Thanks Jonathan. Jeryl. I appreciate your sense of urgency. Although management can change their minds, I'm certain I provided proper direction, based on the notes taken and reviewed by all present. Next steps will be yours and legal' s review of this chart on the substantive issues so that we may move on to the procedural matters. I'll expect a draft recommendation with options for Lilian to. consider at that point.

Perhaps I was – what I provided was in chart format but was intended to briefly catalog and outline what issues were raised, what, if anything, was done about each, and how each could potentially be addressed in the IR.

I thought that Lilian requested a draft of your findings and recommendation(s) for next steps for this investigation for resolution; an IR of such.

I shared during our meeting, that I had reviewed the subsequent submission and did not identify anything that was exceptional for the investigation's resolution or would result in a follow-up RFI for the complainants or recipient.

I was anticipating a report to review and provide comments as needed. Was I mistaken in the directions that were provided?

Laura – Please review per our conversation. Thanks!

Jeryl and Betsy -

Please look over this preliminary short synopsis of issues relating to the area around facility and add if needed – while I phrased each issue as being raised by complainants, please especially add anything you found that wasn't directly raised by the complainants, either on the call or via their data dump. Also, for the first 2 items, Jeryl, please fill in the years of the facility's last NOVs (even though they were extremely minor). Thanks!
