Society of Toxicology Merit Award.pdf
Kavlock CV 2017.pdf

Ron –

Here's what I sent out. I know I'm missing key people but hoping those on this email will fill it in more.

Rusty will be the first letter, and George Daston has agreed to do the second letter, so now just looking for additional support. I didn't want to put you on the spot given your upcoming role in SOT, but if you'd like to also write a letter that would be great.

Thanks again for your help!

Maureen

Subject: SOT Merit Award Nomination for Bob Kavlock

Dear Current and Former Friends, Colleagues, Associates, and Collaborators of Bob,

As many of you know, Bob will be retiring later this year and the field of toxicology will be losing one of its most innovative and influential thinkers. For many of us, Bob has not only had a significant impact on our careers, but is also a friend. In light of this impact, I would like to nominate him for the 2018 SOT Merit Award. I have worked closely with Bob for just the past few years, and would like this nomination to reflect the full breadth and depth of his career and his impact on the field by including as many of letters of support as possible. With this in mind, I am reaching out to ask each of you to write a letter nominating Bob for the award and send it to me by October 7. These letters will then be compiled and submitted together as a single package to the SOT Awards Committee before the October 9 deadline. I apologize for this short timeframe, as I know most of you have very busy schedules. If this timeframe is not possible, I am also planning to compile these letters of support in a book to give to Bob as a retirement gift, and will include any letters received by October 14.

According to the SOT website, the letter should contain "documentation and description of career highlights for the nominee and his or her significant contributions to toxicology". Details about the award and Bob's CV are attached. You can also visit SOT's website at https://www.toxicology.org/awards/sot/awards.aspx?AwardID=22. I would encourage each of you to describe your views on his contributions to toxicology, but also to include personal anecdotes on your scientific collaborations together or how he may have impacted your career.

Please share this request with anyone you think would be interested in joining in this effort to nominate Bob for this award.

Thank you,

Maureen
