122702 Herculaneum Lead Smelter TO-27

0740 Beno arrives on site. Todays weather is cloudy with light flurries in the morning w/highs in the mid 30's. Todays activities include: ① collect and setup Hi-Vols to run Sunday 12-29-02, ② perform maintenance on laptop, ③ prep samples for shipment.

0800 Drive around site to check road conditions. Street sample locations are still either wet or have snow on them. Unable to sample today.

0830 Beno call Rusty Keller w/ Doe Run to inform him there will be no street sampling today. C Asbery will be back in on Monday.

0845 Download weather data for Hi-Vol calculations. The laptop is locking up every now and then. Also the laptop has popped up that there is a fatal error several times the last couple of days. Beno begins to run maintenance on laptop

1000 Collect Hi-Vols.

1025 Run calculations for Hi-Vols. Prep Hi-Vols for shipment

1115 Load Hi-Vol cartridges. Beno leaves trailer to load monitors to run Sunday 12-29-02.

1200 Leave trailer to drop off (recon) results to 440 & 453 Thurwell,

1225 No one was home at 453 Thurwell. OSC Silver has received a package about the plating facility investigation. Beno copies the documents for OSC Silver for STM Joe Parish

1245 Beno logs, labels, and prepare COCs for all sample. Did not hear from STM Schuler about shipping. Will wait till Monday.

1325 Beno leaves site for the week.
