Shelly,

In our discussion today with the City regarding the site operations, some information came to light regarding the startup dates of the facility and the fact that there is 2 feet of snow on the site right now. With this in mind, it would probably be better for us to talk next week, as dates could change. Could you let us know some dates and times next week that work for you? Thanks.

Shelly,

I'm unavailable in the morning Thursday, but Brent and Bill would be available for a call. If you're available at 2:00 on Thursday, all three of us are available. Whatever works best for you is fine. Thanks.

Hi Shelly,

We wanted to let you know of our upcoming field work. We are scheduled to begin the brush removal on Monday 2/24/14, and will be partnering with Environmental Restoration for this scope of work. As part of this work, the various work zones will be established and signage will be erected. In addition, the one drum situated on the ground surface will be removed, along with the underlying soil. We anticipate conducting a site meeting and a review of the HASP as the first steps of our site work. The scope of work is scheduled for 5 days. Please let us know if you have any questions. Thanks.
