Subject: Subsurface Coring - capped SMA
Attachments: IMG_20180806_142953346_HDR.jpg

Included is a photo of SC-S139 /RM: 7.2W coring attempt #2, yeilding negligible recovery. The target is within a capped region, and the crew has made 2 unsuccessful attempts to core a sample passed the cap, staying within a 125ft radius.

The Pre-RD group believes the sediment that was recovered in the initial attempts were obtained from the barrel coring parallel to the cap. Onere attempt will be made gain recovery.

Jonni
