0600 STM R. Schuler cleaves office

0760 Arrive at office trailer in Herculane

0730 STM Reno Arrives on site, Today's weather will be nice, High's in the mid 80's. Activities today will include:

1. Oversight of ATC (Sampling out to 1.5 miles)
2. oversight of ER (Excavation)
3. Prepare and package samples for shipment to LAB (AML)
4. Load Hi-Vols
5. Clean Trailer

0800 - Schuler begins calibration of Niton and it is determined that the unit needs to be sent in for ~~calibration~~ RCS a repair. The unit will not recognize the Cd109 source, Schuler calls Niton and they suggest that one of the sensors (The Hull Sensor) is out. - START will be without a Niton today. The other Niton U945-A05213 is waiting to be returned from Niton. No PO was issued.

0805. Schuler notifies OSC Silver who will not be onsight today

8/30/02 HLS. TO-27

0815 Rano goes w/ ATC's Jay to provide oversight of sampling activity; Schuler deals w/ Nitra issues.

0900 STM Schuler ~~[illegible]~~ calls Cliff Asberry of Doe Run to get weather Ave for 8/28/02, Anything weather can is currently not responding. DR's weather Data comes from the River Met, Along the Mississippi River

0930 Schuler out to provide oversight of Exc/Backfilling Activity

0937 - Backfilling at 561 Reservoir, Rocky Driveway and in front of Shed in back 558 Reservoir is now seeded and strawed. 491 Long - backfilling - final grading 434 Hill - Backfilling 436 Hill - final Grading 455 Hill - Backfilling 423 Thurwell - backfilling 361 Mott - Seeded - Ready for Straw. The Lady may want more soil to East of House

1000 Back to trailer, Schuler answers some ?'s that OSC Silver has.

8-30-02 Herculaneum Lead Smelter TO-27

1030 STM Reno back to trailer - Reno & Schuler will fill out COC's and package samples for shipment to LAB.

1200-1230 Lunch

1300 - Reno finishes AIRBILL

~~1330~~ 1350 STM Schuler leaves site, End of Day on site

1400 STM Reno leaves trailer to setup Hi Vols and Check on site activities

1510 Return to trailer. Gravel work is being done at 561 Reservoir. Backfilling and grading is being done on Hill St. (434, 436, & 455 Hill). 361 Mott has been graded and appears to have been seeded (no straw yet). Did not see any activity at 491 Long.

1515 Reno leaves site. End of the day.
