Subject: RE: NorthMet Co-lead/EPA Coordination - Batch 3 Deliverables

Is there more than just "issue 2"? Is Issue 2 related to the waste pile discharge or something else?

This "Batch 3" actually has the NPDES item on the agenda. I wasn't planning to go to the meetings (there are two meetings associated with Batch 3). Let me know if you think I should go. (I kept only the agenda attachment here so as not to overload your inbox)

Subject: NorthMet Co-lead/EPA Coordination - Batch 3 Deliverables

Batch 3 Deliverables

Hello all,

The purpose of this email is to provide Batch 3 Deliverables to EPA in preparation of tomorrow's Batch 3 Presentation meeting. There are several deliverables, and we have "zipped" them together in two files – wetland related items and water related items. ***Please note: After you download the deliverables files, you must rename them by adding ".zip" to the end of the file name so you are able to open them.***

Attachments being transmitted are:

- EPA Remaining Items table, updated 02/23/15 *(includes updated status for Batch 1 and 2 Issues; additional deliverables for several issues; deferment of one deliverable for Issue #9 to Batch 4)*

- Agenda for Batch 3 Presentation Meeting 02/23/15
- Deliverables for Batch 3 (*see agenda for a detailed list of deliverables, and if applicable, the portions of documents recommended for review regarding each issue*):

  Wetland related items:
  - EPA Issue #13 Items (wetland impacts due to new east side TB containment system)
  - EPA Issue #14 Items (indirect wetland impacts - monitoring and mitigation)
  - EPA Issue #15 Items (wetland impacts – mitigation credits)
  - EPA Issue #21 Items (criteria for wetland fragmentation) (*pending*)
  - EPA Issue #22 Items (20% metric) (*pending*)
  - EPA Issue #23 Items (on-site wetland reclamation not used for mitigation credits)
  - EPA Issue #24 Items (inconsistency between Table 6.2-8 and Table 6.2-11)

  Water Related Items:
  - EPA Issue #2 Items (NPDES permitting)
  - EPA Issue #11 Items (Colby Lake modeling)
  - EPA Issue #20 Items (pH extrapolation)

As identified above, deliverables associated with EPA Issues #21 and #22 are pending. We hope to deliver them by mid-week and still include them in the Batch 3 review.

This is a continuation of a series of meetings for coordination on EPA's remaining issues. Tomorrow's meeting will orient EPA to the information the Co-leads believe would address each of the issues included in Batch 3. The Resolution meeting for Batch 3 issues is scheduled for next Thursday, 03/05/15.

Please forward the attached information to EPA staff who will participate in the resolution of Batch 3 Issues. If you have difficulty opening the attachments, or have questions about the deliverables or the process, please call Randall Doneen (651-259-5156) or me (651-259-5110).

Thank you,

Lisa Fay, EIS Project Manager
