SUBJECT : Generated Hazardous Wastes

REFERENCE :

TO : V.T. Matteucci B2SC

The Seattle Plant's generation of significant hazardous wastes is outlined below:

Waste Name	Volume	Classification of Hazard
Vanillin Black Liquor Solids (VBLS)	2100 tons/yr	Corrosive (RCRA)
Vanillin Still Bottoms (VSB)	75 tons/yr	LC_{50} 1000ppm (Washington State)
Misc. Process Solid Waste	24 tons/yr	Unknown (Washington State)

The above wastes are disposed of at the Chem Security site in Arlington, Oregon.
