Subject: Basin Plan compounds database export
Date: Friday, September 12, 2014 8:55:47 AM
Attachments: PVOU_20140911.xlsx

Scott,

This is all we have in our database. The attached file is the result of a query for our PVOU database to export a spreadsheet with all groundwater analytical results for

- Boron
- Chloride
- Fluoride
- Nitrate
- Sulfate
- TDS (total dissolved solids)

It has the concentration, units, MDL, date of sample, well ID, well xy, well elevation, screen interval depth.

I suggest that you review this, put data on a map, and let us know if this dataset covers the area just north of PVOU.

I will also ask for EN's data.
