---

Jonathan,
You sent me this chart with the siting factors and said that most of them were addressed. But the comments on how they were addressed don't seem to address the factors at all. The comment for factor 5 seems to relate to factor 2, but the others aren't responsive. See my comments on the doc.

Do you have other evidence supporting that these siting factors were actually considered, and how they were addressed?

Thanks,

Betsy Biffl
