32
Other ~~cu#3/4~~
4 29 87
6737

1 Bill will be out all next week, but available later in May
He is not real familiar with Boxter Springs, but would be willing to help
He suggests we get together with Elmo Burl - Mayor because he is very familiar with the area Howard Truster, Water Superintendant, is also a good contact

As soon as our field schedule is more definite I will contact Bill and we can set up a field tour

2 Rex Heate, KDHE Chanute is in Water Protection Group He is the one most aware of sampling the deep well at Chemical plant. I talked with Rex and he said we could get data they have if we are interested.
I can contact ALLCO - Mike Chapman 316-783-1321
Thermix Energy - Gary Eck 316-783-1363

I told Rex we would be sampling only for inorganics We would let the firms know we were NOT interested in organics.
Rex said the plant should be using water only for industrial purposes, not for human consumption

I told Rex I would contact KDHE after we sample, to keep them informed of our work
