Email from Seagloss to staff on 14 OCT

The chemicals that were shipped from St. Croix to do the fumigation in I lower, C upper and lower and H upper were delayed and will not be here until this coming Friday. Terminix would like to start the fumigation on Monday and I don't see any reason on the calendar while this would be an issue. Are you able to move that block? We would need them blocked from the 20th to the 23rd.
