RBT

180' thru silts, clay

penta, PAH don't migrate much

USEPA RCRA
3058158

10' sump to collect
filtering formation H_2O first couple years
unorthodox

pan lysimeter? like Texaco
~~TBD~~ deep

5' sump
only if could develop well
could add DI water to
develop well
artificially develop well
purge first
ask for detailed
workplan
how will they install
develop, what kind of
materials
