No problem- it was just a question stuck in my head.

Don't know. I need to see the draft WP to know which wells are proposed.

Hi Jim –

Last fall H&A did a site survey of all available wells and their condition and performed a one time large sampling event of these wells.

The GMP sampling is a small subset of the site's available monitoring wells.

Not sure what "whole site" sampling means, but there will likely be wells included that are not part

of the GW Management Permit sampling conducted in spring and fall.

HI Jim – just going through our discussion yesterday and want to ask a clarifying question.

Did I hear correctly that you indicated that there were perhaps additional wells on site that are being considered for sampling in this action that were not included in the "whole site" sampling event conducted by H&A?
