Subject: Buffalo Mtn.-King Coal Alternatives Development Mtg - NOTES

Attached are the DRAFT minutes from Friday's meeting to discuss the Draft SEIS and the RAM 145 Alternative. Please review and provide comments to me by COB on Wednesday (3/26/13). FHWA will consolidate the comments and distribute the final notes to the group for inclusion in the administrative record.

In particular review the action items located in the Next Steps portion of the notes and provide clarifications and responses ASAP. Additionally, we would like to schedule a follow-up meeting to address the remaining action items. Although, a face to face meeting would be preferred we can do this remotely via web or video conferencing if need be. Please provide your availability for the weeks of April 8 and 15.

Thank you
