Sarah,

Thank you again for your note earlier this week and for the logs.

It is my understanding that on or about March 3, 2014, Tierra will submit a Statement of Work for the activities it proposes to undertake to more precisely locate the water mains buried in the vicinity of RM 10.9. The results of the work to locate those lines then will be used to evaluate what methods might be employed to excavate in the area of the water mains that the CPG did not dredge.

We remain available to meet in person or by telephone at a time of your choosing.

Given that we have not yet conferred as you had anticipated in your December 23, 2013 letter and as the deadline extending the time for demonstration of financial assurance is today, would you please confirm a further extension?

Thank you and I hope you have a good weekend.
Carol

Carol,

Thank you for the update. We had suggested arranging a call the first week of February, 2014, but other obligations prevented EPA from doing so. At this point, unless you have specific questions, we would like to have the statement of work to review before scheduling a call. Can you please submit that to EPA by March 3, 2014?

Note that I am attaching the boring logs for the samples collected by Lockheed Martin in the utility area in November 2013.

Regards,

-Sarah
