Subject: RE: Amphenol Storm Sewer
Attachments: Draft Storm Sewer Gas Analytical Results Table.pdf

Carolyn,

Sorry for my confusion. The only media I saw referenced in your original email was regarding water, so that is why I prepared the previous table regarding outfall, surface water, and storm water sampling results.

The only storm sewer vapor sampling data we have available was collected on September 17, 2018 and is attached.

Please let me know if you need anything additional.

Thank you,
Chris

Thanks Chris.
Per my original email, would you please also prepare a table of storm sewer vapor sampling, including historic data?
Thanks.
Carolyn

Subject: RE: Amphenol Storm Sewer

Carolyn,

We don't have a lot of sampling data from the stormwater/surface water – what we do have is attached. I also included sampling data in the table which was collected by the City of Franklin at the Glendale Stormwater Outfall from 2018. IWM was also notified by the City that a previous sampling event at the Glendale Outfall was also non-detect for VOCs.

Flow in Hurricane Creek is from the Northeast to the Southwest.

Surface water sampling results in the up-gradient direction (near the elementary schools) was clean in February 1985 (H-1) and in 1992 (SW-01). There was a small hit of 1,1,1-TCA in the sample collected from the up-gradient storm sewer location (SD-1) in February 1985. It should be noted that this sampling location is not connected with the storm sewer system at the Amphenol facility.

Also attached are several maps depicting storm and sanitary sewer locations in the area, which include the former Amphenol facility. The sanitary and storm sewer systems associated with the Amphenol facility are not connected with the sewer systems at the nearby elementary schools.

Let me know if you need anything additional.

Sincerely,
Chris

Hi Carolyn

I am off today and out of the office. I will be back in tomorrow but Chris might be able to track down some of the information you are requesting today. I can be reached by cell phone if you need to speak today though.

Brad Gentry
