Not much going on —

Notified as storage facility in 1981 —

Req. burden on them doing this — + reverted generators

- Basic solvents are the only things —

- Xylene in hogfuel boilers — they did do this — this is standard practice to burn things with heat value as supplement — it <u>may</u> put out toxic materials —

— but not considered a waste —

- Employee was a problem —

- Used to just put solvents on hogfuel pile (past years) — pile was adjacent to boiler — blew fumes into fire room —

- NPDES — possible that they had dumped some things illegally — somebody —

— all conjecture —
