RCRA issue and just focus on TSCA, Safer Choice, and air.

You also asked for attendees. I would like to propose the list below, which includes the top two CSPA executives and several leading board members. The board members proposed below are top executives at some of the country's largest companies. If you accept this attendee list, I'll get you and RJ detailed bios with pictures well in advance of the meeting.

•□□□□□□□□ Steve Caldeira, President and CEO, Consumer Specialty Products Association

•□□□□□□□□ Phil Klein, Executive Vice President, Consumer Specialty Products Association

•□□□□□□□□ Bill Auriemma, President of Diversified CPC and Chairman of CSPA Board

•□□□□□□□□ Kelly Semrau, VP, SC Johnson and Sons

•□□□□□□□□ Jerry Porter, VP, Procter & Gamble

•□□□□□□□□ David Campbell, VP, RB (maker of Lysol, Mucinex, etc.)

•□□□□□□□□ Paul Siracusa, VP, Church & Dwight (maker of Arm & Hammer and Trojan products)

•□□□□□□□□ Greg Johnson, Sherwin Williams

•□□□□□□□□ Steve Christenson, VP, Ecolab

•□□□□□□□□ Steve Goldberg, VP, BASF (world's largest chemical manufacturer)

•□□□□□□□□ Ben Dunham, Holland & Knight

Can we confirm this group?

Thanks again for all your help in setting this up!

Thank you, Sydney!

One question – do you have an inkling of the timeline when you'll start looking at 4th quarter travel? (and I only ask because I know my CEO will ask me! I'm sure you're juggling a million schedules!)

Best,

LM.

Hi Sydney,

Thanks for your patience – we actually have two options for the November Annual Conference in Chicago, IL. Hopefully one of these works for his schedule!

The two dates/times we have for our Annual Conference are:

Wednesday, November 8, 2017

Opening General Session

3.00pm – 4.30 pm *(presentation time roughly 3.20pm – we start the session with some associate*

business)

OR

Friday, November 10, 2017

Business Meeting and General Session

9.00am – Noon *(presentation time approximately 10.30/10.45am depending on how quickly the session flows)*

Please let me know if something is unclear. If I need to redo the speaker form, just let me know. A lways feel free to call me if you have questions. 703.375.0483.

Thank you!

Best,

Liz.

Hello,

The Society of Independent Gasoline Marketers of America (SIGMA) would like to invite Scott Pruitt to speak at our Summer Legislative Conference. I have attached the speaker request form for Scott Pruitt for the event on July 18, 2017, following up on a personal invitation from Charles Michael Thornbrugh from the QuikTrip Corporation in Tulsa,

Oklahoma, and member of SIGMA's Board of Directors, and our CEO Ryan McNutt. Please let me know if we can provide any further information.

Thank you.

Best,

Liz

Pruitt Invite - SNPS 17.pdf

Hi Sydney –

I hope this note finds you doing well! I wanted to touch base again on the status of our invitation to Administrator Pruitt and see if I could answer any questions for you.

We are hopeful he is available to speak at our Thursday Lunch Session as part of our States & Nation Policy Summit on **December 7, 2017** in Nashville, TN. I have attached the original invitation and I am happy to answer any questions you may have. Fingers crossed he is able to join us as I know our attendees would love to hear from him!

Look forward to hearing from you!

Best,

Courtney

Administrator Scott Pruitt
Environmental Protection Agency
Office of the Administrator, 1101A
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt:

Thank you for your commitment to our nation's founding principles and free market ideals. Members of the American Legislative Exchange Council (ALEC) share your belief in limited government, free markets and federalism, and it is my honor to invite you, once again, to deliver a keynote address at our **2017 States and Nation Policy Summit** in **Nashville, Tennessee**. The ALEC States and Nation Policy Summit gathers more than 900 state legislators, business leaders and public policy experts from across the nation to discuss major state issues.

Our 2017 States and Nation Policy Summit will be held at the Omni Nashville from December 6 – 8, 2017. I would be honored to have you address our attendees during the **Thursday Lunch Session** on **December 7, 2017.** Your insight into the future of our environmental programs would greatly benefit our attendees.

As you know, ALEC is the largest nonpartisan voluntary membership organization of state legislators in the country, representing one quarter of all state lawmakers, 60 million Americans and 30 million jobs. ALEC members advance the Jeffersonian principles of limited government, free markets and federalism. Members of ALEC share your belief in protecting hardworking taxpayers and providing a stable environment.

If you are able to share your leadership perspective with ALEC members at the 2017 States & Nation Policy Summit, or if you have additional questions, please contact Courtney Cook, Director of Events, by email at ccook@alec.org or at (571) 482-5003.

Thank you for your consideration and service to our country.

Respectfully,

Lisa B. Nelson
Chief Executive Officer

We know how much you love ALEC and can't wait to have you with us again!

Dear Administrator Pruitt:

The Resource Development Council for Alaska, Inc. (RDC) is writing to invite you to speak at our 38th Annual Alaska Resources Conference, on November 15-16, 2017. The two-day conference, which has attracted up to 1,000 attendees in recent years, will be held at the Dena'ina Convention Center in Anchorage, Alaska.

Please find a formal letter of invitation attached. For more information on our policies, board, and membership, please visit akrdc.org.

We very much appreciate your consideration of our invitation and look forward to hearing from you soon.

RESOURCE DEVELOPMENT COUNCIL

Growing Alaska Through Responsible Resource Development

August 16, 2017

The Honorable Scott Pruitt, Administrator
U.S. Environmental Protection Agency
Office of the Administrator: Mail Code 1101A
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt:

The Resource Development Council for Alaska, Inc. (RDC) would like to extend a formal invitation for you to be a keynote speaker at our 38th Annual Alaska Resources Conference in Anchorage on November 15-16, 2017.

Typically, the first day of the conference has a focus on the oil and gas industry in Alaska, and the second day focuses on mining, tourism, forestry and the fishing industry, as well as presentations from Alaska's native corporations. We invite you to speak at lunch on November 15th, but the 16th is also available should that date work better for your schedule.

The Alaska Resources Conference is the largest resource industry event held in Alaska. The two-day conference will see an expected 1,000 attendees, including decision makers across all resource industries and economic sectors, as well as Alaska Native corporation executives, federal, state, and local government officials, and elected representatives.

Additional details, and presentations from previous conference speakers can be found online at http://www.akrdc.org/conference.

RDC and its membership, representing tens of thousands of working Alaskans, strongly agrees with you that with proper implementation of pro -environment and pro-economy policies, the United States can both protect the environment and realize strong economic growth without sacrificing one ideal over the other.

Founded in 1975, RDC is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

Your consideration of this request at the earliest convenience is greatly appreciated. Our objective is to have our keynote speakers confirmed by early September.

Thank you in advance, I look forward to hearing back from your office.

Sincerely,

Marleanna Hall

Subject: Meeting Request with ND Agriculture Commissioner Doug Goehring

Good morning,

North Dakota Agriculture Commissioner Doug Goehring will be traveling to D.C., May 16th, 17th and the morning of the 18th, and would like to schedule 30 minutes of time to meet with Administrator Pruitt. Below are times windows he currently has available that would work for his schedule. Please let me know at your earliest convenience if a meeting will be possible, and what time frame will work best for a 30 minute meeting with the Administrator.

Tuesday, May 16

8 a.m.-2:45 p.m.

4:30 p.m.-5 p.m.

Wednesday, May 17

8 a.m.-8:30 a.m.

10:30 a.m.-11:15 a.m.

2 p.m.-5 p.m.

Thursday, May 18

8 a.m.-9:45 a.m.

11:30 a.m.-12 p.m.

Thanks again and please feel free to contact me with any questions.

Jessie Pfaff

Subject: RE: On behalf of Bernie Nash

Hi Sydney,

I think there is slight confusion. We are not inviting Administrator Pruitt to speak, which the form suggests otherwise. My message was just to let you all know that The Burton Awards would be sending an invitation for him to attend as a **guest**, and if he does attend that Bernie would like to invite him to sit at his table. Administrator Pruitt spoke a few years back at this event, so he should be familiar with it.

Please let me know if you still need me to fill out the form, though.

Thank you,

Emily

Subject: October 16 meeting request - Administrator Pruitt

Sydney,

You were kind enough to facilitate meetings with Administrator Pruitt earlier this year for Brad Wall, Premier of Saskatchewan, and Tim McMillan, President of the Canadian Association of Petroleum Producers. We also represent Suncor, a Canadian oil company which is North America's fifth largest energy company. Suncor's President and CEO, Steve Williams (bio below) will be in Washington on October 16 and would very much like to meet with Administrator Pruitt. The purpose of the meeting would be for Suncor to gain a better understanding of President Trump's regulatory priorities relating to energy and the environment. I believe that given Suncor's size and role in the energy sector in Canada and the United States, a meeting between Mr. Williams and Administrator Pruitt would allow for a very high level dialogue on these issues.

While the bulk of Suncor's production of 700,000 barrels per day is from the oil sands in Alberta, Suncor also has offshore assets in Canada, the United Kingdom and Norway. Suncor also owns a 98,000 barrel per day refinery in Commerce City, Colorado, along with Canada's largest ethanol plant in Ontario.

Please do not hesitate to let me know if I can provide any further information. I very much appreciate your consideration of our request.

We look forward to hearing from you and hope to see Administrator Pruitt on October 16.

Thank you.

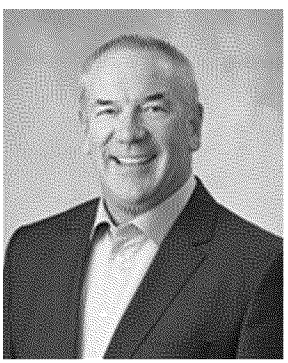
Steve Williams

President and Chief Executive Officer



Steve Williams is president and chief executive officer of Suncor Energy Inc.

Steve's career with Suncor began in May 2002 when he joined the company as executive vice president, Corporate Development and chief financial officer. He then served as executive vice president, Oil Sands and chief operating officer. Steve has more than 40 years of international energy industry experience, including 18 years at Esso/Exxon.

Steve holds a Bachelor of Science degree (Hons.) in chemical engineering from Exeter University and is a fellow of the Institution of Chemical Engineers. He is a graduate of the business economics program at Oxford University as well as the advanced management program at Harvard Business School.

In 2016, Steve was named to the Board of Directors of the new Alcoa Corporation. He is a Board member of the Business Council of Canada, is a member of the Institute of Corporate Directors and is also a member of the McKinsey & Company Canada Advisory Council. In 2014 and 2015 Steve acted as co-chair of Indspire's "Building Brighter Futures" campaign, which provides financial support for Indigenous students.

Steve has long been an advocate for sustainable development in the energy industry and a leader in conversations that connect the environment and economy. In 2005 he was appointed to the National Roundtable on the Environment and the Economy by the Prime Minister. He has also been a member of the advisory board of Canada's Ecofiscal Commission since its inception. He is one of 12 founding CEOs of Canada's Oil Sands Innovation Alliance (COSIA) and he was invited to attend the 2015 United Nations Climate Change Conference (COP21) in Paris, France as an official member of the Government of Canada delegation.

Subject: Fw: AFS - GA FLY-IN AGENDA

Sydney: Below and attached please find the info on the American Foundry Society Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the

Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has

more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

Subject: RE: Request for meeting next week with Administrator Pruitt with CEO of Syngenta

Hi Sydney,

Thanks again for your help. This is a brief high-level introduction to the new CEO. Erik would like to provide Administrator Pruitt with an overview of the vision of Syngenta. With its size, scope and global role in agriculture and biodiversity, Eric would like to discuss some of the new innovative products and seed treatments that are tools for the American farmer.

Should it be useful to you and Administrator Pruitt, we are providing some brief background below.

Background on Syngenta and Erik Fyrwald, CEO

Syngenta is one of the world's largest providers of products to help farmers achieve sustainable crop and food security. Syngenta operates in 90 countries with nearly 30,000 employees and generates nearly $13 B in annual sales. Erik Fyrwald is the CEO of Syngenta, a position he has held since June 1, 2016. Previously, he served as President and CEO of Univar, a world leader in the distribution of chemistry related products and services, as well as Nalco Holding Co., a leading global provider of water treatment and oil and gas products and services. Additionally, Mr. Fyrwald spent 27 years at DuPont, where he held positions relating to technology, manufacturing, sales and marketing, strategic planning, and management. He also serves on the Board of Directors of Eli Lilly & Company and the Society of Chemical Industry. Mr. Fyrwald holds degrees from the University of Delaware and the Harvard School of Business.

Best,

Sarah

Subject: Request for meeting next week with Administrator Pruitt with CEO of Syngenta

Hi Holly and Kenneth,

It was lovely to meet you last week with the Greater Phoenix Economic Council (GPEC). You both and Administrator Pruitt were very helpful. On a separate topic, this is a request for a brief meeting for Monday or Tuesday with Administrator Pruitt with the CEO of Syngenta, Erik Fyrwald, who will be in Washington, D.C. at that time. As you may know, Syngenta is one of the world's largest providers of products to help farmers achieve sustainable crop and food security. Syngenta operates in 90 countries with nearly 30,000 employees and generates nearly $13 B in annual sales. We are providing additional background on Erik below.

Background on Erik Fyrwald, CEO, Syngenta

Erik Fyrwald is the CEO of Syngenta, a position he has held since June 1, 2016. Previously, he served as President and CEO of Univar, a world leader in the distribution of chemistry related products and services, as well as Nalco Holding Co., a leading global provider of water treatment and oil and gas products and services. Additionally, Mr. Fyrwald spent 27 years at DuPont, where he held positions relating to technology, manufacturing, sales and marketing, strategic planning, and management. He also serves on the Board of Directors of Eli Lilly & Company and the Society of Chemical Industry. Mr. Fyrwald holds degrees from the University of Delaware and the Harvard School of Business.

Can you please let us know if a brief meeting would be possible with Administrator Pruitt on Monday or Tuesday?

Thank you,
Sarah

2017 Ford's Gala Invitation.pdf
2017 Ford's Annual Gala Schedule - with venues.pdf

Hi Alicia,

I provide ethics advice to EPA Administrator Pruitt and for gift reporting purposes, would you be able to provide a cost/person estimate for each of the events in your invitation? If there is no cost/person estimate, we will also accept a market value estimate which includes an aggregate cost of food, beverages, entertainment, and any other tangible benefits (e.g., valet parking, gift bag, tips, etc.) per person.

There is no ethics issue with the Administrator's attendance; however, as I provide ethics advice only, it will be the EPA Scheduling Office that is able to confirm his attendance (cc'd to this email).

Thanks!

Ford's Theatre

ANNUAL GALA

A working theatre, historical monument, world-class museum and learning center, Ford's Theatre is the premier destination in our nation's capital to explore and celebrate President Abraham Lincoln's ideals and leadership.

While offering you a chance to experience the best of Washington, the Ford's Theatre Annual Gala helps to ensure that generations, both current and future, will find inspiration in the legacy of our 16th president. The gala provides critical funding to support our artistic performances, education programs and outreach initiatives available throughout the year to students and families across the country.

Join us for an unforgettable celebration.

BOYS & GIRLS CLUBS
OF GREATER WASHINGTON

VIA E-MAIL

TO:	The Honorable Scott Pruitt Administrator United States Environmental Protection Agency
FROM:	Jim Almond Chief Executive Officer and President Boys & Girls Clubs of Greater Washington
DATE:	May 3, 2017
SUBJECT:	Fundraiser at the Washington Nationals Ballpark

The Boys & Girls Clubs of Greater Washington ("BGCGW") recently hired a new Chief Executive Officer, and the Board of Directors is making an effort to establish closer relationships between the CEO, the Board, and appointed officials in the Trump administration. We would be honored to have you attend this charitable fundraising event as an honored guest of the BGCGW. If you can participate, you will help place the more than 15,000 DC youth that we serve each year on a path to a great future.

The mission of the BGCGW is to help boys and girls of all backgrounds, especially those who need us most, build confidence, develop character, and acquire the skills needed to become productive, civic-minded, responsible adults. Every day, nearly 450,000 kids in the Greater Washington area leave school with nowhere to go. They risk being unsupervised, unguided, and unsafe. Our Clubs provide a safe and productive place for children to learn and grow. In 2016, 98% of our kids graduated high school. Our alumni are more likely to go to college, to become actively involved in their community, and to support the Clubs that nurtured them.

Our clubs save lives, and our team can only help our communities by serving more youth. Consequently, the Metropolitan Board of Directors has an aggressive goal of increasing the number of kids we serve in the Metropolitan area to 18,000 youth by 2020.

To support our programming, BGCGW plans to host a fundraiser on May 24, 2017 in a suite at Nationals Park featuring local and national business leaders, our club kids, and members of the Executive Committee of our Board of Directors. The suite and all food and beverages have been donated to BGCGW by BakerHostetler, a law firm with offices in Washington, D.C. that has supported BGCGW for over 20 years.

I would like to arrange a meeting with Administrator Pruitt to introduce him to NSSGA. NSSGA represents the aggregates industry, which provides the raw material in asphalt, concrete and cement used in nearly every construction or infrastructure project and employs over 100,000 in the U.S. We are very encouraged about the direction of EPA under Administrator Pruitt and would like to discuss our industry's unique issues, including air and water issues such as WOTUS and Conductivity. Please let me know if I can provide any additional information. We would like an in person meeting with our President and CEO, Michael Johnson, Senior Vice President, Government and Regulatory Affairs Laura O'Neill-Kaumo, myself and Administrator Pruitt. We realize this is a very busy time for the Administrator, but would greatly appreciate a short meeting to discuss our industry's issues.

Sydney, 12:15 will work great. We will probably need to break close to 12:45 but might be able to push beyond that just slightly. Thank you so much for working with us on this.

Sydney and Cheryl,

Thanks again and looking forward to the meeting on Monday afternoon.

Final attendees are as follows:

Todd Becker, CEO, Green Plains (Omaha, NE)

Mitch Miller, CEO, Carbon Green Bioenergy (Lak Odessa, MI)

Emily Skor, CEO, Growth Energy (DC)

Chris Bliley, Vice President, Growth Energy (DC)

Sasha Forsen, Green Plains (Omaha, NE)

Sydney,

I'm circling back to find out when might be some good times to reschedule this meeting for our senior executives and the Administrator. Let me know some days/times that may work and I'll see what works from this end. Additionally, one of the items we were going to mention in the meeting is the attached invitation for the Administrator to speak to our advocacy conference in September, so I wanted to go ahead and pass that along to you in the meantime. Thanks in advance and just let me know.

Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, April 27th. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

From: Stanko, Joseph
Sent: Mon 5/15/2017 9:49:35 PM
Subject: FW: Meeting Request

Dear Sydney:

I would like to request a meeting with the Administrator for Larry Ziemba, Executive Vice President, Refining, for Phillip 66. Larry has responsibility for the company's refining operations and serves in a leadership position with the American Fuels and Petrochemical Manufacturers Association. He has been working with other refiners and the Auto industry regarding the potential for higher octane fuels and other forward looking fuels issues. A brief bio is set forth below.

Larry is currently scheduled to be in D.C. on Friday June 2nd and Monday June 5th. If those days would not work with the Administrator's schedule, he is happy to work with other days that would be more convenient for Administrator Pruitt.

Lawrence (Larry) M. Ziemba is executive vice president, Refining, for Phillips 66, a diversified energy manufacturing and logistics company. He has 35 years of experience in the oil and gas industry. Before joining Phillips 66 in May 2012, Ziemba previously worked for ConocoPhillips as president, Global Refining, a role he took on after serving as president, U.S. Refining, since 2003. He first joined Phillips Petroleum in 2001 after its acquisition of Tosco and was in charge of handling the integration of the refining operations during the merger with Conoco. Originally from Chicago, he started his career at Unocal's Chicago refinery in 1977. In 1988, he moved to Unocal's Los Angeles corporate headquarters as manager of planning/business development for its downstream business. In 1991, he managed the acquisition of Shell's Carson refinery and subsequently integrated the asset into Los Angeles operations. In 1997, Ziemba joined Tosco as they acquired Unocal's downstream business. In 1999, he was named vice president of Tosco's three San Francisco area refineries. In 2000, he was assigned to handle the acquisition and takeover of the Wood River refinery. He has held a number of industry and community leadership positions including board positions with American Fuels and Petrochemical Manufacturers Association, WRB Refining LP and the Western States Petroleum Association. Ziemba earned a bachelor's degree in mechanical engineering from the University of Illinois-Champaign in 1977 and a Master of Business Administration degree from the University of Chicago in 1985.

Thank you for your consideration,

Joe Stanko

Good morning,

North Dakota Agriculture Commissioner Doug Goehring will be traveling to D.C., May 16th, 17th and the morning of the 18th, and would like to schedule 30 minutes of time to meet with Administrator Pruitt. Below are times windows he currently has available that would work for his schedule. Please let me know at your earliest convenience if a meeting will be possible, and what time frame will work best for a 30 minute meeting with the Administrator.

Tuesday, May 16

8 a.m.-2:45 p.m.

4:30 p.m.-5 p.m.

Wednesday, May 17

8 a.m.-8:30 a.m.

10:30 a.m.-11:15 a.m.

2 p.m.-5 p.m.

Thursday, May 18

8 a.m.-9:45 a.m.

11:30 a.m.-12 p.m.

Thanks again and please feel free to contact me with any questions.

Hi Sydney,

Our original list of attendees is still who we expect to attend. I do not expect it to be added to this list.

Tom

Attendees:

1. Steve George – Iowa Egg Producer, Fremont Farms, UEP Board Member and Chair of UEP's Environment Committee

2. Ron Truex – Indiana Egg Producer, Creighton Brothers Farms, and Chairman of the UEP Board

3. Glenn Hickman – Arizona Egg Producer, Hickman Family Farms, and UEP Board Member

4. Joe Miller – Staff, Rose Acre Farms

5. Chad Gregory – President, UEP

6. David Inall – Senior Vice President and Environment Committee Staff Lead, UEP

7. Tom Hebert – UEP Consultant

Thanks so much for your reply Sydney. We certainly understand. As an alternative, would it be possible for 3 to 5 grower leaders in at some point to meet the Administrator over that period? These would be the people responsible for some of the largest egg producing operations in the country with multiple farm sites and more than 50 million laying hens under production.

Best!

Dear Ms. Hupp,

I hope you are well and settling in nicely at EPA.

Please see attached a letter inviting the Administrator to offer a keynote address to the nation's egg producers at a meeting being held by United Egg Producers (UEP) here in Washington, D.C. on May 17, 18 or 19, 2017. Details are included in the letter.

UEP's farmer members raise hens that produce about 95% of the nation's eggs, and most of that egg production will be accounted for by the 150 or so egg producers in the audience listening to Administrator Pruitt's address should he decide to do this. These producers and UEP have been at the forefront of several US EPA rulemakings and policies that are central to how farmers operate today; Clean Water Act matters involving the Concentrated Animal Feeding Operations (CAFO) rule, WOTUS rule and the Chesapeake Bay TMDL as well as Clean Air Act and CERCLA/EPRCA matters as they relate to ammonia and other air emissions. These are tremendously important issues that relate directly to how egg producers can continue to proudly meet their environmental responsibilities and the growing demand for eggs, and in general make their contribution to the nation's safe, wholesome and abundant food supply.

These farmers would appreciate hearing about Administrator Pruitt's plans for US EPA's environmental programs so they can better understand how they could contribute to the success of his efforts and what these plans might mean for their farms and businesses.

Please let me know if you have any questions or if the Administrator can accept this invitation. Thank you in advance for your consideration of this request.

Best!

Tom Hebert

To: Hupp, Sydney <hupp.sydney@epa.gov>
Subject: Meeting with Administrator Pruitt

I would like to arrange a meeting with Administrator Pruitt to introduce him to NSSGA. NSSGA represents the aggregates industry, which provides the raw material in asphalt, concrete and cement used in nearly every construction or infrastructure project and employs over 100,000 in the U.S. We are very encouraged about the direction of EPA under Administrator Pruitt and would like to discuss our industry's unique issues, including air and water issues such as WOTUS and Conductivity. Please let me know if I can provide any additional information. We would like an in person meeting with our President and CEO, Michael Johnson, Senior Vice President, Government and Regulatory Affairs Laura O'Neill-Kaumo, myself and Administrator Pruitt. We realize this is a very busy time for the Administrator, but would greatly appreciate a short meeting to discuss our industry's issues.

From: Woodward, Cheryl
Sent: Wed 5/10/2017 9:34:57 PM
Subject: RE: Meeting w/ International Paper

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 18th at 10:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Sydney,

Mark Sutton is looking forward to the meeting next week from 10:30am-11:00am on the 18th. Can you please provide me with the office location (Address, Building, Room #). Also, are there special instructions for which entrance to use, parking, etc.?

Do you mind if I list you as the POC? If ok, what is the best phone number for you?

Biography is attached.

Attendees:

- **Mark Sutton, Chairman & CEO**
- **Chris Keuleman, Vice President of Global Government Relations**
- **Neil Naraine, Director of Government Relations**

Please let me know if you need anything else.

Subject: RE: Request for meeting next week with Administrator Pruitt with CEO of Syngenta

Hi Sydney,

Thanks again for your help. This is a brief high-level introduction to the new CEO. Erik would like to provide Administrator Pruitt with an overview of the vision of Syngenta. With its size, scope and global role in agriculture and biodiversity, Eric would like to discuss some of the new innovative products and seed treatments that are tools for the American farmer.

Should it be useful to you and Administrator Pruitt, we are providing some brief background below.

Background on Syngenta and Erik Fyrwald, CEO

Syngenta is one of the world's largest providers of products to help farmers achieve sustainable crop and food security. Syngenta operates in 90 countries with nearly 30,000 employees and generates nearly $13 B in annual sales. Erik Fyrwald is the CEO of Syngenta, a position he has held since June 1, 2016. Previously, he served as President and CEO of Univar, a world leader in the distribution of chemistry related products and services, as well as Nalco Holding Co., a leading global provider of water treatment and oil and gas products and services. Additionally, Mr. Fyrwald spent 27 years at DuPont, where he held positions relating to technology, manufacturing, sales and marketing, strategic planning, and management. He also serves on the Board of Directors of Eli Lilly & Company and the Society of Chemical Industry. Mr. Fyrwald holds degrees from the University of Delaware and the Harvard School of Business.

Best,

Sarah

Subject: Request for meeting next week with Administrator Pruitt with CEO of Syngenta

Hi Holly and Kenneth,

It was lovely to meet you last week with the Greater Phoenix Economic Council (GPEC). You both and Administrator Pruitt were very helpful. On a separate topic, this is a request for a brief meeting for Monday or Tuesday with Administrator Pruitt with the CEO of Syngenta, Erik Fyrwald, who will be in Washington, D.C. at that time. As you may know, Syngenta is one of the world's largest providers of products to help farmers achieve sustainable crop and food security. Syngenta operates in 90 countries with nearly 30,000 employees and generates nearly $13 B in annual sales. We are providing additional background on Erik below.

Background on Erik Fyrwald, CEO, Syngenta

Erik Fyrwald is the CEO of Syngenta, a position he has held since June 1, 2016.

Previously, he served as President and CEO of Univar, a world leader in the distribution of chemistry related products and services, as well as Nalco Holding Co., a leading global provider of water treatment and oil and gas products and services. Additionally, Mr. Fyrwald spent 27 years at DuPont, where he held positions relating to technology, manufacturing, sales and marketing, strategic planning, and management. He also serves on the Board of Directors of Eli Lilly & Company and the Society of Chemical Industry. Mr. Fyrwald holds degrees from the University of Delaware and the Harvard School of Business.

Can you please let us know if a brief meeting would be possible with Administrator Pruitt on Monday or Tuesday?

Thank you,
Sarah

Hi John,

I hope this note finds you well. I am writing to request a meeting with the Administrator on behalf of my client, the American Coalition for Clean Coal Electricity (ACCCE). The purpose of the meeting is to introduce ACCCE's new CEO, Paul Bailey, and discuss various policy initiatives.

By way of background, ACCCE is a partnership of the industries involved in producing electricity from coal. It's membership largely consists of coal producers, railroads and utilities.

Please feel free to contact me directly at 202-486-0521 if you have any questions. Thank you for your help and thoughtful consideration.

RH

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: 05/11/2017

Meeting Date: TBD

Meeting Time: TBD

Requested Location (if offsite, please list address, parking instructions, etc.): EPA HQ

Requestor: Rashd Hallaway, on behalf of the American Coalition for Clean Coal Electricity (ACCCE)

Purpose of the Meeting: To discuss issues related to the coal-fired electric generation fleet.

Background on the Meeting: ACCCE is a partnership of the industries involved in producing electricity from coal, including: railroads, investor owned utilities, rural electric cooperatives, coal producers and service providers.

Role of the Administrator: ACCCE requests a meeting with the Administrator.

Attendees: Paul Bailey, CEO of ACCCE, and Rashid Hallaway, Partner in HHQ Ventures.

Point of Contact: Rashid Hallaway, 202-486-0521 (mobile)

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: 05/11/2017

Meeting Date: 05/22/2017

Meeting Time: 3:15pm ET

Requested Location (if offsite, please list address, parking instructions, etc.): EPA HQ

Requestor: Rashd Hallaway, on behalf of White Stallion Energy's Chairman, Steven E. Chancellor.

Purpose of the Meeting: This is a courtesy call and introductory meeting.

Background on the Meeting: Mr. Chancellor is a successful entrepreneur who has founded numerous businesses in the energy, defense, food, transportation, plastics and insurance sectors. Today, Mr. Chancellor serves as Chairman of White Stallion Energy (WSE), a producer of steam coal with five active mining complexes in the Illinois Basin.

Role of the Administrator: In-person meeting.

Attendees: Steven Chancellor and Rashid Hallaway.

Point of Contact: Rashid Hallaway, 202-486-0521 (mobile)

Mr. Chancellor would like to thank the Administrator for his outstanding leadership during the first 100 days of the Administration, and also discuss several regulations that are adversely impacting the coal industry. Mr. Chancellor is available early next week, May 8-10th, which I recognize is very short notice. If those dates don't work, please let me know the Administrator's availability during the month of May.

Thank your for assistance assistance and thoughtful consideration.

Sydney,

Hope you're having a good Friday, I needed to make a couple changes to our list of attendees. Secretary Perdue ended up only having the 9:30 slot on Tuesday to meet with the rest of our group, so I needed to pull our CEO into that meeting but have replaced with our Senior Exec VP. Here is the updated list.

Matt McInerney, Senior Executive Vice President, Western Growers

Carol Chandler, Chandler Farms LP, Selma, CA

Ron Ratto, Ratto Bros., Inc., Modesto, CA

Craig Reade, Bonipak Produce, Inc. Santa Maria, CA

Stephen F. Patricio, Westside Produce, Firebaugh, California

George Adam, Innovative Produce, Santa Maria, CA

Robert Sakata, Sakata Farms, Brighton, CO

Hank Giclas, Executive Vice President, Western Growers

Ken Barbic, Senior Director, Western Growers

Thanks and let me know if you need anything else from me in advance of Tuesday's meeting ,

Ken

Subject: RE: Western Growers Meeting Request

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16th at 9:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Dear Sydney,

Attached is a meeting request letter from Western Growers CEO, Tom Nassif. Our board of directors will be in DC the week of May 15th, and would appreciate the opportunity to meet with Administrator Pruitt.

As an aside, I'm good friends with Luke Holland, and got your contact information from him, if there is someone else that this request should go through additionally please advise or pass along as appropriate.

Thanks again, let me know if you need any additional information to process this request, and I look forward to hearing back.

Best,

Ken

Good afternoon Ian,

I am hopeful that this email finds you well! Reaching out today about the request you emailed over for Administrator Scott Pruitt to meet with the American Institute of Architects. Thank you for reaching out! Would you mind filling out the attached meeting request form so that we can begin processing your request? Looking forward to hearing back from you!

Thank you,

Subject: AdEdge Invitation

Sydney, I sent this email this morning to Administrator Pruitt and heard back that unfortunately he is travelling out of town tomorrow. Since we have a long history with the EPA including work on the arsenic program a decade ago and now the award I referenced below, perhaps it would be beneficial if we could invite him to visit our facility in Atlanta and see how we have grown to be international leaders on treatment technologies for Groundwater. We are a success story driven from our relationship with the EPA and our collaboration has saved communities across the U.S. millions of dollars by our technologies. I look forward to hearing back from you.

Kindly, Rich

Dear Mr. Pruitt,

AdEdge is the recent recipient of the National Federal Laboratory Consortium technology transfer award with the EPA ORD group on biological technology for ammonia removal from drinking water called NoMonia. By happenstance I need to be in Washington D.C. tomorrow and Friday and realize it is a bold request to see if you had just a few minutes to meet.

We are excited about how this technology will benefit small communities in the Midwest and the relationship of working with the EPA to bring cutting edge technology to the market. It's a great positive story and I would love to share a little bit about what is going on.

I can be reached either by email or on my cell at 770-356-8394.

Best Regards, Rich

Rich Cavagnaro

Hi Cheryl,

I just wanted to quickly touch base regarding our meeting for 1:30PM tomorrow with Administrator Pruitt and provide you with a final list of attendees. Attending from AIA will be:

- Robert Ivy, FAIA; Senior Vice President and Chief Executive Officer
- Jon Penndorf, FAIA; Strategic Council Representative, Committee on the Environment Advisory Group
- Andrew Goldberg, Assoc. AIA; Managing Director, Government Relations and Advocacy
- Christina Mason; Director, Federal Relations
- Ian McTiernan; Manager, Federal Relations

Please let me know if you need any additional information or in the case of any scheduling changes. Thanks again for your assistance.

Best,

Ian

Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16th. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Sydney: Below and attached please find the info on the American Foundry Society

Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

It is not a problem – I am sure you all are extremely busy. I can set a call anytime that will be good for the Secretary's schedule. Because so many states are in legislative session, Thursdays and Fridays are best (in the afternoon so folks on the west coast can join us).

Looking at our network's schedule, the next few weeks are pretty open so we can be flexible if there are a few dates / times that work with his schedule.

Thank you!

Subject: State Policy Network - Speaking request

Attached is the completed form requesting Secretary Pruitt to join our monthly State Energy / Environmental Policy Call. To expand the call to other key parties in the states, I can invite ALEC and RGA to participate. Our three organizations have been on a lot of policy related calls (healthcare and tax reform) together lately.

Background on this call:

We kicked off this call in December of 2015 with the goal of getting as many states as possible to submit requests to EPA for two-year state plan extensions, but after the SCOTUS stay the call transitioned into getting as many states to stop working on a plan. During session our weekly war room calls quickly became the go-to source for state action and info sharing. We not only have state and national think tank policy experts engaged, but also private industry and attorneys associated with state AG offices. We also deal with RPS mandates, carbon tax and messaging proactive free market solutions. The call is now on a monthly basis and would benefit greatly from receiving a first-hand update on changes we will see at the EPA, plus what support the agency needs during this transition.

Look forward to discussing this request. Thank you for your consideration.

Subject: RE: Invitation to Administrator Pruitt for NACD Board Meeting

Good afternoon Ben,

Hope you're well! My apologies for the delay in getting back to you! Mandy sent along the below request to me. I think this is certainly something the Administrator would like to participate in. Would you mind filling out the attached form so that we can look to see if it fits with our schedule? Please let me know if you have any

questions.

Thank you!

Hi Mandy, I hope all is well at EPA. I'm sure it's been busy the first few weeks.

Please find attached an invitation to Administrator Pruitt. Can you please make sure this gets in the right hands over there? Appreciate the help!

Best,

Ben

Hi John,

I hope this note finds you well. I am writing to request a meeting with the Administrator on behalf of my client, the American Coalition for Clean Coal Electricity (ACCCE). The purpose of the meeting is to introduce ACCCE's new CEO, Paul Bailey, and discuss various policy initiatives.

By way of background, ACCCE is a partnership of the industries involved in producing electricity from coal. It's membership largely consists of coal producers, railroads and utilities.

Please feel free to contact me directly at 202-486-0521 if you have any questions. Thank you for your help and thoughtful consideration.

Dear Sydney and Michelle,

On behalf of Roy Bailey I am writing to you to reschedule the meeting with Administrator Pruitt for this week. The Administrator and Mr. Bailey spoke recently and discussed this request. Mr. Kirk just happens to be in the East this week and wondered if the Administrator would be open to meet with Mr. Kirk and Mr. Bailey on the morning of the 17th or 18th. Mr. Kirk needs to be in New York City the afternoon of the 17th. That is why we choose those dates. Please let us know if either Wednesday or Thursday morning will work or what you might have to offer.

I look forward to hearing from you soon so, we may make plans.

Sincerely,

Gay

Subject: Request for meeting next week with Administrator Pruitt with CEO of Syngenta

Hi Holly and Kenneth,

It was lovely to meet you last week with the Greater Phoenix Economic Council (GPEC). You both and Administrator Pruitt were very helpful. On a separate topic, this is a request for a brief meeting for Monday or Tuesday with Administrator Pruitt with the CEO of Syngenta, Erik Fyrwald, who will be in Washington, D.C. at that time. As you may know, Syngenta is one of the world's largest providers of products to help farmers achieve sustainable crop and food security. Syngenta operates in 90 countries with nearly 30,000 employees and generates nearly $13 B in annual sales. We are providing additional background on Erik below.

Background on Erik Fyrwald, CEO, Syngenta

Erik Fyrwald is the CEO of Syngenta, a position he has held since June 1, 2016. Previously, he served as President and CEO of Univar, a world leader in the distribution of chemistry related products and services, as well as Nalco Holding Co., a leading global provider of water treatment and oil and gas products and services. Additionally, Mr. Fyrwald spent 27 years at DuPont, where he held positions relating to technology, manufacturing, sales and marketing, strategic planning, and management. He also serves on the Board of Directors of Eli Lilly & Company and the Society of Chemical Industry. Mr. Fyrwald holds degrees

from the University of Delaware and the Harvard School of Business.

Can you please let us know if a brief meeting would be possible with Administrator Pruitt on Monday or Tuesday?

Thank you,
Sarah

Sydney: Below and attached please find the info on the American Foundry Society Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are

found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

US Environmental Protection Agency

Re:

Wednesday, April 26, 2017 External Meeting

Request for Discussion Between Scott Pruitt and Steve Sexton

Proposal for Operating Permit Program for Vocgen

Dear US EPA Representatives:

Pursuant to our meeting on April 26, 2017 and on behalf of Steve Sexton and Environment and Power Systems International, LLC, we trust that you have found the Vocgen solution for industry including its business and market strategies to be closely aligned with the Administration's environmental and economic growth policies.

Kindly be advised that our April 27, 2017 External Meeting follow-up email was copied to Mr. Tom Dadey to assist him in the delivery of the Vocgen Plan to other chief policy advisors to the President.

It is again our sincere hope that Vocgen can help the Administration to advance an environmentally friendly and energy efficient economy.

Mr. Sexton is available to speak with Mr. Pruitt at the Administrator's convenience.

Lastly, unless you have any objection or reservation, Steve would like to contact as well the EPA Energy Star staff Walt Tunnessen and Elisabeth Dutrow, that EPSI can then begin dialogs with industry organizations.

Thank you again.

Best Regards

Hi Sydney and Aaron-

I wanted to loop in our event planner, Allegra Hewell. She's great to work with, and I apologize for not bringing her in sooner.

Can you let us know if September 28th is workable or let us know when you will have a better idea so we can plan accordingly?

Kind Regards,

Terry

Sydney: Below and attached please find the info on the American Foundry Society Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

Subject: Meeting with Administrator Pruitt

I would like to arrange a meeting with Administrator Pruitt to introduce him to NSSGA. NSSGA represents the aggregates industry, which provides the raw material in asphalt, concrete

and cement used in nearly every construction or infrastructure project and employs over 100,000 in the U.S. We are very encouraged about the direction of EPA under Administrator Pruitt and would like to discuss our industry's unique issues, including air and water issues such as WOTUS and Conductivity. Please let me know if I can provide any additional information. We would like an in person meeting with our President and CEO, Michael Johnson, Senior Vice President, Government and Regulatory Affairs Laura O'Neill-Kaumo, myself and Administrator Pruitt. We realize this is a very busy time for the Administrator, but would greatly appreciate a short meeting to discuss our industry's issues.

Subject: RE: Western Growers Meeting Request

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16th at 9:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified

on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Sharnett, we have an additional participant for the meeting on Monday (May 15) at 3:30 pm. Her is the full list:

- Steve Berry, Volvo
- Brian Mormino, Cummins
- Paul Feenstra, PACCAR
- Sean Waters, Daimler
- Jed Mandel, EMA
- Jason Quaranto, Navistar

We could use your help in answering these questions:

1. We understand that Mandy Gunasekara will also join the meeting which is great. Will anyone else from EPA attend?
2. Can you provide details on where we will meet?
3. Do you need information from us on attendees or anything else?

Thank you for your help,

Brian

Hello Sharnett. Hope you are doing well. We are preparing for our meeting with Ryan Jackson for Monday, May 15th at 3:30 pm. 3 questions:

1. We understand that Mandy Gunasekara will also join the meeting which is great. Will anyone else from EPA attend?

2. Can you provide details on where we will meet?

3. Do you need information from us on attendees or anything else?

Thanks for your help. See you soon!

Subject: Commercial Vehicle Manufacturers Mtg Request - April 19

Ryan, I hope you are doing well with your transition to the EPA. I will be visiting Washington, DC with several of my colleagues in the commercial vehicle industry and hope that you could meet with us on Wednesday, April 19th.

The participants in the meeting would be the President of the Truck and Engine Manufacturers Association (EMA) and executives from the major manufacturers – Cummins, Navistar, Paccar, Daimler and Volvo. Our intent is to discuss industry regulatory issues including the Phase 2 Fuel Efficiency and Greenhouse Gas regulations and the potential for a future low NOx rule.

We can be flexible on the timing for a meeting on April 19th. We are hoping that you would also invite other leaders in the Agency that could contribute to the discussion.

Please let me know what time would work and thanks for your consideration,

Brian

Hi Tate,

I am writing on behalf of Steve Chancellor, Chairman of White Stallion Energy, to request a meeting with Administrator Pruitt. White Stallion Energy is based in Evansville, Indiana, and is one of the largest producers of steam coal in the Illinois Basin.

Mr. Chancellor would like to thank the Administrator for his outstanding leadership during the first 100 days of the Administration, and also discuss several regulations that are adversely impacting the coal industry. Mr. Chancellor is available early next week, May 8-10th, which I recognize is very short notice. If those dates don't work, please let me know the Administrator's availability during the month of May.

Thank your for assistance assistance and thoughtful consideration.

Subject: RE: Scheduling

I apologize I thought you had the instructions.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the South Lobby of the William Jefferson Clinton building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Subject: Request; Reschedule meeting with Administrator Pruitt and RJ Kirk of Intrexon

Dear Sydney and Michelle,

On behalf of Roy Bailey I am writing to you to reschedule the meeting with Administrator Pruitt for this week. The Administrator and Mr. Bailey spoke recently and discussed this request. Mr. Kirk just happens to be in the East this week and wondered if the Administrator would be open to meet with Mr. Kirk and Mr. Bailey on the morning of the 17th or 18th. Mr. Kirk needs to be in New York City the afternoon of the 17th. That is why we choose those dates. Please let us know if either Wednesday or Thursday morning will work or what you might have to offer.

I look forward to hearing from you soon so, we may make plans.

Sincerely,

Gay

Subject: Meeting Request With Administrator Pruitt

Dear Ms. Hupp,

I hope this note finds you well. I am writing to request a meeting with Administrator Pruitt on behalf of my company's President & CEO Paul Browning. I understand that there might be a form we'd need to fill out as part of the scheduling process, and I'd appreciate any assistance you can provide. Mr. Browning will be in Washington on 17th.

MHPSA is a U.S.-based manufacturer and provider of thermal power generation technologies. Mr. Browning would like to speak with Administrator Pruitt about our company's experience in

deploying commercially-viable clean coal and emissions' control solutions in the United States. He would appreciate the opportunity to provide feedback on ways in which the Administration can expedite the deployment of commercially-viable technologies to achieve cleaner air and water and economic growth. Thank you in advance, and I look forward to hearing from you.

Best regards,

Victor

Subject: RE: Scheduling

I apologize I thought you had the instructions.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the South Lobby of the William Jefferson Clinton building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Good afternoon David,

Thank you so much for reaching out! We appreciate your invitation for the Administrator to travel to Australia but unfortunately that overlaps with other travel we already have planned out. We are wishing you all the best in your 25th Anniversary Forum, please never hesitate to reach out to us in the future!

Thank you!

Subject: Letter of Invitation: Australian American Leadership Dialogue, Gold Coast, Australia, 3-5 August 2017.

Dear Administrator Pruitt

Please find attached a letter of invitation from the Co-Chairs of the Australian American Leadership Dialogue, and former Australian Deputy Prime Ministers, Kim Beazley and Mark Vaile, inviting you to participate in the Leadership Dialogue's 25th Anniversary Forum to be held on the Gold Coast, Australia, from 3-5 August 2017.

The Leadership Dialogue is a private diplomatic initiative, which brings together Australian and American leaders from government, enterprise, media, education and the community to help review and refine the parameters of the bilateral relationship. The mission is to broaden and deepen mutual understanding between our nations and to enhance the framework for regional security in a manner that underwrites economic and cultural prosperity for our citizens. The Leadership Dialogue came out of initial discussions during the January 1992 official visit to Australia by President George HW Bush, and subsequently carried the imprimatur of President Clinton following his election in December 1992.

The Forum on the Gold Coast will begin on Thursday, August 3, with an evening Welcome Reception, followed by a number of "nightcaps" on key topical issues. The main program will continue on Friday, August 4, and Saturday, August 5, and will consist of Leadership Dialogue sessions (completely off the record), Australian and American political briefing lunches and a formal dinner on the Saturday evening. Key themes will include: national security; geo-economics and trade; cyber security; innovation and entrepreneurship; energy; and the environment.

We would be delighted to have you participate in our 25th Anniversary Forum.

For your background, I have attached and provided below some additional information on the Leadership Dialogue. Please have your staff contact me should they require anything further.

Kind regards,

David Jessup

Executive Director USA

Australian American Leadership Dialogue

LEADERSHIP DIALOGUE

Some further background to the Australian American Leadership Dialogue

- **The Leadership Dialogue has been publicly described as "the most significant exercise in private diplomacy ever undertaken in Australian history"**

- **The bipartisan Leadership Dialogue is the only non-USA initiated NGO to have ever been invited into the White House for private briefings—three times under President George W Bush, and twice under President Obama—2012 and 2014.**

- **Australian participants at the annual Leadership Dialogue have included Prime Ministers Paul Keating, John Howard, Kevin Rudd, Julia Gillard, Tony Abbott and Malcolm Turnbull plus successive Leaders of the Opposition from 1993 through to Bill Shorten today.**

- **Inter alia the Leadership Dialogue has been a facilitator of the successful FTA negotiations culminating in the FTA effective January 1, 2005.**

- **Our board includes former US Ambassador to Australia Hon Jeffrey Bleich**

- **Our board co-chairmen are former Australian Deputy Prime Minister Mark Vaile (who successfully negotiated the FTA with the USA) and most recent Australian Ambassador to the United States, Hon Kim Beazley—another former Deputy Prime Minister as well as Minister for Defence.**

- **Vice President Joe Biden has twice hosted a bipartisan group of Leadership Dialogue delegates at his residence.**

- **The 2012 photo at the residence of US Vice President Joe Biden (attached) depicts the bipartisan nature of the Leadership Dialogue: Ambassador Bleich, Vice President Biden, Ambassador Beazley (hidden), Bruce Reed (a founding member of the Leadership Dialogue since 1993), Phil Scanlan, former PM Kevin Rudd, current Leader of the Opposition Bill Shorten, Foreign Minister Julie Bishop, former PM Tony Abbott and former Trade Minister Craig Emerson.**

- **The formal Leadership Dialogue sessions have around 80 delegates (political,**

government, industry and academic leaders from both the US and Australia). A moderator leads the discussion but it is very much designed as a free flowing discussion with participants contributing from the floor. There are no formal set piece presentations and everything is off the record.

IP EPA External Meeting Request Form.docx
Mark sutton BIO (2017).docx

Sydney,

Mark Sutton is looking forward to the meeting next week from 10:30am-11:00am on the 18th. Can you please provide me with the office location (Address, Building, Room #). Also, are there special instructions for which entrance to use, parking, etc.?

Do you mind if I list you as the POC? If ok, what is the best phone number for you?

Biography is attached.

Attendees:

- **Mark Sutton, Chairman & CEO**
- **Chris Keuleman, Vice President of Global Government Relations**
- **Neil Naraine, Director of Government Relations**

Please let me know if you need anything else.

Phillip W. Fordham | Government Relations Specialist | International Paper

GOVERNMENT RELATIONS

Advocating for a Stronger International Paper

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: April 25th, 2017

Meeting Date: May 18th, 2017

Meeting Time: 10:30 am to 11:00 am

Requested Location (if offsite, please list address, parking instructions, etc.): EPA HQ

Requestor: Neil Naraine, Director of Government Relations, International Paper

Purpose of the Meeting: Meet with Mark Sutton, Chairman & CEO of International Paper

Background on the Meeting: Discuss the role of Mr. Sutton as a member of the White House Manufacturing Jobs Initiative and profile of the company as a U.S. manufacturer

Role of the Administrator: General discussion with Mr. Sutton on impact of regulations on American manufacturing

Attendees: Mr. Mark Sutton; Mr. Chris Keuleman; and Mr. Neil Naraine

Point of Contact: Mr. Neil Naraine

INTERNATIONAL PAPER

Mark S. Sutton

Chairman and Chief Executive Officer

Mark Sutton became chairman of the International Paper Board of Directors on January 1, 2015, and CEO on November 1, 2014. Immediately prior to becoming CEO, he served as president and chief operating officer with responsibility for leading and running the company's global businesses. He has been a member of the International Paper Board of Directors since June 1, 2014.

Sutton has been with the company his entire career. He joined International Paper in 1984, as an engineer at the Pineville, La., mill. In 1994, he was named mill manager at the Thilmany, Wisc., mill which at the time was part of International Paper's industrial papers business. In 2000, Sutton relocated to Europe to serve as director of European corrugated packaging operations and was promoted to vice president and general manager responsible for all corrugated packaging operations across seven countries in the EMEA (Europe, the Middle East and Africa) region in 2002. In 2005, he was named vice president of corporate strategic planning and relocated to Memphis. He was elected senior vice president, global supply chain, in 2007 and in 2009 became senior vice president, printing and communications papers – the Americas. Sutton was appointed senior vice president, industrial packaging, in November 2011.

Sutton is a member of The Business Council and the Business Roundtable. He serves on the American Forest & Paper Association Board of Directors, the Manufacturing Jobs Initiative and the International Advisory Board of the Moscow School of Management – Skolkovo. He was appointed Chairman of the U.S. Russian Business Council and was also appointed to the U.S. Section of the U.S.-Brazil CEO Forum. Sutton also serves on the Board of Directors of The Kroger Company, Memphis Tomorrow and Board of Governors for New Memphis Institute.

He holds a Bachelor of Science degree in electrical engineering from Louisiana State University.

From: Woodward, Cheryl
Sent: Wed 5/10/2017 4:57:53 PM
Subject: RE: IADC Meeting request to Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 25th at 9:15 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Lincoln,
Please find attached the SAVE THE DATE for July 20th in which our Roanoke Cement plant in Virginia will host the EPA industrial showcase event

Our plant has achieved the energy star award 11 years in a row and it would be an honor if Administrator Pruitt could come and speak at the celebration event.

Please advise the next steps to see if this is a possibility or let me know what questions that you may have,

Hi Sydney,

I'm following up on our conversation from earlier today. I'm excited to meet with the Administrator, May 24 at 2pm. I've filled out and attached the form as per your request.

I don't have the names of my member company participants, but I will get them to you as soon as I confirm their participation. I am anticipating eight total participants.

Please let me know if you need anything else.

Regards,
Robert

Administrator Pruitt,

I hope this finds you well. I am reaching out on behalf of the Society of Chemical Manufacturers & Affiliates (SOCMA). We are a trade association representing the specialty chemicals industry. I have attached a meeting request from SOCMA's CEO, Jennifer Abril.

SOCMA member companies employ more than 100,000 workers across the country and produce some 50,000 products - valued at $60 billion annually - that make our standard of living

possible. From pharmaceuticals to cosmetics, soaps to plastics, and all manner of industrial and construction products, SOCMA members make materials that save lives, make our food supply safe and abundant, and enable the manufacture of literally thousands of other products people use daily.

We hope to introduce you to some of the key players in the specialty chemical industry and explain our high priority issues.

Please contact me if you have any questions.

Earl,

I am copying Sydney Hupp on this email. She works in Administrator Scott Pruitt's office at the EPA. She was recently very helpful in setting up a meeting with Mr. Pruitt and is in a better position than I am when it comes to Scott Pruitt's availability to speak to the National Association of Home Builders this summer. I have also provided her work number below.

Sydney,

First, thank you for your help last week on setting up that other meeting. Second, I

spoke to my local homebuilders the other day and was bragging on Scott. They are eager to meet him if his schedule permits. Please see Mr. McLeod's email below for details. I hope this helps.

Alan-

It was great to see you last night at the HBA of South Carolina Board of Directors meeting and the Bird Supper. Your remarks were well received and appreciated.

Pursuant to our conversation, please extend an invitation to EPA Administrator Scott Pruitt to speak at our lunch meeting during our National Association of Home Builders (NAHB) Legislative Conference on Wednesday, June 14, 2017. The meeting will be held in Emerson Hall of the Library of Congress, Washington DC beginning at 12:15 p.m. We expect 30 members of the Building Industry Association of Central South Carolina to be in attendance including our state leadership and representatives of NAHB.

Of course, we would be honored if you could join us as well.

Thank you for your assistance in this regard.

Sydney, I've attached the form for Tuesday's meeting. I will join Chet for the meeting as well. Please let me know if you need anything else.

For June 15th, do you think it would be possible for the Administrator to join us in our meeting space across the street at the Trump Hotel? If not, that is completely understandable and we'll keep the meeting in EPA HQ. We're just working through some logistical issues on our end.

Thanks!

Geoff

Hi Sydney, I hope things are well with you too! The first meeting is just with Chet Thompson, AFPM's president. We're based in D.C. so his schedule is pretty flexible. I've copied Rebbie Riley, Chet's EA, to help with scheduling.

The second request is for AFPM's executives for the afternoon of June 15th. They'll be flying into town for a series of meetings and would like to visit with Administrator Pruitt if he's available. These are the executives we expect to join.

Larry Ziemba (AFPM Chairman of the Board)

Executive Vice President, Refining, Phillips 66

Joe Gorder (AFPM Vice Chairman)

Chairman, President and CEO, Valero Energy Corporation

Greg Goff (AFPM Past Chairman)

Chairman, President and CEO, Tesoro Corporation

Dennis Seith (AFPM Treasurer)

President and CEO, INEOS

Dan Coombs

Executive Vice President of Global Manufacturing, Projects, Refining & Technology, LyondellBasell Industries

George Damiris

CEO & President, HollyFrontier Corporation

Gary Heminger

Chairman, President and CEO, Marathon Petroleum Corporation

Dave Lamp

President and COO, Western Refining Company

Jack Lipinski

CEO, CVR Energy

Jim Loving

Sr. VP Refining, Pipelines and Terminals, CHS, Inc.

Jeff Ramsey

President and CEO, Flint Hills Resources

Jeff Webber (Associate Liaison)

President, AltairStrickland, Inc.

Michael Coyle (tentative on attendance)

President, Manufacturing, Chevron U.S.A., Inc.

Tom Nimbley (tentative on attendance)

CEO, PBF Energy, Inc.

Jerry Wascom (tentative on attendance)

President, ExxonMobil Refining & Supply Co.

I'll fill out the form for both meeting requests and send them back as soon as possible.

Thanks!
Geoff

Good morning Geoff,

Hope this email finds you well! Ryan forwarded me the below email to facilitate getting the meetings mentioned on the Administrator's calendar. Are you all based in DC or will people need to travel in for the first meeting as well as the second? Trying to get an idea of which May days you would like for me to look at for your group. Additionally, would you mind filling out the attached document at your convenience?

Thank you!

Subject: AFPM Meeting Request

Ryan, I hope things are well. As we discussed last week, I would like to request a meeting for AFPM's president, Chet Thompson, with Administrator Pruitt in early May. Chet would like to reintroduce himself, discuss some of the issues that are top of mind for our refining and petrochemical members, and of course explore any ways AFPM can be helpful to the Administrator. By way of background, Chet was EPA Deputy General Counsel under President G.W. Bush.

Separately, we also have our Executive Committee meeting on June 15th in D.C. If I'm not overstepping, would it be possible to explore a second meeting with Administrator Pruitt and senior executives from our companies for that afternoon?

Thanks,

Geoff Moody

To: Hupp, Sydney <hupp.sydney@epa.gov>; Coyner, Emily W. <ecoyner@nssga.org>
Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 23rd at 2:15 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the left heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

To: Hupp, Sydney <hupp.sydney@epa.gov>
Subject: Meeting with Administrator Pruitt

I would like to arrange a meeting with Administrator Pruitt to introduce him to NSSGA. NSSGA represents the aggregates industry, which provides the raw material in asphalt, concrete and cement used in nearly every construction or infrastructure project and employs over 100,000 in the U.S. We are very encouraged about the direction of EPA under Administrator Pruitt and would like to discuss our industry's unique issues, including air and water issues such as WOTUS and Conductivity. Please let me know if I can provide any additional information. We would like an in person meeting with our President and CEO, Michael Johnson, Senior Vice President, Government and Regulatory Affairs Laura O'Neill-Kaumo, myself and Administrator Pruitt. We realize this is a very busy time for the Administrator, but would greatly appreciate a short meeting to discuss our industry's issues.

Subject: Fw: AFS - GA FLY-IN AGENDA

Sydney: Below and attached please find the info on the American Foundry Society Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant

energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

Subject: Call with EPA Administrator Pruitt

Hi Doug,

Hope all is well!

Gov. Hogan was hoping to schedule a call in early June with EPA Administrator Scott Pruitt to discuss the Chesapeake Bay and other issues facing Maryland. (Tuesday, June 6 before 2 PM would be ideal, if possible.) Please let me know if you need any other information to put in this request. We appreciate your assistance!

Thanks,

Ariel

Yes , Go Pokes !

It was suggested that I discuss this issue with Mr. Ryan Jackson from a Amanda Hall who is with Senator Inhofe's staff on the EPW Committee.

Their office was very supportive of this only national emergency response asset and also the need to reduce EPA's cost of operations overall. They
thought our ideas should definitely be reviewed and considered by Mr. Jackson.

They asked me to contact you directly and brief Mr. Jackson on this topic.

Best Regards,

Subject: Re: scheduling issue

Hello Sydney !

Yes, I was wanting to set up a meeting with Mr. Ryan Jackson to discuss national emergency response issues that impact the U.S. EPA. I would like to bring two colleagues from Oklahoma that are experts about the EPA emergency response program to the meeting. We would like to propose a requested transition of an EPA asset back from where it originated which is the Department of Defense. We expect this will reduce costs for the EPA.

At any point, we would like to discuss a proposal to reduce the current costs of operation to the EPA.

I am originally from Yukon, Oklahoma and a Ph.D. graduate in physical chemistry from Oklahoma State University. I am one of the leading scientists in the country in the technical area of chemical and radiological emergency response technology with over 100 scientific publications and scientific lectures at numerous invited national and international scientific conferences. I have attached a short bio of my experience and a photo.

We would only need about 30-45 minutes with Mr. Jackson to discuss the issues related to the EPA and emergency response. We would be pleased to answer any questions that Mr. Jackson would want to ask about this technology area and the state of the Nation's chemical and radiological emergency response capabilities.

Thanks so much !

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 18th at 11:15 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors - EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Greetings Ms. Dravis,

Sorry to have missed you by phone.

I reached out to Mr. Schuette to give me your contact information because I wanted to keep Mr. Pruitt's office in the loop regarding op eds in the Washington Times. The Times will be running a section on energy. When they have asked me to submit an op-ed on the topic of ethanol, they mentioned that they would also be publishing an op-ed from Mr. Pruitt.

Attached is what I have submitted. I suspect that my views are in line with those of Mr. Pruitt, but I wanted to provide him an opportunity to comment on what I wrote. Any comments or suggestions that his office has would be welcome.

I will be in D.C. the week of May 15th. If Mr. Pruitt or you could carve out 15-20 minutes to meet with me, that would be wonderful.

Have a nice weekend,

Jerry Jung

Subject: Speaking Invitation - Western State Farm Bureau Governmental Affairs Directors

Dear Administrator Pruitt:

I am writing to invite you to speak at an upcoming meeting of the Directors of Governmental Affairs for the western state Farm Bureau organizations. Farm Bureau is the largest agricultural organization in the nation, and the policies of the EPA have a dramatic impact upon our members as they conduct their farming and ranching operations.

We are very encouraged by the direction that you and President Trump have been taking during the first 100 days of the administration. We are very supportive of the proposed withdrawal of the WOTUS rule, the clean power plan, and other burdensome regulations which went far beyond the legal scope of power for the EPA.

Each year the state Farm Bureau Directors of Governmental Affairs meet together to discuss issues, hear from experts and determine how best to work with the administration and Congress to remove unnecessary and overreaching regulatory burdens so our members can do what they do best, provide food, fiber and fuel for the rest of the nation and the world.

If you are available, we would love to have you join us on **Wednesday, June 14 at 11:00 am** at the Coeur d'Alene Resort in Coeur d'Alene Idaho. You would have up to one hour for your comments and to take Q&A. Representatives from every western state except California have registered at this point. We anticipate approximately 17 attendees, plus some spouses, so it will be an intimate setting. No press will be present, unless you would like us to invite the press for your presentation.

This will be a great opportunity to share President Trump's and your vision of the proper role of the EPA and how EPA can work more effectively with the states. We believe our organizations can have a positive influence on the Congressional delegations from the western states to help implement your goals and priorities. We see this as an opportunity to ensure we are all on the same page and moving forward in a unified manner.

We understand that you cannot always be at every event that you would like to attend. If you cannot attend personally, we would appreciate the opportunity to hear from another senior political official within EPA.

If you need any additional information from me, please don't hesitate to contact me using the information below.

Thanks for your consideration of this request, we look forward to hearing from you.

Sincerely,

Russ Hendricks
Director of Governmental Affairs

Subject: Meeting Request With Administrator Pruitt

Dear Ms. Hupp,

I hope this note finds you well. I am writing to request a meeting with Administrator Pruitt on behalf of my company's President & CEO Paul Browning. I understand that there might be a form we'd need to fill out as part of the scheduling process, and I'd appreciate any assistance you can provide. Mr. Browning will be in Washington on 17th.

MHPSA is a U.S.-based manufacturer and provider of thermal power generation technologies. Mr. Browning would like to speak with Administrator Pruitt about our company's experience in deploying commercially-viable clean coal and emissions' control solutions in the United States. He would appreciate the opportunity to provide feedback on ways in which the Administration can expedite the deployment of commercially-viable technologies to achieve cleaner air and water and economic growth. Thank you in advance, and I look forward to hearing from you.

Best regards,

Victor

From: Woodward, Cheryl
Sent: Tue 5/9/2017 4:45:18 PM
Subject: RE: Western Growers Meeting Request

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16th at 9:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Dear Sydney,

Attached is a meeting request letter from Western Growers CEO, Tom Nassif. Our board of directors will be in DC the week of May 15th, and would appreciate the opportunity to meet with Administrator Pruitt.

As an aside, I'm good friends with Luke Holland, and got your contact information from him, if there is someone else that this request should go through additionally please advise or pass along as appropriate.

Thanks again, let me know if you need any additional information to process this request, and I look forward to hearing back.

Best,

Ken

Subject: NAHB Meeting w Administrator Pruitt

Hi Sydney!

Thanks for the call today. The National Association of Home Builders is very interested in having EPA Administrator Pruitt speak before a larger group of our members. In an effort to accommodate his schedule, we are willing to create a special meeting during our Mid-Year Meeting if the Administrator is available. The timing for the meeting would be Thursday, June 15 at a time that is convenient between 12:30 and 2:30 at the Marriott Wardman Park, 2660 Woodley Road, NW, Washington, DC. We would have an audience of approximately 700 members who are interested in hearing about Administrator Pruitt's vision for the agency, how the agency will address some of the high priority issues, and steps that may be taken to improve the regulatory environment for the Nation's home builders. We would also like to reserve some time for questions, if allowed.

Our Senior Officers would also like to meet privately with Administrator Pruitt. They will be in town and available for a quick visit next week, if a meeting on such short notice is possible. They could be available Wednesday, March 29, between 3 – 5 pm or Thursday, March 30, between 8 am – 12 pm. They could also be available for a meeting on Wednesday, June 14 or before or after the address to the members on June 15, if that schedule works.

Please take another look at the calendar and let me know what might be possible. I look forward to working with you and the Administrator in the future.

Thanks for your assistance!

Thanks for the response. Let me know on timing for a possible meeting in the Administrator's office. For logistical reasons on our end, we wouldn't try to bring our entire group over, but would like bring a subset of 8-10 folks (or whatever you suggest is appropriate size for your space).

Good morning Ken,

Hope you've been well! I don't think we will be able to make the speaking portion happen. However, we might be able to host you at the EPA for an in office meeting if you all have a time that works over the duration of your stay. Kindly let me know your thoughts on that at your convenience.

Thank you!

Dear Sydney,

Attached is a meeting request letter from Western Growers CEO, Tom Nassif. Our board of directors will be in DC the week of May 15th, and would appreciate the opportunity to meet with Administrator Pruitt.

As an aside, I'm good friends with Luke Holland, and got your contact information from him, if there is someone else that this request should go through additionally please advise or pass along as appropriate.

Thanks again, let me know if you need any additional information to process this request, and I look forward to hearing back.

Best,

Ken

Hi Sydney,

I think there is slight confusion. We are not inviting Administrator Pruitt to speak, which the form suggests otherwise. My message was just to let you all know that The Burton Awards would be sending an invitation for him to attend as a **guest**, and if he does attend that Bernie would like to invite him to sit at his table. Administrator Pruitt spoke a few years back at this event, so he should be familiar with it.

Please let me know if you still need me to fill out the form, though.

Thank you,

Emily

Hi Millan,

Hope you are well. Bernie wanted me to let you know that Administrator Pruitt will be receiving an invitation to the Burton Awards from Bill Burton. You may recall that the Administrator spoke at one of the luncheons a few years ago in his AG capacity. The Burton Awards will take place on Monday, May 22. If he is able to attend, Bernie would like to invite him to sit at his table with Lori Kalani and Senator Luther Strange who has said he would be attending. Administrator Pruitt's wife or a staff member is also invited.

Let me know if you have any questions.

Thank you,

Emily

Subject: RE: Ford Meeting Request

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 23 at 1:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hi Sydney, I tried to call you at the number below and it said it was not in service. I guess those budget cuts are extreme!!

I have visited with Ryan Bernstein from Senator Hoeven's office (copied) and we were wondering about a meeting in North Dakota per the media discussion here today on the ND Senators inviting the Secretary to ND. I have also through Blu Hulsey at Continental Resources extended an invitation for the Secretary to speak at our Annual Meeting in Grand Forks, North Dakota on Sept 27 or 28th but that's likely too far out for these discussions.

We are more than happy to visit in DC as well.

Thanks, I look forward to more discussion on a meeting date. My number if you chose to call is 701-223-6380.

NORTH DAKOTA
PETROLEUM
COUNCIL

[illegible]

March 31, 2017

Environmental Protection Agency
Mr. Scott Pruitt, Administrator
Mail Code 28221T
1200 Pennsylvania Ave. NW
Washington, DC 20460

Dear Mr. Pruitt;

Congratulations on your appointment as Administrator of the Environmental Protection Agency. I am the President of the North Dakota Petroleum Council (NDPC) and wanted to take this opportunity to tell you about the overreach of the prior administration that continues to affect NDPC members. Under the previous administration, EPA initiated sweeping Clean Air Act (CAA) Section 114 information requests and threatened company-ending sanctions under the CAA against oil companies operating in North Dakota. EPA's style and process were often contrary to the North Dakota Department of Health's (NDDoH) alternative approach to Clean Air Act Enforcement. In the one consent decree that EPA completed before the election, North Dakota refused to sign the final decree, even though NDDoH had participated fully in months of EPA driven negotiations with the operator. The North Dakota approach produced industry-wide results that immediately benefitted the environment in a shorter timeframe, with substantially less cost and included continued future compliance opportunities. Unfortunately, despite the successful North Dakota effort, we continue to see EPA focused on an aggressive, federal-only approach adopted under the earlier administration.

We respectfully request, consistent with your recent internal directive and President Trump's March 28, 2017 Executive Order, *Promoting Energy Independence and Economic* Growth, that you promptly review EPA's ongoing enforcement activities in North Dakota to determine whether they are consistent with your and the Trump Administration's approach to environmental protection and regulation.[1] We also ask that you seriously consider EPA's adoption of the NDDoH approach to Clean Air Act enforcement and take steps to amend, with court approval, the existing federal consent decree to add North Dakota (ND) so that the state continues to play an important role in protecting its environment. The attached documents describe the EPA Section 114 enforcement process, and contrasts it with the approach that North Dakota utilized. The information provided will show that ND achieved industry-wide compliance plus (above current regulations) in one-third of the time required by EPA to negotiate a settlement with one ND operator. NDPC believes that you will find this information of interest as you seek to make EPA a more effective and efficient agency, which works with states to implement, enforce and adopt resolutions that directly benefit the environment.

Please call or email with any questions you may have. We welcome the opportunity to discuss this with you and would be available to travel to Washington, DC if you feel it would be beneficial.

Thank you for your time and consideration.

Sincerely,

Ron Ness

Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 18th at 11:15 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Greetings Ms. Dravis,

Sorry to have missed you by phone.

I reached out to Mr. Schuette to give me your contact information because I wanted to keep Mr. Pruitt's office in the loop regarding op eds in the Washington Times. The Times will be running a section on energy. When they have asked me to submit an op-ed on the topic of ethanol, they mentioned that they would also be publishing an op-ed from Mr. Pruitt.

Attached is what I have submitted. I suspect that my views are in line with those of Mr. Pruitt, but I wanted to provide him an opportunity to comment on what I wrote. Any comments or suggestions that his office has would be welcome.

I will be in D.C. the week of May 15th. If Mr. Pruitt or you could carve out 15-20 minutes to meet with me, that would be wonderful.

Have a nice weekend,

Jerry Jung

Subject: Kansas Farm Bureau request to discuss Flint Hills range burning with Administrator Pruitt or staff

Sydney,

Kansas Farm Bureau would like to discuss the Clean Air Act, specifically Flint Hills (Kansas) range burning, with Administrator Pruitt. There will be a group of approximately six Kansas Farm Bureau members in Washington, DC on the morning of Wednesday, May 24 where we would be able to visit. Our main concern is the challenge of needing a prescribed fire to maintain the natural ecosystem of the Flint Hills in Kansas and the Osage Hills in Oklahoma and how smoke from these necessary fires impact the ozone and PM2.5 standards. Exceedances or violations of a national ambient air quality standard directly related to prescribed fires in the Flint Hills and Osage Hills is becoming a challenge to manage.

In 2011, Sens. Inhofe and Moran introduce a bill addressing this issue:
https://www.moran.senate.gov/public/index.cfm/news-releases?ID=dc891dd7-ad7c-4d8f-83f7-aa7c4b644b3f

So far this year the media has written a number of stories:

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: Tuesday, May 9, 2017

Meeting Date: Wednesday, May 24, 2017

Meeting Time: 11:15am eastern

Requested Location (if offsite, please list address, parking instructions, etc.): EPA headquarters or a location of the Administrator's choosing near downtown Washington, DC.

Requestor: Ryan Flickner, Senior Director of Public Policy, Kansas Farm Bureau

Purpose of the Meeting: To discuss National Ambient Air Quality Standards and the annual Flint Hills burn season in Kansas.

Background on the Meeting: Our main concern is the challenge of needing a prescribed fire to maintain the natural ecosystem of the Flint Hills in Kansas and the Osage Hills in Oklahoma and how smoke from these necessary fires impact the ozone and PM2.5 standards. Exceedances or violations of a national ambient air quality standard directly related to prescribed fires in the Flint Hills and Osage Hills is becoming a challenge to manage.

In 2011, Sens. Inhofe and Moran introduce a bill addressing this issue:
https://www.moran.senate.gov/public/index.cfm/news-releases?ID=dc891dd7-ad7c-4d8f-83f7-aa7c4b644b3f

Role of the Administrator: Listen to the concerns of Kansas Farm Bureau members and, if possible, offer suggestions for a workable solution moving forward.

Attendees: Ryan Flickner (staff), Logan Moulds (staff), George Pretz (farmer-stockman from Miami County, KS), Doug Zillinger (farmer-stockman from Phillis County, KS), Keith Miller (farmer-stockman from Barton County, KS), Sara Scott (stockman from Montgomery County, KS).

Flint Hills Prescribed Fire Update

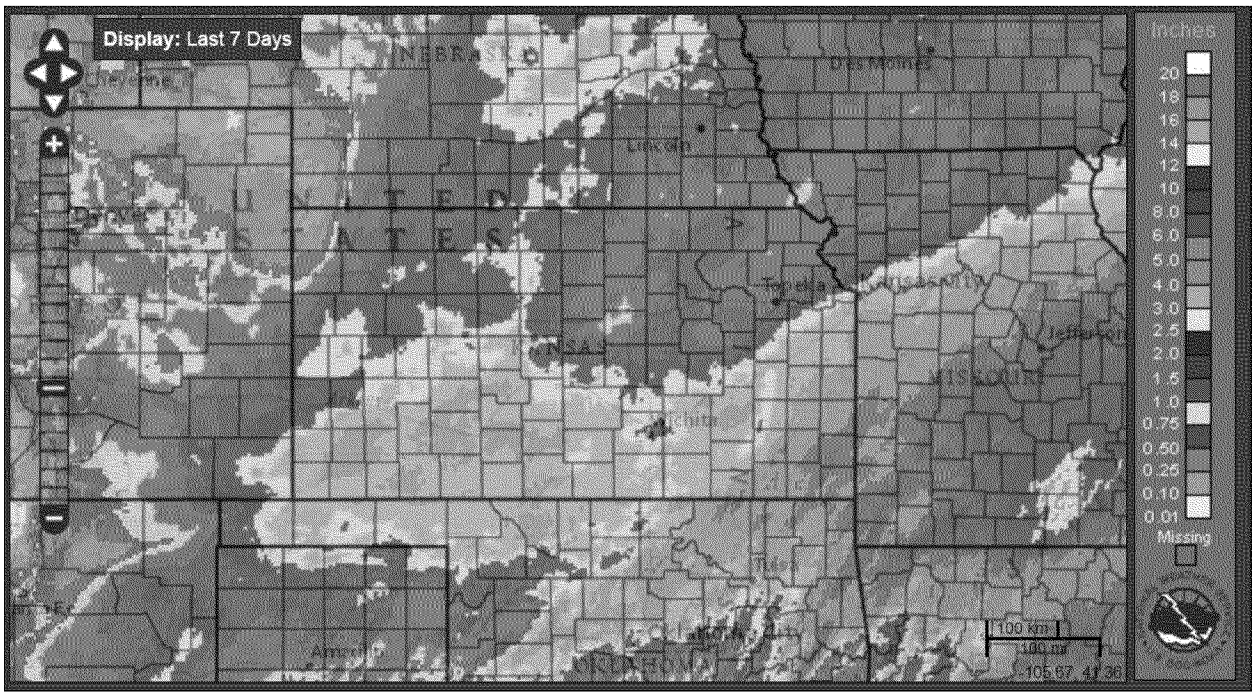
May 5, 2017

The following information on the Flint Hills prescribed fires will be sent weekly to keep stakeholders up to date on fires and related smoke.

Meteorology

Multiple rounds of rain fell throughout the past week, including some heavy rains over the southern Flint Hills and especially east of the Flint Hills. Rainfall totals over the past week ranged from an inch to more than 6 inches in the Flint Hills. Between the rounds of rain, there were cool and breezy conditions with temperatures in the 40s and 50s, and wind speeds often gusting above 30 mph. Dry conditions finally took hold by late Wednesday (May 3), and warmth returned to the area yesterday (Thursday, May 4) with temperatures back up near 70 degrees.

Precipitation



NOAA/NWS Observed Total Precipitation for April 28 – May 4, 2017.

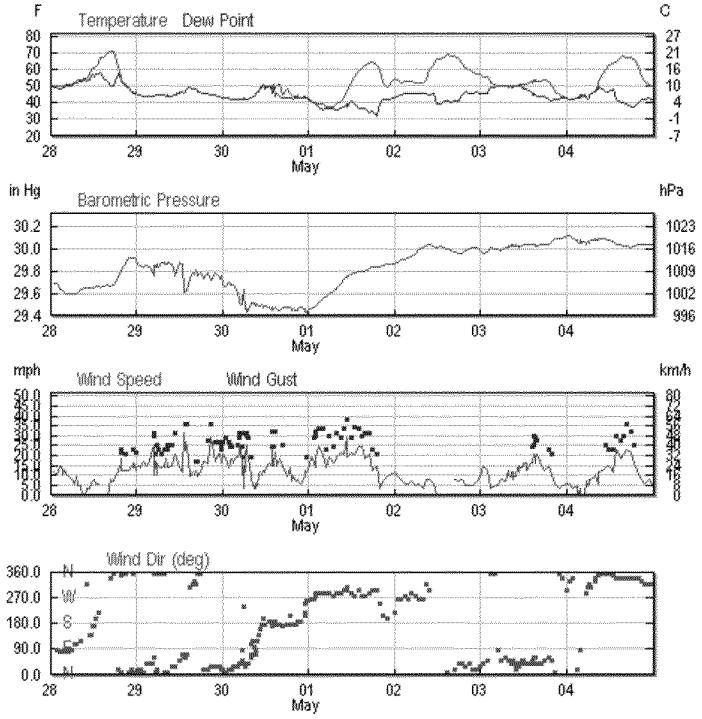
Apr 28 – May 4, 2017 Observed Weather from KLNK. Graphic: Weather Underground, Inc.

Emporia, KS



Apr 28 – May 4, 2017 Observed Weather from KEMP. Graphic: Weather Underground, Inc.

Air Quality Data

Air quality data for the week of April 28 – May 4, 2017:

Ozone: Preliminary data indicates no exceedances of the NAAQS daily 8-hour average maximum of 70 ppb.

PM2.5: Preliminary data indicates no exceedances of the NAAQS 24-hour daily average of 35 $\mu g/m^3$.

Air quality images on the following pages for each day show preliminary data, courtesy Air Now Tech.

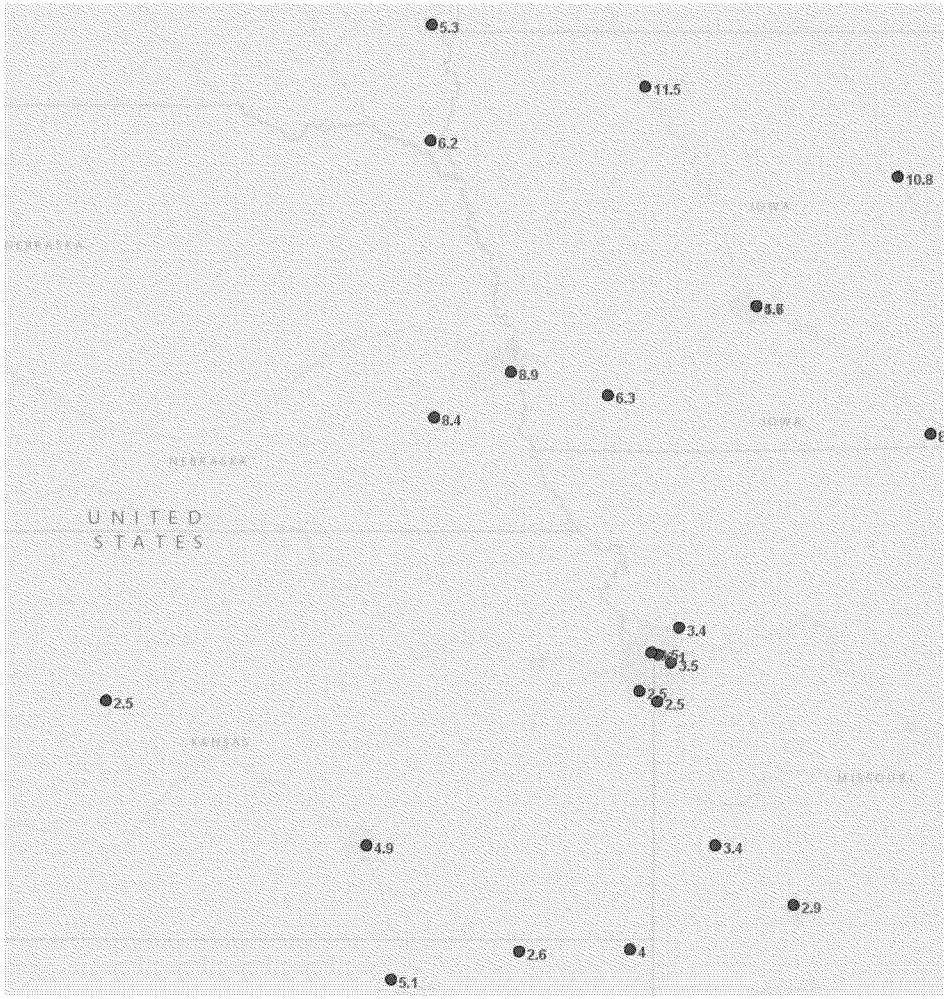
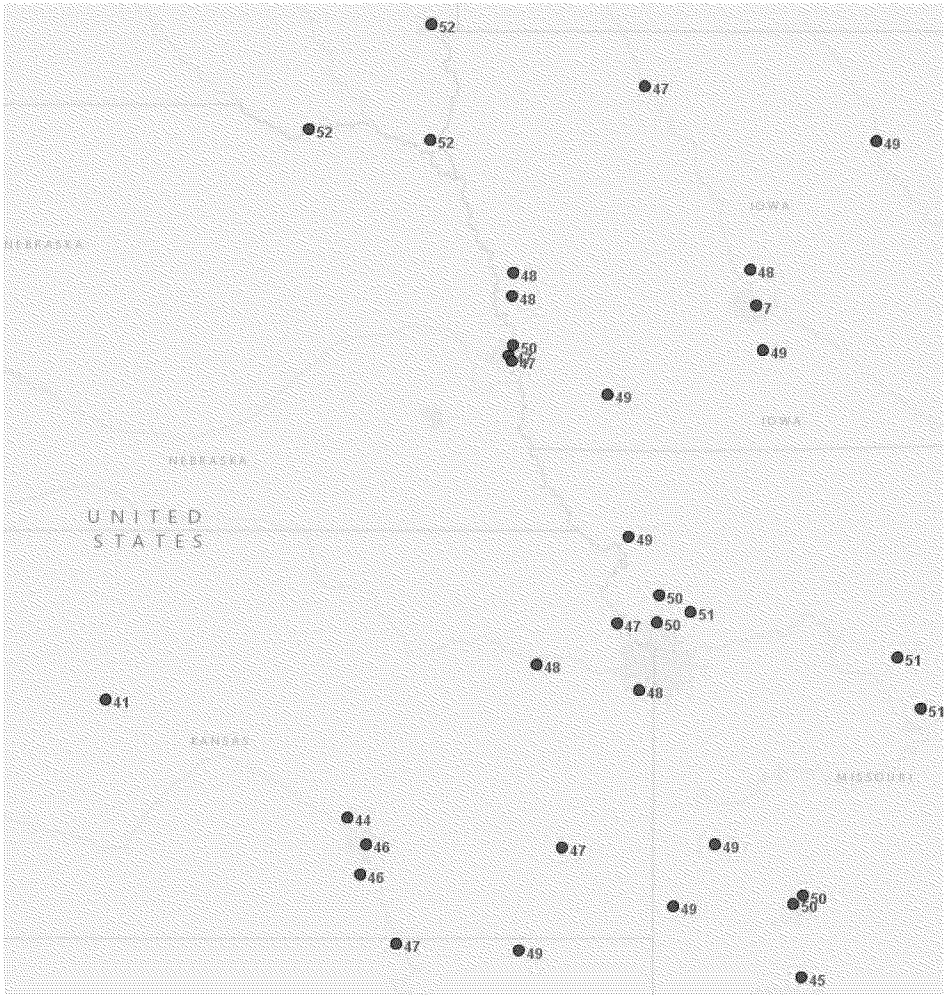
Thursday, May 4, 2017

PM2.5 (24-hour average)



Ozone (8-hour average maximum)



Fires and Smoke

A mere handful of prescribed fires within the Flint Hills were seen last Friday (April 28) and Monday (May 1). A few other prescribed fires occurred outside of the Flint Hills throughout the week. An area of smoke was analyzed along the Missouri River valley on Tuesday (May 2), primarily aloft, that was likely from prescribed burning in North Dakota and southern Manitoba, Canada.

Daily Fires and Smoke Analysis provided by NOAA Hazard Mapping System Fire and Smoke Product are provided on the following pages.

KSFIRE.ORG

This website was developed as part of the development of the Kansas Flint Hills Smoke Management Plan. Kansas State University hosts the webpage and it includes important information for ranchers and others who might be interested in the Flint Hills. It provides training, regulations, policies, publications, a modeling tool and other links to guide people looking for information on smoke management. The development of the Flint Hills Smoke Management Plan is an attempt to balance the need for prescribed fire in the Flint Hills with the need for clean air in downwind areas.

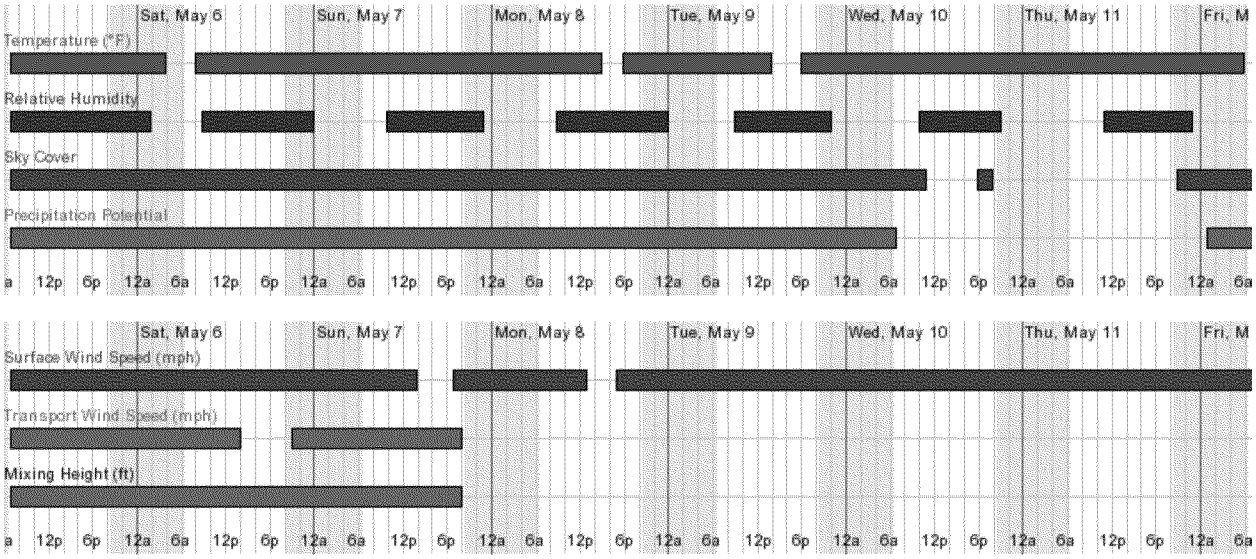
Bureau of Air, KDHE

Upcoming Look at Fires and Smoke

Intensive 'green-up' has already occurred across the Flint Hills and will likely preclude any additional significant prescribed burning this spring. Temperatures and humidity will be ideal throughout the week ahead. There appears to be a good chance for a round of rain on Wednesday and Thursday. Breezy conditions are expected for Sunday and Monday afternoon. A high pressure moving overhead will drop transport wind speeds below the ideal threshold on Saturday afternoon.

Ideal Weather Conditions for Prescribed Burning



Current National Weather Service forecast for the approximate center of the Flint Hills showing when conditions may be most favorable for wildland burning as described at KSFire.org. Conditions are most favorable when each parameter has a colored boxplot displayed. Note: Forecast for mixing height and transport winds are only out to 2 days. Forecast valid: 8am May 5, 2017.

Hi Sydney,

I think there is slight confusion. We are not inviting Administrator Pruitt to speak, which the form suggests otherwise. My message was just to let you all know that The Burton Awards would be sending an invitation for him to attend as a **guest**, and if he does attend that Bernie would like to invite him to sit at his table. Administrator Pruitt spoke a few years back at this event, so he should be familiar with it.

Please let me know if you still need me to fill out the form, though.

Thank you,

Emily

Emily,

Great to hear from you! I have passed this along to Sydney who handles all the scheduling. She should be in touch on Monday.

Thank you.

Millan Hupp

On Apr 7, 2017, at 4:50 PM, Lundahl, Emily <ELundahl@cozen.com> wrote:

Hi Millan,

Hope you are well. Bernie wanted me to let you know that Administrator Pruitt will be receiving an invitation to the Burton Awards from Bill Burton. You may recall that the Administrator spoke at one of the luncheons a few years ago in his AG capacity. The Burton Awards will take place on Monday, May 22. If he is able to attend, Bernie would like to invite him to sit at his table with Lori Kalani and Senator Luther Strange who has said he would be attending. Administrator Pruitt's wife or a staff member is

also invited.

Let me know if you have any questions.

Thank you,

Emily

I am still trying to get you sufficient info on the AFS fly-in, but I have better clarity on the other items:

-The Vinyl Institute would love to have Samantha speak to the exec team on the 16th as well as to the full fly-in group on the 17th. They are very excited and appreciative.

-Joc O'Rourke of Mosaic would be available any time the Administrator has time. To restate, he is requesting no more than 15 minutes.

Thank you again, Sydney, A.J. Ferate

Thanks for trying to make those work, Sydney.

While I have you looking, could you check on two other dates in June:

- The Global CEO for Mosaic, Joc O'Rourke is requesting to meet with Pruitt for 15-20 min on June 20th. He is only in county & DC that day. Mosaic is involved in a number of industries, but phosphate and potash production are the primary industries they are involved in here in the U.S.

-The American Foundry Society (AFS) Fly-in is on June 21st (or 20th.) Their specialty is "Metalcasting". They're asking for Administrator Pruitt to speak at their Leadership Breakfast on 21 June. If June 21st doesn't work, they can make June 20th work.

Thank you for letting me bother you with these; talk to you soon.

I appreciate you, AJF

Subject: Meeting request (as discussed)

Sydney:

Thanks for the note yesterday. As mentioned, the Vinyl Institute is holding

it's annual fly-in meeting in May. A request for Ryan Jackson to speak to the group on May 17th was previously forwarded by the organization.

This request is for the Executive Committee of the Vinyl Institute to meet for 15 minutes with the Administrator the day before the fly-in, on May 16th at any point during that day the Administrator is available.

The executive committee represents four large chemical companies that produce products such as PVC. Names that would likely be in attendance would include:

Bob Buesinger, Senior Vice President – Vinyls, Westlake Chemical, Houston, TX

Grant Evans, Vice President and General Manager – Vinyls, Occidental Chemical Corporation, Dallas, TX

Dick Heinle, Senior VP/General Manager – Vinyls, Formosa Plastics, Livingston, NJ

Dick Mason, Corporate Secretary, Shintech Inc., Houston, TX

Dick Doyle, President and CEO, Vinyl Institute, Washington, DC

Rich Krock, Vice President Regulatory and Technical Affairs, Vinyl Institute, Washington, DC

JC Walker, Partner, Keller & Heckman, Washington, DC

Should you have any additional questions about this you know where to find me.

Also, when I met with the Administrator a couple of weeks ago an invitation was extended to speak to the Oklahoma Independent Petroleum Association (OIPA) Annual Conference during the weekend of June 3-4 at

any time he would be available. The conference is in Las Colinas, TX (Dallas metro area.) He seemed interested, but non-committal. Let me know if this is something he would be interested in doing.

Call me with any questions, Sydney. I appreciate you, A.J. Ferate

Hello Sydney !
Yes, I was wanting to set up a meeting with Mr. Ryan Jackson to discuss national emergency response issues that impact the U.S. EPA. I would like to bring two colleagues from Oklahoma that are experts about the EPA emergency response program to the meeting. We would like to propose a requested transition of an EPA asset back from where it originated which is the Department of Defense. We expect this will reduce costs for the EPA.

At any point, we would like to discuss a proposal to reduce the current costs of operation to the EPA.

I am originally from Yukon, Oklahoma and a Ph.D. graduate in physical chemistry from Oklahoma State University. I am one of the leading scientists in the country in the technical area of chemical and radiological emergency response technology with over 100 scientific publications and scientific lectures at numerous invited national and international scientific conferences. I have attached a short bio of my experience and a photo.

We would only need about 30-45 minutes with Mr. Jackson to discuss the issues related to the EPA and emergency response. We would be pleased to answer any questions that Mr. Jackson would want to ask about this technology area and the state of the Nation's chemical and radiological emergency response capabilities.

Thanks so much !

Best Regards,
Robert Kroutil

Would it be possible for you to contact me regarding a scheduling issue ?

I am a Ph.D. graduate from Oklahoma State University.

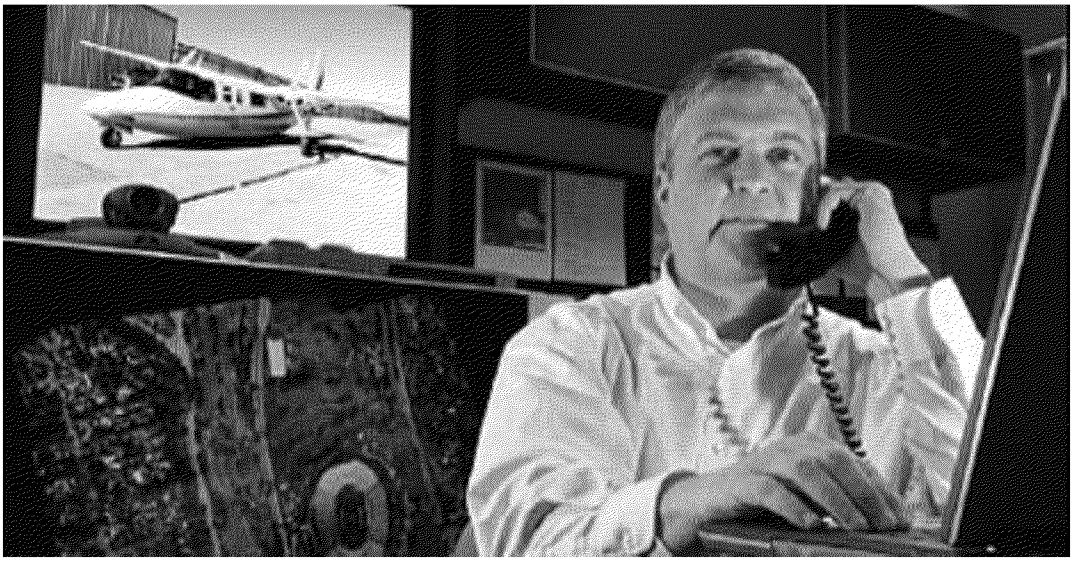
My phone number is 757-419-9386.

Best Regards,

Robert Kroutil

Kalman and Company, Inc.

Yukon, Oklahoma



Dr. Robert Kroutil is a nationally recognized expert in the field of passive infrared chemical detection to address homeland security issues. He has over 34 years experience within the Department of Defense assigned to the Edgewood Research and Development and Engineering Center, Edgewood, Md. After 2000, he supported the Department of Defense Joint Staff (J3-Operations). Dr Kroutil has also worked for the Department of Energy Los Alamos National Laboratory for nine years on homeland security matters. Work in private industry included employment with the Dynamac Corporation supporting the ASPECT project which is currently the Nation's only airborne emergency response chemical and radiological detection system. He is currently a senior scientist for Kalman and Company, Inc which is based in Virginia Beach, Virginia. Dr. Kroutil is the author and coauthor of over 28 open literature publications, 70 invited scientific national or international conferences, 1 U.S. Patent, and 2 book chapters that address homeland security issues. He has developed advanced software analysis tools for detecting environmental chemical species in the atmosphere.

Dr. Kroutil was the leading research scientist and program manager for Project SAFEGUARD which was a development project of the Department of Defence Chemical and Biological Defense Program. In that position, he led a team to develop advanced technology for defense and homeland security in a skunk works environment. He also developed policy to address chemical and radiological issues that are of critical importance to homeland security.

Dr.Kroutil is a native of Oklahoma and graduated with a Ph.D. in physical chemistry from Oklahoma State University. He was a graduate from Yukon High School, Yukon, Oklahoma. Dr. Kroutil is married.

Subject: May 10 Meeting with Administrator Pruitt

Dear Sydney,

I am writing to amend my participant list for ACC and the Biocide Panel's May 10 meeting with Administrator Pruitt. Mike Walls, Vice President, Regulatory and Technical Affairs, ACC also will be in attendance.

Would you please let me know who will be attending with Administrator Pruitt.

Thanks,

Komal

Sydney,

I apologize that it has taken a bit of time to return the attached meeting request form. Coordination among the attendees and finding available dates to propose to you and Administrator Pruitt was a little tricky. We are suggesting May 9, May 11 or May 12 (times specified in the form). If Administrator Pruitt is not free during those times, please let me know as soon as possible, and we will revisit calendars.

Thanks again.

Best,

Komal

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: May 2, 2017

Meeting Date: May 25, 2017

Meeting Time: We are available anytime from 7 a.m. to 1 p.m. May 25, 2017.

Requested Location (if offsite, please list address, parking instructions, etc.): We are happy to come to the EPA or the Administrator is welcome at our address: 1667 K Street, NW WDC.

Requestor: Elizabeth Craddock – VP of Policy and Government Affairs, on behalf of the International Association of Drilling Contractors (IADC).

Purpose of the Meeting: IADC is holding an offshore member WDC fly-in to meet with Congressional Members as well as agency officials who have policies that may impact IADC's offshore members.

Background on the Meeting: IADC is a trade association representing the interest of the upstream oil and gas industry, specifically, the drilling contractor. Our members who are coming to DC represent the largest companies (Transocean, Rowan, Ensco, Noble and Diamond Drilling) operating in the Gulf of Mexico. Our members would like the opportunity to meet the Administrator, give him a status update on the state of the U.S. offshore drilling industry, and review a few issues that are under EPA's jurisdiction. (Please see attached letter sent in February).

Role of the Administrator: To meet and connect with IADC's members while they are in DC. Ideally to listen and understand industry's point of view and take that information into consideration when moving forward with future EPA policies.

Attendees: James Sanislow, VP and CCO at Noble Drilling; Brady Long, General Counsel at Transocean; Michael Lawson, VP HSE at Rowan; Lyndol Dew, SVP at Diamond Offshore; Chris Johnson VP at Ensco; and Jason McFarland, President; Alan Spackman, VP PGRA; Elizabeth Craddock, VP PGA; and Melissa Mejias, Legislative Analyst all of IADC.

Point of Contact: Elizabeth Craddock 202-293-0670 or Elizabeth.craddock@iadc.org

From: Woodward, Cheryl
Sent: Mon 5/15/2017 3:10:26 PM
Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 23rd at 2:15 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the left heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

I would like to arrange a meeting with Administrator Pruitt to introduce him to NSSGA. NSSGA represents the aggregates industry, which provides the raw material in asphalt, concrete and cement used in nearly every construction or infrastructure project and employs over 100,000 in the U.S. We are very encouraged about the direction of EPA under Administrator Pruitt and would like to discuss our industry's unique issues, including air and water issues such as WOTUS and Conductivity. Please let me know if I can provide any additional information. We would like an in person meeting with our President and CEO, Michael Johnson, Senior Vice President, Government and Regulatory Affairs Laura O'Neill-Kaumo, myself and Administrator Pruitt. We realize this is a very busy time for the Administrator, but would greatly appreciate a short meeting to discuss our industry's issues.

On May 5, 2017, at 7:18 AM, Rashid G. Hallaway <rhallaway@hhqventures.com> wrote:

Hi Tate,

I am writing on behalf of Steve Chancellor, Chairman of White Stallion Energy, to request a meeting with Administrator Pruitt. White Stallion Energy is based in Evansville, Indiana, and is one of the largest producers of steam coal in the Illinois Basin.

Mr. Chancellor would like to thank the Administrator for his outstanding leadership during the first 100 days of the Administration, and also discuss several regulations that are adversely impacting the coal industry. Mr. Chancellor is available early next week, May 8-10th, which I recognize is very short notice. If those dates don't work, please let me know the Administrator's availability during the month of May.

Thank your for assistance assistance and thoughtful consideration.

Subject: RE: ETHICS QUESTIONS - EPA Administrator' Attendance at Ford's Theatre Annual Gala - June 3-4, 2017

Good morning Jennie,

I hope you're well!

The *Ford's Theatre Society Annual Gala* is a full weekend of events that takes place over two days. Guests who purchase tickets are purchasing for the entire weekend of events, and do not have the option to pay for each event "a la carte." The fair market value for one ticket for the full weekend of events is $500.

Please let me know if I can be of additional assistance. We would be delighted to welcome Administrator and Mrs. Pruitt to the event.

Best,

Alicia

Subject: ETHICS QUESTIONS - EPA Administrator' Attendance at Ford's Theatre Annual Gala - June 3-4, 2017

Hi Alicia,

I provide ethics advice to EPA Administrator Pruitt and for gift reporting purposes, would you

be able to provide a cost/person estimate for each of the events in your invitation? If there is no cost/person estimate, we will also accept a market value estimate which includes an aggregate cost of food, beverages, entertainment, and any other tangible benefits (e.g., valet parking, gift bag, tips, etc.) per person.

There is no ethics issue with the Administrator's attendance; however, as I provide ethics advice only, it will be the EPA Scheduling Office that is able to confirm his attendance (cc'd to this email).

Thanks!

Good morning,

I'm reaching out regarding the invitation for Administrator and Mrs. Pruitt to attend the *Ford's Theatre Annual Gala* on June 3-4, 2017. A formal invitation has been sent; a pdf of the invitation and a full schedule of events is also attached for your reference. We would be delighted to have them join us for any or all of the weekend they might be available for. Please contact me with any questions or should you need additional information.

Best,

Alicia

Good morning Sydney,

I was just following up on the request Mr. O'Bannon had to get an appointment with Byron Brown to invite him to speak at a Policy Seminar sponsored by OPM. Our last email indicated you were going to forward the request to Mr. Brown's office about getting a meeting set up. As I have not heard anything, could you please provide contact information so I can seek a meeting date?

Also, Mr. O'Bannon asked me to set up a lunch appointment with the Administrator for himself and Steven Milloy, who I understand worked on the transition team.

Thank you in advance for you assistance.

Best,
Diane

Good morning!

Arrival instructions are below. Would you please let me know a final list of attendees as well? I will forward your note to Byron's office about getting a meeting set up.

Thanks!

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, between Constitution Ave and Pennsylvania Ave. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the South Lobby of the William Jefferson Clinton building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Subject: Meeting April 26th

Good morning Sydney,

Is there any particular instructions I should provide to the attendees for the GM meeting next week on April 26th at 10 am.

On another note, Michael O'Bannon asked me to set up a meeting with Byron Brown, Deputy Chief of Staff for Policy. He would like to invite him to speak at a Policy Seminar, sponsored by OPM. I believe the seminar will be held in the beginning of July with approximately 33 students. Michael would like Mr. Brown's presentation to be on Policy

Development in the Federal Government. All this to ask, if you could provide a contact number for the person I should speak with to set up the meeting.

Thank you,

Diane

Good afternoon Mr. Peterson,

Thank you for reaching out! I would be happy to help facilitate getting this meeting with the Administrator on the calendar! Would you happen to be available May 16th at 4:30PM to come by our office? Additionally, would you mind filling out the attached form? Please let me know if you have any questions!

Thank you!

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: 5/8/17

Meeting Date: 5/16/17

Meeting Time: 4:30pm

Requested Location (if offsite, please list address, parking instructions, etc.): Office of the Administrator

Requestor: James Peterson, Co-Founder and CEO of Frontier Water Systems

Purpose of the Meeting: To discuss technology advances and corresponding economics of FGD wastewater treatment as well as suggestions for modifications to the rule in order to save cost while mitigating environmental impact.

Background on the Meeting: Introduce Frontier Water Systems and provide additional supporting data as it pertains to the ELG rule during this period of potential re-consideration. We are an example of the private American engineering and environmental innovation required to deliver clean coal, protect our nations waters and preserve jobs

Role of the Administrator: To participate directly in the meeting in order to gain an appreciation of the state of technology and consider suggested improvements to the ELG rule

Attendees: James Peterson (Frontier Co-Founder and CEO), Tim Pickett (Frontier Co-Founder and CTO)

Point of Contact: James Peterson, cell 858.822.8247, jamespeterson@frontierwater.com

Subject: RE: Meeting with Chris Wood, President and CEO of Trout Unlimited

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 25 at 11:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hello Sydney and Ryan,

As a follow-up to his letter (attached), Chris Wood, President and CEO of Trout Unlimited, would like to request a meeting with Administrator Pruitt to discuss Trout Unlimited's partnership with the EPA.

He can meet as early as Monday, April 24, and can be available at the convenience of Administrator Pruitt.

I will follow-up by phone in the coming days to assist with scheduling, if needed.

Thank you,

Liz

Dear Ms. Hupp,

I know an invitation or two is floating around the offices there at EPA, but I was recently given your email as you are the scheduler for Administrator Pruitt. We want to formally invite Mr. Pruitt to be our opening keynote to our annual OK Building Summit & Expo on September 27, 2017, 10:00 am, at the Cox Convention Center. As builders and developers we heavily endorsed and applauded his appointment as Administrator of the EPA.

Our annual Summit has grown each year and last year we had over 650 in attendance. We would love to welcome Mr. Pruitt back to Oklahoma in his new role.

Thank you for consideration and please let me know if I can provide any additional details.

Subject: Kansas Farm Bureau request to discuss Flint Hills range burning with Administrator Pruitt or staff

Sydney,

Kansas Farm Bureau would like to discuss the Clean Air Act, specifically Flint Hills (Kansas) range burning, with Administrator Pruitt. There will be a group of approximately six Kansas Farm Bureau members in Washington, DC on the morning of Wednesday, May 24 where we would be able to visit. Our main concern is the challenge of needing a prescribed fire to maintain the natural ecosystem of the Flint Hills in Kansas and the Osage Hills in Oklahoma and how smoke from these necessary fires impact the ozone and PM2.5 standards. Exceedances or violations of a national ambient air quality standard directly related to prescribed fires in the Flint Hills and Osage Hills is becoming a challenge to manage.

In 2011, Sens. Inhofe and Moran introduce a bill addressing this issue:
https://www.moran.senate.gov/public/index.cfm/news-releases?ID=dc891dd7-ad7c-4d8f-83f7-aa7c4b644b3f

So far this year the media has written a number of stories:

http://cjonline.com/news/state-government/local/2017-04-18/burning-questions-tradition-economics-cloud-debate-prairie

http://journalstar.com/news/local/article_420984a8-e0a3-546e-a36d-7333898b551f.html

Subject: May 15-16 Scheduling Request for Administrator Pruitt

Sydney,

I hope this finds you doing well. Cam Savage suggested that I reach out to you to submit my scheduling request for Administrator Pruitt to address our Indiana Leadership Forum group.

The Indiana Leadership Forum is a 501(c)(3) non-profit organization dedicated to educating Indiana's most talented business and community leaders about government, politics and policy to prepare them for greater civic involvement and leadership roles in their communities. The group was founded in 1994 by Indiana businessman, and former White House official, Al Hubbard. I have been serving as the Executive Director of the group since 2012. Each year, we bring a class of 25 professionals to Washington, D.C. toward the end of the program to meet with federal officials and

policy experts.

We would greatly appreciate the opportunity to bring the group to the EPA to hear from Administrator Pruitt.

In terms of scheduling, we have time available on the afternoon of Monday, **May 15th** and also various times on Tuesday, **May 16th**. Is it possible for us to schedule a visit on one of those days?

I'm copying Kacey Shriner who is coordinating all the logistics for the trip.

Thank you so much for your time and consideration of this request.

Subject: RE: Meeting with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 18 at 11:15 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process

Subject: Re: Meeting with Administrator Pruitt

Greetings Ms. Dravis,

Sorry to have missed you by phone.

I reached out to Mr. Schuette to give me your contact information because I wanted to keep Mr. Pruitt's office in the loop regarding op eds in the Washington Times. The Times will be running a section on energy. When they have asked me to submit an op-ed on the topic of ethanol, they mentioned that they would also be publishing an op-ed from Mr. Pruitt.

Attached is what I have submitted. I suspect that my views are in line with those of Mr. Pruitt, but I wanted to provide him an opportunity to comment on what I wrote. Any comments or suggestions that his office has would be welcome.

I will be in D.C. the week of May 15th. If Mr. Pruitt or you could carve out 15-20 minutes to meet with me, that would be wonderful.

Have a nice weekend,

Jerry Jung

Oh this is such great news!

One small wrinkle…we had someone else (literally just 15 minutes ago) accept the 3:30pm time slot. Is there any way possible that Administrator Pruitt could come meet with us at 4:30pm at the Grand Hyatt OR we could come meet him in his office at 5:00pm at the EPA? If neither of these times work, please let me know and we will do our best to move the other meeting.

Thanks again and happy to chat on the phone if that's easier.

Hi Sydney,

Thank you so much for all of your help. Due to a recent change in schedule, we would be available on Tuesday, May 16th anytime between 11:45-1:30 p.m. Would that work?

We come to town once a year for this event, but if it doesn't work out this year, we can try again next May!

Subject: RE: May 15-16 Scheduling Request for Administrator Pruitt

Thanks so much for your help. The best options for us to visit your office would be:

Monday, May 15, anytime between 12:30pm – 2:00pm. We would need to depart at 2pm.

Tuesday, May 16, 8:30am – 9:30am (30 minutes is great, of course)

Wednesday, May 17, anytime between 11:30am – 1:30pm. We would need to depart at 1:30pm.

Would anything in those time frames work?

Subject: May 15-16 Scheduling Request for Administrator Pruitt

Sydney,

I hope this finds you doing well. Cam Savage suggested that I reach out to you to submit my scheduling request for Administrator Pruitt to address our Indiana Leadership Forum group.

The Indiana Leadership Forum is a 501(c)(3) non-profit organization dedicated to educating Indiana's most talented business and community leaders about government, politics and policy to prepare them for greater civic involvement and leadership roles in their communities. The group was founded in 1994 by Indiana businessman, and former White House official, Al Hubbard. I have been serving as the Executive Director of the group since 2012. Each year, we bring a class of 25 professionals to Washington, D.C. toward the end of the program to meet with federal officials and policy experts.

We would greatly appreciate the opportunity to bring the group to the EPA to hear from Administrator Pruitt.

In terms of scheduling, we have time available on the afternoon of Monday, **May 15th** and also various times on Tuesday, **May 16th**. Is it possible for us to schedule a visit on one of those days?

I'm copying Kacey Shriner who is coordinating all the logistics for the trip.

Thank you so much for your time and consideration of this request.

Ryan and Samantha,

I hope you are well and settling into your new roles. Congratulations on your new leadership opportunities! I am personally thrilled with your appointments. I look forward to working closely with you and supporting your efforts.

I am writing to request a meeting with Administrator Pruitt for Bruce Culpepper, Shell US Country Chair, and Greg Guidry, Shell Executive Vice President of Unconventionals, on the morning of Monday, May 15th. Mr. Culpepper and Mr. Guidry would like to update Administrator Pruitt on Shell's operations in the US and discuss policy issues within EPA's jurisdiction that impact Shell's various lines of business.

If the morning of May 15th is problematic, both Shell leaders have some availability on May 16th.

I look forward to hearing from you.

Regards,

Marnie Funk

Subject: Our conversation

Dear Sarah
It was a pleasure to talk to you last week

To recap our discussion about setting our agenda for the may 10th meeting. I would like to propose the following subject to your comments and ideas

We would like to have a company deliver our home unit on may ninth to your administer's office. Our technician will set it up and it will be plugged in at a location in your offices of your choosing. It will be operational within 24 hours and we will be able to provide drinking water for all at the meeting from the device

We will spend the first portion of the meeting. Discussing the applications. Of water gen and we would like to offer the EPA the opportunity of running a pilot program at an area of your choosing to be jointly monitored

Then we would like to introduce two technologies from our sister companies that also affect the Enviorment and have enormous global implications .

The vertical fields project and secondly under the new rules of energy consumption set to go into effect in 2019 we haven a technology that reduces energy consumption drastically in driers and humidifiers

We would like to invite you for a dinner on the ninth of may

Sincerely

Yehuda Kaploun

Hi Sydney!

Yes, 10 a.m. on June 20th is perfect. Thank you!

Unfortunately, Mr. Donohue is traveling on May 9th. Any chance May 5th anytime between noon and 1:15 pm is he available? I realize the time is during the traditional lunch hour but we could make it a short meeting. Or what about May 11th? Thank you for your time and help.

Best regards,

Leila

Hi Leila,

We are confirmed for June 20 to speak. Is 10AM okay?

As for the meeting on May 8th, we are now traveling that day. Could we look at the 9th at 10AM?

Thank you!

Hi Lelia,

Hope you had a great weekend! Just touching base on the speaking form. Please let me know if you have any questions. Additionally I received your request for a meeting between Mr. Donohue an the Administrator. That would be great! Of the days offered, the 8th looks good on our end. What time of day tends to be best for you all?

Thanks!

Good morning Leila,

Hopeful that this email finds you well! I am reaching out about the invitation for Administrator Pruitt to speak at your event on June 20th. This is certainly something he would be interested in doing. Would you be willing to please fill out the attached speaker request form so that we may discuss getting it on our June schedule? Please let me know if you have any questions for me and I'd be happy to answer!

Thank you!

Subject: Call with EPA Administrator Pruitt

Hi Doug,

Hope all is well!

Gov. Hogan was hoping to schedule a call in early June with EPA Administrator Scott Pruitt to discuss the Chesapeake Bay and other issues facing Maryland. (Tuesday, June 6 before 2 PM would be ideal, if possible.) Please let me know if you need any other information to put in this request. We appreciate your assistance!

Thanks,

Ariel

Subject: RE: Invitation to Administrator Pruitt for NACD Board Meeting

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Monday, May 8 at 4:45 pm in the ALM Conference Room. The instructions/directions to EPA is below and if you have any questions please contact me. Please send me the name of the Board Members. Don't worry if some may not be attend, just give me all the names to prepare for security. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hi Sydney,

Good to hear from you and happy to hear we're able to move forward!

We have an all-member coalition meeting at 2:00 today and will identify several possible dates at that time.

I'll touch base with you this afternoon.

Cheers,

Owen

Hi Sydney and Michelle,

Thanks so much for organizing the meeting for us 'aggies' last week with the Administrator. Our ag groups are part of a larger coalition that represents just about every facet of the economy. Owen McDonough, cc'd here, represents the Home Builders which is one of the major groups that are part of the coalition. I'm reaching out to you now to coordinate a meeting with the coalition and the Administrator. I'll wait to hear back from you on next steps. Happy to chat by phone, if that's easier. Thanks in advance.

We're all here in DC. Sometime this month would be perfect, the sooner the better really. We have our legislative fly-in starting on March 28 (with Mr. Pruitt speaking to our cattle producers on March 30) so it would be optimal for this meeting to happen before March 28. Thanks in advance for your effort on this. Happy to discuss further by phone if that's helpful. 202 347 0228.

Subject: RE: Industry Coalition Request to Meet with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Monday, May 8 at 2:45 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and

Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hi Sydney,

Yes, we can move the meeting up to 2:45 PM.

The following coalition members representing 33 different organizations plan to attend:

Name
Britt Aasmundstad
Paul Balserak
C. Richard Bozek
Daren Coppock
Emily Coyner
David Crow
Deidre Duncan
Ross Eisenberg
Amy Emmert
Michael C. Formica
Lorraine K. Gershman
John Glaser
Nick Goldstein
Charlie Grizzle
Kyle Harris
Mary-Thomas Hart
Robert Helland
Aaron Hobbs
Abigail Jagoda
Dorothy Kellogg
William L. Kovacs
Reece Langley
Peter Lidiak
Kerry Lynch
Ethan Mathews
Owen McDonough
Kerry McGrath
Riaz Mohammed
Cal Odom
Don Parrish
Russell Riggs
Marci Schlup
Jerry Schwartz
Ryan Serote
Brad Steele
Ed Thomas
Desmarie M. Waterhouse
Lauren Williams
Scott Yager

Please let me know if you need anything further at this point, and thanks for your help.

Best,

Owen

Hi Owen,

Hope you've been well! Would you mind if we moved your meeting up to 2:45 instead of 3:00? He is needing to attend a meeting at the White House at 3:30.

Thanks!

Sydney Hupp

Hi Sydney and Michelle,

Thanks so much for organizing the meeting for us 'aggies' last week with the Administrator. Our ag groups are part of a larger coalition that represents just about every facet of the economy. Owen McDonough, cc'd here, represents the Home Builders which is one of the major groups that are part of the coalition. I'm reaching out to you now to coordinate a meeting with the coalition and the Administrator. I'll wait to hear back from you on next steps. Happy to chat by phone, if that's easier. Thanks in advance.

We're all here in DC. Sometime this month would be perfect, the sooner the better really. We

have our legislative fly-in starting on March 28 (with Mr. Pruitt speaking to our cattle producers on March 30) so it would be optimal for this meeting to happen before March 28. Thanks in advance for your effort on this. Happy to discuss further by phone if that's helpful. 202 347 0228.

Good afternoon Ben,

Hope you're well! My apologies for the delay in getting back to you! Mandy sent along the below request to me. I think this is certainly something the Administrator would like to participate in. Would you mind filling out the attached form so that we can look to see if it fits with our schedule? Please let me know if you have any questions.

Thank you!

Hi Mandy, I hope all is well at EPA. I'm sure it's been busy the first few weeks.

Please find attached an invitation to Administrator Pruitt. Can you please make sure this gets in the right hands over there? Appreciate the help!

Best,
Ben

That would actually be perfect! We have a dinner on the Hill with Sen. Barrasso at 6:30pm this works out well. We have 25-27 board members including a couple senior staff if that is possible?

Thanks so much, Eric

I am still trying to get you sufficient info on the AFS fly-in, but I have better clarity on the other items:

-The Vinyl Institute would love to have Samantha speak to the exec team on the 16th as well as to the full fly-in group on the 17th. They are very excited and appreciative.

-Joc O'Rourke of Mosaic would be available any time the Administrator has time. To restate, he is requesting no more than 15 minutes.

Thank you again, Sydney, A.J. Ferate

Thanks for trying to make those work, Sydney.

While I have you looking, could you check on two other dates in June:

- The Global CEO for Mosaic, Joc O'Rourke is requesting to meet with Pruitt for 15-20 min on June 20th. He is only in county & DC that day. Mosaic is involved in a number of industries, but phosphate and potash production are the primary industries they are involved in here in the U.S.

-The American Foundry Society (AFS) Fly-in is on June 21st (or 20th.) Their specialty is "Metalcasting". They're asking for Administrator Pruitt to speak at their Leadership Breakfast on 21 June. If June 21st doesn't work, they can make June 20th work.

Thank you for letting me bother you with these; talk to you soon.

I appreciate you, AJF

Subject: Meeting request (as discussed)

Sydney:

Thanks for the note yesterday. As mentioned, the Vinyl Institute is holding it's annual fly-in meeting in May. A request for Ryan Jackson to speak to the group on May 17th was previously forwarded by the organization.

This request is for the Executive Committee of the Vinyl Institute to meet for 15 minutes with the Administrator the day before the fly-in, on May 16th at any point during that day the Administrator is available.

The executive committee represents four large chemical companies that produce products such as PVC. Names that would likely be in attendance would include:

Bob Buesinger, Senior Vice President – Vinyls, Westlake Chemical, Houston, TX

Grant Evans, Vice President and General Manager – Vinyls, Occidental Chemical Corporation, Dallas, TX

Dick Heinle, Senior VP/General Manager – Vinyls, Formosa Plastics, Livingston, NJ

Dick Mason, Corporate Secretary, Shintech Inc., Houston, TX

Dick Doyle, President and CEO, Vinyl Institute, Washington, DC

Rich Krock, Vice President Regulatory and Technical Affairs, Vinyl Institute, Washington, DC

JC Walker, Partner, Keller & Heckman, Washington, DC

Should you have any additional questions about this you know where to find me.

Also, when I met with the Administrator a couple of weeks ago an invitation was extended to speak to the Oklahoma Independent Petroleum Association (OIPA) Annual Conference during the weekend of June 3-4 at any time he would be available. The conference is in Las Colinas, TX (Dallas metro area.) He seemed interested, but non-committal. Let me know if this is something he would be interested in doing.

Call me with any questions, Sydney. I appreciate you, A.J. Ferate

Hey Sydney – I would like to request an appointment with Administrator Pruitt, anytime on May 16th, with the South Coast Air Quality Management District. The discussion topics and meeting attendees are below. If this request is duplicative with one from the Carmen Group, please disregard.

Thanks and call me with any questions or concerns.

What: Meeting to discuss challenges faced by largest clean air district in the U.S. Specifically want to discuss

- General background and challenges to attain air quality requirements in Southern California

- Importance of funding for EPA programs

- Potential Air Quality Fund in Infrastructure Bill

- Waiver granted to California and 17 other states (including Washington) under Clean Air Act

- Port and Rail efficiency infrastructure (Port of Los Angeles)

- Fleet efficiency for truckers and rail along the logistical supply chain of southern California

Who: South Coast Air Quality Management District Board of Directors

- Judith Mitchell, Rolling Hills Estates City Councilmember and Member of the California Air Resources Board (representing the Western Cities of Los Angeles County on the SCAMQD Board)

- Marion Ashley, Riverside County Supervisor (representing the County of Riverside on the SCAQMD Board)

- Janice Rutherford, San Bernardino County Supervisor (representing the County of San Bernardino)

- Larry McCallon, Highland Mayor Pro Tem (representing the Cities of San Bernardino County)

- Dwight Robinson, City of Lake Forest Councilmember (representing the Cities of Orange County)

- Shawn Nelson, Orange County Supervisor, (Representing Orange County)

When: May 16th – any time of the day

Subject: Re: Meeting with Administrator Pruitt

Greetings Ms. Dravis,

Sorry to have missed you by phone.

I reached out to Mr. Schuette to give me your contact information because I wanted to keep Mr. Pruitt's office in the loop regarding op eds in the Washington Times. The Times will be running a section on energy. When they have asked me to submit an op-ed on the topic of ethanol, they mentioned that they would also be publishing an op-ed from Mr. Pruitt.

Attached is what I have submitted. I suspect that my views are in line with those of Mr. Pruitt, but I wanted to provide him an opportunity to comment on what I wrote. Any comments or suggestions that his office has would be welcome.

I will be in D.C. the week of May 15th. If Mr. Pruitt or you could carve out 15-20 minutes to meet with me, that would be wonderful.

Have a nice weekend,

Jerry Jung

External Meeting Request Form for Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: May 10, 2017

Meeting Date: May 18, 2017

Meeting Time: 11:15AM

Requested Location (if offsite, please list address, parking instructions, etc.): EPA offices

Requestor: Jerry Jung

Purpose of the Meeting: Discuss ethanol mandates

Background on the Meeting: see attached op-ed.

Role of the Administrator: Provide a sense of the Administrator's vision on this important issue.

Attendees: Jerry Jung

Point of Contact: Sydney Hupp / Samantha Davis / Bill Schuette

organizations thought that it was a renewable source of energy that would help the environment and reduce harmful emissions. Others saw it as a way to reduce dependence on foreign oil.

After eight years of dramatically increasing mandates, the results are in and it is apparent that none of these goals have been met — in fact, the opposite is true.

Due to an arcane and fraud-prone ethanol credit trading scheme, the price of higher-octane gasoline has skyrocketed, relative to lower grades; the farm economy continues its decline; finite resources such as phosphorus and subterranean aquifers are being depleted; wildlife and biodiversity are being threatened; harmful emissions have doubled; and the mandate has had no impact on reducing use of fossil fuels.

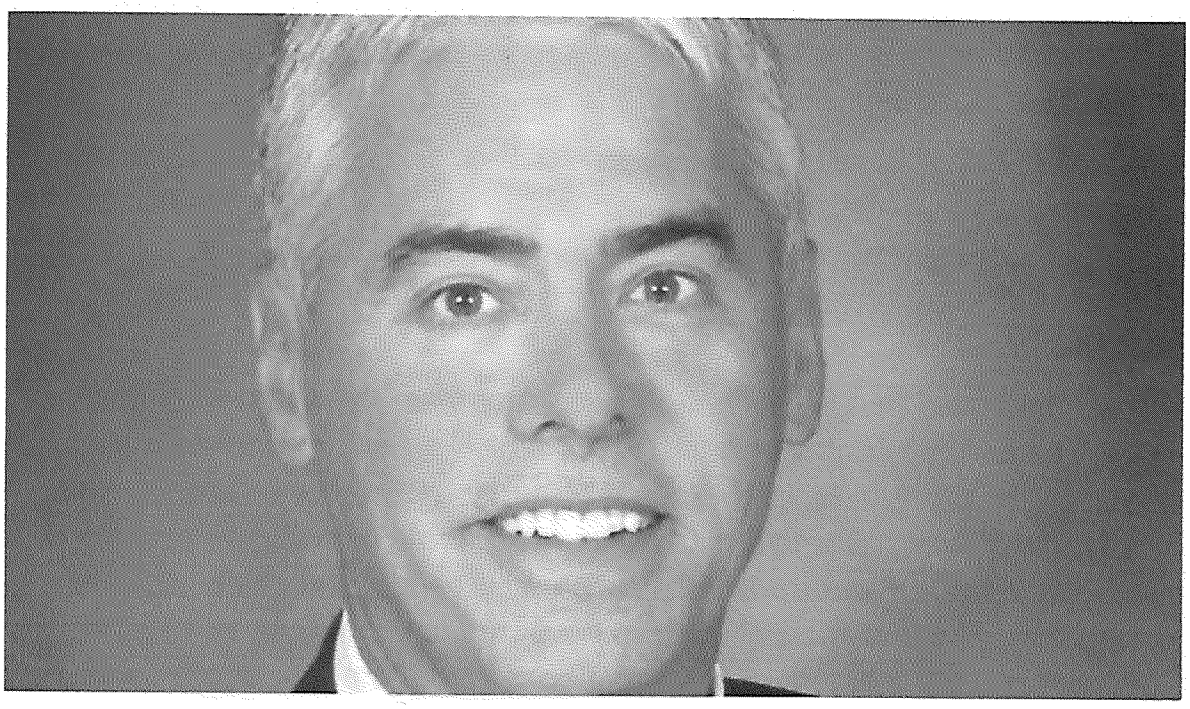
How can this be?

The answer is simple — it takes as much fossil fuel to produce ethanol from corn as it yields.

A Cornell University study estimates that it takes 40 percent more energy to produce corn ethanol than it yields. The actual distillation of corn into ethanol consumes about 28 percent as much energy as it produces; yet when all the inputs required to grow corn — such as the production of herbicides, insecticides, fertilizer and the fuel for tractors and transportation — are factored in, the equation changes. Even the U.S. Department of Agriculture, a misguided proponent of ethanol production, estimates that the energy output only slightly exceeds the inputs. The agency points out that by-products from the distillation process can be fed to livestock, but studies such as one published by the University of Nebraska point out that the practice of feeding distillates to cattle shortens the shelf life of their meat. Other studies indicate that the practice alters the flavor of meat and can make livestock sick.

The price of corn shot up to $8 per bushel when the mandate was dramatically ramped up nine years ago. As a result, there were food riots in some countries where corn is a dietary staple.

It's time to rethink ethanol mandates



By Jerry Jung - - *Monday, May 1, 2017*

This year the Environmental Protection Agency (EPA) has mandated that 15 billion gallons of ethanol be added to gasoline. As a result, most gasoline contains about 10 percent ethanol.

Initially, automotive manufacturers saw the mandate as a cheap way to increase octane ratings, and corn growers thought it would be a boon to the agricultural economy. Casual observers and even some conservation

Since then, the amount of acreage devoted to growing corn has increased to over 35 million acres in the U.S. (larger than most states) and the price is back where it started.

Unfortunately, much of this land is ecologically sensitive. The National Wildlife Federation estimates that 10 million acres in the U.S. have been converted from Conservation Reserve Programs — virgin prairie, woodlands and wetlands in the U.S. — to grow corn over the last 10 years.

The careful reader might question how 35 million acres are growing corn for ethanol, but "only" 10 million new acres have been converted to agricultural use in the U.S. Much of this acreage used to grow soybeans for export. Typically, farmers would rotate between corn and soybeans, but now many grow corn year after year.

South America has filled the void, with the result that Brazil now exports more soybeans than the U.S. — with the concomitant destruction of forest and grasslands in that country, not to mention an increased trade deficit here in this country.

A recent study discussed by a Conservative Political Action Committee panel in February concludes that the farm economy continues its decline despite — and perhaps because of — ethanol mandates.

Ethanol is a low-value commodity. A bushel of corn will produce 2.8 gallons of ethanol worth about $4.50. The same corn, fed to poultry, produces about $20 of value, and to cattle, about $50 of value. It is this value-added chain that creates rural employment and economic diversity.

It is not uncommon to see hand-painted signs in Iowa that read "Family Farms, not Factory Farms." A poll conducted by a leading conservation organization shows surprising opposition to ethanol mandates in rural areas. It is no wonder, since these are the populations most affected in terms of water quality and outdoor recreational opportunities. These are the families that must confront chemical pollution and that are at a competitive disadvantage against huge absentee landowners, when it comes to low-value commodity products. Look no further than the City of Des Moines water authority's lawsuit against upstream agricultural districts. Look no further than the City of Toledo that shut down water supplies to hundreds of

thousands of residents because of nutrient-fed toxic algae. Look no further than the just-released U.S. Geological Survey study that confirmed deadly "neo-nic" insecticides in Iowa drinking water. Perhaps it is no accident that Texas Sen. Ted Cruz, who has never supported ethanol mandates or costly agricultural subsidies, won the Republican primary in Iowa.

There are many other reasons to discontinue ethanol mandates. Dozens of diverse stakeholder groups, representing fiscal conservatives; small and marine engine users and manufacturers; food producers and food justice groups; charter boat captains; The Sierra Club, The National Wildlife Federation and the Audubon Society; and even the American Petroleum Institute are opposed to subsidized and mandated corn ethanol production.

Ironic, is it not, that a mandate sold to Congress and the public as "green" is arguably the biggest polluter of air and water in the U.S.? The policy has also been a significant driver of what has aptly been termed the Sixth Extinction of biodiversity.

Fortunately, legislation has been introduced in the House of Representatives that would cap the ethanol content of gasoline at 10 percent and reduce mandates over time. Urge your members of Congress to support this legislation.

The EPA can also play a vital role as they work with automobile companies implementing improved fuel economy standards.

The first step in this regard would be to eliminate artificial incentives to produce ethanol. Currently, the EPA gives CAFE mileage bonuses to gas guzzlers if they can consume gasoline that is up to 85 percent ethanol. Credits are also given to compensate for the reduced energy content of ethanol as compared to pure gasoline. Given the environmental destruction and excessive use of fossil fuels consumed in the production of ethanol, these credits should realistically be debits. It is imperative that the EPA consider the overall economic and environmental impact of their policies and not focus solely on a single aspect of the overall picture.

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: May 9, 2017

Meeting Date: June 19, 2017

Meeting Time: 11 am ET

Requested Location (if offsite, please list address, parking instructions, etc.): EPA Headquarters

Requestors: National leaders of 11 leading health and medical organizations, listed in the meeting request letter submitted on February 27, 2017 (also attached).

Purpose of the Meeting: To discuss the important role the U.S. Environmental Protection Agency (EPA) plays in cleaning up the air we breathe and protecting millions of Americans from the life-threatening dangers of air pollution.

Background on the Meeting:
Some of those who are most vulnerable to air pollution include children with asthma, adults with heart disease, newborns and children of all ages, as well as older adults – but everyone needs healthy air. We urge EPA to continue to implement and enforce this lifesaving public health law, and to build upon its success cleaning up air pollution and protecting Americans' health for the past 47 years. Our organizations strongly support moving forward with safeguards that promote and protect public health, and oppose initiatives to block, weaken, or delay critical health protections. We would like to discuss with you how to best continue this progress and protect the health of all Americans.

Role of the Administrator:

To share his vision for how EPA will continue to implement and enforce the Clean Air Act to protect the health of millions of Americans. Topics we are interested in hearing from the Administrator about include:

- How EPA will continue using independent, peer-reviewed scientific information and advice to inform its policymaking;
- How EPA will uphold its scientific integrity policy, which ensures the timely release of scientific research and reviews;
- EPA plans to fully implement and enforce the Clean Air Act, including the air pollution health standards; continuing to clean up sources of air pollution, including cars, trucks,

power plants, and oil and gas facilities; and addressing the health impacts of climate change, both by reducing the carbon and methane pollution that worsen it, and by investing in measures to study and reduce its health impacts in communities; and
- How EPA plans to ensure continued public access to air quality and climate change data and information, and other EPA resources, including on EPA's website.

Attendees – confirmed list below, update forthcoming based on schedules:

Harold P. Wimmer
President & CEO,
American Lung Association

Georges C. Benjamin, MD
Executive Director
American Public Health Association

Mark Del Monte,
Chief Deputy and Senior Vice President, Advocacy and External Affairs
American Academy of Pediatrics

Paul Jarris, MD
Chief Medical Officer
March of Dimes

Katie Huffling, RN, MS, CNM
Executive Director
Alliance of Nurses for Healthy Environments

Jeff Carter
Executive Director
Physicians for Social Responsibility

John Auerbach
President and CEO
Trust for America's Health

Ian Goldstein
Government Affairs Specialist
National Association of County and City Health Officials

Lyndsay Moseley Alexander
Assistant Vice President & Director, Healthy Air Campaign
American Lung Association

Tentative, pending confirmation:
Gary Cohen
President,
Health Care Without Harm and Practice Greenhealth

Dr. David T. Dyjack
Executive Director and CEO
National Environmental Health Association

Mary Pittman, DrPH
President and CEO
Public Health Institute

Steve Crane PhD, MPH
Executive Director
American Thoracic Society

Point of Contact:
Lyndsay Moseley Alexander
Assistant Vice President & Director, Healthy Air Campaign

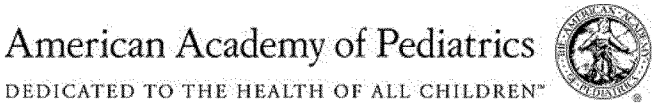
Lyndsay.moseley@lung.org



February 27, 2017

The Honorable Scott Pruitt
Administrator, Environmental Protection Agency
Office of the Administrator, 1101A
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt:

On behalf of our members and supporters, the undersigned leaders of national public health and medical organizations respectfully request a meeting with you to discuss the important role the U.S. Environmental Protection Agency (EPA) plays in cleaning up the air we breathe and protecting millions of Americans from the life-threatening dangers of air pollution. Some of those who are most vulnerable to air pollution include children with asthma, adults with heart disease, newborns and children of all ages, as well as older adults – but everyone needs healthy air.

Thankfully, the Clean Air Act has yielded tremendous benefits to the American people, as documented in multiple studies. We urge EPA to continue to implement and enforce this lifesaving public health law, and to build upon its success cleaning up air pollution and protecting Americans' health for the past 47 years. Our organizations strongly support moving forward with safeguards that promote and protect public health, and oppose initiatives to block, weaken, or delay critical health protections. We would like to discuss with you how to best continue this progress and protect the health of all Americans.

Key priorities that we would like to discuss with you include:

- Continuing EPA's history of using independent, peer-reviewed scientific information and advice to inform its policymaking;

- Upholding EPA's scientific integrity policy, which ensures the the timely release of scientific research and reviews;
- Fully implementing and enforcing the Clean Air Act, including the air pollution health standards, without delay;
- Continuing to clean up sources of air pollution, including cars, trucks, power plants, and oil and gas facilities;
- Addressing the health impacts of climate change, both by reducing the carbon and methane pollution that worsen it, and by investing in measures to study and reduce its health impacts in communities; and
- Ensuring continued public access to air quality and climate change data and information, and other EPA resources, including on EPA's website.

Please consider our organizations a resource on these issues, along with other topics that impact public health. To help schedule this important conversation, please contact Lyndsay Moseley Alexander at the American Lung Association: Lyndsay.moseley@lung.org, 202-481-7668.

Sincerely,

Tonya Winders
CEO and President,
Allergy & Asthma Network

Fernando Stein, MD, FAAP
President
American Academy of Pediatrics

Harold P. Wimmer
President & CEO,
American Lung Association

Georges C. Benjamin, MD
Executive Director
American Public Health Association

Steve Crane PhD, MPH
Executive Director
American Thoracic Society

Nsedu Obot Witherspoon
Executive Director
Children's Environmental Health Network

Gary Cohen
President,
Health Care Without Harm and Practice Greenhealth

Dr. David T. Dyjack
Executive Director and CEO
National Environmental Health Association

Jeff Carter
Executive Director
Physicians for Social Responsibility

Mary Pittman, DrPH
President and CEO
Public Health Institute

John Auerbach
President and CEO
Trust for America's Health

Sydney,

I hope this finds you doing well. Cam Savage suggested that I reach out to you to submit my scheduling request for Administrator Pruitt to address our Indiana Leadership Forum group.

The Indiana Leadership Forum is a 501(c)(3) non-profit organization dedicated to educating Indiana's most talented business and community leaders about government, politics and policy to prepare them for greater civic involvement and leadership roles in their communities. The group was founded in 1994 by Indiana businessman, and former White House official, Al Hubbard. I have been serving as the Executive Director of the group since 2012. Each year, we bring a class of 25 professionals to Washington, D.C. toward the end of the program to meet with federal officials and policy experts.

We would greatly appreciate the opportunity to bring the group to the EPA to hear from Administrator Pruitt.

In terms of scheduling, we have time available on the afternoon of Monday, **May 15th** and also various times on Tuesday, **May 16th**. Is it possible for us to schedule a visit on one of those days?

I'm copying Kacey Shriner who is coordinating all the logistics for the trip.

Thank you so much for your time and consideration of this request.

HI Sydney,

Our best open windows for bringing the egg producers to meet with Administrator Pruitt are as follows:

Wednesday, May 17

3:00 pm - 5:00 pm

Thursday, May 18

9:00 am - 11:00 am

Can we find something in these windows that works or do we need to look for others?

Best!

HI Sydney,

That is great news. I will work with the egg producers and get back to you with day/time windows that might work – they will want to be very flexible and make this work for the Administrator's schedule.

I will get back to you later today or tomorrow with the filled-out form.

Best!

Tom

Thanks so much for your reply Sydney. We certainly understand. As an alternative, would it be possible for 3 to 5 grower leaders in at some point to meet the Administrator over that period? These would be the people responsible for some of the largest egg producing operations in the country with multiple farm sites and more than 50 million laying hens under production.

Best!

Dear Ms. Hupp,

I hope you are well and settling in nicely at EPA.

Please see attached a letter inviting the Administrator to offer a keynote address to the nation's egg producers at a meeting being held by United Egg Producers (UEP) here in Washington, D.C. on May 17, 18 or 19, 2017. Details are included in the letter.

UEP's farmer members raise hens that produce about 95% of the nation's eggs, and most of that egg production will be accounted for by the 150 or so egg producers in the audience listening to Administrator Pruitt's address should he decide to do this. These producers and UEP have been at the forefront of several US EPA rulemakings and policies that are central to how farmers operate today; Clean Water Act matters involving the Concentrated Animal Feeding Operations (CAFO) rule, WOTUS rule and the Chesapeake Bay TMDL as well as Clean Air Act and CERCLA/EPRCA matters as they relate to ammonia and other air emissions. These are

tremendously important issues that relate directly to how egg producers can continue to proudly meet their environmental responsibilities and the growing demand for eggs, and in general make their contribution to the nation's safe, wholesome and abundant food supply.

These farmers would appreciate hearing about Administrator Pruitt's plans for US EPA's environmental programs so they can better understand how they could contribute to the success of his efforts and what these plans might mean for their farms and businesses.

Please let me know if you have any questions or if the Administrator can accept this invitation. Thank you in advance for your consideration of this request.

Best!

Tom Hebert

Sent: Wed 5/3/2017 7:46:33 PM
Subject: RE: meeting request - Republic Services [WARNING: SPF validation failed] [WARNING: SPF validation failed]

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16 at 3:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Please have **your attendee's list no later than Thursday, May 11** to submit to security for your entry. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Yes...3:30 pm on Tuesday May 16th works great for us.

And our CEO of Republic Services, Don Slager, will be participating in the meeting as well.

When do you need the names of the remaining participants on our end? And do you need any additional information from us before the meeting?

Really appreciate the flexibility on the scheduling and getting us on the calendar.

Hope you are well.

I wanted to email you to request a meeting with Administrator Pruitt with the CEO of Republic Services, Dan Slager. As you know Republic Services is the second largest waste company in the country.

Purpose of the meeting will be to update Mr. Pruitt on the issues we are dealing with at Republic and the issues surrounding the West Lake Landfill in Missouri.

I am happy to work with your staff to set up a meeting in the coming weeks or month.

Thanks and let me know what else you need from us.

It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hello Sydney and Ryan,

As a follow-up to his letter (attached), Chris Wood, President and CEO of Trout Unlimited, would like to request a meeting with Administrator Pruitt to discuss Trout Unlimited's partnership with the EPA.

He can meet as early as Monday, April 24, and can be available at the convenience of Administrator Pruitt.

I will follow-up by phone in the coming days to assist with scheduling, if needed.

Thank you,

Liz

Yes...3:30 pm on Tuesday May 16th works great for us.

And our CEO of Republic Services, Don Slager, will be participating in the meeting as well.

When do you need the names of the remaining participants on our end? And do you need any additional information from us before the meeting?

Really appreciate the flexibility on the scheduling and getting us on the calendar.

Checking back on the potential for the Republic Services meeting with Administrator Pruitt. Is May 16th even a possibility or do we need to stick with the Friday May 19th time slot of 9:30 am you sent earlier.

Thanks and I appreciate you taking the time to help us out here.

Sydney

We will get this filled out and back to you by tomorrow.

We would like to do the meeting in the next couple of weeks and we can also offer to meet Mr. Pruitt outside of DC if you all are traveling the country. While the executive team for Republic is based in Phoenix we can get to anywhere.

Should we just outline that in the attachment?

Thanks.

Hope you are well.

I wanted to email you to request a meeting with Administrator Pruitt with the CEO of Republic Services, Dan Slager. As you know Republic Services is the second largest waste company in the country.

Purpose of the meeting will be to update Mr. Pruitt on the issues we are dealing with at Republic and the issues surrounding the West Lake Landfill in Missouri.

I am happy to work with your staff to set up a meeting in the coming weeks or month.

Thanks and let me know what else you need from us.

From: Woodward, Cheryl
Sent: Tue 5/9/2017 2:04:51 PM
Subject: RE: Request for Meeting Regarding ELG Rule

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16th at 4:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Hi Sydney,

I am reaching out to see if I could obtain your contact information (phone and mailing address) please.

I know AG Schuette would like to reach out to Mr. Pruitt at some point. I thought perhaps he could call you to arrange that, unless there is a different number you prefer him to call.

Thank you.

On May 5, 2017, at 7:18 AM, Rashid G. Hallaway <rhallaway@hhqventures.com> wrote:

Hi Tate,

I am writing on behalf of Steve Chancellor, Chairman of White Stallion Energy, to request a meeting with Administrator Pruitt. White Stallion Energy is based in Evansville, Indiana, and is one of the largest producers of steam coal in the Illinois Basin.

Mr. Chancellor would like to thank the Administrator for his outstanding leadership during the first 100 days of the Administration, and also discuss several regulations that are adversely impacting the coal industry. Mr. Chancellor is available early next week, May 8-10th, which I recognize is very short notice. If those dates don't work, please let me know the Administrator's availability during the month of May.

Thank your for assistance assistance and thoughtful consideration.

Sydney,

Sorry for the delay, I was trying to make this work, but unfortunately can't with Kevin's schedule. He needs to fly out that afternoon. Are there any openings in the Administrator's schedule on the 17th that would work? I can move our schedule around for any time after 10:30 AM.

Thursday, we are free anytime before 11:00 AM.

Sorry again for all the hassle, it's usually not this hard…

Subject: Contura Energy Scheduling Request for Administrator Pruitt

Sydney,

I am reaching out with the hopes of scheduling a meeting with Administrator Pruitt for Kevin Crutchfield, our CEO, on either May 3-4th. For you background, Contura Energy is one of the country's largest coal companies with affiliate mining operations across multiple major coal basins in Pennsylvania, Virginia, West Virginia and Wyoming. You can find some additional information on Kevin in the attached bio.

He will be arriving in D.C. that morning, so any time after 10:30 AM on Wednesday should work. He is currently planning on flying out the afternoon of May 4, so morning would be preferable on Thursday.

While Kevin has met Scott in the past, the topics of this visit would be somewhat introductory, but also include a conversation about the current and future challenges facing both the domestic production and use of coal.

Any help you can provide in securing time with the Administrator would be greatly beneficial.

Thanks in advance for the consideration,

Jay

Hello Sydney and Ryan,

As a follow-up to his letter (attached), Chris Wood, President and CEO of Trout Unlimited, would like to request a meeting with Administrator Pruitt to discuss Trout Unlimited's partnership with the EPA.

He can meet as early as Monday, April 24, and can be available at the convenience of Administrator Pruitt.

I will follow-up by phone in the coming days to assist with scheduling, if needed.

Thank you,

Liz

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: 5/3/2017

Meeting Date: May 15-19, or May 25-June 2, 2017

Meeting Time: At the convenience of Administrator Pruitt

Requested Location (if offsite, please list address, parking instructions, etc.): Office of the Administrator

Requestor: Chris Wood, President and CEO of Trout Unlimited

Purpose of the Meeting: To discuss ways that TU can maintain and strengthen our long term partnership with EPA. TU has enjoyed a long and positive partnership with EPA on a number of habitat improving programs over many Administrations, and we would like to keep it going with the new Administration and Administrator Pruitt.

Background on the Meeting: We see strong opportunities to work together with EPA, such as on abandoned mine clean up, Good Samaritan policy, Chesapeake Bay clean up, and non-point pollution more broadly. We have our differences, such as with water of the U.S. policy of the current Administration. We seek to establish a good working relationship with Administrator Pruitt and his staff.

Role of the Administrator: We seek a positive engagement with the Administrator to establish a working relationship with him and his senior staff.

Attendees: Mr. Wood and Steve Moyer, TU VP for Government Affairs

TROUT UNLIMITED
Chris Wood
President & CEO

April 14, 2017

The Honorable Scott Pruitt
USEPA Headquarters
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt:

On behalf of the Trout Unlimited's 160,000 members, I am writing to request a meeting with you to discuss several issues of mutual importance to Trout Unlimited and EPA.

We believe that EPA's most important job is to lead the Nation to improve the quality of the Nation's water, working well with state, local and conservation groups in partnership to do so. I am sure you agree that there remains a lot of work to do to clean up the Nation's waterways.

TU's mission is to conserve, protect and restore America's trout and salmon fisheries and their watersheds. Founded in 1959, TU has long supported the Clean Water Act as the backbone of the Nation's water quality efforts. Our local chapters and state councils have used the Clean Water Act to protect and restore their local home waters. As TU has evolved, we have added professional staff who have worked with EPA resources, such as its Section 319 nonpoint source funds, and its Small Watershed program funds. Using modest EPA funds, we have leveraged additional funds to restore streams and rivers across the U.S., from brook trout streams in the upper Potomac in West Virginia to cutthroat streams in the upper Colorado River in Colorado. In short we have enjoyed a long and successful partnership with EPA.

We would like to continue that partnership and take advantage of opportunities provided by the Trump Administration and Congress, such as cleaning streams and rivers polluted by abandoned coal and hardrock mine waste, and upgrading the Nation's water infrastructure. However, these efforts are threatened by the Trump Administration's proposed budget cuts and the initiative to repeal and replace the Clean Water Rule. We would deeply appreciate the chance to have a good discussion with you about the opportunities and risks that lie ahead of us.

Fishing, and Trout Unlimited, would not exist without the bountiful water resources of the United States. As President Teddy Roosevelt urged us to do, we seek to work with EPA to ensure that these waters are in better condition tomorrow than they are today.

We would like to meet with you as soon as possible to begin a discussion on how we accomplish these objectives. My assistant, Liz Thompson, will be reaching out to your scheduler to schedule a meeting. We thank you in advance for considering this request.

Sincerely,

A mission to conserve, protect, & restore North America's coldwater fisheries and their watersheds.

HI Sydney,

Our best open windows for bringing the egg producers to meet with Administrator Pruitt are as follows:

Wednesday, May 17

3:00 pm - 5:00 pm

Thursday, May 18

9:00 am - 11:00 am

Can we find something in these windows that works or do we need to look for others?

Best!

Producers in DC on May 17, 18 or 19, 2017

Thanks so much for your reply Sydney. We certainly understand. As an alternative, would it be possible for 3 to 5 grower leaders in at some point to meet the Administrator over that period? These would be the people responsible for some of the largest egg producing operations in the country with multiple farm sites and more than 50 million laying hens under production.

Best!

Dear Ms. Hupp,

I hope you are well and settling in nicely at EPA.

Please see attached a letter inviting the Administrator to offer a keynote address to the nation's egg producers at a meeting being held by United Egg Producers (UEP) here in Washington, D.C. on May 17, 18 or 19, 2017. Details are included in the letter.

UEP's farmer members raise hens that produce about 95% of the nation's eggs, and most of that egg production will be accounted for by the 150 or so egg producers in the audience listening to Administrator Pruitt's address should he decide to do this. These producers and UEP have been at the forefront of several US EPA rulemakings and policies that are central to how farmers operate today; Clean Water Act matters involving the Concentrated Animal Feeding Operations (CAFO) rule, WOTUS rule and the Chesapeake Bay TMDL as well as Clean Air Act and CERCLA/EPRCA matters as they relate to ammonia and other air emissions. These are tremendously important issues that relate directly to how egg producers can continue to proudly meet their environmental responsibilities and the growing demand for eggs, and in general make their contribution to the nation's safe, wholesome and abundant food supply.

These farmers would appreciate hearing about Administrator Pruitt's plans for US EPA's environmental programs so they can better understand how they could contribute to the success

of his efforts and what these plans might mean for their farms and businesses.

Please let me know if you have any questions or if the Administrator can accept this invitation. Thank you in advance for your consideration of this request.

Best!

Tom Hebert

Sydney,

Sorry for the delay, I was trying to make this work, but unfortunately can't with Kevin's schedule. He needs to fly out that afternoon. Are there any openings in the Administrator's schedule on the 17th that would work? I can move our schedule around for any time after 10:30 AM.

Thursday, we are free anytime before 11:00 AM.

Sorry again for all the hassle, it's usually not this hard…

From: Jay Martin
Sent: Wednesday, April 5, 2017 11:34 AM
To: hupp.sydney@epa.gov
Subject: Contura Energy Scheduling Request for Administrator Pruitt

Sydney,

I am reaching out with the hopes of scheduling a meeting with Administrator Pruitt for Kevin Crutchfield, our CEO, on either May 3-4th. For you background, Contura Energy is one of the country's largest coal companies with affiliate mining operations across multiple major coal basins in Pennsylvania, Virginia, West Virginia and Wyoming. You can find some additional information on Kevin in the attached bio.

He will be arriving in D.C. that morning, so any time after 10:30 AM on Wednesday should work. He is currently planning on flying out the afternoon of May 4, so morning would be preferable on Thursday.

While Kevin has met Scott in the past, the topics of this visit would be somewhat introductory, but also include a conversation about the current and future challenges facing both the domestic production and use of coal.

Any help you can provide in securing time with the Administrator would be greatly beneficial.

Thanks in advance for the consideration,

Jay

Subject: RE: meeting request - Republic Services [WARNING: SPF validation failed] [WARNING: SPF validation failed]

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Tuesday, May 16 at 3:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Please have **your attendee's list no later than Thursday, May 11** to submit to security for your entry. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Yes...3:30 pm on Tuesday May 16th works great for us.

And our CEO of Republic Services, Don Slager, will be participating in the meeting as well.

When do you need the names of the remaining participants on our end? And do you need any additional information from us before the meeting?

Really appreciate the flexibility on the scheduling and getting us on the calendar.

Sydney

I just tried to call you to ask a quick question on the number you have listed below but didn't get an answer. Is there a better number to call you? My number is 202-368-4323.

Attached is the form I have filled out today.

I wanted to let you know to do the meeting the week of May 1st we will need to send in the Executive team which are listed on the request form. The team is well versed on the issues facing republic and will be able to provide in detail to the Administrator the issues facing Republic Services.

Thanks and let me know what more information you need from me.

Sydney

We will get this filled out and back to you by tomorrow.

We would like to do the meeting in the next couple of weeks and we can also offer to meet Mr. Pruitt outside of DC if you all are traveling the country. While the executive team for Republic is based in Phoenix we can get to anywhere.

Should we just outline that in the attachment?

Thanks.

Ryan

Hope you are well.

I wanted to email you to request a meeting with Administrator Pruitt with the CEO of Republic Services, Dan Slager. As you know Republic Services is the second largest waste company in the country.

Purpose of the meeting will be to update Mr. Pruitt on the issues we are dealing with at Republic and the issues surrounding the West Lake Landfill in Missouri.

I am happy to work with your staff to set up a meeting in the coming weeks or month.

Thanks and let me know what else you need from us.

Hi Sydney!

I wanted to send you along an updated attendance list for our meeting with Administrator Pruitt at 3:30 on May 9th. We do have some flexibility on how many people attend the meeting (we can cut all the non-essential Toy Association staff if necessary) so do let me know if you can accommodate a group this large. Feel free to call me if it's easier to discuss logistics over the phone.

We're very much looking forward to our meeting! Thanks again for helping facilitate.

Best,

Ms. Woodward,

I came by your contact after consulting with NRECA about a good person to meet with at EPA. Alaska Power Association, the statewide trade association for electric utilities in Alaska, is holding our annual fly-in to Washington, D.C. June 6-8. We'll have about 10 of our members with us from all parts of the state – Barrow to Southeast, Interior and Southcentral, and the Bristol Bay Region. We'd like to request a meeting with you to talk about EPA regulations and their impact on the unique circumstances electric utilities face in Alaska. Of course, any subject that may come up will be of interest to our members.

Are you available for a meeting between 11:30 a.m. and 1 p.m., June 6, or the morning of June 7 or late morning of June 8? We'd be honored to meet with you if you are available.

Thanks,

Sydney,

Thanks again for trying to make Administrator Pruitt's schedule work. Kevin actually had to reschedule his trip and is now coming to D.C. on May 17-18th. Any chance these dates work better from your end?

Thanks in advance,
Jay

Subject: Contura Energy Scheduling Request for Administrator Pruitt

Sydney,

I am reaching out with the hopes of scheduling a meeting with Administrator Pruitt for Kevin Crutchfield, our CEO, on either May 3-4th. For you background, Contura Energy is one of the country's largest coal companies with affiliate mining operations across multiple major coal basins in Pennsylvania, Virginia, West Virginia and Wyoming. You can find some additional information on Kevin in the attached bio.

He will be arriving in D.C. that morning, so any time after 10:30 AM on Wednesday should work. He is currently planning on flying out the afternoon of May 4, so morning would be preferable on Thursday.

While Kevin has met Scott in the past, the topics of this visit would be somewhat introductory, but also include a conversation about the current and future challenges facing both the domestic production and use of coal.

Any help you can provide in securing time with the Administrator would be greatly beneficial.

Thanks in advance for the consideration,

Jay

Subject: RE: Industry Coalition Request to Meet with Administrator Pruitt

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Monday, May 8 at 2:45 pm. The instructions/directions to EPA is below and if you have any

questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Subject: RE: 4:30 mtg w/ Byron

We're all here in DC. Sometime this month would be perfect, the sooner the better really. We have our legislative fly-in starting on March 28 (with Mr. Pruitt speaking to our cattle producers on March 30) so it would be optimal for this meeting to happen before March 28. Thanks in advance for your effort on this. Happy to discuss further by phone if that's helpful. 202 347 0228.

Hi again Michelle, I just wanted to touch base regarding a reschedule for our full group to meet with Administrator Pruitt. A sub-set of us were able to meet with Byron on Monday because the administrator was pulled away to a cabinet level meeting. Our full group looks forward to meeting with the administrator as soon as that can be rescheduled. Please let me know if you need anything further from me.

Sydney,

Thank you for connecting me to Aaron and Sharnett.

Next time, I won't leave the office until I get to meet you face to face!

Aaron and Sharnett,

As a follow up to the meeting that the Administrator had with the ICAC last Thursday, I wanted to get on the phone with Ryan for 10 minutes or so to ensure that our next steps are in line with what Ryan thinks would be most helpful.

If it is easier for him, he can just call my cell phone any time that it is convenient for him.

Regards,

Hessler

From: Woodward, Cheryl
Sent: Mon 5/8/2017 10:51:25 PM
Subject: RE: Administrator Pruitt- Speaking to US Chamber

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Friday, June 2nd at 2 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Can you please send me the list of who will be attending? Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Actually we were successful in moving our other meeting so if the 3:30pm spot is still available, we'll take it! Let me know if that still works for the administrator.

Thanks so much,

Autumn

> Oh this is such great news!
>
> One small wrinkle…we had someone else (literally just 15 minutes ago) accept the 3:30pm time slot. Is there any way possible that Administrator Pruitt could come meet with us at 4:30pm at the Grand Hyatt OR we could come meet him in his office at 5:00pm at the EPA? If neither of these times work, please let me know and we will do our best to move the other meeting.

Thanks again and happy to chat on the phone if that's easier.

Best,

Autumn

Sydney,

Please find the attached completed meeting request form. We have some flexibility in scheduling for May 9th and 10th so if none of the times suggested work for the Administrator, let me know and hopefully we can find a time that will better suit his schedule. I've also attached a list of anticipated meeting participants. Don't hesitate to call me if you have any questions.

Thanks again for considering our request.

Best,

Autumn

I am still trying to get you sufficient info on the AFS fly-in, but I have better clarity on the other items:

-The Vinyl Institute would love to have Samantha speak to the exec team on the 16th as well as to the full fly-in group on the 17th. They are very excited and appreciative.

-Joc O'Rourke of Mosaic would be available any time the Administrator has time. To restate, he is requesting no more than 15 minutes.

Thank you again, Sydney, A.J. Ferate

Thanks for trying to make those work, Sydney.

While I have you looking, could you check on two other dates in June:

- The Global CEO for Mosaic, Joc O'Rourke is requesting to meet with Pruitt for 15-20 min on June 20th. He is only in county & DC that day. Mosaic is involved in a number of industries, but phosphate and potash production are the primary industries they are involved in here in the U.S.

-The American Foundry Society (AFS) Fly-in is on June 21st (or 20th.) Their specialty is "Metalcasting". They're asking for Administrator Pruitt to speak at their Leadership Breakfast on 21 June. If June 21st doesn't work, they can make June 20th work.

Thank you for letting me bother you with these; talk to you soon.

I appreciate you, AJF

Sydney:

Thanks for the note yesterday. As mentioned, the Vinyl Institute is holding it's annual fly-in meeting in May. A request for Ryan Jackson to speak to the group on May 17th was previously forwarded by the organization.

This request is for the Executive Committee of the Vinyl Institute to meet for 15 minutes with the Administrator the day before the fly-in, on May 16th at any point during that day the Administrator is available.

The executive committee represents four large chemical companies that produce products such as PVC. Names that would likely be in attendance would include:

Bob Buesinger, Senior Vice President – Vinyls, Westlake Chemical, Houston, TX

Grant Evans, Vice President and General Manager – Vinyls, Occidental Chemical Corporation, Dallas, TX

Dick Heinle, Senior VP/General Manager – Vinyls, Formosa Plastics, Livingston, NJ

Dick Mason, Corporate Secretary, Shintech Inc., Houston, TX

Dick Doyle, President and CEO, Vinyl Institute, Washington, DC

Rich Krock, Vice President Regulatory and Technical Affairs, Vinyl Institute, Washington, DC

JC Walker, Partner, Keller & Heckman, Washington, DC

Should you have any additional questions about this you know where to find me.

Also, when I met with the Administrator a couple of weeks ago an invitation was extended to speak to the Oklahoma Independent Petroleum Association (OIPA) Annual Conference during the weekend of June 3-4 at any time he would be available. The conference is in Las Colinas, TX (Dallas metro area.) He seemed interested, but non-committal. Let me know if this is something he would be interested in doing.

Call me with any questions, Sydney. I appreciate you, A.J. Ferate

Administrator Pruitt,

I founded a group focused on promoting technology in agriculture (www.royseagtech.com). Attached are two papers that I will be discussing with Congressmen this week in Washington.

I believe that tech can go a long way in protecting the environment and resolving conflicts with the agriculture industry. As you may recall, I am from North Dakota so I am interested in preserving the family farm while reducing environmental impact without having to resort to over-regulation.

If you or your staff have a few minutes this week, I would love to share my thoughts.

Thanks

21st Century Agriculture Technology & Funding Rural Broadband Infrastructure

By Roger Royse, and Allison Kroeker

Introduction

Broadband-enabled enterprises include health care, education, job training, public safety, and technology. Broadband is the key to adoption of 21st Century Agriculture Technology ("Ag Tech"). Due to the accelerating development of Ag Tech, it is the new rural driver for broadband utilization. Large telecommunications companies naturally invest in profitable urban infrastructure, however, and are not interested in cabling sparsely populated rural areas. Although 96% of California's population is urban, 95% of the state's geography is rural. We cannot leave out 95% of the state from broadband coverage.

Rural Broadband Infrastructure

In the Ag Tech context, broadband refers to any high-speed internet access that is always on and faster than traditional dial-up access. Broadband mapping describes geographically how internet access service from telephone and cable TV companies is available in terms of speed and price. Broadband maps are used to find "unserved" areas and "underserved" areas. The former areas contain no broadband infrastructure while the latter areas have access to broadband but not at fast speeds. Generally, rural internet users have fewer options and slower service. We need federal assistance to bring high-speed internet service to these rural areas.

Just as 19th century railroads and 20th century interstate highways played leading roles in American prosperity, high-speed internet is the factor that determines which rural communities, and which farms, will enjoy economic growth and prosperity in the 21st century. And just as it took public investment to bring transportation infrastructure to rural regions of the U.S., it will take public resource investment to bring high-speed internet to rural communities and farms. Funding rural broadband infrastructure is the single most promising public resource investment the federal government can make to provide unserved and underserved regions of the country with economic prosperity, opportunity, and technological innovation.

Agriculture Technology

Ag Tech represents the future of farming. It is broadband-enabled technology that increases the efficiency of farms. Ag Tech generally consists of marketplaces, farm management software, precision agriculture, sensors, smart irrigation, and drones and robotics.

- Marketplaces are e-commerce platforms that connect farmers directly to vendors and consumers.

- Farm management software allows farmers to efficiently manage their resources, such as crop

production and farm animals.

- Precision agriculture focuses on predictive analytics to address allocation issues and make better decisions regarding energy, water, and pesticide efficiency.

- Sensors are smart devices that collect data and help farmers evaluate crop health, weather, and soil quality.

- Smart irrigation provides systems that help monitor and automate water usage for farms.

- Drone companies can also cater to agricultural needs, while robotics can provide intelligent farm machines that perform various farm functions.

Today, Ag Tech most commonly consists of the sensors that monitor, analyze, and respond to changing farm conditions. Other major areas of applied Ag Tech include maximizing yields, maximizing water efficiency, increasing energy efficiency, sustaining the environment, and ensuring food safety. The two latter applications are driven by state and federal regulations wherein Ag Tech offers a means of meeting the various statutory requirements. In fact, many of the sensors and other Ag Tech instruments have multiple benefits. For example, water irrigation technology saves money, water, power, and meets state groundwater regulations. Sensors monitoring chemical inputs also optimize farm efficiency while minimizing the farmer's footprint on the environment.

The adoption and application of this type of Ag Tech rests on the availability of the internet. In order to access the internet, Ag Tech requires rural broadband infrastructure. Broadband enables smart devices to compile, analyze, and transmit data to farmers that increases productivity, quality, and sustainability. In addition, Ag Tech is scalable to smaller farms and even facilitates alternative farming methods to permit farming in locations and settings that cannot support traditional farming. Reaping all of these benefits requires a massive rural infrastructure that can only be obtained through federal assistance and funding to ensure that broadband is not only accessible, but useful to farmers and conducive to technological innovation within rural communities.

Realizing Funding

One way to implement rural broadband infrastructure is through FirstNet. FirstNet is the largest amount of federal funding available for broadband infrastructure. Its purpose is to create a national system of emergency communications between all first responders. We propose that Congress ensure that FirstNet emergency communications are provided to rural regions of California and not limited to making urban population centers a priority like most broadband infrastructure initiatives.

Clearly, this would only assist Ag Tech if there is also a multiple use requirement for any FirstNet investment. In other words, a FirstNet broadband system needs to not only be available for rural regional use, but FirstNet resources would also have to be bundled with other broadband resources (regardless of source) to create a multi-benefit system. The implementation of rural broadband infrastructure under this model operates under the assumption that there are simply not enough public resources to build redundant single-use broadband systems.

Alternatively, or contemporaneously, the federal government may implement a program that

assists and encourages state and local governments to invest in rural broadband infrastructure. Congress can realize such a program by offering states like California a match of federal resources. This way, from both federal and state perspectives, the public resources that are invested will be leveraged. Notably, any leveraged public resources under this program would need to be invested in the form of grants in order to actually benefit the unserved and underserved areas of California. Successful funding models include the Internet For All Now Act and the New York state broadband infrastructure.

The reason current federal programs offered by the U.S. Department of Agriculture ("USDA") do not work is because they provide loans and not grants. These loans typically take two years to acquire after initiating the application process. Instead of bringing 21st century Ag Tech to the farm fields, the current programs offer assistance only to those communities that can wait two years before confirming that a broadband-enabled investment opportunity is available and have the means to pay back any federal funds that are ultimately received. This is stifling the economic growth and prosperity otherwise available to rural communities. Thus, the facilitation of Ag Tech innovation through federal programs is in need of comprehensive reform.

Realizing Innovation and Prosperity

To facilitate innovation, any comprehensive reform should also consider adopting a program for funding proof-of-concept projects. Ag Tech is a hot bed of innovation and improvement where internet access acts as an entry point to the 21st century economy. From optimizing agriculture, to protecting the environment, and ultimately ensuring our own health and safety, we need to be investing in our future by funding proof-of-concept projects to support the creation of new Ag Tech and improvements to broadband infrastructure. The benefits of such funding extend to rural medicine, distance learning, transportation, public safety, direct market access, and even rural tourism and recreational activities.

We should also encourage federal funding and regular surveys of broadband signal available on farm fields to create a metric for the constraints imposed on Ag Tech by broadband service technology. While some Ag Tech does not require high bandwidth, this is due to Ag Tech attempting to adapt to the lack of high-speed internet in rural areas. It does NOT mean that Ag Tech does not need high-speed internet to be available on the farm fields. We need to have high bandwidth availability for farm fields and rural communities in order to fully realize the benefits of having rural broadband infrastructure.

Conclusion

AgTech continues to grow at an accelerating rate towards a $240 billion industry by 2050. It will enable farm production to meet the future doubling of global food demand. If we have rural broadband, the same internet platform used for farming in the fields can be used to increase the overall prosperity and quality of life in the U.S. and particularly in our nation's rural communities.

Specialty Agriculture and the Reallocation of Farm Bill Funding

By Roger Royse and Allison Kroeker

Introduction

Specialty crop producers, researchers, and farmworkers provide our nation with safe and nutritious food. That is an enormous responsibility and requires federal support. Federal support for specialty agriculture research and development not only increases economic prosperity on the farm fields but in every family's home. Federal funding provides all Americans with economic opportunities, technological innovation, and educational experiences, in addition to putting food on the table. Specialty agriculture must therefore be a permanent priority in the federal budget.

Specialty crops generally consist of plants used by people for food, medicinal purposes, and aesthetic gratification. They are defined by the USDA as "fruits and vegetables, tree nuts, dried fruits, and horticulture and nursery crops (including floriculture)." The diversity of specialty crops and their variety of uses make the task of developing policy in this area particularly challenging. Federal funds can be used to support projects ranging from food safety compliance to distribution systems and marketing.

Federal funds can also provide scientific advances that enable our country to use the most efficient and environmentally sound agriculture technology in the world. Funding this research is imperative due to the industry's increasing reliance on science and technology to maintain profitable production. Likewise, labor dependency is an ongoing concern regarding specialty agriculture's profitability in the absence of labor saving technology. Thus, we propose that disproportionate funding for conventional agriculture be reallocated to specialty agriculture in the next farm bill so the specialty crop programs can continue to act as efficient safety nets and effective innovation initiatives.

Specialty Crop Provisions

Every five years or so, Congress passes a "farm bill" specific to American agriculture. The Agricultural Act of 2014, also known as the 2014 farm bill, put permanent programs in place to address the critical needs of the specialty crop industry and enhance the competitiveness of specialty crops. Realizing this goal requires the continuous reform of outdated agriculture policies that do not adequately address the realities of specialty agriculture, modern economies, or their labor challenges. Each year, we rely on our representatives to allocate federal resources to meet the needs of specialty crop producers and specialty agriculture technology on a budget that is realistic and fair to taxpayers.

Unfortunately, federal support for specialty crops still differs in significant ways from commodity crops. Since the 1930s, farm bills have focused on farm commodity program support for the staple, non-perishable, and generally storable commodities such as corn, soybeans, wheat, cotton, rice,

17cv1906 Sierra Club v. EPA ED_001523B_00004037-00001

and sugar. Federal support for specialty crops is relatively recent and its funding is disproportionately small. Accordingly, policy still weighs commodity crops as being essential or more important than specialty crops. Although the 2014 farm bill provided permanent funding for specialty crops, the programs still account for a small share of total farm bill spending, well below spending levels for commodity crops.

Mandatory funding for the major commodity crops averages about $4.7 billion per year, compared to $773 million for specialty crops.[1] In addition, specialty crop producers do not benefit from the same types of federal commodity price and income support programs that benefit commodity crop producers. Specifically, the specialty crop programs do not provide benefits for individual produce growers directly, but rather for the specialty crop industry as a whole. While the provision of direct benefits and an increase in mandatory funding would give specialty crops equal footing with commodity crops, we instead propose a more efficient allocation of resources as part of next year's policy reform.

Specialty Crop Block Grant Program

The Specialty Crop Block Grant Program provides federal funding to "enhance the competitiveness of specialty crops." The 2014 farm bill provides $72.5 million for this program in 2017 and $85 million in all subsequent years. Examples of projects that enhance competitiveness include efforts to enhance food safety, sustainability, developing new and improved seed varieties, pest and disease control, increasing nutritional knowledge and consumption of specialty crops, reducing the costs of distribution systems, and helping businesses to comply with the requirements of the Food Safety Modernization Act.

Application forms are submitted to each state's department of agriculture which helps manage the competitive grant process. Each state consolidates the applications it receives from interested parties into a single plan to indicate how grant funds will be used. States are eligible to receive an amount that represents the proportion of the value of specialty crop production in the state in relation to the national value of specialty crop production. Specialty crop production is focused in California, Florida, Washington, Oregon, North Dakota, and Michigan.

A majority of specialty crop producers are considered specialized, which means that they receive at least half of their gross value of production from the sale of fruits and vegetables, tree nuts, or other specialty crops. Specialized farms account for 90-95% of the total value of U.S. specialty crop production and are concentrated in the Western states. These states do not have nearly as much representation as Midwestern states where commodity support programs receive substantial support. Specialty crops make up one-fourth of the value of U.S. crop production and receive less than one-fifth of the funding provided to commodity crops.[2] We ask that farm bill funding be increased for specialty crops through a proportionate reallocation from commodity programs based on the U.S. crop production statistics. This allocation is a fair and necessary adjustment to 21st century agriculture policy

[1] See CRS Report IF00014, The 2014 Farm Bill (Agricultural Act of 2014, P.L. 113-79).
[2] See CRS from USDA, 2012 Census of Agriculture (Table 2, Market Value of Agricultural Products Sold), https://www.agcensus.usda.gov/Publications/2012/Full_Report/Volume_1,_Chapter_1_US/st99_1_002_002.pdf.

based on the modern economy as well as the demands of farm innovation and a shrinking labor force.

Specialty Crop Research Initiative Program

The Specialty Crop Research Initiative Program addresses the critical needs of specialty agriculture by awarding grants to support an organization's research proposal. The 2014 farm bill set aside mandatory funding of $80 million each year for this program. Of that amount, $25 million is set aside for citrus disease research. The remaining funds support projects that address at least one of five legislated focus areas: (1) genetics; (2) pests and diseases; (3) efficiency and profitability; (4) innovation and mechanization; or (5) food safety.

Generally, these research grants are awarded to universities for standard research and extension projects to support problem-solving efforts. The next farm bill creates an excellent opportunity to make it easier for individuals and small businesses to apply for these grants, or even extend these funding opportunities to startups. Relaxing the program's eligibility requirements would not only facilitate technological innovation in the private sector but support American entrepreneurship and small business.

At the same time, it is imperative that federal policy promote co-innovation. A proactive approach to realizing innovation requires a networking platform to accelerate the exchange of ideas and information across industries. The three main industries involved in the development of agriculture technology are the academic research institutions, the technology startup industry, and the finance industry. Fostering co-innovation among industries provides a platform for entrepreneurs to learn about licensing intellectual property from the universities. Funding UC extensions cannot create new ventures without this bridge to entrepreneurship. Thus, we propose an expansion of the research initiative program's focus areas to consider additional projects for startup funding and co-innovation platforms.

Resolving Labor Challenges

Specialty agriculture has a completely different cost structure, and a completely different set of policy interests, than conventional agriculture. The latter's cost structure is based on land while the cost of specialty crops is based on labor. Nearly all specialty crops destined for the fresh market are hand harvested to ensure freshness and a pleasing appearance. Hand-harvesting accounts for 50% of specialty agriculture production costs, and continues to rise as the labor force shrinks. With the decline of labor availability and increasing labor costs, specialty crops are losing their price competitiveness in the world markets.

In the absence of labor saving technology, American specialty crop producers have no safety net. Domestic workers will not accept seasonal agricultural jobs in sufficient numbers and the H-2A visa program is currently too complex and costly to maintain profitability. Federal support is required to compete with cheap imports and modern labor challenges. Federal investment in agriculture technology is the single most promising use of farm bill funds to stabilize prices, reduce manual labor, and create permanent jobs with higher income for domestic workers. Thus, adequate funding for the research and

development of agriculture technology is required to protect U.S. crop production and keep specialty crop producers in business.

Conclusion

Congress has made historic investments to support U.S. crop production and keep U.S. growers in business while ending unnecessary subsidies and programs. We can continue to support our nation's farmers and families by reforming federal agriculture policy in the next farm bill. The reallocation of commodity funds to meet the critical needs of specialty crop producers is a fair and necessary compromise to invest in our future and economic prosperity.

Ms. Woodward,

I came by your contact after consulting with NRECA about a good person to meet with at EPA. Alaska Power Association, the statewide trade association for electric utilities in Alaska, is holding our annual fly-in to Washington, D.C. June 6-8. We'll have about 10 of our members with us from all parts of the state – Barrow to Southeast, Interior and Southcentral, and the Bristol Bay Region. We'd like to request a meeting with you to talk about EPA regulations and their impact on the unique circumstances electric utilities face in Alaska. Of course, any subject that may come up will be of interest to our members.

Are you available for a meeting between 11:30 a.m. and 1 p.m., June 6, or the morning of June 7 or late morning of June 8? We'd be honored to meet with you if you are available.

Thanks,

Michael Rovito, CCC

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Monday, May 8 at 4:45 pm in the ALM Conference Room. The instructions/directions to EPA is below and if you have any questions please contact me. Please send me the name of the Board Members. Don't worry if some may not be attend, just give me all the names to prepare for security. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

That would actually be perfect! We have a dinner on the Hill with Sen. Barrasso at 6:30pm this works out well. We have 25-27 board members including a couple senior staff if that is possible?

Thanks so much, Eric

Hi Sydney,

I think there is slight confusion. We are not inviting Administrator Pruitt to speak, which the form suggests otherwise. My message was just to let you all know that The Burton Awards would be sending an invitation for him to attend as a **guest**, and if he does attend that Bernie would like to invite him to sit at his table. Administrator Pruitt spoke a few years back at this event, so he should be familiar with it.

Please let me know if you still need me to fill out the form, though.

Thank you,

Emily

Hosts and Sponsors
In association with the Library of Congress, presented by Lead Sponsor, Law360, and
Co-Sponsored by American Bar Association.

About the Library of Congress
The Library of Congress is the research Library of the United States Congress, the de facto national library of the United States and the oldest federal cultural institution in the United States. Located in three buildings in Washington, D.C., it is the largest library in the world by shelf space and holds the largest number of books. The Library of Congress was established by Congress in 1800 and was housed in the United States Capitol for most of the 19th Century. The Library's primary mission is researching inquiries made by members of Congress through the Congressional Research Service and although it is open to the public, only legislators, Supreme Court justices and other high-ranking government officials may check out books.

Presented by Law360, Lead Sponsor
Law360, a LexisNexis company, is a one-stop source for legal news and analysis, covering litigation, policy developments, corporate deals, and legal industry trends. Law360 covers 50+ practice area, industry, and state sections, and our daily newsletters reach over 700,000 professionals at top law firms, Fortune 500 companies, and key government agencies every business day.

The American Bar Association, Co-Sponsor
With nearly 400,000 members, The American Bar Association is one of the largest voluntary professional membership organizations in the world. As the national voice of the legal profession, the ABA works to improve the administration of justice, promotes programs that assist lawyers and judges in their work, accredits law schools, provides continuing legal education, and works to build public understanding around the world of the importance of the rule of law.

The Burton Foundation
The Burton Foundation is a nonprofit, cultural and academic organization devoted to further promoting the performance and stature of the legal profession.

About the Chairman
The Founder and Chair of The Burton Awards for Legal Achievement is William C. Burton, Esq., a partner in the law firm of Sagat|Burton LLP. He is a former New York State Assistant Attorney General, a former New York State Assistant Special Prosecutor, and the author of the first legal thesaurus ever written for the profession of law, BURTON'S LEGAL THESAURUS (5th edition), published by McGraw-Hill. He was presented the highest honor given by The Legal Writing Institute, for "significantly advancing the cause of legal writing in the profession of law." In addition, the Law Library of Congress presented Burton with the "Blackstone Award" for exemplifying the best objectives of the Law Library of Congress and advancing the mission and activities of the Law Library of Congress.

May 3, 2017

Hon. Scott Pruitt
Administrator, Environmental Protection Agency
1200 Pennsylvania Avenue, NW
Washington, DC 20460

Re: National Awards Program, May 22, 2017, Library of Congress

Dear Administrator Pruitt:

Almost two decades ago , I established a national non-profit foundation in law to promote the legal profession and encourage excellence by all lawyers. My concept then, as it is now 18 years later, is to select the finest recipients, and, therefore, set an example for all to follow.

Our emphasis - since the outset - was to encourage clear and cogent legal writing. That is my enduring interest, especially since I authored the first thesaurus in law. Since that time, the awards program has grown universally. Today, our scope of our awards ranges from lawyers in the military to attorneys in the executive branch, from general counsel of the world's largest corporations to managing partners in America's finest law firms, and from professors at law schools to journalists in law, and even legal writers in the largest law firms and leading law schools.

Our program is now co-sponsored by the American Bar Association, and presented in association with the Library of Congress. Since it is non -profit, there are no commercial aspects and our selections are made by le ading professors and highly distinguished professionals.

As in the past, we are honored that Chief Justice Roberts has traditionally attended our reception; Justice Ginsburg is on the program this year, and Justice Sotomayor is attending our Gala. In addition, Chief Judge US Court of Appeals for the Second Circuit, Robert Katzmann, will also be a recipient at the event.

To this effect, we would be extremely honored if you would accept this invitation to join us at the Gala on Monday, May 22, 2017 in the Great Hall of the Library of Congress. The R eception begins at 6:30pm in the Great Hall, the Dinner starts at 7pm, and impressionist Darrell Hammond's performance is set for 8:45 pm. We expect over 400 guests to attend the event, including the General Counsels of General Motors, CBS, Apple, Paypal, Toyota, Bank of America, and Home Depot, etc.

As a matter of background, our Honorary and Distinguished Board of Directors include: Judge Richard Posner, 7th Circuit U.S. Court of Appeals; Judge Alex Kozinski, 9th Circuit U.S. Court of Appeals; U.S. Senator John Cornyn; U.S. Senator Robert P. Casey, Jr.;

U.S. Senator Mike Crapo; U.S. Senator Michael F. Bennet; Supreme Court Justice Ca rol Corrigan of California; Yabo Lin, Partner, Sidley Austin LLP; Jane Sullivan Roberts, Partner, Major, Lindsey & Africa; Lisa Rickard, President, U.S. Chamber Institute for Legal Reform; Elissa Lichtenstein, Director, Public Services Division, American Bar Association; Thomas L. Sager, Partner, Ballard Spahr LLP; Les Parrette, Senior Vice President, General Counsel and Compliance Officer, Novelis Inc.; James M. Rishwain, Jr., Chairman of Emeritus, Pillsbury Winthrop LLP; Betty Whelchel, Head of PublicPolicy & Regulatory Affairs, BNP Paribas SA; Stephen R. Mysliwiec, Partner, DLA Piper LLP (US); Brian E. Cabrera, Former SVP and General Counsel,NVIDIA Corporation; and Linda Klein, President, American Bar Association.

Again, we would be extremely honored , and genuinely delighted, if you would accept this invitation and join us on May 22, 2017 for an evening to celebrate law.

With all my best wishes,

William C. Burton
Founder & Chair

2017 BURTON AWARDS PROGRAM

A TRADITION
OF EXCELLENCE

THE
BURTON
AWARDS

IN ASSOCIATION WITH THE LIBRARY OF CONGRESS,
PRESENTED BY LEAD SPONSOR LAW360,
AND CO-SPONSORED BY THE AMERICAN BAR ASSOCIATION

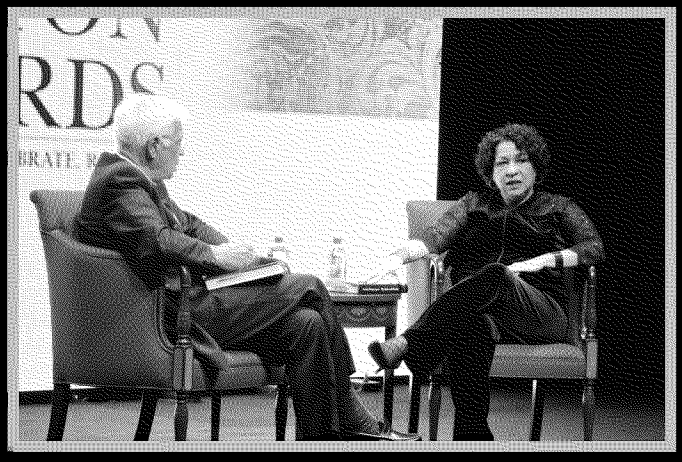
Specifics of the 2017 Burton Awards Program

The 48th annual national awards will be held on Monday, May 22, 2017 at the Library of Congress. U.S. Supreme Court Justice Ruth Bader Ginsburg, will be awarded the Book of the Year in Law.

The Burton Awards: An Established Tradition in Law

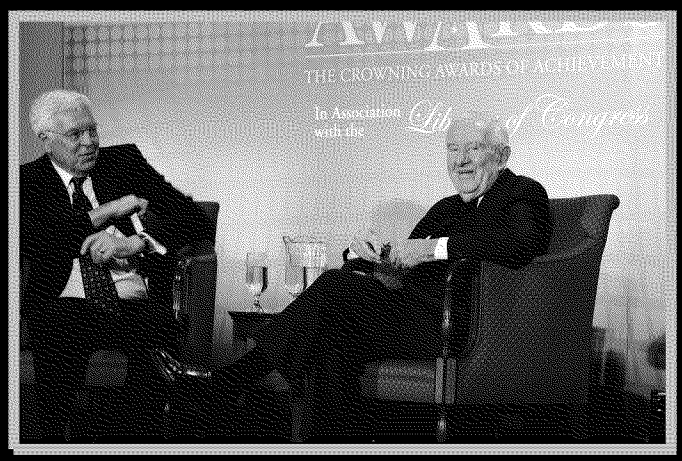
The Burton Awards program is run in association with the Library of Congress. The non-profit event is held each year to honor distinguished writers and recognize leaders in law, including those counsel belonging to America's most prestigious law firms. Patterned after the Pulitzers, the program has become one of the most prominent and dynamic awards programs in law. While the emphasis is on writing, the program is also geared towards rewarding legal achievement in many other areas of law. In addition, awards are also given to general counsel for their distinguished careers in law.

Prior Renowned Guest Speakers



Above left: Justice Stephen Breyer meets with Colonel Logan who won the 2016 Public Service in Military Award along with other high ranking members of the military. *Above right:* U.S. Supreme Court Justice Sonia Sotomayor, honored guest at the 2013 program.

Below left: U.S. Supreme Court Justice John Paul Stevens *(retired)*. *Below right:* U.S. Supreme Court Justice Ruth Bader Ginsburg discusses writing, the art of persuasion and memorandums of law with Bill Press, CNN commentator and Master of Ceremonies.



Award Categories

The Legends in Law Awards — These awards recognize the finest general counsel in the world's largest corporations.

Distinguished Writing Awards — Presented to the best law firm and law school authors.

Distinguished Public Service in the Military — Presented to the finest lawyers in the military.

Leadership in Law Award — This award is given to the nation's finest managing partner in a leading law firm.

Outstanding Contributions to Legal Writing Education Award — Presented for outstanding contributions to the education of new lawyers in the field of legal analysis, research and writing, whether through teaching, program design, program support, innovative thinking or writing.

Book of the Year Award — Presented to the authors of the most outstanding book in the profession of law.

Distinguished Public Service in the Executive Branch — These awards are given to top tier and staff-member levels of the Executive Branch.

Blog of the Year — Presented to the law firm which has published the most outstanding blog in the country on the issues involving law.

The Outstanding Journalist in Law — Presented for a lifetime of achievement and accomplishment reporting on legal issues, cases or the profession.

ABA Announces sponsorship of the Burton Awards to honor major achievements in law

WASHINGTON, April 7, 2015 – American Bar Association President William C. Hubbard announced that the ABA will sponsor the Burton Awards, a national awards program created by William C. Burton and run in association with the Library of Congress and its Law Library.

The Burton Awards program rewards accomplishments in law, including the finest writing, teaching, journalism, public service in government, public interest work, general counsel efforts and achievements of lawyers in the military. Close to 70 awards are presented annually.

Hubbard said, "The ABA and the Burton Awards program share a desire to promote excellence in the legal profession. Both organizations have the ultimate goal of encouraging the highest level of accomplishment in law. This new relationship builds on the finest traditions of the American Bar Association."

The Standing Committee on the Law Library of Congress, chaired by Elizabeth Medaglia, will be the ABA liaison to the awards program. This year's awards program will take place on June 15 at the Library of Congress. Justice Sonia Sotomayor will be the guest speaker. Robert Katzmann, chief judge, U.S. Court of Appeals for the Second Circuit, will also participate in the program. Emmy and Tony award winning actress and singer Kristen Chenoweth will provide entertainment.

William C. Burton, founder and chair of the awards program, said, "We are profoundly honored and grateful to President William Hubbard, Chairperson Elizabeth Medaglia and the members of the House of Delegates of the American Bar Association for their partnership. I could not think of a greater honor for our program. I look forward to working with this renowned institution to continue to recognize the greatest accomplishments in law."

Thanks Mike.

Sydney - our CEO, Gary Heminger, would be very glad for an opportunity to visit with the Administrator, as there are any number of EPA regulations (including the Renewable Fuel Standard) that impact Marathon Petroleum Corporation and our operations. We appreciate Administrator Pruitt's firm and long-held commitment to cooperative federalism, and I believe this would be a constructive dialogue.

By way of a little background, MPC is the third largest refiner in the U.S., with refining operations in Kentucky, Texas, Ohio, Louisiana, Illinois, and Michigan. We also have (through our 2015 acquisition of MarkWest) natural gas gathering and processing operations in Oklahoma, Texas, and the Marcellus region; and significant retail, maritime, pipeline, and terminal operations across the eastern half of the U.S.

Mr. Heminger is scheduled to be in town June 6, and will also be here June 21 if that date would be better. Please let me know if there is anything in particular I might be able to provide that would be helpful on your end.

Thank you,
Steve

Sydney —

Stephen works at Marathon Petroleum Corporation. His CEO is coming into town in June, and he wanted to know who to contact at EPA about a meeting between his boss and the Administrator.

I told him you are the right place to start.

Stephen, Sydney is the best; please treat her with the appropriate level of fear and respect.

Dear Sydney,

I am writing to amend my participant list for ACC and the Biocide Panel's May 10 meeting with Administrator Pruitt. Mike Walls, Vice President, Regulatory and Technical Affairs, ACC also will be in attendance.

Would you please let me know who will be attending with Administrator Pruitt.

Thanks,

Komal

Sydney,

I apologize that it has taken a bit of time to return the attached meeting request form. Coordination among the attendees and finding available dates to propose to you and Administrator Pruitt was a little tricky. We are suggesting May 9, May 11 or May 12 (times specified in the form). If Administrator Pruitt is not free during those times, please let me know as soon as possible, and we will revisit calendars.

Thanks again.

Best,

Komal

HI Sydney,

Our best open windows for bringing the egg producers to meet with Administrator Pruitt are as follows:

Wednesday, May 17

3:00 pm - 5:00 pm

Thursday, May 18

9:00 am - 11:00 am

Can we find something in these windows that works or do we need to look for others?

Best!

Thanks so much for your reply Sydney. We certainly understand. As an alternative, would it be possible for 3 to 5 grower leaders in at some point to meet the Administrator over that period? These would be the people responsible for some of the largest egg producing operations in the country with multiple farm sites and more than 50 million laying hens under production.

Best!

Subject: Invitation to Administrator Pruitt to Offer a Keynote Address to the Nation's Egg Producers in DC on May 17, 18 or 19, 2017

Dear Ms. Hupp,

I hope you are well and settling in nicely at EPA.

Please see attached a letter inviting the Administrator to offer a keynote address to the nation's egg producers at a meeting being held by United Egg Producers (UEP) here in Washington, D.C. on May 17, 18 or 19, 2017. Details are included in the letter.

UEP's farmer members raise hens that produce about 95% of the nation's eggs, and most of that egg production will be accounted for by the 150 or so egg producers in the audience listening to Administrator Pruitt's address should he decide to do this. These producers and UEP have been at the forefront of several US EPA rulemakings and policies that are central to how farmers operate today; Clean Water Act matters involving the Concentrated Animal Feeding Operations (CAFO) rule, WOTUS rule and the Chesapeake Bay TMDL as well as Clean Air Act and CERCLA/EPRCA matters as they relate to ammonia and other air emissions. These are

tremendously important issues that relate directly to how egg producers can continue to proudly meet their environmental responsibilities and the growing demand for eggs, and in general make their contribution to the nation's safe, wholesome and abundant food supply.

These farmers would appreciate hearing about Administrator Pruitt's plans for US EPA's environmental programs so they can better understand how they could contribute to the success of his efforts and what these plans might mean for their farms and businesses.

Please let me know if you have any questions or if the Administrator can accept this invitation. Thank you in advance for your consideration of this request.

Best!

Tom Hebert

On behalf of the United Egg Producers

202-441-0570

External Meeting Request Form for
Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date: May 4, 2017

Meeting Date: May 18, 2017

Meeting Time: 9:15 AM Eastern

Requested Location (if offsite, please list address, parking instructions, etc.): Office of the Administrator

Requestor: United Egg Producers

Purpose of the Meeting: Egg producers that are members of the trade association representing the producers of approximately 95% of the nation's domestic egg supply would like to meet with Administrator Pruitt to thank him for the steps he has taken to this point to help create a more rational, sound and effective federal regulatory program that properly respects the role of the states. The producers would like to share with the Administrator information about some of the great strides that egg producers have taken to properly manage their animals so as to protect water and air quality, and the extent to which the industry's total environmental footprint has been reduced over the last 50 years even as the number of egg laying hens and the total amount of eggs produced has increased to meet demand. They will share with the Administrator some of their first-hand experiences with how the federal environmental regulatory programs can or do affect them, their farming businesses, and families.

Background on the Meeting: Egg producers have direct and important experiences with several of the regulatory programs operated by US EPA, including the Clean Water Act rulemaking for Concentrated Animal Feeding Operations, the Emergency Planning and Community Right to Know Act and the Comprehensive Environmental Response, Compensation and Liability Act and the costs that the associated rulemakings can entail. As for many in the private sector, egg producers have taken great strides to improve the efficiency of their operations, and in the process, have improved their farms' and the sector's environmental performance.

Role of the Administrator: We seek an opportunity to have a conversation with the Administrator on the above topics, to hear his views on these matters and to learn more about his plans for policymaking at US EPA.

Attendees:

1. Steve George – Iowa Egg Producer, Fremont Farms, UEP Board Member and Chair of UEP's Environment Committee
2. Ron Truex – Indiana Egg Producer, Creighton Brothers Farms, and Chairman of the UEP Board
3. Glenn Hickman – Arizona Egg Producer, Hickman Family Farms, and UEP Board Member

4. Joe Miller – Staff, Rose Acre Farms
5. Chad Gregory – President, UEP
6. David Inall – Senior Vice President and Environment Committee Staff Lead, UEP
7. Tom Hebert – UEP Consultant

Priscilla, I am Personal Security Detail/Ex. 6/Ex. 7C/Ex. 7E/Ex. 7F with Administrator Pruitt's security detail.

We'd be happy to facilitate your meeting with Administrator Pruitt on Wednesday.

We will need a couple of items from you to ensure the arrival goes smoothly.

Personal Security Detail/Ex. 6/Ex. 7C/Ex. 7E/Ex. 7F

Please have the trooper and/or driver reach out for me and I will talk them through the arrival point. As well, if the troopers would like a site walk thru prior to the Governor's arrival, we would be happy to accommodate.

Regards,

Good afternoon Priscilla,

Looping in Agent [redacted] Gov. Scott will be visiting us on Wednesday at 11:15. Would you mind working with Priscilla to get details on he vehicle to ensure he is brought in through the courtyard?

Thank you all!

Subject: Meeting with Scott
SGH Bio w pic.docx

Hello Sydney,
Scott sent me a text and asked me to contact you about setting up a 20 minute meeting in Washington DC. Our first choice would be at any time on May 10. If that day does not work, then May 9 would also be a possibility. In the event he is unavailable either of those days, we could probably see him when he is back in Oklahoma during May, with the exception of May 9-12.

Although Scott and I have known each other for many years, I have attached my bio for your information.

Regards,
Sam Hammons

Sam Hammons has spent over 40 years in the energy arena, most recently assisting start-up and existing energy companies develop and implement energy-related projects and strategies. He currently serves as an Advisory Director to Alcor Energy Solutions, Mesa, Arizona, owns and operates Gas2Power, LLC, Sequoyah Information Systems, Ltd. and Sequoyah Capital, LLC. He chairs Express PAC, a nation-wide political action committee focused on business issues.

Until retiring from private law practice in 1996, he founded and served as President of Hammons, Vaught & Conner, a P.C. His practice involved energy-related contracts, and transactions, including international transactions, as well as energy litigation.

Prior to entering private practice he owned and operated Clinton Gas Transmission, one of the nation's earliest natural gas marketing companies. He was a partner in the Resource Analysis & Management Group of Oklahoma City where he managed the Natural Gas Contracts Division. Prior to joining the RAM Group, he was the Director of the Oklahoma Department of Energy while serving on the Governor's Cabinet.

From 1974-1980 he served as Administrative Assistant for Energy and Natural Resources to Governor David Boren (later Oklahoma's U.S. Senator and currently the President of the University of Oklahoma) and then in the same position for Governor George Nigh. Mr. Hammons presented testimony before Congressional Committees as well as state legislative bodies.

For six years Mr. Hammons served as Oklahoma's Official Representative to the Interstate Oil and Gas Compact Commission, which is the Congressionally-chartered organization that monitors oil and gas production in the various producing states. He has also served as Chairman of the Energy Council of the Oklahoma State Chamber of Commerce and Chairman of the 17-state Southern States Energy Board based in Atlanta, Georgia. He has authored numerous publications and appeared frequently on television and radio as a commentator on energy matters.

A graduate of Oklahoma Baptist University, Hammons later received a Masters of Arts as well as a Juris Doctor degree from the University of Oklahoma. Mr. Hammons has served on the Board of Directors of the Oklahoma State Chamber and twice was elected chairman of Oklahoma Baptist University Board of Trustees. He served as President of the Oklahoma City Rotary Club, the world's largest Rotary Club, and President of the Oklahoma City Committee of 100.

External Meeting Request Form 3-31-2017 EPSI-VOCGEN SteveSexton.pdf
EPA,Jarvis,Ranalli,MeetingNotes 4-26-2017,Re EPSI-VOCGEN.pdf

Hello All,

Thank you again for permitting Doug and I your time to quickly discuss the External Meeting Request Form we submitted.

Below & attached are, as promised, the Draft Minutes from yesterday's call. To perhaps prompt our first next follow-on dialog.

I refer to these notes as "Draft" minutes for two reasons: I didn't take notes - It's from memory, and I added some content for clarification or emphasis;

Plus I'm we probably shouldn't classify this as minutes without your all approval.

Thank you again for your time. It was a pleasure to have met you all, and thank you very much Karen, Sydney and Emily for making this happen !

Talk to you soon.

Best Regards

Doug and Mark

Draft Meeting Notes (with some added editorial – for emphasis or clarity purposes)

Date: Wednesday 4-26-2017

Time: 12:30 pm to 1:00 pm

Venue: Conference Call

Attendees:

- Doug R. Jarvis - President Green Visions Solar and Co-Founder EPSI-VOCGEN New York
- Mark A. Ranalli – Principal Allegiance Energy Systems, and Co-Founder EPSI-VOCGEN New York
- Mandy Gunasekara – Senior Policy Advisor
- Sarah Dunham – Acting Assistant Administrator of EPA's Office of Air and Radiation
- Reid Harvey – Director, Clean Air Markets Division

Purpose: To review and discuss *US EPA External Meeting Request Form* completed/submitted April 1 2017, on behalf of Environment & Power Systems International (EPSI), by Doug Jarvis and Mark Ranalli, to request a short meeting for EPSI President to present and discuss with Administrator Pruitt the EPSI VOCGEN National Implementation Plan and the EPSI proposed VOCGEN Operating Permit Program. A program that, once in place; can enable the speedy retrofit and construction of new manufacturing facilities with no net increase in Ozone precursors, toxics, or global warming gases. And a national plan, that with the national permitting program, offers the opportunity to leverage the increase of American manufacturing operations without limitation, or opposition by environmentalists, and in full compliance with the presently stayed CPP.

Agenda:

1. Doug and Mark's (D&M) few questions toward guiding our 30 minute conference call:

a. D&M Question: Have you had a chance to review the completed "EPA External Meeting Request Form" we sent back to Sydney Hupp, along with two documents attached to it? . . .

and, . . .

b. D&M Question: have you any immediate or specific questions for us to address regarding our input on the External Meeting Request Form (EMRF) or the attachments ?

M/S/R Answer: to Qa and Qb – yes we did review the material, and yes we would like to know, summarily from D&M, an overview from those documents, along with a statement about what D&M would like our team to consider.

D&M Response: Agreed, we plan to address your questions and cover basically:

- Who we are,

- What is VOCGEN, and

- the Purpose of this conference call meeting, such that at the end of the call, you and your team would be sufficiently satisfied and comfortable submitting to Administrator Pruitt:

o the External Meeting Request Form (EMRF) with attached two documents, plus

o the two documents we emailed to Emily just before this call; and,

o with your recommendation that Administrator Pruitt and President Trump will be delighted to:

A. know that the VOCGEN technology, is:

o a proven, vetted and patented combined Air Pollution Control (APC) / Combined Heat and Power (CHP) technology, that is the quintessential optimal and only effective *market-based solution*, the world, that will cost-effectively transform and help revitalize industrial manufacturing in America,

while

o also being the revolutionary disruptive APC technology that becomes the means to achieve

and exceed the requirements of the presently stayed Clean Power Plan (CPP);

thereby, precluding the Trump Administration's need to modify or denounce the stayed CPP, and in fact leverage their keeping of the Democratic Party's CPP (without destroying the American economy), i.e, toward:

- eliminating the age-old "cost-to-economy" vs. "Environment / Climate Change / regulatory compliance" paradigm, and thus neutralizing the commonplace environmentalist's anti-climate criticism/rhetoric.

- building increased and additional American Manufacturing – product, revenue, jobs and careers - in America;

- repatriation of American manufacturing operations;

- monetizing emissions to America's advantage; and

- being a means to

•□□□□□□□□ levelize the taxation of Imports, and

•□□□□□□□□ affecting a new NAFFTA program

while,

- increase American Exports and concerns;

- reversing the American Trade Deficit; and,

- decreasing per-capita taxes, yet increasing tax revenue.

and,

B. briefly meet, as requested in the EMRF, via Conference call with EPSI President Steven E. Sexton, to discuss the development of Sexton's proposed Federal Operating Permit Program, toward the creation of a streamlined, standardized yet comprehensive (i.e. optimal) permitting program that can be helpful to and adopted by the States.

c. D&M Question: have you had any recent communication with either Tom Dadey or Senator Thad Cochran?

M/S/R Answer: None, in regard to VOCGEN or EPSI; and, we are not familiar with the name Tom Dadey

D&M Response: if or as time permits we'll explain the reason for this question.

2. What is Vocgen:

In one sentence: *VOCGEN is a revolutionary, disruptive technology and market-based solution that represents the future of clean, efficient and competitive American manufacturing and a vibrant American economy based on wealth creation.* –Steven E. Sexton

Briefly – and from attached or referenced documents:

a. VOCGEN is an Air Pollution Control (APC) technology/system that outperforms and is unlike any other APC technology in the world – because it can abate emissions 100% while also cost-effectively perform Combined Heat and Power.

The VOCGEN system's performance exceeds the requirements of the Clean Air Act (CAA) Title I, the National Ambient Air Quality Standards (NAAQS), and the CAA Title V air operating permit requirements for major sources.

b. Moreover, VOCGEN is also a dispatchable, clean energy, Combined Heat and Power (CHP) technology/system – for manufacturing - that outperforms and is unlike any other CHP technology in the world – because it can cost-effectively perform Combined Heat and Power - for the Industrial Sector affording an unheard-of 2 year return on capital investment**, while also most effectively performing Air Pollution Control – Notably, a single VOCGEN power generator (with an output of 560kWe/hr and 6.4MMBtu/hr high quality waste heat) offsets ≈20,000 metric tons CO2e and toxics annually from regional coal-fired generation; representing high value emissions for trade.

**Each VOCGEN System will save its Manufacturer in excess of $1,000,000 annually in operating costs, as a secondary benefit of eliminating its emissions – to comply with regulations.

c. At the heart of the patented VOCGEN technology is the gas turbine oxidizer (GTO), having an off-the-shelf robust industrial gas turbine engine (i.e. combustion turbine or "jet engine") that has over 45 years of highly reliable operations in marine, desert and Arctic environments; which is coupled with a generator set, to produce 560 kWh/hr electric and 1,876 kWh/hr (or 6.4

MMBtu/hr) heat energy.

d. The VOCGEN is the only cost effective clean energy technology capable of achieving – exceeding - the proposed standards of the CPP Ruling. The VOCGEN is shovel-ready to be made commercially available (i.e. to be mass produced), to fulfill a US industrial sector demand/market of nearly 40,000 facilities. Many of these facilities will install multiple VOCGEN units.

e. The EPSI VOCGEN has been vetted by:

- U.S. DOE - Department of Energy, Berkeley National Labs
- U.S. EPA – Environmental Protection Agency (reference the attached White Paper co-authored by Steve E. Sexton (EPSI) and John A. Skip" Laitner (U.S. EPA))
- U.S. DARPA – Defense Advanced Research Projects Agency,
- GTI - Gas Technology Institute,
- EPRI - Electric Power Research Institute
- ACEEE - American Society for an Energy-Efficient Economy
- CEC – California Energy Commission

3. Our Goal for this Meeting:

That we, Doug and Mark, will have provided you and your team sufficient information and discussion points to:

◆ support your due diligence review of the attached and referenced documentation, and following that review and follow-up meeting(s) or clarifications you require from us, to

◆ recommend to Administrator Pruitt that a brief meeting (perhaps too with Secretary Rick Perry) be arranged for EPSI President Steve E. Sexton to discuss among other things, the proposed National VOCGEN Operating Permit Program – preferably before President Trump's policy team votes to determine the fate of the presently stayed CPP.

4. EPA's (M/S/R) questions of or from the aforementioned:

a. M/S/R Question: can you provide us an example from the list of organizations that have vetted the EPSI VOCGEN technology?

D&M Answer: Yes, reference the attached white paper co-authored by Steve E. Sexton (EPSI) and John A. Skip" Laitner (U.S. EPA)

b. M/S/R Question: describe the state of play of the VOCGEN – in the US and/or internationally, e.g. are there presently systems deployed in other countries?

D&M Answer: to our knowledge Steve Sexton has resisted or deferred responding to current requests from other countries until he first discusses the VOCGEN program with the Trump Administration; so, there are no deployed systems, monitored by EPSI, outside the US.

An initial, generation I, VOCGEN GTO/CHP commercial prototype operated successfully for a 3.5 year period on a mixture of waste pentane air emissions (VOC) and natural gas, in compliance with the requirements of a Class 1 air quality operating permit issued by the San Joaquin Valley Air Pollution Control District.

c. M/S/R Question: are there currently regulatory barriers, in the States or at the Federal level, that are stifling the marketing or precluding deployment of VOCGEN systems?

D&M Answer: EPSI has Letters of intent to purchase from a number of manufacturing concerns headquartered and/or having operations in U.S.A.

As you may know there are nearly 40,000 facilities of approximately 104 industrial categories, that are subject to Title I of the Clean Air Act (CAA); the National Ambient Air Quality

Standards (NAAQS) for ground level Ozone; the CAA Title V air operating permit requirements for major sources; and the US EPA Clean Power Plan Guidelines.

The Automobile industry is one of those groups, and many manufacturing concerns, like the Automobile industry, have operations in multiple states.

These firms have advised EPSI that not only do they need and want multiple units for their multiple facilities, they expressed that they need too assurance from EPSI that:

A. EPSI can have the infrastructure in place to affect and respond to high production requirements that would come from the demand for the VOCGEN technology/systems –from their multiple plants and from that of their competitors; and

B. That the various State permitting processes won't slow or stifle project implementation; i.e. the Manufacturing concerns need uniformity (or standardization) w/r/t the permitting process.

In regard to the deployment of VOCGEN with respect to interconnection of the VOCGEN systems for grid-tied Distributed Generation (DG or DG/CHP) applications, as you may know each States' Utility Commission has different interconnection requirements – some more onerous than others, and are particularly more complex and onerous in deregulated States where the investor-owned utilities are threatened by DG. However, we believe from experience, that EPSI and the aforementioned EPSI-VOCGEN targeted industrial customers will not, in any way, find Utility interconnection requirements to be a hurdle or barrier to VOCGEN project implementation.

d. M/S/R Question: we would like to continue this conversation via a follow-up dialog if that works for D&M and EPSI.

D&M Answer: Agreed, and we hope these minutes as well as any of the information and data from documents we submitted, referenced, or to be submitted for you review, will prompt more questions & answers toward your satisfaction and conclusion that *the EPSI VOCGEN is indeed the most revolutionary, most documented, most vetted, and the only market-based solution offering a wealth generating economic model that will significantly improve manufacturing industry growth, production, revenue and profits; creating jobs and careers, and vastly improve the American economy, while simultaneously improving energy security, protecting human health, and directly benefiting environmental health – thereby providing the*

environmentalist the quintessential solution that until now was not ever expected or known to exist.

-

Moreover we would like to again encourage visiting the following websites, for more information about EPSI, the VOCGEN technology, and Mr. Steve E. Sexton:

Hello Emily,

Looking forward to conference-call meeting with Sarah shortly;

And, I thought It'd be worthwhile to add yet 2 more document tot the two we had attached to your External Meeting Request Form.

While the documents are straight forward, if time permits we may want to go over these with you and/or Sarah.

Thank you again

ABSTRACT

Conventional pollution control technologies do just that; they control pollution to acceptable levels but provide little else in the way of economic benefits. But what if the redesign of such systems makes it possible to produce useful by-products beyond the so-called "end of pipe" controls? In the case of industrial plants required to reduce volatile organic compounds (VOC), the conventional abatement technologies include regenerative thermal oxidizers (RTOs) which have an efficiency removal rate of 98 percent and higher. Environment and Power Systems International, LLC (EPSI) has developed an alternative technology that uses the VOC-containing gases enriched with natural gas to generate both electricity and useful thermal heat as a by-product of pollution control. This paper describes the alternative technology and reviews the potential contribution to the nation's electricity supply. Preliminary data suggests there may be 100,000 industrial facilities that might be able to take advantage of this alternative technology. If 60 percent of these facilities adopt the EPSI system by 2020, the primary energy savings might exceed one quad of energy. This is equivalent to the petroleum production that might be provided by opening the Alaska National Wildlife Refuge.

Introduction

Few question the importance of reducing or eliminating air and water pollutants from our nation's industrial processes. To the extent there is any controversy, it is about the need to balance benefits with costs as we try to manage the reduction of those pollutants. In the case of air pollution generally, and more specifically, the reduction of volatile organic compounds (the primary technology driver in this paper), standard engineering practice generally requires some form of pollution control technology. The good news is that this approach does very well, typically achieving emission reductions of at least 98 percent when the technology is appropriately designed, engineered, and operated. On the other hand, the conventional pollution control technologies do only that; they control pollution to acceptable levels but provide little else in the way of economic benefits.

But, as we ask in this paper, what if the redesign of such systems made it possible to produce useful by-products beyond the so-called "end of pipe" controls? In the case of industrial plants required to reduce volatile organic compounds (VOCs), the dominant abatement technologies include regenerative thermal oxidizers (RTOs) which provide an efficiency removal rate of 98 percent and higher. Environment and Power Systems International (EPSI) has developed an alternative technology that uses the VOC-containing gases enriched with natural gas to generate both electricity and useful thermal heat as a by-product of pollution control. This paper describes the alternative technology and reviews the potential contribution to the nation's electricity supply. Preliminary data suggests there may be 100,000 industrial facilities that might be able to take advantage of this alternative technology (EPSI 2004). If 60 percent of these facilities adopt the EPSI system by 2020, the primary energy savings might exceed one quad of energy. This is equivalent to the petroleum production that might be provided by opening the Alaska National Wildlife Refuge.[1]

[1] This estimate is derived from calculations by Laitner (2004) and compared to ANWR production potential found in Koomey et al. (2003).

Background and Technology Characterization

Ground-level or tropospheric ozone is a widespread air pollutant, a gas that forms in the atmosphere when three atoms of oxygen are combined together. It is not emitted directly into the air, but is produced by chemical reactions between oxides of nitrogen (NOx), and volatile organic compounds (VOC) near ground level and in the presence of sunlight.[2] Hence, NOx and VOC are identified as precursors to the formation of ozone. Nitrogen oxides are formed when fossil fuel is burned at high temperatures. Many of the nitrogen oxides are colorless and odorless, although nitrogen dioxide can often be seen as a reddish-brown gas. NOx results from sources that burn fuel, including motor vehicles, electric generating plants, boilers, and other industrial and residential sources. These NOx emissions can drift hundreds of miles away from their point of origin, allowing one geographic location to affect an entire region.

VOCs, the specific focus of this new technology, are compounds that contain carbon which can volatilize to form an organic vapor in the air and participate in atmospheric photochemical reactions.[3] The major man-made sources of VOCs are industrial processes (46 percent) and automobiles (30 percent) (Noll 1999). VOCs are widely used as solvents in a large number of industrial processes because they evaporate into air leaving no residue.

The Clean Air Act will continue to be the pre-eminent driver of the VOC recovery and destruction market. The EPA and several states finalized many relevant and demanding regulations during the last few years increasing the rate of growth in the pollution control markets to their highest levels (Frost and Sullivan 2003). Due to the nature of most industrial processes, one option to meet these air quality regulations is the installation of pollution control equipment. As we previously noted, the equipment is required to achieve at least a 95 to 98 percent VOC reduction rate from what would be released without pollution control equipment.

The largest end-users of VOC destruction and recovery equipment continue to be chemical, oil, gas, lumber and wood industries (EPSI 2004). Specific industries that focus on VOC technologies include aerospace, semiconductor, printing, automotive and generally all coating operations including can, wire, appliances, and furniture. In total, there are 104 industries subject to Clean Air regulatory requirements for VOCs including the subset list of 189 Hazardous Air Pollutants (HAPs).

There are a number of ways VOC emissions can be reduced to meet EPA limitations. New VOC abatement technologies including absorption, ultra violet oxidation and refrigeration/condensation equipment captured 17 percent of the total market in the year 2000 (EPSI 2004). Older, more mature technology segments growing more slowly include carbon adsorption, distillation and air stripping equipment. Thermal oxidation captured 55+ percent of the total market in that year (EPSI 2004). Each method has its own benefits and limitations that may make them more desirable for certain applications. The applicability of a given technique is dependent on the physical and chemical properties of the pollutant and the characteristics of the exhaust stream.

VOC equipment companies are combining multiple technological processes to create unique solutions. Integrated pollution control systems have a strong potential for future growth. Pre-wired, pre-piped, pre-tested and certified systems reduce project costs, trading slightly higher integrated and

---

[2] Ozone occurs in two layers of the atmosphere. The atmospheric layer near the earth's surface is the troposphere. Ground level or "bad" ozone is an air pollutant that damages human health, vegetation, and many common materials. It is a key ingredient of urban smog. Strong sunlight and hot weather cause ground level ozone to form in harmful concentrations in the air. The troposphere extends from ground level to about ten miles up, where it meets the second layer, the stratosphere. In the stratosphere, there is a "good" ozone layer that extends upward from about 10 to 30 miles, and this ozone protects life on earth from the sun's harmful ultraviolet rays.

[3] The following compounds are excluded from this list of volatile organic compounds: carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate.

functionally tested equipment costs for decreased field installation and start-up costs, and reduced site installation and maintenance problems.

Thermal Oxidation

Thermal oxidation, by definition, converts a hydrocarbon, in the presence of oxygen and heat, to carbon dioxide and water vapor. As we already indicated, this technology provides the greater part of the VOC control market and becomes the basis for estimating national benefits of the alternative control market based on the Gas Turbine Oxidation approach. A general equation showing this relationship is shown below (Rafson 1998):

$$c_n H_{2n} \quad (n \quad m/2) O_2 \quad n CO_2 \quad H_2O \quad \text{Heat}$$

The particular *n* and *m* subscripts of the equation are used to define the number of carbon atoms and hydrogen atoms. The amount of oxygen atoms present are converted to *n* molecules of carbon dioxide and *m* molecules of water vapor and heat which is given off in the exothermic reactor. This last aspect, the exothermic nature of thermal oxidation is a key to generating multiple benefits beyond mere pollution control.

There are three critical requirements to ensure combustion and destruction of the VOCs: time, temperature, and turbulence. Time refers to the retention time or residence time, which is the length of time that an organic is at the appropriate temperature to ensure proper VOC destruction. Typically, a residence time of 0.5 second is adequate to ensure at least a 95% destruction rate at the proper temperature. Temperature must be maintained in conjunction with time. As time is decreased, temperature will need to be increased and vice versa. A minimum temperature for VOC destruction is approximately 1400ºF. Turbulence implies an adequate level of mixing. By changing the configuration of the air stream, the inlet air to the destruct chamber is properly mixed to ensure complete combustion takes place. There are three different thermal oxidation processes. These include:

(1) Direct Flame Incineration: A direct flame incinerator consists of only a combustion chamber with no heat recovery from the incinerator. Direct flame incinerators are the simplest type of thermal oxidizers. Direct flame incinerators have the advantages of minimum complexity and low cost, but, since they are typically used in applications with dangerous pollutants (explosive, corrosive or poisonous) ; the overall system including the required safety equipment is typically very complex.

(2) Recuperative Thermal Oxidation: The technique of recuperative thermal oxidation involves the recovery of energy produced by burning a support fuel to achieve VOC destruction using a primary or secondary heat exchanger to heat the incoming process air utilizing hot waste gases from the oxidizer. The exhaust gases from the oxidizer pass through a shell and tube or plate-type heat exchanger to recover the heat of combustion and increase the fuel efficiency of the VOC destruction process. Recuperative oxidizers are ideal for high VOC emission rates. A recuperative thermal oxidizer is generally able to recover 70 percent of the heat available from the oxidizer. Some units are designed with a secondary heat recovery unit to preheat air or water or heat transfer fluids for other plant processes such as drying ovens.

(3) Regenerative Thermal Oxidation: Another type of thermal oxidizer is the regenerative thermal oxidizer which appears to be the system of choice among industrial users. These systems are used when the contaminated air stream has a low concentration of VOC (< 1000 ppm) and/or large air flows. They also are used in industrial processes that require a high oxidation temperature. Regenerative oxidizers allow for better heat recovery than a recuperative oxidizer and diluted vapor streams can be incinerated at lower costs. Regenerative systems use beds of ceramic material as a heat sink. Once the ceramics are heated, the flow shifts and the post-combustion gas stream is used to heat up the second bed of ceramic material while pre-combustion air flows through the first hot bed gaining heat as it travels to the burner. Flow is shifted between the beds as they heat up and cool down. Heat transfer efficiencies of 95% can be

Copyright © 2010 Environment & Power Systems International – All Rights Reserved

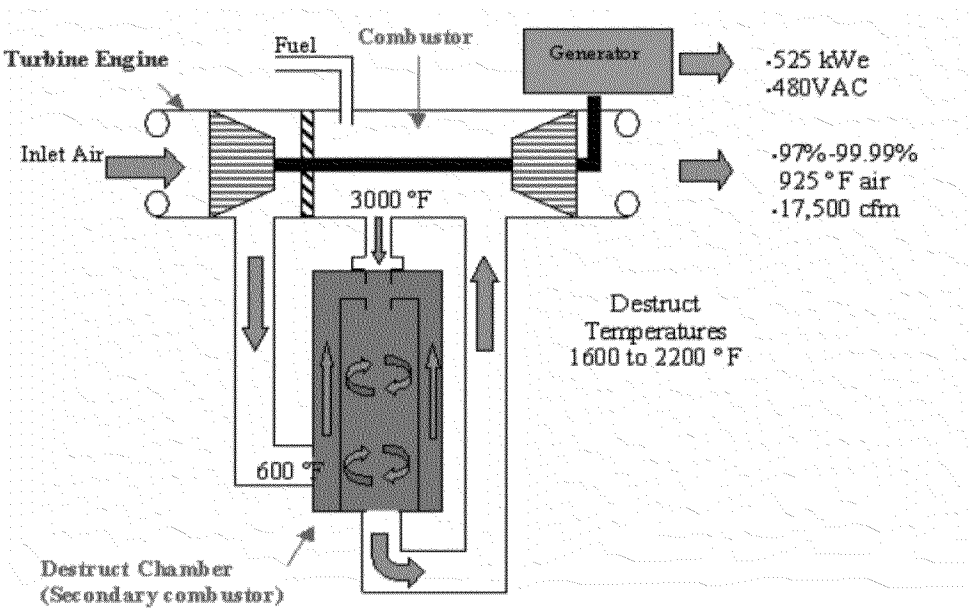
17cv1906 Sierra Club v. EPA ED_001523B_00004062-00003

achieved with regenerative units. The alternating sequence decreases the removal efficiency of the VOC. The overall removal efficiency can be as high as 99%, but typically is 98%(GTI 2003).

Gas Turbine Oxidizer

Another type of thermal oxidizer is a gas turbine oxidizer (GTO). As described in this paper, this technology provides the basis for generating both electricity and thermal energy as a by -product of pollution control. The GTO consists of a turbine and a secondary combustion chamber for thermal destruction of production process or w aste volatile organic compounds (VOC) and hazardous air pollutants (HAP) emissions including renewable hydrocarbon fuels and other organic materials within an air stream.

Figure 1. Schematic Drawing of Gas Turbine Oxidizer



As shown in Figure 1, above, the VOC -laden air, combined with ambient atmospheric concentrations of oxygen (20.9%) is compressed within the gas turbine engine's compressor section to approximately 132 psig or 9 atmospheres. This raises the VOC-laden air temperature to 600 °F. This air enters a patented VOC destruction chamber where it is mixed with the 3000 °F combustion products from the turbine combustor. The resultant air (now ~ 1850 °F, but in the range of 1600 – 2200 °F) travels in a cyclonic fashio n inside the destruction chamber. This cyclonic action allows for good mixing and a residence time of approximately 0.44 seconds in which the VOCs oxidize into carbon dioxide and water. This "clean" air stream enters the turbine combustor where it is mix ed with fuel and ignited creating temperatures ~ 3,000 °F. This high-energy air is routed through the turbine section of the engine where the air is quickly cooled to 925 °F creating a significant airflow that rotates the turbine shaft. This shaft is connected to a generator that produces electricity (approximately 525 kWe)(GTI 2003).

Gas turbines have several advantages to their design. Due to their high operating temperatures, large amounts of heat are available for recovery. This heat can be used for other plant processes and/or pretreatment of air into a VOC concentrator, which will allow for more VOC destruction within the turbine. The unit is also able to generate electricity, which can be used to power other plant equipment.

Copyright © 2010 Environment & Power Systems International – All Rights Reserved

The footprint of the s ystem is smaller than other VOC destruction technologies. The turbine itself is durable and should last much longer than other technologies.

System Performance

Although the GTO system requires a higher cost outlay, the lower annual operating costs, together with the credits associated with heat recovery and electricity generation indicate a highly cost - effective system. As summarized in Table 1 below, the generic cost characterizations suggest a simple payback of little as 1.6 years.

Table 1. Cost and Performance Characterization (EPSI 2004)

	RTO System	EPSI GTO System
Total Capital and Project Costs	$1,800,000	$3,200,000
Total Annual Costs	$618,000	$262,000
Fuel and electricity	$227,000	$122,000
Maintenance	$35,000	$10,000
Administration	$94,000	$90,000
Refurbishment Fund	$261,000	$40,000
Total Annual Credits	$0	$475,000
Electricity Generation	$0	$125,000
Heat Recovery	$0	$350,000
Simple Payback Period	None	1.6 Years
Return on Investment		60%

The higher capital costs associated with the GTO system include system costs associated with the generation of electricity and thermal energy. At the same time, the system design reduces annual operating costs (especially depreciation and normal wear and tear, or what we call "refurbishment costs"). The design also anticipates slightly increased natural gas purchases but substantially reduced electricity costs. Most important are the revenues or credits earned through the generation of electricity and process heat or steam.

Assuming a 525 kW unit operating at 63% percent capacity factor (or 5520 hours per year), and subtracting parasitic or ancillary loads needed to safely operate the system, the GTO unit will provide 2.9 million kilowatt-hours (kWh) of electricity. Priced at 4.5 cents per kWh implies an electricity credit of $125,000 annually. At the same time, the potential for waste heat recovery approaches 1.656 trillion Btu per year. If purchased from local utilities at $7.0 per million Btu, this implies an even bigger annual credit of $350,000. The higher capital costs, then, are clearly offset by reduced annual operating costs and a sizeable credit for both electricity and heat. So what is now possible through a technology redesign is to convert a pollution control technology into a new system that provides a new source of combined heat and power operations that pays for itself in less than two years.

Size of Opportunity

The GTO-VOC technology will compete with other abatement equipment and with CHP systems on the basis of quality, price, and service. However, there are no industry players that supply VOC

Copyright © 2010 Environment & Power Systems International – All Rights Reserved

destruct chambers for gas turbines. North American penetration of this market segment is zero percent and recent technological and design advances in environmental/cogeneration by EPSI have set the stage for making significant inroads against the incumbent VOC destruct only suppliers. With over $2 billion in North American annual sales, this market segment is expected to provide significant growth for EPSI over the next ten years. But to evaluate the potential for market penetration, we provide a closer look at the economics of the GTO-VOC system.

EPSI will compete in a $200 billion North American market (Frost and Sullivan) for air pollution control solutions. It is estimated that there are over 100,000 VOC destruct devices with annual turnover of $13 billion. Growth in this market is being driven by the need for 104 discrete industries subject to EPA regulated control of environmental pollution and is estimated at 7% annually. EPSI's approach is to target these existing thermal oxidizers with our GTO products. EPSI's value proposition to replace these existing thermal oxidizers is its high VOC destruct efficiency, utilization of the useful byproducts of the destruction process (electricity and heat) and its low maintenance costs. This value proposition provides the customer with an attractive ROI on the EPSI system as shown below. With the EPSI system, a pollution control device can have a return on investment. As shown in the example below, an additional investment of $1.4 million in the EPSI technology will generate annual cash flow of $831,000, an ROI of 60% and a payback of 1.6 years. We are not aware of any other pollution control device that can make this statement.

Perhaps just as exciting as the attractive return on investment, the GTO system can deliver a sizeable reduction in the nation's total primary energy supply. If we assume that just 60 percent of the existing 100,000 VOC destruct devices are converted to the GTO-VOC technology over the next 15 years, the primary energy savings for both electricity and heat might exceed 1.25 quads. This is about the same as the anticipated annual average production from the Alaska National Wildlife Refuge [4] and about two percent of current electricity generation. Hence, we have a cost-effective technology redesign that moves pollution control into a significant energy supply opportunity.

Conclusion

The EPSI system's ability to generate electricity, provide recoverable heat for use beyond the VOC destruction process, and its ability to operate within a large temperature band to destroy VOC more efficiently and completely, differentiates it from other pollution control technologies currently available in the market. The development of the 480 VAC synchronous generator component is critical to the success of the EPSI product, as it will provide a sufficient load to the turbine independent of the local electric utility's grid status, assuring combustion temperature for VOC destruction. It will also enable the EPSI system to function as an emergency generator (utilizing the EPSI system's electric output) to power the exhaust fans which move the VOC laden air stream; avoiding the potential of VOC build-up (a potential explosion hazard) that could occur with loss of the local utility grid and the use of an RTO.

The ability to quickly achieve VOC destruction temperatures from a cold start position is another advantage over RTO technology. Based on the information supplied by an RTO manufacturer and an end-user's data, the RTO requires one to eight hours to achieve proper temperatures from a cold start position. The GTO achieves destruction temperatures within minutes.

Based on the information gathered by an end-user, the major overhaul frequency of an RTO (50 to 60 SCFM) is between seven and ten years, at a cost of approximately $250,000. This amount is almost three times higher than EPSI's estimates for the GTO. One unknown with the GTO is the impact particulate or foreign matter will have on the turbine if inlet air scrubbing and filtration is not used

[4] For a review of the "fully-risked" market production potential of ANWR, see (Koomey et al. 2003).

Copyright © 2010 Environment & Power Systems International – All Rights Reserved

appropriately. When particulate begins to collect on an RTO, its performance will begin to degra de. On the other hand, depending on the type and the amount of particulate, the (GTO) turbine may become damaged, possibly inoperable if corrosives or particulates are not addressed for gas turbine protection

After reviewing all the information, the following advantages and disadvantages are noted:

Advantages of the EPSI GTO system over standard (tower type) RTO include:

- Shorter initial cold start-up time (5 minutes versus 1 to 8 hours)
- Recoverable heat for use by end-user (RTOs use their heat in the VOC abatement process)
- Electrical power generation
- Higher combustion temperature (which in combination with high residence time assures more complete destruction of VOC) (VOC as renewable resource fuel)
- Smaller equipment footprint
- Lower major overhaul cost
- Short-term return on investment

The d isadvantages of EPSI system when compared to standard (tower type) RTO include the following:

- Air flows greater than 6,200 scfm which need to be treated, require a VOC concentrator
- Although based on proven ASE 8 gas turbine installations (there are over 500 units installed in the field), this is a new product (the secondary combustor is the new component), whereas hundreds of RTOs have been installed and are in use.
- Greater consumption of natural gas for low air-flow systems

Based on the points listed above, our conclusion is that the EPSI system can provide a more thorough destruction of VOC due to its higher temperature variable thermal oxidation process (compared to an RTO) and having the abil ity to generate electricity, makes it a better choice of the two pollution control devices. Using the electricity the GTO can produce, it may also be possible to use the energy to purge the VOC stream ductwork (in the event of loss of the local electric gr id) to minimize or eliminate the potential of VOC buildup – which would increase plant safety. The EPSI system reviewed is based on a 525 kW system. The implementation of the concept, using a larger turbine (2 to 5 MW range), would improve system economics through the elimination of the need for a VOC concentrator, obtaining greater usable electrical power and a greater amount of recoverable heat.

Subject: The Vocgen National Plan for Manufacturing Industries

Dear Mr. President:

I offer a market-based pollution control and clean energy solution that can cost-effectively help revitalize industrial manufacturing.

I would like to send you the Vocgen National Plan describing the Solution, which as been formally peer-reviewed, commercially deployed and now represents shovel-ready projects and jobs.

Vocgen was designed by AlliedSignal/Honeywell and Environment & Power Systems International, LLC to help build a sustainable and competitive manufacturing sector and an energy efficient economy.

Notably, the solution eliminates the age-old cost vs. air quality compliance paradigm, making cost-effective air pollution controls and clean energy available to all industrial operations big and small. It represents an energy and air pollution control solution designed to serve over 38,800 existing US industrial operations. Our 0.560MW power generators reduce energy consumption resulting in positive cash flows averaging $1 million USD/year.

The National Plan proposes to replace energy-intensive air pollution controls at industry with combined heat and power (CHP) systems that uniquely uses waste regulated air emissions as supplemental fuel for the cogeneration of electric power and useful high quality heat. The plan can substantially improve industrial energy security, environmental health and the overall economy of the United States of America.

I respectfully request an introduction to Scott Pruitt to discuss and develop a Vocgen operating permit program for States to adopt. Once such a program is in place; it can enable the speedy retrofit and construction of new facilities with no net increase in Ozone precursors, toxics, or global warming gases. This fact offers you the opportunity to leverage the increase of manufacturing operations without limitation, or opposition by environmentalists.

100% project financing, the best equipment manufacturers and contractors are already in place to kick off the transformation of both the air pollution control market including a transition to greater industrial sector security, profitability and competitiveness.

I look forward to hearing from you and making America great again!

Respectfully,

Steven E. Sexton
CEO and Managing Director
Environment & Power Systems International, LLC

The Vocgen Solution for Industry

A national plan to support competitive manufacturing and an energy efficient economy

Steven E. Sexton, CEO and Managing Director of Environment & Power Systems International

An ambitious plan is proposed to replace energy-intensive air pollution controls at industry with a combined heat and power (CHP) technology that uniquely uses regulated air emissions as supplemental fuel for the cogeneration of electric power and u seful high quality heat. The plan can substantia lly improve industrial energy security, environmental health and the overall economy of the United States of America.

At the heart of the patented VOCGEN power generator and the solution overall is the gas turbine oxidizer (GTO). The GTO is the only combined energy generator and air pollution control alternative that has undergone product development through peer group scrutiny via the stage -gate method including product prototyping; testing and evaluation; business case and planning; risk analysis; and a stage six (6) review of the economic feasibility representations essential for commercialization. Vocgen is a market-based energy efficiency and cost savings scheme for ma nufacturing industries created by recycling VOC energy, thus eliminating the traditio nal cost necessary to operate air pollution control systems. Notably, a Vocgen power generator with an output of 560kWe and 6.4MMBtu high quality waste heat offsets ≈20,000 metric tons CO_2e and toxics annually from regional coal -fired generation; representing high value emissions for trade.

VOCGEN is a combined air pollution control and cogeneration solution for industries subject to Title I of the Clean Air Act (CAA); the National Ambient Ai r Quality Standards (NAAQS) for ground level Ozone; CAA Title V air operating permit requirements for major sources; and the US EPA Clean Power Plan Guidelines.

Critical to its ability to replace legacy thermal destruction equipment costs at industry is the understanding that this innovation is not a "me too" energy solution. It is a unique alternative that generates positive cash flows for the 20 -year+ life of its operation. When the legacy equipment is altogether replaced within a corporate fleet, an improved and competitive cost of operations model is achieved. This profitability is not realized by simply adding up the fuel value of volatile organic air emissions used to help fuel the generation of electric power and heat. It is realized by replacing the lifecycle costs of legacy thermal destruction equipment with the lifecycle savings produced by combined heat and power (CHP) equipment, consisting of specially designed and configured power and heat producing equipment . Such equipment is used to offset the emissions typically generated on the grid to energize, heat and cool industrial production processes and buildings at industry. It therefore offsets coal-fired power and emissions just like renewables.

Given the fact that only a handful of the 104 industrial categories regulated by the U.S. EPA/States have ever deployed on-site combined cooling heating, and power (CCHP), the VOCGEN solution creates an extraordinary emergent market consisting of over 38,880 facilities within the United States alone. The significance of the emergent market is its potential market capitalization and potential to support industrial manufacturing growth. This potential, despite the fact that the air pollution control market is saturated with inefficient legacy "burner" type equipment, can be quickly realized con sidering the contem porary factors shaping the mandate for the growth of a cost-effective and competitive U.S. industrial manufacturing sector.

Once national commercialization begins, the impact of the VOCGEN plan will be nation wide industrial facility retrofit construction projects and jobs in support of cost-competitive manufacturing; representing a significant reduction in ground level Ozone and CO_2e and a measurable reduction in environmental health cost. Primarily, the Vocgen wealth generating economic model has the potential to significantly improve business growth, create jobs and improve the American economy.

Copyright©2017Environment & Power Systems International, LLC – All Rights Reserved

A long-awaited clean energy solution is superbly positioned to help President Trump execute a manufacturing resurgence in America. It was purposefully designed and commercially demonstrated by AlliedSignal Honeywell and Environment & Power Systems International, LLC to cost-effectively cogenerate high quality power and heat energy onsite for industrial operations subject to Title V air quality permit requirements. The solution offsets coal-fired power generation emissions CO2e and Toxics pursuant to the clean power plan. It also offsets emissions generated by traditional air pollution controls and other energy-intensive onsite equipment, significantly reducing energy consumption. The solution creates a CFO-approved ≈2-year return on capital investment upside making shovel ready projects and jobs possible. It represents the future of clean, efficient and competitive American manufacturing and a vibrant American economy based on wealth creation.

Steven E. Sexton, CEO
Environment & Power Systems International, LLC

A Solution for the 21st Century

- Vocgen eliminates the age-old cost vs. regulatory compliance paradigm; making cost-effective air pollution controls and clean efficient energy available to industrial operations
- Vocgen is a market-based solution designed to serve over 38,880 existing U.S. industrial operations
- A single Vocgen genset (1 unit) significantly reduces energy consumption; designed to generate positive cash flows averaging $1 million/year/unit within the U.S.

Landmark Realizations

1st - Proves both air quality and an energy efficient economy is possible
1st - Proves free market competition can drive uniquely unexpected innovations and new markets
1st - Proves Vocgen to be a superior clean energy solution rivaling, however enhancing renewables
1st – A market-based energy efficiency program for industry
1st – Gas turbine oxidizer (GTO power generator/pollution controls) w/buy-back program warranty
1st - Substantial positive cash flows for the life of Vocgen projects; lowering cost of operations
1st – Eliminates governmental energy-production subsidies
1st - Economic incentive for grandfathered and synthetic minor permittees to abate air emissions

Perspective

1. Promotes competitive electricity and natural gas markets
2. Promotes national security and energy security
3. A free-market approach to climate change
4. A win for both environmentalists and private corporations
5. Advances the modernization of American manufacturing
6. A conservative approach to federal energy and environmental policies
7. Financial partners offer project financing to help clients conserve capital. Energy savings pay for projects
8. Guarantees end-users lowest cost for energy and reduces risk of failed production and plant operations
9. A lean federal operating permit program can help states and end-user clients to promote and justify shovel-ready clean energy projects consistently from state to state where adopted

Subject: Introduction Video for Resource Bank Address

Hi Sydney,

I wanted to touch base with you to see if Mr. Pruitt had any sort of introduction video clip he would like to have played before going on stage to give his remarks at Resource Bank 2017. We have some large video screens in the main session room and it could be a great way to give some background information on him, etc. before he takes the stage. The video should ideally be less than 3 minutes long; around the 2 minute mark is ideal.

If this is something you would be interested in, please use this link to upload the video directly: https://www.dropbox.com/sh/8lh69vnucr5wmks/AADMQ2c7M-zyFSA3CE9b8UnFa?dl=0. You will receive a separate email from me/DropBox with a direct link inviting you to upload video/materials. Please entitle anything you upload with his name.

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your continued support of Resource Bank 2017!

Sincerely,

Jessica

Hi Sydney,

Marathon Petroleum Corp.'s CEO, Gary Heminger, will be in town June 20-21 and is looking to meet with the Administrator. I've cc'd Mike Birsic who is a good friend and is the point person for setting this up. Mr. Heminger would like to talk about RFS and air regulations, among other things.

Mike, fill in any missing details.

Sydney, let me know if you need anything else from my end in the interim.

Best,

Mandy

Earl,

I copied Ms. Hupp on the email below where I tried to connect you all with her. She is copied again on this email. I know they are slammed up there so hopefully she will catch this email.

I assumed you all were in contact with her so I have not followed up. You can try emailing her again directly using the email above. If you don't hear from her within a week then call me back and I will contact Administrator Scott Pruitt directly for you guys.

I hope all is well.

Sincerely

Alan Wilson

Earl,

I am copying Sydney Hupp on this email. She works in Administrator Scott Pruitt's office at the EPA. She was recently very helpful in setting up a meeting with Mr. Pruitt and is in a better position than I am when it comes to Scott Pruitt's availability to speak to the National Association of Home Builders this summer. I have also provided her work number below.

Sydney,

First, thank you for your help last week on setting up that other meeting. Second, I spoke to my local homebuilders the other day and was bragging on Scott. They are eager to meet him if his schedule permits. Please see Mr. McLeod's email below for details. I hope this helps.

Alan-

It was great to see you last night at the HBA of South Carolina Board of Directors meeting and the Bird Supper. Your remarks were well received and appreciated.

Pursuant to our conversation, please extend an invitation to EPA Administrator Scott Pruitt to speak at our lunch meeting during our National Association of Home Builders (NAHB) Legislative Conference on Wednesday, June 14, 2017. The meeting will be held in Emerson Hall of the Library of Congress, Washington DC beginning at 12:15 p.m. We expect 30 members of the Building Industry Association of Central South Carolina to be in attendance including our state leadership and representatives of NAHB.

Of course, we would be honored if you could join us as well.

Thank you for your assistance in this regard.

Sent: Mon 5/8/2017 8:21:30 PM
Subject: RE: Meeting

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 11th at 9:30 am. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the South Lobby of the William Jefferson Clinton building.

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Sydney

My name is Don Parrish and I would like to request a meeting with Administrator Pruitt and Sarah Greenwalt. I plan to bring – including myself – 6 people. The topic we wish to discuss is "waters of the US". I look forward to your response and discussing dates and times for this meeting. Thank you and I look forward to finding time on Administrator Pruitt's busy schedule.

Subject: Invitation to Administrator Pruitt

Good Morning Sydney,

I didn't know you had gone to EPA with General Pruitt….CONGRATULATIONS! I am sure your life has become quite zesty since making the move. If we can ever be of assistance, don't hesitate to give us a call.

When we met with General (I obtained his permission to still call him "General") Pruitt a few weeks ago he expressed his desire to come to the Summer Meeting and speak to his former colleagues. The dates of the meeting are 20 – 22 June 2017 in Big Sky, Montana. I am sure there is a form we need to complete and return to you. Could you send me a copy and we will get it right back to you.

Again, Welcome to DC!

Jim

Subject: Fw: AFS - GA FLY-IN AGENDA
AFS GA Fly In - Program - April 5 2017.docx

Sydney: Below and attached please find the info on the American Foundry Society Fly-in as you requested last week.

I may call you about those items I sent you last week to follow up as well.

As always, please let me know if you have any questions.

Respectfully, A.J. Ferate

Please see attached our agenda for the Fly-In in June. Should Administrator Pruitt be available Tuesday morning June 20, we would slot the "Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?" in at either 10:15 am or 11:00 am in place of one of those panels. If the Administrator cannot join us – we would be delighted to have Samantha for the 7:30 am Breakfast Session keynote slot on June 21. You can see from the agenda what the other topics are of interest to our members and the caliber of speakers we have lined up so far.

As we have discussed, the American Foundry Society represents the U.S. metalcasting industry – the sixth-largest industry sector in America and the second largest supplier of castings in the world, after China. Metal castings are integral to virtually all U.S. manufacturing activities – especially national defense, energy and infrastructure. In the U.S., castings are used to produce 90% of all manufactured durable goods and nearly all manufacturing machinery.

The American metalcasting industry provides employment for over 200,000 men and women directly and supports thousands of other jobs indirectly. Our energy-intensive, trade-exposed industry supports a payroll of more than $9 billion and sales of more than $30.3 billion annually. Metalcasting plants are found in every state, and the industry is made of predominately small businesses, with 80% of domestic metalcasters having fewer than 100 employees.

Foundries are the mainstay of national defense. All sectors of the U.S. military are reliant on metal castings for jet fighters, ships, tanks, trucks, weapon systems and other vital operations. In fact, the U.S. Department of Defense has established formal programs to convert fabricated components to single-piece castings, improving our military's ability to cost-effectively produce such equipment in the least amount of time.

Metalcasting is one of the most energy-intensive industries in the U.S. Approximately 55% of its energy costs are consumed in melting. Mold making, core making, heat treatment, and post-cast operations also use significant energy. As such, the sector has been particularly hard hit by the regulatory overreach from EPA over the last eight years.

The American Foundry Society (AFS) is the major trade and technical association for the North American metalcasting industry. The association has more than 8,000 members representing over 2,000 metalcasting firms, their suppliers and customers. We will have about 150 owners, CEOs and executives in Washington for the Fly-In over those two days. Energy and enthusiasm among the attendees will be very high with the new Administration in place in Washington.

Thanks again for your help Stuart.

Best.

AFS Government Affairs Fly-In
June 20-21, 2017
Hyatt Regency Capitol Hill - Washington, D.C.

2017 AFS FLY-IN: THE TIME IS NOW TO WORK TOGETHER FOR CHANGE IN WASHINGTON!
Make Our Voice Heard on June 20-21, 2017

The AFS Washington, D.C. Fly-In is three great things in one: a chance to influence our lawmakers on key metalcasting issues, uniting the largest group of metalcasting advocates and the opportunity to learn about the key issues before Congress and the federal agencies that will affect your business. This annual event is your chance to communicate directly with your members of Congress on the need for action on regulatory reform, tax reform, infrastructure package and other key matters.

Check out the Fly-In program schedule on the following pages and then register today! Consider bringing several metalcasters from your state with you. A strong industry grassroots presence during this once-in-a-generation opportunity to reform regulations and boost infrastructure investment is critical to getting the job done right!

I look forward to seeing you in the Nation's Capital in June.

Brad Muller, AFS Government Affairs Chairman and Vice President Sales and Marketing, Charlotte Pipe

AGENDA as of April 5, 2017

Tuesday, June 20, 2017 **8:00 a.m. – 4:00 pm**	**Registration**
10:00 a.m. – 10:10 a.m.	**Opening Session / Welcoming Remarks** **Patricio Gil**, AFS President and CEO Blackhawk Manufacturing
General Sessions	
10:15 a.m. – 10:55 a.m.	**Outlook on Infrastructure Package in the Trump Administration and the 115th Congress** President Trump has called for a $1 trillion package to invest in the nation's infrastructure. But the devil is in the details when it comes to funding the plan and deciding what to fund. **DJ Gribbin**, Special Assistant to the President for Infrastructure Policy, White House (Invited)
11:00 a.m. – 11:55 a.m.	**Trade and Buy America Policies in the Trump Administration** President Trump has focused heavily on international trade issues such as revising NAFTA, negotiating new trade agreements, enacting import tariffs, expanding Buy America, and supporting U.S. jobs and manufacturing. Learn about the new opportunities and challenges presented by the Administration's trade actions. **Tim Brightbill**, Partner, Wiley Rein **Christopher Weld**, Partner, Wiley Rein **Scott Paul**, President, Alliance for American Manufacturing(Invited)
Noon - 12:30 p.m.	**Permit Streamlining and Reducing Regulatory Burdens for Manufacturers** The Trump administration has issued a series of executive orders and directives to reduce regulatory burdens on U.S. manufacturers. Our speaker will provide an overview of these orders, update us on the burdensome rules report to the President and what next steps will be taken. **Carter Halfman,** Special Advisor, Office of Policy and Strategic Planning, U.S. Department of Commerce (Invited)
12:35 p.m. – 2:00 p.m.	**Keynote Luncheon** **The Political Landscape in Washington** **Stephen Hayes**, Editor in Chief, The Weekly Standard and a FOX News contributor
GENERAL SESSIONS	
2:15 p.m. – 3:00 p.m.	**Workplace Safety Update: OSHA Silica Rule & Top 5 OSHA Issues Facing Foundries in 2017** Our panelists will provide an in-depth update on the status of OSHA's silica rule and pending litigation, as well as the Top 5 OSHA Issues foundries should be prepared for. **Bradford T. Hammock**, Principal, Jackson Lewis P.C.

	Tressi L. Cordaro, Principal, Jackson Lewis P.C.
3:00 p.m. – 3:30 p.m.	**Changes at EPA on Regulations - What Does it Mean for the Metalcasting Industry?** Hear the latest on the administration plans to roll back certain rules and re-open others developed under the Obama administration such as Waters of the U.S. and Clean Power Plan. **Jeff Holmstead,** Partner, Bracewell
3:30 p.m. – 4:05 p.m.	**Trump, Congress and Taxes: Is Tax Reform Here?** Learn the latest on key tax reform issues moving through Congress that will impact the metalcasting industry. **Scott McCandless**, Principal, PwC Washington National Tax Services (Invited)
4:10 p.m. – 5:00 p.m.	**Preparation for Capitol Hill Visits / State Breakout Sessions**
5:45 – 7:30 p.m.	**Metalcasting Industry Reception & Recognition Awards to Members of Congress** Join your colleagues for a Reception and Networking Opportunities Location: Capitol Hill Club – 300 First Street, SE

Wednesday, June 21 **7:30 a.m. – 9:00 a.m.**	**Breakfast Session:** **Speaker: TBD**
9:00 – 5:00 p.m.	**Metalcasting Advocacy Day** **Congressional Visits in Pre-Scheduled Meetings on Capitol Hill**

Congressional Appointments

The AFS Washington Office will be scheduling your Hill visits for Wednesday, June 21, 2017, between 9:00 a.m.-5:00 p.m. Please be sure to bring your company brochure or pictures of castings with you to your meetings. If you have any questions, contact the AFS Washington Office at 202/452-7135 or email Stephanie Salmon, ssalmon@afsinc.org

q YES, I would like AFS to schedule my congressional meetings. I understand that I **must live in OR work at a facility in the district of the member of Congress**. Other AFS constituents may be attending the meetings as well.
q NO, I do not plan to participate in the congressional meetings.

Subject: Administrator Pruitt Meeting request

Dear Administrator Pruitt:

As President and CEO of Renewable Energy Group, Inc. (REG), North America's largest producer of advanced biofuel, I respectfully request the opportunity to meet with you and members of your staff to discuss issues important to American biomass-based diesel producers.

Like you, we are eager to restore certainty to regulated industries like our own. REG is a multi-feedstock producer that currently owns and operates 11 active biomass based diesel refineries across the United States with a combined nameplate capacity of 452 million gallons. We can provide you and your team with a unique perspective on the biomass-based diesel industry and the tens of thousands of jobs it supports.

I would like to discuss items within the Renewable Fuel Standard with you including the annual Renewable Volume Obligation, biomass-based diesel imports, and point of obligation.

I appreciate your consideration in advance. Should you have any questions about this request, please feel free to contact me directly at Daniel.Oh@REGI.com or Lindsay Fitzgerald from our Corporate Affairs team at Lindsay.Fitzgerald@REGI.com.

Sincerely,
Dan

Hi Sydney,

Marathon Petroleum Corp.'s CEO, Gary Heminger, will be in town June 20-21 and is looking to meet with the Administrator. I've cc'd Mike Birsic who is a good friend and is the point person for setting this up. Mr. Heminger would like to talk about RFS and air regulations, among other things.

Mike, fill in any missing details.

Sydney, let me know if you need anything else from my end in the interim.

Best,

Mandy

Hi Sydney –

I would love to find time for a phone call between Mr. Pruitt and Tony Perkins sometime

this week or next. With Congress out for the Easter recess, things are a lot more quiet and flexible on our end. For the most part, Tony could be available for a call anytime each day, with the exception of 4:00 – 6:00 pm ET when he is preparing for and hosting his daily radio program.

As I mentioned to John, the topic of this call would be to discuss pulling together a small group of key business leaders around the country who are very excited about Administrator Pruitt's new leadership role.

Appreciate you sending me some times you think this call could take place in the next week or so.

Subject: Request for phone call today with Tony Perkins

Hi John –

Thank you for taking my call. Tony Perkins is hoping to speak with Mr. Pruitt today about a couple things:

1. We would love for him to stop by The Willard tomorrow anytime between 9:00 – 10:30 am to speak to 200 of our key supporters. This is basically the equivalent of a stakeholders meeting where we report to our major donors on FRC's impact over the last year and what we have planned for the future. We believe this crowd, many of them business owners, would be interested to hear from Mr. Pruitt on the important and necessary changes he is bringing to the EPA.

2. This is not as urgent, but he wanted to start the discussion about pulling together a small meeting of key business owners and Mr. Pruitt. This came out of a meeting Tony had a few weeks ago in California with some of our major supporters.

Tony's cell is Personal Phone/Ex. 6 If he doesn't answer, it's because he is on stage at this event, but he will call right back.

Thank you very much for passing along this request!

Hi Gay,

Thank you for the information! Could we do 45 minutes with a 9:30AM start time, please? I am looping in Cheryl who can send you all of the logistical details on the location and arrival. Please feel free to reach out to me at any time with questions!

Thank you!

Dear Sydney,
On behalf of Roy Bailey and RJ Kirk I am writing to set the appointment for Thursday the 11th. I was able to move some appointments around and they are available the morning of Thursday, May 11th. May we please have an hour appointment? Would 9:30 or 10:00 am start time work best for this appointment? You may call me to discuss or email me back. Once we have a set time I will need an address and any special directions to enter the building, etc. The appointment will be with RJ Kirk, Bob Walsh and Roy Bailey.
I look forward to hearing from you.
Sincerely,
Gay Ludwick

Sydney,

That's wonderful news and thank you so much. I have cc'd my asst Gay so she can help coordinate the meeting. RJ Kirk's exec asst Curtis is also cc'd.

I think we have a meeting at Dept of Energy at 10am on Thurs May 11. Could we possibly do it a bit earlier or later on Thursday ? We are available Wednesday as well.

I greatly appreciate it and look forward to seeing you all.

Best regards

Subject: RE: Meeting request from IPAA

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on today at 1:45 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Sydney

Yes...3:30 pm on Tuesday May 16th works great for us.

And our CEO of Republic Services, Don Slager, will be participating in the meeting as well.

When do you need the names of the remaining participants on our end? And do you need any additional information from us before the meeting?

Really appreciate the flexibility on the scheduling and getting us on the calendar.

Malloy

Checking back on the potential for the Republic Services meeting with Administrator Pruitt. Is May 16th even a possibility or do we need to stick with the Friday May 19th time slot of 9:30 am you sent earlier.

Thanks and I appreciate you taking the time to help us out here.

Would you shoot me if I asked for availability for Tuesday May 16th? On the 16th I have a better chance of getting the executive team and the CEO in town for the meeting.

My apologies as the Republic team in Phoenix just made me aware of this change.

I just tried to call you to ask a quick question on the number you have listed below but didn't get an answer. Is there a better number to call you? My number is 202-368-4323.

Attached is the form I have filled out today.

I wanted to let you know to do the meeting the week of May 1st we will need to send in the Executive team which are listed on the request form. The team is well versed on the issues facing republic and will be able to provide in detail to the Administrator the issues facing Republic Services.

Thanks and let me know what more information you need from me.

Ryan

Hope you are well.

I wanted to email you to request a meeting with Administrator Pruitt with the CEO of Republic Services, Dan Slager. As you know Republic Services is the second largest waste company in the country.

Purpose of the meeting will be to update Mr. Pruitt on the issues we are dealing with at Republic and the issues surrounding the West Lake Landfill in Missouri.

I am happy to work with your staff to set up a meeting in the coming weeks or month.

Thanks and let me know what else you need from us.

Cc: Hupp, Sydney <hupp.sydney@epa.gov>; David Schwietert <DSchwietert@autoalliance.org>
Subject: RE: Meeting Next Week

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, April 27 at 11:45 am. The instructions/directions to EPA is below and if you have any questions please contact me. As stated earlier, send the list by COB tomorrow (Tuesday, April 25th) to get to security. You asked by the shuttle bus parking, we don't have designated parking around our agency however there are places buses uses around the Smithsonian area they may be able to hold until meeting is over. But feel free to give my contact number if you need for me to speak with them directly. If the company is familiar with the area the driver might be knowledgeable on where to sit for the 30-45 minutes. Look forward to seeing you all.

Directions

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

> Thanks Sydney. I appreciated your call.

I've copied Sheila James here at the Alliance who can also assist with the list of attendees for our meeting with the Administrator next Thursday at 11:45-12:15 pm

My initial estimate is that with 12 member companies being represented, we'll likely have just under 30 folks coming over for the meeting. Cheryl, can you tell us when you need the list by?

We wrap up our meeting with Secretary Chao at DOT shortly after 11:00 so that will give us enough time to commute to EPA HQ.

I appreciate you flagging my follow up e-mail/call to Ryan.

>
> One small wrinkle…we had someone else (literally just 15 minutes ago) accept the 3:30pm time slot. Is there any way possible that Administrator Pruitt could come meet with us at 4:30pm at the Grand Hyatt OR we could come meet him in his office at 5:00pm at the EPA? If neither of these times work, please let me know and we will do our best to move the other meeting.

Thanks again and happy to chat on the phone if that's easier.

Best,

Autumn

Sydney,

Please find the attached completed meeting request form. We have some flexibility in scheduling for May 9th and 10th so if none of the times suggested work for the Administrator, let me know and hopefully we can find a time that will better suit his schedule. I've also attached a list of anticipated meeting participants. Don't hesitate to call me if you have any questions.

Thanks again for considering our request.

Best,

Autumn

Dear Sydney,

Your colleague, Cheryl Woodward, responded to my voicemail and suggested that you would be able to help me with this request for a meeting at EPA.

Please see the information set forth below.

If you have questions or require additional information, I would be happy to provide this.

Thank you for your consideration in this matter.

Regards,

Nancy

To: <pruitt.scott@epa.gov>
Subject: WISE Intern Visit to EPA

Dear Administrator Pruitt,

I am contacting your office about a summer visit to EPA for the WISE interns: http://www.wise-intern.org

During their 6 week stay in DC, I serve as their Faculty Mentor. My WISE interns come here from a

variety of universities throughout the USA to learn about science policy and during the 6-week program, they are funded and sponsored by various national standards organizations, such as AIChE, ASTM, ANS, ASHRAE, IEEE, etc. This year there are 10 of them, all with varied backgrounds but all interested in science and technology policy, e.g. renewable energy generation, energy storage, sustainable energy, clean technology, medical imaging, water quality, high level waste disposal, international development etc.

Their main objective is to write a research paper that provides an up-to-date analysis of a current issue in public policy which centers around scientific or technological developments. During their stay, they act as essentially investigative reporters, trying to collect information from as many people and places as possible.

My request to you or whomever is the appropriate contact at EPA, is to arrange a meeting with the Administrator or other leadership and the interns to tell them about the EPA mission, what you do and perhaps give them a tour so they become acquainted with how the work at EPA on science and technology intersects with public policy.

I am suggesting a meeting some morning in June after June 8, 2017, but I am willing to work with you to find a good date/time during their stay here. I may be reached by e-mail or at the phone number below. If you have questions or require additional information, please let me know. Thank you for your consideration.

Best regards,

Nancy McNabb, AIA

Hi Sydney and Michelle,

Thanks so much for organizing the meeting for us 'aggies' last week with the Administrator. Our ag groups are part of a larger coalition that represents just about every facet of the economy. Owen McDonough, cc'd here, represents the Home Builders which is one of the major groups that are part of the coalition. I'm reaching out to you now to coordinate a meeting with the coalition and the Administrator. I'll wait to hear back from you on next steps. Happy to chat by phone, if that's easier. Thanks in advance.

Subject: RE: 4:30 mtg w/ Byron

We're all here in DC. Sometime this month would be perfect, the sooner the better really. We have our legislative fly-in starting on March 28 (with Mr. Pruitt speaking to our cattle producers on March 30) so it would be optimal for this meeting to happen before March 28. Thanks in advance for your effort on this. Happy to discuss further by phone if that's helpful. 202 347

0228.

Hi Scott,

Great to meet you via email! I'm going to try to find you all a time slot in March to reschedule. Is your whole team in DC or do I need to allow a little bit of time for people to make travel arrangements?

Thank you!

Sydney

Hi again Michelle, I just wanted to touch base regarding a reschedule for our full group to meet with Administrator Pruitt. A sub-set of us were able to meet with Byron on Monday because the administrator was pulled away to a cabinet level meeting. Our full group looks forward to meeting with the administrator as soon as that can be rescheduled. Please let me know if you need anything further from me.

Subject: RE: Request for introductory meeting with Administrator Pruitt on behalf of GE

Ann wears many hats at GE. However, for this meeting she'd like to introduce herself in her role as Vice President of Environmental Health & Safety, discuss GE's leading EHS program, and her interest in furthering GE's collaboration with EPA. Roger Martella is our Environmental Health & Safety General Counsel and will be accompanying her.

Would you kindly tell me the location of this meeting and I'll send out the invitation.

Thanks again for such a fast response!

His other dup reservation Ex. 6 - Personal Privacy should be cancelled asap by your office with Delta directly, (before boarding time)

We are very busy at the airport,… yesterday's afternoon and today since morning I've spending time to work on seats assignment, coordinated seats for Mr Pruitt to seat next or close by Personal Security Detail/Ex. 6/Ex. 7C/Ex. 7E/Ex. 7F Personal Security Detail/Ex. 6/Ex. 7C/Ex. 7E/Ex. 7F and monitor for better seat. It ended up to be "double work"!.

It's good that Mr Pruitt's assistance could work out better seats for him, then for the future just notify us of his travel for departure day's LEO form, meet and greet and pre-board at DCA.

Thanks,

Christina

From: Woodward, Cheryl
Sent: Mon 5/1/2017 2:34:20 PM
Subject: RE: Meeting request from IPAA

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on today at 1:45 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators and then do a small U-Turn to the right heading toward 12th street, the North Lobby entrance is directly and immediately to your left (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street and the Federal Triangle Metro sign can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Thanks for trying to make those work, Sydney.

While I have you looking, could you check on two other dates in June:

- The Global CEO for Mosaic, Joc O'Rourke is requesting to meet with Pruitt for 15-20 min on June 20th. He is only in county & DC that day. Mosaic is involved in a number of industries, but phosphate and potash production are the primary industries they are involved in here in the U.S.

-The American Foundry Society (AFS) Fly-in is on June 21st (or 20th.) Their specialty is "Metalcasting". They're asking for Administrator Pruitt to speak at their Leadership Breakfast on 21 June. If June 21st doesn't work, they can make June 20th work.

Thank you for letting me bother you with these; talk to you soon.

I appreciate you, AJF

Subject: RE: Meeting request (as discussed)

Hi AJ,

Sorry for the delay!! Vinyl I couldn't get the Administrator or Ryan in on due to travel but our head of policy, Samantha Dravis, said she would happily serve as a proxy. For OIPA, he will be headed for Italy beginning of June so is unavailable. So sorry!

Subject: Meeting request (as discussed)

Sydney:

Thanks for the note yesterday. As mentioned, the Vinyl Institute is holding it's annual fly-in meeting in May. A request for Ryan Jackson to speak to the group on May 17th was previously forwarded by the organization.

This request is for the Executive Committee of the Vinyl Institute to meet for 15 minutes with the Administrator the day before the fly-in, on May 16th at any point during that day the Administrator is available.

The executive committee represents four large chemical companies that produce products such as PVC. Names that would likely be in attendance would include:

Bob Buesinger, Senior Vice President – Vinyls, Westlake Chemical, Houston, TX

Grant Evans, Vice President and General Manager – Vinyls, Occidental Chemical Corporation, Dallas, TX

Dick Heinle, Senior VP/General Manager – Vinyls, Formosa Plastics, Livingston, NJ

Dick Mason, Corporate Secretary, Shintech Inc., Houston, TX

Dick Doyle, President and CEO, Vinyl Institute, Washington, DC

Rich Krock, Vice President Regulatory and Technical Affairs, Vinyl Institute, Washington, DC

JC Walker, Partner, Keller & Heckman, Washington, DC

Should you have any additional questions about this you know where to find me.

Also, when I met with the Administrator a couple of weeks ago an invitation was extended to speak to the Oklahoma Independent Petroleum Association (OIPA) Annual Conference during the weekend of June 3-4 at any time he would be available. The conference is in Las Colinas, TX (Dallas metro area.) He seemed interested, but non-committal. Let me know if this is something he would be interested in doing.

Call me with any questions, Sydney. I appreciate you, A.J. Ferate

EPA Administrator Pruitt Speaker Request Form Mid Year.docx

Hi Sydney,

Sorry for the delay. Please find attached the Speaker Request Form for Administrator Pruitt to address NAHB's Board of Directors on Thursday, June 15. We are hopeful that his schedule will permit his participation. Please contact me at your convenience to further discuss.

Thanks much!

Hi Susan,

Thank you for your email! So on the Mid-Year meeting, would you mind filling out the attached form so that we may discuss in scheduling? And as for the senior executives being in town next week, we actually just had a meeting cancelled at 3PM on the 29th. Is it still possible for your senior officers to meet with him then? It would be from 3:00-3:30 and I would request their

names and topic of the meeting. Hoping this still works on your end!

Thank you!

Sydney

Subject: NAHB Meeting w Administrator Pruitt

Hi Sydney!

Thanks for the call today. The National Association of Home Builders is very interested in having EPA Administrator Pruitt speak before a larger group of our members. In an effort to accommodate his schedule, we are willing to create a special meeting during our Mid-Year Meeting if the Administrator is available. The timing for the meeting would be Thursday, June 15 at a time that is convenient between 12:30 and 2:30 at the Marriott Wardman Park, 2660 Woodley Road, NW, Washington, DC. We would have an audience of approximately 700 members who are interested in hearing about Administrator Pruitt's vision for the agency, how the agency will address some of the high priority issues, and steps that may be taken to improve the regulatory environment for the Nation's home builders. We would also like to reserve some time for questions, if allowed.

Our Senior Officers would also like to meet privately with Administrator Pruitt. They will be in town and available for a quick visit next week, if a meeting on such short notice is possible. They could be available Wednesday, March 29, between 3 – 5 pm or Thursday, March 30, between 8 am – 12 pm. They could also be available for a meeting on Wednesday, June 14 or before or after the address to the members on June 15, if that schedule works.

Please take another look at the calendar and let me know what might be possible. I look forward to working with you and the Administrator in the future.

Thanks for your assistance!

Earl,

I am copying Sydney Hupp on this email. She works in Administrator Scott Pruitt's office at the EPA. She was recently very helpful in setting up a meeting with Mr. Pruitt and is in a better position than I am when it comes to Scott Pruitt's availability to speak to the National Association of Home Builders this summer. I have also provided her work number below.

Sydney,

First, thank you for your help last week on setting up that other meeting. Second, I spoke to my local homebuilders the other day and was bragging on Scott. They are eager to meet him if his schedule permits. Please see Mr. McLeod's email below for details. I hope this helps.

Alan-

It was great to see you last night at the HBA of South Carolina Board of Directors meeting and the Bird Supper. Your remarks were well received and appreciated.

Pursuant to our conversation, please extend an invitation to EPA Administrator Scott Pruitt to speak at our lunch meeting during our National Association of Home Builders (NAHB) Legislative Conference on Wednesday, June 14, 2017. The meeting will be held in Emerson Hall of the Library of Congress, Washington DC beginning at 12:15 p.m. We expect 30 members of the Building Industry Association of Central South Carolina to be in attendance including our state leadership and representatives of NAHB.

Of course, we would be honored if you could join us as well.

Thank you for your assistance in this regard.

Subject: RE: Reconfirming AF&PA Meeting at EPA on Thursday, May 4 at 1:00 PM

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 4 at 1:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and

Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Dear Cheryl,

I am writing to reconfirm our group's meeting at EPA this Thursday, May 4 at 1:00 PM.

Just to clarify – as I have hired a car service for our group – in your instructions below, the South Lobby is mentioned in bold in the directions; is it the North Lobby

or the South Lobby where they should enter? Some of our folks were confused when I stipulated the South Lobby, as they have had meetings there earlier this week, and they used the North Lobby – so they asked me to verify.

•□□□□□□□ I currently have the instructions/directions for the group as: EPA, 1200 Pennsylvania Avenue, NW, William Jefferson Clinton Building, South Lobby / Tell Security that our group was instructed to all Cheryl Woodward at 202-564-1271 or Michelle Hale at 202-564-1430 to escort our group to the meeting

•□□□□□□□ And for the car service/driver as: EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues.

Please let me know if both sets of directions/instructions are correct.

Our group is looking forward to the meeting on Thursday afternoon.

Many thanks, Brooke

Subject: Two AF&PA Meeting Requests

Dear Amy Dewey,

As we discussed, AF&PA has requested two meetings with EPA. The first is a request for AF&PA's President and CEO and several of our member CEOs to meet with Administrator Pruitt on May 4th (see attached meeting request). To assist with scheduling that meeting, I have copied Sydney Hupp and Michelle Hale, as you suggested. I appreciate any help you can provide on scheduling this meeting.

The second is request for AF&PA staff to meet with Mandy Gunasekara and other key EPA staff to discuss our comments filed in response to the Department of Commerce Request for Information and to prepare for the meeting with Administrator Pruitt (see meeting request below). It is my understanding that Ms. Gunasekara has already facilitated the scheduling of that meeting. Thanks again for all your help.

Dear Amy Graham,

Thank you for your recent introductory message. We look forward to working with you on these and other issues. Jerry Schwartz

Subject: Meeting Request

Dear Ms. Gunasekara:

We are writing to request a meeting with you and your colleagues to discuss a number of EPA regulations and permit requirements that we have identified as adversely affecting our member's manufacturing operations. On March 31, AF&PA filed comments in response to the Department of Commerce's Request for Information pursuant to the President's January 24 directive, and our comments discuss problems and proposed solutions related to 77 distinct rules and permit issues impeding U.S. manufacturing. Most of the comments focus on EPA issues.

AF&PA President and CEO Donna Harman has requested a meeting with Administrator Pruitt on behalf of several of our CEOs on May 4th, and we believe that meeting with you and other key EPA staff in advance of that meeting would enable the Administrator to be well-briefed and ensure the meeting is as productive as possible. As the issues we would like to discuss span a number of EPA offices, we have copied several of your colleagues on this message. We will facilitate your busy schedule, but the dates of April 18-21 look good for us.

Top priority issues we would like to discuss include:

1. Carbon Neutrality of Biomass

2. Air Permit Gridlock

3. Human Health Water Quality Criteria

4. EPA Procurement Guidelines for Paper and Paper Products Containing Recovered Materials/Specifications, Labels and Standards

AF&PA represents U.S. manufacturers of pulp, paper, packaging, tissue and wood products. Our industry employs 900,000 hard working men and women, and our mills often are located in small, rural communities that need good-paying jobs. The U.S. forest products industry is very heavily regulated, but at the same time also must operate efficiently in a fiercely competitive global market.

We look forward to hearing from you soon and to discussing these important issues. Thank you for your consideration.

Best regards,

Paul Noe

Good morning Russell,

Thank you for reaching back out! We will be looking at 4th quarter travel as we edge more into summer. Would it be okay if we reach back out after we've had some time to get through May? In the interim, would you mind filling out the speaker request form? Please let me know if you have any questions!

Thank you!

Importance: High

Mr. Pruitt,

On behalf of POWER-GEN International and PennWell Corporation, I would like to invite you to be a keynote speaker at POWER-GEN International 2017, the world's largest annual forum for the power sector. We're expecting more than 20,000 power professionals to attend. Nearly 4,000 are expected to attend the keynote session on Tuesday Dec. 5 in Las Vegas, Nevada.

As EPA Administrator, your perspective on the power generation market is important to our attendees. POWER-GEN would be an excellent place to share your vision with the rest of the industry as power producers face tremendous pressure to craft comprehensive strategies to comply with a host of new and pending environmental standards. Your plan to restore balance between the economic concerns and environmental concerns of power generation is a topic of great interest for the industry. POWER-GEN would be the perfect forum to convey your ideas about the EPA's role in regulating the construction, maintenance and operation of power plants in the U.S. Nearly 40 percent of POWER-GEN's attendees are power generators (IOUs, IPPs, electric co-ops and municipal utilities).

Keynote presentations are typically 15 to 20 minutes with slides. You would be joined by four other high-ranking executives. **The keynote session begins at 9:30 a.m. Tuesday Dec. 5.** A rehearsal will be held Monday Dec. 4 around 3 p.m.

To see last year's keynote session, click here: http://bit.ly/2has7fQ. Also, here's the link to the POWER-GEN International website: www.power-gen.com.

We would be proud and honored by your participation. Please let me know if you would like to participate in the keynote session by April 17. If you have any questions, don't hesitate to contact me. I hope to hear from you soon.

Thank you for your time.

Sincerely,

Russell Ray

ADMINISTRATOR PRUITT SPEAKER REQUEST FORM
U.S. Environmental Protection Agency

Deadline for Acceptance:	Please let us know by June 1
Event Title:	POWER-GEN International 2017
Speech Date:	Dec. 5, 2017
Is the Above Date Flexible:	No
Speech Time & Duration:	Keynote begins at 9:30 a.m. – Presentation should be 15 minutes
Speaker Requested:	Administrator Scott Pruitt
Would You Consider a Surrogate:	Yes
Event Location:	Las Vegas, Nevada, Convention Center 3150 Paradise Road, Las Vegas, Nev., 89109 702-892-0711 TBD
Open Press/Closed Press:	TBD
Is Event Webcast/Recorded/Transcribed:	Yes - Video
Purpose of the Event:	POWER-GEN International is the world's largest gathering of power professionals. The purpose is to share ideas about the latest trends in power generation. About 20,000 power professionals are expected.
Speech Topic:	EPA's role in regulating the construction, maintenance and operation of power plants
Requested Presentation Format:	15 minute keynote speech (with some slides preferably)
Dress Code:	Business
Speech/Presentation Duration:	15 minutes
Teleprompter Available:	Yes
Microphone / Room Setup:	TBD
Event Sponsor:	TBD
Relationship to the EPA:	None
Event Agenda/Program:	Dec. 5-7 http://www.power-gen.com/conference.html
Honorable Guests Attending:	Other keynote speakers will include Paul Browning, CEO of Mitsubishi Hitachi Power Systems Americas, and Blake Moret, CEO of Rockwell Automation. We expect to confirm a keynote speaker from a major utility, perhaps Tom Fanning of Southern and Mauricio Gutierrez of NRG Energy

ADMINISTRATOR PRUITT SPEAKER REQUEST FORM
U.S. Environmental Protection Agency

Notable Federal, State or Local Appointed or Elected officials attending:	TBD
Individual Introducing Administrator:	Russell Ray, Chief Editor, Power Engineering, Chairman, POWER-GEN International
Person to contact for speechwriting purposes:	Russell Ray, russellr@pennwell.com, 918-832-9368, 918-938-1435
Person to contact for media purposes:	Russell Ray, russellr@pennwell.com, 918-832-9368, 918-938-1435
Origin of Invitation:	Russell Ray, russellr@pennwell.com, 918-832-9368, 918-938-1435
Day of Event Point of Contact:	Jan Simpson, Conference Manager, jsimpson@pennwell.com, 918-230-6656
Security Contact:	Jan Simpson, Conference Manager, jsimpson@pennwell.com, 918-230-6656

Is the organization or host of the event a registered 501(c)(3), (4), or has a 527 Political Action Committee (PAC):	**no**
Will there be a presentation of a "gift" to the Administrator?	**no**
If so, what is the US currency value of the gift?	
Will a meal be provided, if so what is the US currency value?	**no**

Please return this form completed to scheduling@epa.gov and Sydney Hupp (hupp.sydney@epa.gov).

Sydney: I was referred to you by Judd in Sen Moran's office, he's included in this email! Below is a scheduling request for your consideration!

June 13, 2017

The Honorable Scott Pruitt

Administrator

Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, DC 20460

Dear Administrator Pruitt:

I write today on behalf of the American Council of Independent Laboratories (ACIL) requesting a meeting with your Department to discuss the Clean Water Act Analytical Methods "Method Update Rule (MUR) - 2016" for your Agency's "Guidelines Establishing Test Procedures for the Analysis of Pollutants" (40 CFR 136) in the Federal Register. The MUR was signed by your Agency's former Administrator McCarthy on December 16, 2016. The ACIL, an association representing independent commercial scientific and engineering firms with over 1,000 facilities across the U.S. engage in testing, product certification, consulting, and research and development to enhance public health and safety, fully supports the immediate publication of the 2016 MUR by your Agency.

The method updates included in the 2016 MUR were designed to improve flexibility, update older methods, and allow laboratories to utilize newer technology when conducting compliance monitoring testing. The 2016 MUR approves method revisions and updates that result in improveddata quality, approves new analytical methods, and changes the procedure for the determination of the Method Detection Limit (MDL). These revisions provide improved analytical test procedures to the regulated community, improve the produced data quality and operational efficiency for testing laboratories performing analysis per your Agency's regulatory methods, and address issues related to calculating the detection limit that will better account for intra-laboratory variability.

The proposed rule, when published for stakeholder review in 2016,received a very positive response from all sectors of the community.

The method updated and additions included in the 2016 MUR are extremely important as they will increase laboratory productivity and reduce testing cost to the regulated community.

Thank you for your time and attention regarding this meeting request on behalf of ACIL and I look forward to your response to it. Please do not hesitate to call upon me.

Sincerely,

Hi Sydney and Michelle,

Thanks so much for organizing the meeting for us 'aggies' last week with the Administrator. Our ag groups are part of a larger coalition that represents just about every facet of the economy. Owen McDonough, cc'd here, represents the Home Builders which is one of the major groups that are part of the coalition. I'm reaching out to you now to coordinate a meeting with the coalition and the Administrator. I'll wait to hear back from you on next steps. Happy to chat by phone, if that's easier. Thanks in advance.

Good morning Sydney & Cheryl,

Terrific – the 1:30 PM time is confirmed on our team's end here at AF&PA!

Cheryl, thanks also for reconfirming the South Lobby is best, and for the updated directions and entrance instructions!

Have a great day ladies!

All the best,

Brooke

My name is Cheryl Woodward and I will assist you in the logistics for your meeting at EPA on Thursday, May 4 at 1:30 pm. The instructions/directions to EPA is below and if you have any questions please contact me. Look forward to seeing you all.

Directions: If you come by Metro, the Federal Triangle metro stop is directly below the building entrances. You would leave the metro station and go up all three sets of escalators from the train otherwise two escalators then do a small U-Turn to the right heading toward 12th street, the South Lobby entrance is directly and immediately to your right (Glass Doors -EPA Signified on Glass).

EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues. It is almost exactly half way between the two avenues on 12th street with Federal Triangle Metro sign and Trump Hotel Towers side entrance can be used as a landmark. From 12th Street, facing the building with the EPA and American flags, walk toward the building (under the flags) and take the glass door on your left hand side with the escalators going down to the metro on your left. This again will be the **South Lobby of the William Jefferson Clinton building.**

Once inside the building, security will prompt you to scan all items such as bags, coats etc., and then let the guards know that you were instructed to call Cheryl Woodward at 564-1274 or Michelle Hale at 564-1430 to escort you to the meeting with the Administrator. Security will make temporary cards for everyone. Allow for 15 minutes to get through the process.

Dear Cheryl,

I am writing to reconfirm our group's meeting at EPA this Thursday, May 4 at 1:00 PM.

Just to clarify – as I have hired a car service for our group – in your instructions below, the South Lobby is mentioned in bold in the directions; is it the North Lobby or the South Lobby where they should enter? Some of our folks were confused when I stipulated the South Lobby, as they have had meetings there earlier this week, and they used the North Lobby – so they asked me to verify.

•□□□□□□□ I currently have the instructions/directions for the group as: EPA, 1200

Pennsylvania Avenue, NW, William Jefferson Clinton Building, South Lobby / Tell Security that our group was instructed to all Cheryl Woodward at 202-564-1271 or Michelle Hale at 202-564-1430 to escort our group to the meeting

•□□□□□□□ And for the car service/driver as: EPA address is 1200 Pennsylvania Avenue, NW. If you are coming by taxi/vehicle, you want to be dropped off on 12th NW, which is between 12th and Constitution Avenues.

Please let me know if both sets of directions/instructions are correct.

Our group is looking forward to the meeting on Thursday afternoon.

Many thanks, Brooke

Subject: Two AF&PA Meeting Requests

Dear Amy Dewey,

As we discussed, AF&PA has requested two meetings with EPA. The first is a request for AF&PA's President and CEO and several of our member CEOs to meet with Administrator Pruitt on May 4th (see attached meeting request). To assist with scheduling that meeting, I have copied Sydney Hupp and Michelle Hale, as you suggested. I appreciate any help you can provide on scheduling this meeting.

The second is request for AF&PA staff to meet with Mandy Gunasekara and other key EPA staff to discuss our comments filed in response to the Department of Commerce Request for Information and to prepare for the meeting with Administrator Pruitt (see meeting request below). It is my understanding that Ms. Gunasekara has already facilitated the scheduling of that meeting. Thanks again for all your help.

Dear Amy Graham,

Thank you for your recent introductory message. We look forward to working with you on these and other issues. Jerry Schwartz

Subject: Meeting Request

Dear Ms. Gunasekara:

We are writing to request a meeting with you and your colleagues to discuss a number of EPA regulations and permit requirements that we have identified as adversely affecting our member's manufacturing operations. On March 31, AF&PA filed comments in response to the Department of Commerce's Request for Information pursuant to the President's January 24 directive, and our comments discuss problems and proposed solutions related to 77 distinct rules and permit issues impeding U.S. manufacturing. Most of the comments focus on EPA issues.

AF&PA President and CEO Donna Harman has requested a meeting with Administrator Pruitt on behalf of several of our CEOs on May 4th, and we believe that meeting with you and other key EPA staff in advance of that meeting would enable the Administrator to be well-briefed and ensure the meeting is as productive as possible. As the issues we would like to discuss span a number of EPA offices, we have copied several of your colleagues on this message. We will facilitate your busy schedule, but the dates of April 18-21 look good for us.

Top priority issues we would like to discuss include:

1. Carbon Neutrality of Biomass

2. Air Permit Gridlock

3. Human Health Water Quality Criteria

4. EPA Procurement Guidelines for Paper and Paper Products Containing Recovered Materials/Specifications, Labels and Standards

AF&PA represents U.S. manufacturers of pulp, paper, packaging, tissue and wood products. Our industry employs 900,000 hard working men and women, and our mills often are located in small, rural communities that need good-paying jobs. The U.S. forest products industry is very heavily regulated, but at the same time also must operate efficiently in a fiercely competitive global market.

We look forward to hearing from you soon and to discussing these important issues. Thank you for your consideration.

Best regards,

Paul Noe

Subject: Wynn, thanks for your help. I have sent the whole spiel in case you need to send this to someone who does not know Mr. Catsimatidis.

John Catsimatidis is a businessman here in New York City and he also has the #1 radio program which airs Sunday mornings in New York, Washington DC, Philadelphia and Boston area. CatsRoundtable.com (https://en.wikipedia.org/wiki/John_Catsimatidis)

The program is taped during the week. The interview is taped over the phone and takes between 8- 10 minutes. We would very much like to have the Director Pruitt on for a few minutes this week. Anytime the Director has a few minutes I will make it work. Talk about anything he would like. Most recently coal.

Mr. Catsimatidis and Director Pruitt are well known to each other.

We have the top guests in the Country. (see below)

Please let me know if this would be possible and I will work out the all details at your convenience.

Hope to hear from you.

5-1 Honors Event Save the Date.pdf

Hi Sydney,
We have developed a save the date for the September event and I wanted to share it with you before we sent it out. Please let me know if we need to make any changes to how the Administrator is listed.

Thanks so much,
Libby

Hi Libby,

Good to meet you via email. Thank you for the information. I will be back in touch!

Best,
Sydney

Hi Sydney,
We haven't finalized the actual award yet, but it's usually a globe with his name engraved and it will not be a sit-down dinner, just a reception with passed appetizers. If you have any other questions, just let me know.

Thanks!
Libby
