I incorporated my comments into Jon's version. I've only worked through cases topics 1 and 2. I think there is much that can be done to streamline the presentation of the info needed for the discussions. I also wonder if the number of example cases needs to be cut back for some of these. I can continue to work on 3 and 4, but should we have a discussion of the direction of the suggested changes first?

Glinda

PS I read through this as most participants will - while waiting in an airport because of a canceled flight.....
