Texas Commission on Environmental Quality

INTEROFFICE MEMORANDUM

To: Municipal Permits Team **Date:** February 8, 2013

From: Santiago Velez-Garcia, Pretreatment Coordinator

Subject: Pretreatment program options for the TPDES permit number **WQ0010544-001**, City of West summary sheet

This memo is saved under I:\wq\muni\pret\memos\10544-001memo.docx. Based on the review of the above referenced permit, it has been determined that the POTW receives the standard pretreatment language:

Option 1- This general pretreatment boilerplate language should be put in TPDES permits for all POTWs that do not have either an approved pretreatment program or requirement to develop a new pretreatment program.

Within this standard language, I have not incorporated additional pretreatment language requirements.

Please incorporate the following language for permittee's FACT SHEET under:

1. INDUSTRIAL WASTE CONTRIBUTION

The facility does not appear to receive significant industrial wastewater contributions.

2. PRETREATMENT REQUIREMENTS

Permit requirements for pretreatment are based on TPDES regulations contained in 30 TAC Chapter 315 which references 40 CFR Part 403, AGeneral Pretreatment Regulations for Existing and New Sources of Pollution@ *[rev. Federal Register/ Vol. 70/ No. 198/ Friday, October 14, 2005/ Rules and Regulations, pages 60134-60798].* The permit includes specific requirements that establish responsibilities of local government, industry, and the public to implement the standards to control pollutants which pass through or interfere with treatment processes in publicly owned treatment works or which may contaminate the sewage sludge. This permit has appropriate pretreatment language for a facility of this size and complexity.

3. SUMMARY OF CHANGES FROM EXISTING PERMIT

The pretreatment language has not been updated. The pretreatment requirements will continue until permit expiration.
