Date: 10/10/2012 12:53 PM

Hi Yen Vy:

Thank you for the report! It looks great, and I have only a few comments:

1) A bulleted time line of events and milestones, both past and future (i.e., next steps), would be very helpful for a quick glace of where we have been and where we are going. This could also be keyed into some of the language in the Order to avoid confusion (i.e., the July 2012 event is the 2nd quarter event). This could be it's own section or in either the Introduction or Conclusions sections.

2) Are the terms Interim Remedial Action (IRA) and Interim Site Remediation used interchangeably ?

3) Section 4.0, page 11, last paragraph, first sentence. Please note that this is the July 2012 monitoring event that you are referring to.

4) Section 4.0, page 12, 3rd paragraph. In future monitoring reports, it would be nice to discuss trends in electron acceptors and metabolic by products in addition to contaminants of concern, or provide a very brief discussion of what trends would be expected in the groundwater geochemistry if biodegradation was proceeding.

5) Table 3. In future monitoring reports, it would be nice to graph the concentration trend of some key COCs (benzene, gas, xylenes, naphthalene) through time to provide a snapshot look.

Hi Rob

Please find attached for your review the DRAFT 2nd Phase IRA – Bioremediation Report completed for the former Smitty Conoco #140 (Spirit Gas Station) facility located at 102 East Toppenish Ave. in Toppenish, WA. A hard copy of this report will also be mailed to you. We'll email and send a copy of the Final Report to the Yakama Nation and the City of Toppenish after incorporating your edits and comments for this report.

Please do not hesitate to contact me at 360-352-9835 should you have questions. Thank you.

Regards,
Yen-Vy
