Shelly,

Thanks for this data. I am also interested in obtaining TOC, VOC, SVOC data along with tentatively identified compound data frequently showing up on chromatograms.

Is this testing data available?

Best Regards,

Scott C. Smith (508-345-6520)

Hi Scott,

It was nice to meet you earlier and find out more about the sampling Water Defense is doing in Flint.

As you requested, I am sending you analytical results from our health complaint sampling investigation. I have removed personally identifiable information such as addresses. Some of the data are preliminary. As such, we ask that you do not share it outside of your organization.

If you have any questions about the data, please let me know. I look forward to hearing more about the work Water Defense is doing.
